Accounting Policies

1. Presentation of Consolidated Annual Financial Statements

The consolidated annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

These consolidated annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied, are disclosed below.

These accounting policies are consistent with the previous period.

1.1 Significant judgements and sources of estimation uncertainty

In preparing the consolidated annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the consolidated annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the consolidated annual financial statements. Significant judgements include:

Trade receivables / Held to maturity investments and/or loans and receivables

The economic entity assesses its trade receivables, held to maturity investments and loans and receivables for impairment at each statement of financial position date. In determining whether an impairment loss should be recorded in the statement of financial performance, the entity makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables, held to maturity investments and loans and receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the statement of financial position date. The quoted market price used for financial assets held by the economic entity is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. The economic entity uses a variety of methods and makes assumptions that are based on market conditions existing at each statement of financial position date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward foreign exchange contracts is determined using quoted forward exchange rates at the statement of financial position date.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the economic entity for similar financial instruments.

The carrying amount of available-for-sale financial assets would be an estimated - lower or - higher were the discounted rate used in the discount cash flow analysis to differ by 10% from management's estimates.

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values. These calculations require the use of estimates and assumptions.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.1 Consolidation (continued)

The economic entity reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. In addition, goodwill is tested on an annual basis for impairment. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including, together with economic factors.

Useful lives of waste and water network and other assets

The municipality's management determines the estimated useful lives and related depreciation charges for the waste water and water networks. This estimate is based on industry norm. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

Effective interest rate

The economic entity used the prime interest rate to discount future cash flows.

Allowance for doubtful debts

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

1.2 Consolidation

Basis of consolidation

The consolidated annual financial statement the the year ended 30 June 2012 incorporate the annual financial statements of the municipality and the municipal group.

The consolidated annual financial statements of the municipality and its municipal group are used in the preparation of the consolidated annual financial statements and are prepared as the same reporting date.

The results of municipal entity, are included in the consolidated consolidated annual financial statements from the effective date of acquisition. Where necessary adjustments are made to the consolidated annual financial statements of the municipal group to bring their accounting policies used in line with those of the municipality.

All intra-entity transactions, balances, revenues and expenses are eliminated in full on consolidation.

Minority interests in the net assets of the economic entity are identified and recognised separately from the controlling entity's interest therein, and are recognised within net assets. Losses applicable to the minority in a consolidated controlled entity may exceed the minority interest in the controlled entity's net assets. The excess, and any further losses applicable to the minority, are allocated against the majority interest except to the extent that the minority has a binding obligation to, and is able to, make an additional investment to cover the losses. If the controlled entity subsequently reports surpluses, such surpluses are allocated to the majority interest until the minority's share of losses previously absorbed by the majority has been recovered.

Minority interests in the surplus or deficit of the economic entity is separately disclosed.

1.3 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.3 Inventories (continued)

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the economic entity incurs to acquire the asset on the reporting date.

The cost of economic entity comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the economic entity to their present location and condition.

The cost of economic entity of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of economic entity is assigned using the formula. The same cost formula is used for all economic entity having a similar nature and use to the economic entity.

When economic entity are sold, the carrying amounts of those economic entity are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of economic entity to net realisable value or current replacement cost and all losses of economic entity are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of economic entity, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of economic entity recognised as an expense in the period in which the reversal occurs.

The inventory of the economic entity encompass land held for resale. The land held for resale is measured at the lower of cost and current replacement cost where they held for distribution at no charge.

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.4 Property, plant and equipment (continued)

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Average useful life
Land	Infinite
Furniture and fixtures	7 - 10 years
Infrastructure	
• Roads and paving	5 - 100 years
• Pedestrian malls	30 years
• Electricity	10 - 100 years
• Water	10 - 100 years
• Sewerage	10 - 100 years
• Storm Water	20 years
• Housing	3 - 30 years
Community	
• Buildings	10 - 50 years
• Recreational facilities	10 - 100 years
• Security	5 years
• Watercraft	15 years
Other property, plant and equipment	2 - 5 years
Office equipment	3 - 7 years
Other	
• Vehicles	5 years
• Bins and containers	5 years
• Landfill sites	15 years
• Specialised vehicles	10 years
• Specialised property, plant and equipment	10 - 15 years

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.5 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the economic entity, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Item	Average useful life
Property - land	Indefinite
Property - buildings	5 - 50 years

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

No depreciation is calculated on these properties.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises

1.6 Heritage assets

Assets are resources controlled by an economic entity as a result of past events and from which future economic benefits or service potential are expected to flow to the economic entity.

Carrying amount is the amount at which an asset is recognised after deducting accumulated impairment losses.

Class of heritage assets means a grouping of heritage assets of a similar nature or function in an economic entity's operations that is shown as a single item for the purpose of disclosure in the consolidated annual financial statements.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

Depreciation is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

An impairment loss of a cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable amount.

An impairment loss of a non-cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable service amount.

An inalienable item is an asset that an economic entity is required by law or otherwise to retain indefinitely and cannot be disposed of without consent.

Recoverable amount is the higher of a cash-generating asset's net selling price and its value in use.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.6 Heritage assets (continued)

Value in use of a cash-generating asset is the present value of the future cash flows expected to be derived from an asset or cash-generating unit.

Value in use of a non-cash-generating asset is the present value of the asset's remaining service potential.

Transitional provision

According to the transitional provision, the economic entity is not required to measure heritage assets for reporting periods beginning on or after a date within three years following the date of initial adoption of the Standard of GRAP on Heritage assets. Heritage assets have accordingly been recognised at provisional amounts, as disclosed in . The transitional provision expires on 2015/06/30.

In accordance with the transitional provision as per Directive 2 of the GRAP Reporting Framework, where heritage assets was acquired through a transfer of functions, the economic entity is not required to measure that heritage assets for a period of three years from the effective date of the transfer of functions or the effective date of the Standard, whichever is later. The economic entity acquired a transfer(s) of function in Controlling entity - 2013 and heritage assets have accordingly been recognised at provisional amounts, as disclosed in .

Until such time as the measurement period expires and heritage assets is recognised and measured in accordance with the requirements of the Standard of GRAP on Heritage assets, the economic entity need not comply with the Standards of GRAP on (to the extent that these Standards prescribe requirements for heritage assets):

- Presentation of Financial Statements (GRAP 1),
- The Effects of Changes in Foreign Exchange Transactions (GRAP 4),
- Leases (GRAP 13),
- Segment Reporting (GRAP 18),
- Non-current Assets Held for Sale and Discontinued Operations (GRAP 100)

The exemption from applying the measurement requirements of the Standard of GRAP on Heritage assets implies that any associated presentation and disclosure requirements need not be complied with for heritage assets not measured in accordance with the requirements of the Standard of GRAP on Heritage assets.

1.7 Intangible assets

An asset is identified as an intangible asset when it:

- is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, assets or liability; or
- arises from contractual rights or other legal rights, regardless whether those rights are transferable or separate from the economic entity or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the economic entity; and
- the cost or fair value of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

An intangible asset acquired through a non-exchange transaction, the cost shall be its fair value as at the date of acquisition.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.7 Intangible assets (continued)

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software, internally generated	3 - 5 years
Computer software, other	3 - 5 years

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. It is recognised in surplus or deficit when the asset is derecognised.

1.8 Non-current assets held for sale (and) (disposal groups)

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets held for sale (or disposal group) are measured at the lower of its carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

1.9 Impairment of cash-generating assets

Cash-generating assets are those assets held by the economic entity with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The economic entity assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the economic entity estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the economic entity also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.9 Impairment of cash-generating assets (continued)

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the economic entity estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the economic entity applies the appropriate discount rate to those future cash flows.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.9 Impairment of cash-generating assets (continued)

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the economic entity determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the economic entity use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.9 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The economic entity assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.10 Impairment of non-cash-generating assets

Cash-generating assets are those assets held by the economic entity with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Non-cash-generating assets are assets other than cash-generating assets.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The economic entity assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the economic entity estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also test a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.10 Impairment of non-cash-generating assets (continued)

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the economic entity would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Restoration cost approach

Restoration cost is the cost of restoring the service potential of an asset to its pre-impaired level. The present value of the remaining service potential of the asset is determined by subtracting the estimated restoration cost of the asset from the current cost of replacing the remaining service potential of the asset before impairment. The latter cost is determined as the depreciated reproduction or replacement cost of the asset, whichever is lower.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The economic entity assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the economic entity estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.10 Impairment of non-cash-generating assets (continued)

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.11 Investments

Where the carrying amount of an investment is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the Statement of Financial Performance.

1.12 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Finance leases – lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the municipality's incremental borrowing rate.

The lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability

Any contingent rents are expensed in the period in which they are incurred

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset. The classification of the lease is determined using GRAP 13 – Leases.

Operating leases – lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset. This liability is not discounted

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis over the lease term.

Any contingent rents are expensed in the period they are incurred.

1.13 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
 - receive cash or another financial asset from another entity; or
 - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.13 Financial instruments (continued)

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Cash and cash equivalents	Financial asset measured at amortised cost

The entity has the following types of residual interests (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.13 Financial instruments (continued)

Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at amortised cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the entity establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, an entity calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

Gains and losses

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and uncollectibility of financial assets

The entity assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

For amounts due to the entity, significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy and default of payments are all considered indicators of impairment..

Financial assets measured at amortised cost.

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly OR through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Where financial assets are impaired through use of an doubtful debt provision account, the amount of the loss is recognised in surplus or deficit within operating expenses. When such assets are written off, the write off is made against the relevant doubtful debt provision account. Subsequent recoveries of amounts previously written off are credited against operating expense.s

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.13 Financial instruments (continued)

Derecognition

Financial assets

The entity derecognises financial assets using trade date accounting.

The entity derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the entity, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Financial liabilities

The entity removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.14 Employee benefits

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognise the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Post-employment benefits: Defined contribution plans

When an employee has rendered service to the entity during a reporting period, the entity recognise the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.14 Employee benefits (continued)

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the entity recognise actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Assets held by a long-term employee benefit fund are assets (other than non-transferable financial instruments issued by the reporting entity) that are held by an entity (a fund) that is legally separate from the reporting entity and exists solely to pay or fund employee benefits and are available to be used only to pay or fund employee benefits, are not available to the reporting entity's own creditors (even in liquidation), and cannot be returned to the reporting entity, unless either:

- the remaining assets of the fund are sufficient to meet all the related employee benefit obligations of the plan or the reporting entity; or
- the assets are returned to the reporting entity to reimburse it for employee benefits already paid.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognise past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The entity account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The entity measure the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The entity determine the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the consolidated annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.14 Employee benefits (continued)

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The entity uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, an entity shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, an entity shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The entity recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the entity re-measures the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

The entity offsets an asset relating to one plan against a liability relating to another plan when the entity has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.14 Employee benefits (continued)

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Pension Obligations

The municipality and its employees contribute to 7 different Pension Funds, of which 2 (The Natal Joint Provident and Retirement Pension Fund) cater for the majority of the staff.

Natal Joint Retirement Funds, Government Employee Pension Fund and Associated Institution Pension Fund are defined benefit funds.

The Natal Joint Provident Fund, Pietermaritzburg and South African Local Authority are defined contribution funds.

The schemes are funded through payments to financial consultant companies or trustee-administered funds, determined by periodic actuarial calculations.

The Municipality has both defined benefit and defined contribution plans.

A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. A defined contribution plan is a pension plan under which the Municipality pays fixed contributions into a separate entity. The Municipality has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

For defined contribution plans, the Municipality pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Municipality has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

1.15 Provisions and contingencies

Provisions are recognised when:

- the economic entity has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.15 Provisions and contingencies (continued)

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the economic entity settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of a activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the economic entity

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 45.

1.16 Housing development fund

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes, both complete and in progress as at 1 April 1998, were also transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

1.17 Use of Estimates

The preparation of consolidated annual financial statements in conformity with Generally Recognised Accounting Practice requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the economic entity's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated annual financial statements are disclosed in the relevant sections of the consolidated annual financial statements. Although these estimates are based on management's best knowledge of current events and actions they may undertake in the future, actual results ultimately may differ from those estimates.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.18 Correction of prior period errors

When accounting errors have been identified in the current year, the correction is applied retrospectively as far as it is practicable and the prior year comparatives are restated accordingly. When there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as it is practicable and the prior year comparative is restated accordingly.

1.19 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GAMAP, GRAP or GAAP.

1.20 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

1.21 Budget information

Economic Entity are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by economic entity shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives.

The budget for the economic entity includes all the entities approved budgets under its control.

The consolidated annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

1.22 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.23 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.23 Revenue from exchange transactions (continued)

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the economic entity has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the economic entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the economic entity; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the economic entity;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by .

Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

1.24 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by an municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, an municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.24 Revenue from non-exchange transactions (continued)

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in-kind

Services in-kind are not recognised.

1.25 Conditional Grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

1.26 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote;
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.27 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.28 Irregular expenditure

Irregular expenditure as defined in section 1 of the PFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including -

- (a) this Act; or
- (b) the State Tender Board Act, 1968 (Act No. 86 of 1968), or any regulations made in terms of the Act; or
- (c) any provincial legislation providing for procurement procedures in that provincial government.

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.29 Borrowing costs

It is inappropriate to capitalise borrowing costs when, and only when, there is clear evidence that it is difficult to link the borrowing requirements of an entity directly to the nature of the expenditure to be funded i.e. capital or current.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.30 Translation of foreign currencies

Foreign currency transactions

A foreign currency transaction is recorded, on initial recognition in Rands, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At each statement of financial position date:

- foreign currency monetary items are translated using the closing rate;
- non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and
- non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous consolidated annual financial statement the the year ended 30 June 2012 are recognised in surplus or deficit in the period in which they arise.

When a gain or loss on a non-monetary item is recognised directly in equity, any exchange component of that gain or loss is recognised directly in equity. When a gain or loss on a non-monetary item is recognised in surplus or deficit, any exchange component of that gain or loss is recognised in surplus or deficit.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Accounting Policies

1.30 Translation of foreign currencies (continued)

Cash flows arising from transactions in a foreign currency are recorded in Rands by applying to the foreign currency amount the exchange rate between the Rand and the foreign currency at the date of the cash flow.

1.31 Related parties

The NCT tree farming (Pty) Ltd manages timber plantations established on Council owned land on behalf of the Council by a management agreement. NCT is entitled to a 5% management fee based on net profit.

1.32 Grant in aid

The economic entity transfers money to individuals, institutions and organisations. When making these transfers, Theeconomic entity does not:

Receive any goods or services directly in return, as would be expected in a purchase or sale transaction

Expect to be repaid in future; or

Expect a financial return, as would be expected from an investment

These transfers are recognised in the financial statements as expenses in the period that the events giving rise to the transfer occurred.

1.33 Issued capital

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

The Msunduzi Municipality and its Municipal Entity

2. New standards and interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the economic entity has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

Standard/ Interpretation:

- GRAP 5 : Browing costs
- GRAP 23 : Revenue from Non Exchange Transactions
- GRAP 24: Presentation of Budget Information in the Financial Statements
- GRAP 103: Heritage Assets
- IGRAP 1: Interpretation of GRAP: Applying the Probability Test on Initial Recognition of Exchange Revenue
- GRAP 21: Impairment of non-cash-generating assets
- GRAP 26: Impairment of cash-generating assets
- GRAP 25: Employee benefits
- GRAP 104: Financial Instruments
- IGRAP 2: Changes in Existing Decommissioning, Restoration and Similar Liabilities
- IGRAP 3: Determining Whether an Arrangement Contains a Lease
- IGRAP 4: Rights to Interests Arising from Decommissioning, Restoration and Environmental Rehabilitation Funds
- IGRAP 5: Applying the Restatement Approach under the Standard of GRAP on Financial Reporting in Hyperinflationary Economies
- IGRAP 6: Loyalty Programmes
- IGRAP 7: The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction
- IGRAP 8: Agreements for the Construction of Assets from Exchange Transactions
- IGRAP 9: Distributions of Non-cash Assets to Owners
- IGRAP 10: Assets Received from Customers
- IGRAP 13: Operating Leases – Incentives
- IGRAP 14: Evaluating the Substance of Transactions Involving the Legal Form of a Lease
- IGRAP 15: Revenue – Barter Transactions Involving Advertising Services
- GRAP 2 (as revised 2010): Cash Flow Statements
- GRAP 4 (as revised 2010): The Effects of Changes in Foreign Exchange Rates
- GRAP 10 (as revised 2010): Financial Reporting in Hyperinflationary Economies
- GRAP 11 (as revised 2010): Construction Contracts
- GRAP 19 (as revised 2010): Provisions, Contingent Liabilities and Contingent Assets
- GRAP 100 (as revised 2010): Non-current Assets Held for Sale and Discontinued Operations
- GRAP 20: Related parties
- GRAP 6 (as revised 2010): Consolidated and Separate Financial Statements
- GRAP 8 (as revised 2010): Interests in Joint Ventures
- GRAP 1 (as revised 2012): Presentation of Financial Statements
- GRAP 3 (as revised 2012): Accounting Policies, Change in Accounting Estimates and Errors
- GRAP 7 (as revised 2012): Investments in Associates

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Notes to the Consolidated Annual Financial Statements

2. New standards and interpretations (continued)

- GRAP 9 (as revised 2012): Revenue from Exchange Transactions
- GRAP 12 (as revised 2012): Inventories
- GRAP 13 (as revised 2012): Leases
- GRAP 16 (as revised 2012): Investment Property
- GRAP 17 (as revised 2012): Property, Plant and Equipment
- GRAP 27 (as revised 2012): Agriculture (Replaces GRAP 101)
- GRAP 31 (as revised 2012): Intangible Assets (Replaces GRAP 102)

2.2 Standards and interpretations issued, but not yet effective

The economic entity has not applied the following standards and interpretations, which have been published and are mandatory for the economic entity's accounting periods beginning on or after 01 July 2013 or later periods:

Standard/ Interpretation:

- GRAP 18: Segment Reporting
- GRAP 105: Transfers of functions between entities under common control
- GRAP 106: Transfers of functions between entities not under common control
- GRAP 107: Mergers

Consumer debtors pledged as security

Consumer debtors were not pledged as security for overdraft facilities.

Credit quality of consumer debtors

The credit quality of consumer debtors that are neither past nor due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counter party default rates. Although credit quality can be assessed the entity did not apply any methods to evaluate the credit quality.

Trade and other receivables from exchange transactions impaired

The amount of the provision was R 801 836 140 as of 30 June 2013 (2012: R 584 042 761).

6. Cash and cash equivalents

Cash and cash equivalents consist of:

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Notes to the Consolidated Annual Financial Statements

	Economic entity		Controlling entity	
Figures in Rand	2013	2012	2013	2012
6. Cash and cash equivalents (continued)				
Cash on hand	1,150,694	1,222,181	45,485	44,985
Bank balances	43,772,294	65,722,023	43,772,294	65,722,023

	719,173,501	622,792,510	718,068,292	621,615,314

Average rate of return	5.09	5.09	5.09	5.09
------------------------	------	------	------	------

Cash and cash equivalents are classified as financial instruments under the loans and receivable category.

Due to the short term nature of these investments no amortisation was performed.

Fair value is taken at face value.

No cash and cash equivalents were pledged as security for any financial liabilities.

No restrictions exist with regard to the use of cash.

No portion is past due or impaired.

These amounts best represent the maximum exposure to credit risk at the end of the reporting period, without taking account of any collateral held or other credit enhancements.

Credit quality of cash at bank and short term deposits, excluding cash on hand

The credit quality of cash at bank and short term deposits, excluding cash on hand that are neither past due nor impaired can be assessed by reference to external credit ratings. Although credit quality can be assessed the Municipality did not apply any methods to evaluate the credit quality.

Pledged as security

No property , plant and equipment was placed as security for financial liabilities.

Refer to Appendix B for the detailed property,plant and equipment schedule.

All assets that were fully depreciated in the asset register had their useful lives reviewed in the 2012/2013 financial year This was processed retrospectively and in terms of GRAP 3 treated as a change in accounting estimate.

During the financial year the useful life of property plant and equipment with zero values and assets that have been impaired have been reviewed , this is disclosed in the reconciliation above as depreciation adjustments and impairment.

Adjustments on cost in the reconciliation above are attributable to -

- * reclassification of assets as per the different categories of property, plant and equipment.
- * change in market value of investment property .
- * reclassification of investment to property to property , plant and equipment
- * reclassification change of property to property , plant and equipment.

9. Investment property (continued)

Pledged as security

Carrying value of assets pledged as security:

No investment property has been pledged as security for any financial liabilities.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Details of valuation

Investment property has been accounted for in terms of GRAP 16 and comprises of both land and buildings owned by the Msunduzi Municipality. Investment property will not be depreciated but will be annually valued on balance sheet date to determine their fair value as prescribed in GRAP 16.

Mills Fitchet has been awarded the tender for the valuation and identification of all investment property of the Msunduzi Municipality. The deliverables of the project included:

- A comprehensive deed search
- Providing separate land and building values
- Identifying Investment property
- Providing a data fact sheet for each property identified with information on the street address, SG 21 digit key (Erf, stand, portion), property description, GIS information and a photograph of the property.

The method applied in updating the investment property data in the asset register was:

- Vacant land was reviewed to determine future use and if no future use could be determined then it was classified as investment property.
- Properties with valid rental and lease agreements were deemed to be investment properties.
- All buildings have been identified and classified as investment property

Restrictions on the realisability of investment property or the remittance of revenue and proceeds of disposal are as follows:

Contractual obligations to purchase, construct or develop investment property or for repairs, maintenance or enhancements is as follows:

In the exceptional cases when the municipality have to measure investment property using the cost model in the Standard of GRAP on Property, Plant and Equipment when the municipality subsequently uses the fair value measurement, disclose the following:

- a description of the investment property,
- an explanation of why fair value cannot be determined reliably,
- if possible, the range of estimates within which fair value is highly likely to lie, and
- on disposal of investment property not carried at fair value:
 - the fact that the entity has disposed of investment property not carried at fair value,
 - the carrying amount of that investment property at the time of sale, and
 - the amount of gain or loss recognised.

Restrictions on the realisability of investment property or the remittance of revenue and proceeds of disposal are as follows:

Contractual obligations to purchase, construct or develop investment property or for repairs, maintenance or enhancements is as follows:

In the exceptional cases when the economic entity have to measure investment property using the cost model in the Standard of GRAP on Property, Plant and Equipment when the economic entity subsequently uses the fair value measurement, disclose the following:

- a description of the investment property,
- an explanation of why fair value cannot be determined reliably,
- if possible, the range of estimates within which fair value is highly likely to lie, and

10. Heritage assets (continued)

Transitional provisions

The Msunduzi Municipality has taken advantage of the transitional provision as issued by the Accounting Standards Board as per directive 7. As at 30 June 13 heritage assets have been initially measured at provisional amounts. Full compliance with GRAP 103 will be in June 2015. Only then will the municipality comply with GRAP 3 in terms of the retrospective application of the restating the cost of heritage assets as far as June 2011.

List of heritage assets where the values can not be determined :

1. Legal Deposit collection at the Bessie Head Library

In 1916, the Natal Society Library (now the Msunduzi Municipal Library – Bessie Head Library) was identified as one of 5 libraries in South Africa accorded Legal Deposit status. This privilege helped make it into one of South Africa's major research and information libraries. Legal Deposit Libraries play a unique and very important role as custodians, in perpetuity, of this country's cultural wealth and information. They also have to make this information available, as widely as possible, to the citizens of South Africa. The Legal Deposit Collection has become an important asset.

Since 1916, the Msunduzi Municipal Library has amassed a huge collection of South African books, pamphlets, periodicals, maps and newspapers which it has to preserve for future generations.

2. Mahatma Gandhi Statue

The Statue was donated to the municipality in 1993 by the PMB Gandhi Memorial society in commemoration of the anniversary of Gandhi's eviction from a train at the Pietermaritzburg train station.

3. Highfield Road – (Site no. 166)

The land has been identified as a conservation site due to the endangered species of the Hilton Daisy, *Gerbera aurantiaca*. The Hilton daisy is a strikingly beautiful grassland plant that occurs around Pietermaritzburg in KwaZulu-Natal. The species is under considerable threat of extinction due to habitat fragmentation and degradation resulting from agriculture and urban sprawl.

4. City Hall Surrounding Garden and Memorial Plaque

This area has been identified as a heritage asset.

5. Tatham Art Gallery Gardens

This area has been identified as a heritage asset.

6. Alexandra Park

This area has been identified as a heritage asset.

7. Mayoral Chain

Stored in a secure safe at city hall

19. Provisions (continued)

The landfill site provision represents management's best estimate of the municipality's rehabilitation liability based on an valuation provided by an external consultant on the remaining useful life of the landfill site.

Envitech Solutions was appointed to provide the provision for the programme for closure of the New England Road landfill site.

Alien vegetation provision.

According to the National Environmental Management Act, 1998 (Act No. 107 of 1998) the municipality was encouraged to recognise a provision in this regard.

The Department of Agriculture has since 2006 provided considerable support to the Msunduzi Municipality in terms of clearing listed alien invasive plants.

The Msunduzi Municipality's involvement and responsibility is effectively operational support to the Department of Agriculture terms of clearing listed alien invasive plants.

20. Retirement benefit obligations

Defined contribution and benefit plan

The Council provides retirement benefits to its employees by contributing to a either a pension or provident fund.

Membership to either a pension or provident fund is compulsory for all permanent employees.

The majority of the members and the Council contributes to the Natal Joint Municipal Pension (NJMP) and Provident funds, employees contributing to South African Local Authorities Pension Fund (SALA), Associated Institution Pension Fund (AIPF), Pietermaritzburg Provident Fund and Government Employees Pension Fund (GEPPF). Employees contributing to SALA, AIPF, Pietermaritzburg Provident Fund and GEPPF make up the minority of members contribution to the pension funds.

The Msunduzi Municipality's liability in these funds can not be determined owing mainly to the assets not being allocated to each employer and one set of financial's being compiled for each fund and not for each contributing employer.

The majority of personnel are members of the following pension funds:

1. Kwa-Zulu-Natal Joint Municipal Provident Fund.

An interim actuarial valuation was performed on 31 March 2012 by Arthur Els and Associates Consulting Actuaries .

Results of the valuation.

The Fund self-insures its risk benefits in excess of the full benefit. It therefore maintains a Risk Reserve Account as a measure of protection against volatility in claims experience. The amount of R 16 287 188 required to be held in the Risk Reserve Account.

The Fund is financially sound as at the valuation date.

Benefits of the fund:

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Notes to the Consolidated Annual Financial Statements

Figures in Rand	Economic entity		Controlling entity	
	2013	2012	2013	2012

20. Retirement benefit obligations (continued)

- * Pension age - 65 years
- * Earliest retirement age - 58 years (55 years if more than 10 years continuous service)
- * Full benefit - Initial transfer plus member's contributions plus employer's contributions for full benefits plus investment earnings and bonuses.
- * Member's portion of full benefits - Initial transfer plus members contributions plus local authorities contributions for full benefits plus interim, special and final bonuses
- * Benefit on retirement after earliest retirement age or pension age - Full benefit.
- * Benefit on retirement because of ill health - Full benefit
- * Benefit on death in service - Full benefit plus 0.7% of annual pensionable salary for each month of potential service to a maximum of 2.1 years salary.

Contributions of the fund :

* Members contributions

Members may choose to contribute at a rate of 5%, 7% or 9.25% of their pensionable emoluments in terms of regulation 14(a)

* Local Authorities Contributions

Participating employers contribute at a rate of 1.95 times of the rate of members contribution in terms of regulation 17(1)(b)

Benchmark:

The benchmark asset allocation determined as being appropriate for the fund, which takes cognisance of membership and liability profile, is stated below :

Domestic Investments:	945, 890,000
International Investments	221,730,000
Risk Reserve Account	16,287,000
Membership	9,942

Natal Joint Municipal Pension Fund: (Superannuation) interim actuarial valuation

An interim actuarial valuation was performed on 31 March 2012 by Arthur Els and Associates Consulting Actuaries .

The market value of the Fund's assets was R 6,240,600,000 as at 31 March 2012.

The Discounted Cash Flow (DCF) method of valuation has been applied for the purposes of determining the Fund's financial condition.

The funding level in respect of contributory members has increased to 96.0%% from 90.9%.

On the DCF funding level has decreased and the overall shortfall has increased. The valuation disclosed a surplus of R405.0 million in respect of pensioners and a shortfall of R270.0 million in respect of members.

The regulations of the fund have been amended with effect from 1 July 2004, so that the Committee of Management is able to levy a separate surcharge on local authorities which grant excessive salary increases, thereby causing a financial strain on the Fund to the detriment of other stakeholders.

The employers are no longer permitting members to join the Fund, so that it is effectively closed to new members. This means that the average age will increase over time which, in turn, means that the required rate of contribution will also increase.

Thus, once the surcharge ceases, the underlying rate of contribution will not be sufficient to meet the cost of the benefits. It is necessary to set aside a reserve to hold assets equal to the expected shortfall. For this reason a "Contribution Reserve" is held equal to the present value of the shortfall in terms of the Financial Services Board's Circular PF117 for the 5 years to 2015 when it is expected that the surcharge will cease.

20. Retirement benefit obligations (continued)

Benefits of the fund:

- * Members Contributions -9.25% of pensionable salaries.
- * Pension age 65 years
- * Final average salary - average annual pensionable salaries during the last year of service.
- * Pension on retirement at pension age - 2.2% of final average emoluments per year of continuous service.
- * Lump sum on retirement at pension age - 8.25% of final average emoluments per year of service.
- * Pension on retirement because of ill-health (minimum ten years continuous service) - pension as for retirement at pension age.
- * Lump sum on retirement because of ill-health (minimum 10 years continuous service) - lump sum as for retirement at pension age.
- * Lump sum on retirement because of ill health (less than ten years continuous service) - the greater of the resignation benefit or twice the members contributions.
- * Surviving Spouses pension on death in service - 1,2% of final average emoluments per year of continuous service that the member would have had at the pension age.
- * Surviving Spouses pension on death of pensioner - 1,22% (0,77% in the case of a pensioner who retired before 1 July 1999) of final average emoluments per year of continuous service.
- * Lump sum on death in service - Annual pensionable emoluments.10.75% of final average salaries
- * Withdrawal - members contribution plus 5/12% for each month of continuous service (the addition is approximately equal to compound interest at 10% a year) and increased by 5% for each complete year of service up to a maximum of 20 years.

Municipal properties	505,937,000	490,180,000	505,937,000	490,180,000
	49,066,191,119	48,362,829,120	49,066,231,119	48,362,829,120

General valuations on properties are performed every 4 years in terms of the Municipal Property Rates Act. The last general valuation came into effect on 1 July 2009. Supplementary valuations are take place on an annual basis to take into account building additions, changes, sub divisions and consolidations.

A general rate of 2.02 cents in a rand for 2013 - (2012: 1.89 cents in a rand) is applied to property valuations to determine assessment rates.

The adjustments during the year are compiled of all interim assessments, corrections and amendments to the accounts. This includes any transfer of payments, penalty reversals and value changes. A list of adjustments is available on a monthly basis and form part of the scope by the Auditor General .

24. Service charges

Sale of electricity	1,425,626,841	1,212,660,157	1,425,626,841	1,212,660,157
Sale of water	349,139,733	288,345,314	349,139,733	288,345,314
Solid waste	73,999,200	70,091,118	73,999,200	70,091,118

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Notes to the Consolidated Annual Financial Statements

	Economic entity		Controlling entity	
Figures in Rand	2013	2012	2013	2012

30. Depreciation and amortisation

Property, plant and equipment	255,797,272	269,456,733	255,744,359	269,428,121
Intangible assets	1,663,602	3,659,157	1,663,602	3,659,157
Change in accounting estimate	(28,396,843)	-	(28,396,843)	-
	229,064,031	273,115,890	229,011,118	273,087,278

Change in accounting estimate relates to review of useful life for fully depreciated assets as per GRAP 17. The effect of this estimate is a decrease on the depreciation of R 28 392 843.

31. Impairment of assets

Impairments

Property, plant and equipment	6,096,453	-	6,096,453	-
-------------------------------	-----------	---	-----------	---

The procedure used to determine if the asset was impaired was to physically inspect the asset and determine if the asset was impaired and what factors contributed to the impairment and then comparing the condition, age and cost of the asset to the current records in the asset register and if there was a change this was then adjusted accordingly

No impairments have been reported on cash generating assets because all assets acquired and which management has confirmed are primarily acquired for service delivery

* Investment property	1,951,690	585,791	1,951,690	585,791
-----------------------	-----------	---------	-----------	---------

Impairment of investment property was performed because the municipality had identified old and dilapidated buildings which added no contributory value to the investment property

* Inventories	93,369	-	93,369	-
---------------	--------	---	--------	---

Due to technological changes the inventory has become redundant.

8,141,512	585,791	8,141,512	585,791
------------------	----------------	------------------	----------------

32. Finance costs

Loans	69,343,234	69,583,589	69,343,234	69,583,589
Finance leases	389,929	685,018	389,929	685,018
Other interest paid	1,232,898	1,865,460	1,232,898	1,865,460
	70,966,061	72,134,067	70,966,061	72,134,067

No external funding was raised for capital projects during the 2012/2013 financial year.

33. Debt impairment

Contributions to debt impairment provision	217,793,936	58,209,770	217,793,936	58,209,770

43. Prepaid electricity

Commissions - are calculated on sales from prepaid electricity sales made by vendors on behalf of the Council. The commissions are included in the general expenses category of the statement of financial performance.

In the 2006/2007 financial year two vendors had defaulted in depositing amounts received from prepaid sales. As a result no commission was paid to them. The defaulting vendors are Sweet waters and Phayiphini who had ceased trading in January 2007 and October 2006 respectively.

The amounts of R55 723 and R75 896 respectively are deemed to be irrecoverable for the 2005/2006 financial year. Also the amounts of R13 980 and R15 671 being the movements for the 2006/2007 year are deemed irrecoverable .

This matter is being handled by the legal division in conjunction with the SAPS - Commercial branch unit and Venn Nemeth & Hart attorneys.

	3,970,629	3,998,373	3,970,629	3,998,373

47. Events after the reporting date

Mountain rise crematorium

On the 20th of August 2013 the new cremators malfunctioned during the first cremation. Subsequent to this event all further cremations ceased and the contractor was called in to investigate the malfunction.

The total cost of the remedial work amounts to R 620 000 and will be borne by the contractor. The expected time for the completion of the remedial work is 30th September 2013.

Debtors amnesty period

On the 28th August 2013, Council resolved that the Debt Collection Campaign be implemented from 1st September 2013 to 31st May 2014.

The amnesty period is only applicable to residential household consumers, flats and small home business as their primary use is residential.

Consolidated Annual Financial Statements for the year ended 30 June 2013

Notes to the Consolidated Annual Financial Statements

Figures in Rand	Economic entity		Controlling entity	
	2013	2012	2013	2012
48. Prior period errors				
The comparative statements for 2011/2012 financial year have been restated to recognise the amendments relating to all of the below errors. The effects of the changes are detailed below :				
Correction of prior period error	-	717,204,781	-	717,204,781
Statement of financial position				
Trade and other payables from exchange transactions				
Balance previously reported	-	452,056,290	-	452,056,290
Due to errors in trade and other payables control votes have been cleared - prior 11/12	-	(3,101,178)	-	(3,101,178)
Clearing stale cheques due to prescription	-	(2,980,334)	-	(2,980,334)
Writing back of retention monies due to non performance of contractor - prior 11/12	-	(5,299)	-	(5,299)
Write back of trust funds - prior 11/12	-	(4,966,722)	-	(4,966,722)
Corrections on Debi market development fund - 11/12	-	(28,800)	-	(28,800)
Restated balance	-	440,973,958	-	440,973,958
Trade and other receivables from non exchange transactions				
Balance previously reported	-	11,092,841	-	11,092,841
Due to errors in trade and other receivables control votes have been cleared - prior 11/12	-	(17,544)	-	(17,544)
Write back of unknown deposits due to prescription - prior 11/12	-	1,241,489	-	1,241,489
Reversal of rates raised on council owned properties - prior 11/12	-	(2,125,480)	-	(2,125,480)
	-	10,191,306	-	10,191,306
Inventory				
Balance previously reported	-	57,007,581	-	57,007,581
Writeback of concrete casting yard stock - prior 11/12	-	(739,842)	-	(739,842)
Land held for re-distribution appearing on valuation roll not on asset register - prior 11/12	-	693,428,000	-	693,428,000
Increase in water stock due to incorrect measurement - 11/12	-	2,482,682	-	2,482,682
Restated balance	-	752,178,421	-	752,178,421
Investment property				
Balance previously reported	-	381,012,346	-	381,012,346
Recognition of Prestbury police station previously omitted - prior 11/12	-	920,000	-	920,000
Assets incorrectly identified as property plant and equipment - prior 11/12	-	(56,124,991)	-	(56,124,991)
Restated balance	-	325,807,355	-	325,807,355
Property plant and equipment				
Balance previously reported	-	6,417,768,392	-	6,417,768,392
Assets incorrectly identified as property plant and equipment - prior 11/12	-	56,124,991	-	56,124,991
Restated balance	-	6,473,893,383	-	6,473,893,383

Notes to the Consolidated Annual Financial Statements

Figures in Rand	Economic entity		Controlling entity	
	2013	2012	2013	2012
50. Fruitless and wasteful expenditure (continued)				
Fruitless and wasteful expenditure current year	36,490	879,143	36,490	879,143
Fruitless and wasteful expenditure awaiting condonement/repayment	3,993,460	3,956,970	3,993,460	3,956,970
Interest on : Late payment of Telkom accounts	7,629	22,011	7,629	22,011
Interest on : Late payment of Eskom accounts	25,848	11,708	25,848	11,708
Advertising costs on tenders withdrawn	-	67,897	-	67,897
Cancellation of electricity contract : PriceWaterhouseCoopers	-	777,527	-	777,527
Interest on : Late payment of Post office accounts	1,911	-	1,911	-
Interest on : Late payment of SABC TV license	200	-	200	-
Interest on : Late payment to Swiftnet	902	-	902	-
	36,490	879,143	36,490	879,143

A system has been put in place to stream-line the payment process to ensure non occurrence of interest costs. Staff have been advised on possible recovery of costs due negligence.

51. Unauthorised expenditure

Depreciation and asset impairment	-	21,071,373	-	21,071,373
Reconciliation of unauthorised expenditure				
Opening balance	21,073,373	-	21,073,373	-
Add : Unauthorised expenditure - current year	-	21,071,373	-	21,071,373
	21,073,373	21,071,373	21,073,373	21,071,373

Depreciation is calculated as an estimate on the approved budget and taking in to account the previous years depreciation.

The following factors are not considered when depreciation is estimated:

1. Depreciation as captured in the statement of financial performance is inclusive of offset depreciation which includes depreciation on revaluations.
2. Variances do occur due to asset reclassification, revaluations and review of useful lives of assets.

52. Electricity, water and inventory losses

Electricity losses

Units purchased - kWh	1,748,918,830	1,752,171,161	1,748,918,830	1,752,171,161
Units sold - kWh	(1,546,449,278)	(1,514,431,630)	(1,546,449,278)	(1,514,431,630)
Street light losses - kWh	-	(10,693,112)	-	(10,693,112)
Loss - kWh	202,469,552	227,046,419	202,469,552	227,046,419
Electricity loss as a percentage	12	13	12	13
Cost per kWh in cents	0.60427	0.52440	0.60427	0.52440
Electricity loss in rand value	122,345,594	119,063,582	122,345,594	119,063,582

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Notes to the Consolidated Annual Financial Statements

	Economic entity		Controlling entity	
Figures in Rand	2013	2012	2013	2012

52. Electricity, water and inventory losses (continued)

The acceptable norm of electricity loss is 5%. The significant electricity losses of 2013 : 202,469,552 kWh (2012 - 227,046,419 KWh) occurred during the year under review, which resulted in material revenue losses to the municipality.

The reduction in losses are due to vigorous attempts to reduce illegal connections from the informal settlements. It is still however higher than the norm.

Water losses

Units purchased - KI	64,680,158	66,801,851	64,680,158	66,801,851
Units sold - KI	(43,461,581)	39,643,638	(4,346,581)	39,643,638
Losses - KI	21,218,577	27,158,213	21,218,577	27,158,213
Apparent losses - KI	(5,516,830)	(7,061,135)	(5,516,830)	(7,061,135)
Real losses - KI	15,701,747	20,097,078	15,701,747	20,097,078
Water loss as a percentage	24	30	24	30
Rand per kilolitre	4.35500	2.76590	4.35500	2.76590
Water loss in rand value	92,406,904	75,116,846	92,406,904	75,116,846

The acceptable norm in developing countries of water loss is 20%. The significant water losses of 2013 : 15,701,747 kl (2012: 20,097,078 kl) occurred during the year under review, which resulted material revenue losses to the municipality.

The loss above the norm is due to theft, distribution losses, illegal tampering of water meters and can also be attributable to the ageing infrastructure.

.

Inventory losses

Central Stores - net write up of general ledger	-	132,048	-	132,048
---	---	---------	---	---------

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

Notes to the Consolidated Annual Financial Statements

	Economic entity		Controlling entity	
Figures in Rand	2013	2012	2013	2012

52. Electricity, water and inventory losses (continued)

Targets

1. Hathorns reservoir repair – completion of reservoir rehabilitation and repair
2. Timer control units and PRV discreteness – installation and commissioning of 2 pilot, advanced timer control devices.
3. PRV maintenance and i20 Installations – install and commission 7 i20 advanced flow-modulating PRV controllers
4. Implementation of meter replacement programme – maintain and replace 4000 malfunctioning and/or damaged domestic meters
5. Bulk commercial meter changeout programme – replace Top 200 bulk water consumers
6. Civils contract for valve magnetic tops – make discrete the 7 i20 controller zones

Achievements/Progress

1. Hathorns reservoir repair – reservoir rehabilitation and repair was completed at the beginning of the 2012/13 financial year.
2. Timer control units and PRV discreteness – installation and commissioning of 2 pilot, advanced timer control devices.
3. PRV maintenance and i20 Installations – installed and commissioned 7 i20 advanced flow-modulating PRV controllers. The seven installations sites chosen where prioritised on size of zone as well as zones requiring pressure management to reduce high burst frequencies caused by fluctuating peak and off-peak pressures.
4. Implementation of meter replacement programme – this was project managed through the NRW PSP with the help of five plumbing contractors. To date 804 meters have been maintained to ensure that the consumers receive accurate bills and 1986 damaged and malfunctioning meters have been replaced.
5. Bulk commercial meter changeout programme – to date 24 of the Top 200 consumers have been replaced with the correct installation and meter which shall yield increased revenue for the Municipality. It is still too early to validate and report on the results until a minimum of 6 months worth of billing is completed post-meter change out.
6. Civils contract for valve magnetic tops – make discrete the 7 i20 controller zones. Towards the end of the financial year an award was made for the replacement/refurbishment of zone dividers. The civils contract was to ensure that the seven i20 controller zones were secure from being breached and this is still on-going with the contract due for completion before the Christmas shut-down.

Inventory losses

Cable stores - net write down of general ledger	93,369	132,048	93,369	132,048
---	--------	---------	--------	---------

There has been a close monitoring and interrogation of the movement of inventory. Additional staff have been appointed to maximise efficiency of the central stores.

57. Change in accounting estimate

Property, plant and equipment

Review of useful life for fully depreciated assets according to GRAP 17. The effect of this revision has decreased the provision by R 28 396 843

Landfill rehabilitation provision

The New England Road landfill site provisional programme closure was awarded to Envitech Solutions. The useful life of the landfill site was estimated in 2013 to be 10 years. The landfill site provision represents management's best estimate of the municipality's rehabilitation liability based on an valuation provided by an external consultant. The effect of this revision has increased the provision by R33 057 761.

Roads infrastructure

During the process of conditionally assessing roads it was established that several roads have been impaired and the useful life have to be amended to its present expected useful life. Consequently the depreciation has to be adjusted to reflect the change of useful life due to impairment. The effect of this revision has increased the provision by R 696 172 .

Provisions

The leave pay provision is created to ensure adherence to SALGA collective agreement requirements. It states that at the end of a leave cycle, an employee may not have more than 48 days annual leave to his credit. The effect of this revision has increased the provision by R 8 107 068

The post-employment health care benefit actuarial valuation was done by Arch Acturial Consulting. The valuation undertaken in accordance with the requirements of Professional Guidance Note (PPN) 301 of the Actuarial Society of South Africa. The effect of this revision has increased the provision by R194 553 858

The long service award provision is created to ensure adherence to SALGA collective agreement requirements. The estimate is based on the monthly salaries rate at 30 June 2013. The effect of this revision has increased the provision by R3 714 230.

The Msunduzi Municipality and its Municipal Entity

Consolidated Annual Financial Statements for the year ended 30 June 2013

58. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance.

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying businesses, municipality treasury maintains flexibility in funding by maintaining availability under committed credit lines.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

Interest rate risk

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the group to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk.

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored.

59. Going concern

The consolidated annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.
