Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1. Presentation of Consolidated Annual Financial Statements

The consolidated annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practices (GRAP) prescribed by the Minister of Finance in terms of General Notice 991 and 992 of 2005.

The standards are summarised as follows:

Standard of GRAP	
GRAP 1	Presentation of financial statements
GRAP 2	Cash flow statements
GRAP 3	Accounting policies, changes in accounting estimates and errors
GRAP 4	The effects of changes in foreign exchange rates
GRAP 5	Borrowings
GRAP 6	Consolidated financial statements and accounting for controlled entities
GRAP 7	Accounting for investments in associates
GRAP 8	Financial reporting of interests in joint ventures
GRAP 9	Revenue from exchange transactions
GRAP 11	Construction Contracts
GRAP 12	Inventories
GRAP 13	Leases
GRAP 14	Events after the reporting date
GRAP 16	Investment Property
GRAP 17	Property, plant and equipment
GRAP 19	Provisions, contingent liabilities and contingent asset
GRAP 100	Non-current Assets Held for Sale and Discontinued Operations
GRAP 101	Agriculture
GRAP 102	Intangible Assets

GRAP 6, 7 and 8 have been complied with to the extent that the requirements in these standards relate to the municipality's separate financial statements.

Accounting policies for material transactions, events or conditions not covered by the above GRAP and GAMAP Standards have been developed in accordance with paragraphs 7, 11 and 12 of GRAP 3. These accounting policies and the applicable disclosures have been based on the South African Statements of Generally Accepted Accounting Practices (SA GAAP) including any interpretations of such Statements issued by the Accounting Practices Board.

Directives issued and effective:

Directive 1:	Repeal of Existing Transitional Provisions in, and Consequential Amendments to, Standards of GRAP
Directive 2:	Transitional Provisions for the adoption of Standards of GRAP by entities, Municipal Entities and
constitutional Ins	stitutions

Directive 3: Transitional Provisions for the adoption of Standards of GRAP by High Capacity Municipalities

Directive 4: Transitional Provisions for the adoption of Standards of GRAP by Medium and Low Capacity Municipalities

Directive 5: Determining the GRAP reporting Framework

Directive 7: The adoption of Deemed Cost on the Adoption of Standards of GRAP

Approved Guidelines of Standards of GRAP:

Guide 1 Guideline on Accounting for Public Private Partnerships

Effective accrual based IPSAS's considering the provisions in paragraphs 15 to 19 of the Directive:

IPSAS 20 Related Party Disclosure

IPSAS 21 Impairment of Non-Cash-Generating Assets

Effective IFRS's and IFRIC's that are applied considering the provisions in paragraphs 20 to 26 of the Directive:

IFRS 3 (AC 140) Business Combinations IFRS 4 (AC 141) Insurance Contracts IFRS 6 (AC 143) Exploration for and Evaluation of Mineral Resources IFRS 7 (AC 144) Financial Instruments: Disclosure IAS 12 (AC 102) Income Taxes

IFRIC 14 (AC447) IAS 19 - The limit on a Defined Benefit Asset, Minimum Funding Requirements and their interaction

1.1 Consolidation

Basis of consolidation

The consolidated annual financial statements incorporate the annual financial statements of the municipality and the municipal entity.

The consolidated annual financial statements of the municipality and its municipal entity are used in the preparation of the consolidated consolidated annual financial statements and are prepared as of the same reporting date.

On acquisition the economic entity recognises the municipal entity's identifiable assets, liabilities and contingent liabilities at fair value, except for assets classified as held-for-sale, which are recognised at fair value less costs to sell.

The results of the municipal entity are included from the effective date of acquisition. Where neccessary adjustments are made to the consolidated annual financial statements of the municipal entity to bring their accounting policies used in line with those of the municipality.

All intra-entity transactions, balances, revenues and expenses are eliminated in full on consolidation.

1.2 Presentation of currency

These consolidated annual financial statements are presented in South African Rand.

1.3 Going concern assumption

In terms of the accounting standard GRAP 1 paragraphs 27 to 30 the consolidated annual financial statements are prepared on a going concern basis. The assumption is based on the fact that the municipality may invoke its power to levy additional rates or taxes to enable the municipality to be considered as a going concern even though the municipality will be operational for extended periods with negative net assets.

However based on the current solvency and liquidity ratio's tests performed, the municipality's ability to operate as a going concern is under serious threat. To address the threat under which the municipality find's itself, the Provincial MEC for Department of Corporate Governance and Traditional Affairs, in terms of Section 139 (1) (c) of the Constitution, intervened and appointed an administrator together with a Provincial Intervention Team to ensure that the financial and administrative turn-around of the municipality is put in place and sustained. It is estimated that it may take more than one financial period to bring the municipality's financial position to a favourable position.

1.4 Housing development fund

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes, both complete and in progress as at 1 April 1998, were also transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

1.5 Investment property

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.5 Investment property (continued)

Initial Recognition

Investment property includes property (land or a building, or part of a building, or both land or buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations.

At initial recognition, the Municipality and its municipal entity measures investment property at cost including transaction costs once it meets the definition of investment property. However, where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition. The cost of self-constructed investment property is the cost at date of completion

Subsequent Measurement

Investment property is measured using the cost model. Under the cost model, investment property is carried at cost less any accumulated depreciation and any accumulated impairment losses.

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

Item Useful life

Property - land indefinite Property - buildings 30years

1.6 Property, plant and equipment

Initial Recognition

Property plant and equipment are stated at cost less accumulated depreciation. Heritage assets, which are culturally significant resources and which are shown at cost, are not depreciated owing to the uncertainty regarding their estimated useful live. Land is not depreciated as it is deemed to have an indefinite life.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the Municipality and its municipal entity for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Subsequent Measurement

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Where the Municipality and its municipal entity replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

Depreciation commences when the assets are ready for their intended use.

Depreciation and Impairment:-

Depreciation is calculated on cost, using the straight-line method over the estimated useful lives of the assets. The annual depreciation rates are based on the following estimated asset lives:-

Item
Land
Furniture and fixtures
Other items of plant and equipment
Office equipment

Average useful life Infinite

7 - 10 years 2 - 5 years 3 - 7 years

 10 - 15 years

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the group holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. These assets are not accounted for as non-current assets held for sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

1.7 Inventories

Inventories are measured at the lower of cost and net realisable value.

The cost at reporting date comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the entity.

When inventories are sold, the carrying amount of those inventories are recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Redundant and slow-moving inventories are identified and written down from cost to net realisable value with regard to their estimated economic or realisable values.

Unsold properties are at the lower cost and net realisable value on a weighted average cost basis. Direct cost are accumulated for each separately identifiable development. Cost also includes a portion of the overhead costs.

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.8 Financial instruments

Classification

The group classifies financial assets and financial liabilities into the following categories:

- Financial assets at fair value through surplus or deficit held for trading
- Loans and receivables

Classification depends on the purpose for which the financial instruments were obtained / incurred and takes place at initial recognition. Classification is re-assessed on an annual basis, except for derivatives and financial assets designated as at fair value through surplus or deficit, which shall not be classified out of the fair value through surplus or deficit category.

Initial recognition and measurement

Financial instruments are recognised initially when the group becomes a party to the contractual provisions of the instruments.

The group classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement.

Financial instruments are measured initially at fair value, except for equity investments for which a fair value is not determinable, which are measured at cost and are classified as available for sale financial assets.

For financial instruments which are not at fair value through surplus or deficit, transaction costs are included in the initial measurement of the instrument.

Transaction costs on financial instruments at fair value through surplus or deficit are recognised in profit or loss.

Subsequent measurement

Financial instruments at fair value through surplus or deficit are subsequently measured at fair value, with gains and losses arising from changes in fair value being included in surplus or deficit for the period.

Net gains or losses on the financial instruments at fair value through surplus or deficit dividends and interest.

Loans and receivables are subsequently measured at amortised cost, using the effective interest method, less accumulated impairment losses.

Financial liabilities at amortised cost are subsequently measured at amortised cost, using the effective interest method.

Fair value determination

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models making maximum use of market inputs and relying as little as possible on entity-specific inputs.

Impairment of financial assets

At each end of the reporting period the group assesses all financial assets, other than those at fair value through surplus or deficit, to determine whether there is objective evidence that a financial asset or group of financial assets has been impaired.

For amounts due to the group, significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy and default of payments are all considered indicators of impairment.

Impairment losses are recognised in surplus or deficit.

Impairment losses are reversed when an increase in the financial asset's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to the restriction that the carrying amount of the financial asset at the date that the impairment is reversed shall not exceed what the carrying amount would have been had the impairment not been recognised.

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.8 Financial instruments (continued)

Where financial assets are impaired through use of an allowance account, the amount of the loss is recognised in surplus or deficit within operating expenses. When such assets are written off, the write off is made against the relevant allowance account. Subsequent recoveries of amounts previously written off are credited against operating expenses.

Trade and other receivables

Trade receivables are measured at initial recognition at fair value, and are subsequently measured at amortised cost using the effective interest rate method if material. Appropriate allowances for estimated irrecoverable amounts are recognised in surplus or deficit.

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the deficit is recognised in surplus or deficit within operating expenses. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against operating expenses in surplus or deficit.

Trade and other receivables are classified as loans and receivables.

Trade and other payables

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These are initially and subsequently recorded at fair value.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks and investments in financial instruments, net of bank overdrafts.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdrafts are expensed as incurred.

Cash and cash equivalents are classified as loans and receivables

Bank overdraft and borrowings

Bank overdrafts and borrowings are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in accordance with the group's accounting policy for borrowing costs.

Derivatives

Derivative financial instruments, which are not designated as hedging instruments, consisting of foreign exchange contracts and interest rate swaps, are initially measured at fair value on the contract date, and are re-measured to fair value at subsequent reporting dates.

Derivatives embedded in other financial instruments or other non-financial host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contract and the host contract is not carried at fair value with unrealised gains or losses reported in surplus or deficit.

Changes in the fair value of derivative financial instruments are recognised in surplus or deficit as they arise.

Derivatives are classified as financial assets at fair value through surplus or deficit - held for trading.

Held to maturity

These financial assets are initially measured at fair value plus direct transaction costs.

At subsequent reporting dates these are measured at amortised cost using the effective interest rate method, less any

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.8 Financial instruments (continued)

impairment loss recognised to reflect irrecoverable amounts. An impairment loss is recognised in surplus or deficit when there is objective evidence that the asset is impaired, and is measured as the difference between the investment's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition. Impairment losses are reversed in subsequent periods when an increase in the investment's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to the restriction that the carrying amount of the investment at the date the impairment is reversed shall not exceed what the amortised cost would have been had the impairment not been recognised.

Financial assets that the group has the positive intention and ability to hold to maturity are classified as held to maturity.

Gains and losses

A gain or loss arising from a change in a financial asset or financial liability is recognised as follows:

- A gain or loss on a financial asset or financial liability classified as at fair value through surplus or deficit is recognised in surplus or deficit,
- For financial assets and financial liabilities carried at amortised cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, and through the amortisation process.

Derecognition

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- the rights to receive cash flows from the asset have expired;
- the group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the group has transferred its rights to receive cash flows from the asset and either
 - has transferred substantially all the risks and rewards of the asset, or
 - has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the group has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the group could be required to repay. Where continuing involvement takes the form of a written and/or purchased option (including a cash-settled option or similar provision) on the transferred asset, the extent of the group's continuing involvement is the amount of the transferred asset that the group may repurchase, except that in the case of a written put option (including a cash-settled option or similar provision) on an asset measured at fair value, the extent of the group's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in surplus or deficit.

Impairment of financial assets

The group assesses at each statement of financial position date whether a financial asset or group of financial assets is impaired.

Assets are carried at amortised cost.

If there is objective evidence that an impairment loss on loans and receivables carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.8 Financial instruments (continued)

shall be reduced either directly or through the use of an allowance account. The amount of the loss shall be recognised in surplus or deficit. The group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

1.9 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

1.10 Revenue from non-exchange transactions

Non-exchange transactions are defined as transactions where the entity receives value from another entity without directly giving approximately equal value in exchange.

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

1.11 Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality and its municipal entity has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

1.12 Provisions and contingencies

Provisions are recognised when:

- the group has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the group settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.12 Provisions and contingencies (continued)

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditure for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

No obligation arises as a consequence of the sale or transfer of an operation until the group is committed to the sale or transfer, that is, there is a binding agreement.

After their initial recognition contingent liabilities recognised in business combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 42.

1.13 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the restatement of expenditure iro 2007/08 during 2009/10 in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the restatement of expenditure iro 2007/08 during 2009/10.

1.14 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), The Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance..

1.15 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the restatement of expenditure iro 2007/08 during 2009/10 in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the restatement of expenditure iro 2007/08 during 2009/10.

1.16 Translation of foreign currencies

Foreign currency transactions

A foreign currency transaction is recorded, on initial recognition in Rands, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous consolidated annual financial statements are recognised in surplus or deficit in the period in which they arise.

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.16 Comparative figures (continued)

When a gain or loss on a non-monetary item is recognised directly in net assets, any exchange component of that gain or loss is recognised directly in net assets. When a gain or loss on a non-monetary item is recognised in surplus or deficit, any exchange component of that gain or loss is recognised in surplus or deficit.

Cash flows arising from transactions in a foreign currency are recorded in Rands by applying to the foreign currency amount the exchange rate between the Rand and the foreign currency at the date of the cash flow.

1.17 Comparative figures

Current year comparatives

Budgeted amounts have been included in an annexure to these statements for the current financial year only.

Prior year comparatives

When presentation or classification of items in the consolidated annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

1.18 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

The lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset. This liability is not discounted.

Any contingent rents are expensed in the period in which they are incurred.

1.19 Value Added Taxation/TAX

The Msunduzi Municipality accounts for Value Added Tax on the payment basis.

The municipality is exempted from Tax in terms of Section 10(1)(a) of the Income Tax Act.

1.20 Significant judgements and sources of estimation uncertainty

In preparing the consolidated annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the consolidated annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the consolidated annual financial statements. Significant judgements include:

Trade receivables / Held to maturity investments and/or loans and receivables

The group assesses its trade receivables for impairment at each statement of financial position date. In determining whether

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.20 Significant judgements and sources of estimation uncertainty (continued)

an impairment loss should be recorded in the statement of financial performance, the group makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

Allowance for slow moving, damaged and obsolete stock

An allowance for stock to write stock down to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the impairment of assets note.

Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the statement of financial position date. The quoted market price used for financial assets held by the group is the current bid price.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the group for similar financial instruments.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 20 - Provisions.

Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 19.

Effective interest rate

The group used the prime interest rate to discount future cash flows.

1.21 Intangible assets

An asset is identified as an intangible asset when it:

- is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either
 individually or together with a related contract, assets or liability; or
- arises from contractual rights or other legal rights, regardless whether those rights are transferable or separate from the group or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity;
- the cost of the asset can be measured reliably.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.21 Intangible assets (continued)

ItemUseful lifeComputer software, internally generated3 yearsComputer software, other3 years

Intangible assets are derecognised:

- on disposal: or
- when no future economic benefits or service potential are expected from its use or disposal.

1.22 Non-current assets held for sale

Non-current assets are classified as "held for sale assets" if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets held for sale are measured at the lower of its carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as "held for sale" asset.

Interest and other expenses attributable to the liabilities of the "held for sale" assets are recognised in surplus or deficit.

1.23 Impairment of cash-generating assets

Cash-generating assets are those assets held by the group with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the group; or
- (b) the number of production or similar units expected to be obtained from the asset by the group.

1.24 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.24 Employee benefits (continued)

Defined contribution plans

The municipality and its municipal entity provides retirement benefits for its employees and councillors. The contributions to fund obligations for the payment of retirement benefits are charged against revenue in the year they become payable. The defined benefit funds, which are administered on a provincial basis, are actuarially valued triennially on the projected unit credit method basis. Deficits identified are recognised as a liability and are recovered through lump sum payments or increased future contributions on a proportional basis to all participating municipalities.

Defined benefit plans

For defined benefit plans the cost of providing the benefits is determined using the projected credit method.

Actuarial valuations are conducted on a three year basis by independent actuaries separately for each plan.

Consideration is given to any event that could impact the funds up to statement of financial position date where the interim valuation is performed at an earlier date.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight line basis over the average period until the amended benefits become vested.

Gains or losses on the curtailment or settlement of a defined benefit plan is recognised when the group is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as planned assets. In the restatement of expenditure iro 2007/08 during 2009/10, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduces by the fair value of plan assets.

Any asset is limited to unrecognised actuarial losses, plus the present value of available refunds and reduction in future contributions to the plan.

The municipality and its municipal entity does not apply the "Corridor method" and recognise all actuarial gains or losses in the statement of financial performance as they occur.

Retirement benefits

The municipality and its municipal entity and its employees contribute to seven pension funds of which the Natal Joint Municipal Pension Fund cater for the majority of the staff. The Pension Funds has a combination of a defined contribution fund and defined benefit plan. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable.

Pension Obligations

The municipality and its employees contribute to 7 different Pension Funds, of which 2 (The Natal Joint Provident and Retirement Pension Fund) cater for the majority of the staff.

Natal Joint Retirement Funds, Government Employee Pension Fund and Associated Institution Pension Fund are defined benefit funds.

The Natal Joint Provident Fund, Pietermaritzburg and South African Local Authority are defined contribution funds.

The schemes are funded through payments to financial consultant companies or trustee-administered funds, determined by periodic actuarial calculations.

The Municipality has both defined benefit and defined contribution plans.

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.24 Employee benefits (continued)

A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. A defined contribution plan is a pension plan under which the Municipality pays fixed contributions into a separate entity. The Municipality has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

For defined contribution plans, the Municipality pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Municipality has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

1.25 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.26 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset until such time as the asset is ready for its intended use. The amount of borrowing costs eligible for capitalisation is determined as follows:

- Actual borrowing costs on funds specifically borrowed for the purpose of obtaining a qualifying asset less any
 investment income on the temporary investment of those borrowings.
- Weighted average of the borrowing costs applicable to the group on funds generally borrowed for the purpose of obtaining a qualifying asset. The borrowing costs capitalised do not exceed the total borrowing costs incurred.

The capitalisation of borrowing costs commences when all the following conditions have been met:

- expenditures for the asset have been incurred;
- borrowing costs have been incurred; and
- activities that are necessary to prepare the asset for its intended use or sale are undertaken.

When the carrying amount or the expected ultimate cost of the qualifying asset exceeds its recoverable amount or recoverable service amount or net realisable value, the carrying amount is written down or written off in accordance with the accounting policy on Impairment of Assets as per accounting policy number 1.23. In certain circumstances, the amount of the write-down or write-off is written back in accordance with the same accounting policy.

Capitalisation is suspended during extended periods in which active development is interrupted.

Capitalisation ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

1.27 Use of estimates

The preparation of consolidated annual financial statements in conformity with Standards of GRAP requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated annual financial statements are disclosed in the relevant sections of the consolidated annual financial statements. Although these estimates are based on management's best knowledge of current events and actions they may undertake in the future, actual results ultimately may differ from those estimates.

1.28 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP, GAAP or IPSAS.

1.29 Investments

Where the carrying amount of an investment is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the statement of financial performance.

Consolidated Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.30 Grants in aid

The Msunduzi Municipality and its municipal entity transfers money to individuals, institutions and organisations. When making these transfers, The Municipality does not:

Receive any goods or services directly in return, as would be expected in a purchase or sale transaction

Expect to be repaid in future; or

Expect a financial return, as would be expected from an investment

These transfers are recognised in the consolidated annual financial statements as expenses in the period that the events giving rise to the transfer occurred.

1.31 Unspent conditional grants

Unspent conditional grants are reflected on the Statement of Financial Position as a Creditor - Unspent Conditional Grants. They represent unspent government grants, subsidies and contributions from the public. The following conditions are set for the creation and utilisation of these creditors

The unspent portion of the grant is invested until utilised.

Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor. If it is The Msunduzi Municipality's and its municipal entity's interest it is recognised as interest earned in the Statement of Financial Performance.

Whenever an item of property, plant and equipment is purchased from a Creditor – Unspent Conditional Grant, an amount equal to the purchase price is transferred from the Creditor - Unspent Conditional Grant to the operating account on the Statement of Financial Performance as revenue.

Whenever an item of property, plant and equipment is purchased from a Creditor - Unspent Conditional Grant, an amount equal to the purchase price is transferred from the accumulated surplus to the Deferred Income - Government Grants or the Accumulated Surplus account in the case of non government grants. The deferred income account is used to offset depreciation charged on the property, plant and equipment financed from unspent government grant capital receipts and equals the remaining depreciable value (carrying value) of property, plant and equipment financed from unspent government grant capital receipts.

Whenever a non-asset is purchased from a Creditor - Unspent Conditional Grant an amount equal to the purchase price is transferred from the Creditor - Unspent Conditional Grant to the operating account on the Statement of Financial Performance to offset the expenditure which was expensed through the operating account.

2. New standards and interpretations

2.1 Standards and Interpretations early adopted

The group has not applied the following standards and interpretations, which have been issued but are not yet effective

GRAP 18: Seament Reporting

Compliance with this standard would have had an effect on the presentation only. Financial information would have been reported by segments. The disclosure of this information will assist users of the financial statements to better understand the entity's past performance and to identify the resources allocated to support the major activities of the municipality and its municipal entity.

GRAP 23: Revenue from Non-exchange Transactions

Non-exchange transactions in which the entity receives services without directly giving equal value in exchange, has not been accounted for as revenue. The reason being is that this type of transaction is presently non applicable and therefore considered immaterial.

GRAP 24: Presentation of Budget Information in the Financial Statements

Compliance with this standard would have had an effect on the presentation only. The budget information is disclosed in the appendices of the consolidated annual financial statements.

GRAP 103: Heritage Assets

Compliance to the standard would have no impact on the current information due to the fact that there are no heritage assets disclosed in the consolidated annual financial statements. Notwithstanding the above are the recognition and measurements requirements of the standards already adopted.

GRAP 25: Employee benefits

Compliance to the standard would have an effect on the presentation only. Financial information has been reported in the notes to the consolidated annual financial statements and statement of performance. The disclosure of this information will assist users of the financial statements to evaluate the nature of the entity defined plans and the financial effect in those plans during the reporting period.

7. Property, plant and equipment (continued)

Infrastructure Assets.

During the previous financial year the Municipality implemented a process to identify, record, value and manage infrastructure assets as required in terms of GRAP 17. This resulted in a reconstructed fixed asset register for infrastructure assets. The key issues in this regards were as follows:

Physical verification and valuation

- * The assets have been valued by an independent valuer and are effective on 30 June 2009.
- * Due to the specialised nature of the assets, and market availability of information, the depreciated replacement cost method was used.
- * A 100% verification and a conditional assessment was done.
- * In the case of inaccessible assets various methods were employed to record and value the assets. These assets are reflected in the asset register as "polygon assets". A polygon asset that is referenced by a geographically referenced area and the actual position and detail of the asset estimated within this geographical area. As the assets are maintained or a process implemented to more accurately record these assets the polygon can be broken down into detail components.

Retrospective application of the effects of implementation of GRAP 17

* The implementation of GRAP 17 is a prior period error. In terms of GRAP 3 prior period errors should be applied retrospectively. On initial application the Municipality applied retrospective application of the infrastructure assets during the 2008 financial year. The methodology followed for the retrospective application corrections was done as follows:

Disclosure of the asset information

- *The deemed cost was determined on 30 June 2009 by using the depreciated replacement values (DRC).
- *In order to apply the retrospective application as required for the infrastructure assets previously adjusted prospectively, the CPI index was used to determine the DRC values as at 2007.
- *For movable assets actual values were used.
- *The opening for the take-on values of the assets as well as for accumulated depreciation is restated. This adjustment is made directly to accumulated surplus.
- *Depreciation for the year has been based on the new asset values and is calculated on a straight line method.
- *During the financial year the Municipality also identified and measured investment properties in terms of GRAP 16.

Fully Depreciated Assets

- *The fixed asset register as at 30 October 2010 had approximately 42667 fully depreciated assets still in use. Approximately 40383 were acquired prior to July 2006. The Municipality opted not to revalue these assets due to the use of fund accounting in that period. In the interim the assets classified as vehicles have been revalued and the useful lives reviewed through a Section 78 of the Municipal Systems Act investigation of fleet.
- *The remainder of the assets acquired subsequent to June 2006 which were classified as Furniture and Equipment have been revalued and the useful lives have been reviewed. These values will be updated in the 2010/2011 financial year.

Other disclosures

Included in the land and building are items that may meet the definition of investment properties because the municipality has not yet finalised the process to identify investment properties for reporting purposes. At the time of preparation of the consolidated financial statements, the tender for the appointment of a service provider to perform this task was approved, but not yet completed. This process will be finalised during the 2010/2011 financial year. In addition this task will also identify unsold properties.

19. Retirement benefits

Defined contribution and benefit plan

The Council provides retirement benefits to employees by contributing to pension and provident fundsMembership of either pension or provident fund is compulsory for all permanent employees.

The majority members and Council contribute to the Natal Joint Retirement and Provident Funds (NJMP), employees contributing to SALA, AIPF, Pietermaritzburg Provident Fund and GEPF. Employees contributing to SALA, AIPF, Pietermaritzburg Provident Fund and GEPF make up a small number of the total members of pension funds. Msunduzi Municipality liability in these funds could not be determined owing mainly to the assets not being allocated to each employer and one set of financials being compiled for each fund and not for each employer.

At the time of submission of this annual financial statement were the actuarial valuation reports not available for the SALA, AIPF, Pietermaritzburg Provident Fund and GEPF.

The majority of personnel are members of the following pension funds:

Kwa-Zulu-Natal Joint Municipal Provident Fund.

Actuarial Valuation as at 31 March 2009.

Results of valuation.

Consolidated Annual Financial Statements for the year ended 30 June 2010

Notes to the Consolidated Annual Financial Statements

	Gro	Group		ipality
Figures in Rand	2010	2009	2010	2009

19. Retirement benefits (continued)

The Fund self-insures its risk benefits in excess of the full benefit. It therefore maintains a Risk Reserve Account as a measure of protection against volatility in claims experience. The amount of R13,165,000 is required to be held in the Risk Reserve Account. The liabilities of the fund exceeded the assets. Resulting in a small deficit at the valuation date of R13,930,000.

The deficit of R13,930,000 will be met from future investment earnings. The Investment Reserve Account far exceeds the deficit, so that the Fund is financially sound as at the valuation date.

Benefits:

- : Pension age 65 years : Earliest retirement age 58 years
- : Full benefit Initial transfer plus member's contributions plus employer's contributions for full benefits plus investment earnings and bonuses.
- : Member's portion of full benefits Initial transfer plus members contributions plus local authorities contributions for full benefits plus interim, special and final bonuses
- : Benefit on retirement after earliest retirement age or pension age Full benefit.
- : Benefit on retirement because of ill health Full benefit
- : Benefit on death in service Full benefit plus 0.7% of annual pensionable salary

for each month of potential service to a maximum of 2.1 years salary.

Contributions:

: Members may choose to contribute at a rate of 5%, 7% or 9.25% of their pensionable emoluments in terms of regulation 14(a) : Participating employers contribute at a rate of 1.95 times of the

Benchmark: The benchmark asset allocation determined as being appropriate for the fund, which takes cognisance of membership and liability profile, is stated below

rate of members contribution in terms of regulation 17(1)(b)

Domestic Investments: 516.818.000 International Investments: 57,134,000 Membership: 7,977

Natal Joint Pension Fund:

Natal Joint Municipal Pension Fund: (Retirement) Interim actuarial valuation

An interim actuarial valuation was performed on 31 March 2009.

The statutory actuarial valuation as at 31 March 2000 disclosed that the fund was in shortfall. As required by the Pension Funds act, a "Scheme of Arrangement" was implemented so that the shortfall would be funded over the 9 year period 1 July 2001 to 30 June 2010. The initial surcharge has been reviewed at each annual actuarial valuation.

With effect from 1 July 2000 the local authority commenced paying a surcharge equal to 2% of pensionable salaries. The surcharge has been increased as follows:

: 2002-07-01	6%
: 2004-07-01	12%
: 2006-07-01	14%
: 2007-07-01	17%

^{* 1.65%} is paid by members

19. Retirement benefits (continued)

Based on the valuation assumptions that applied in 2000, the shortfall is expected to be fully funded by 2010.

On the DCF funding level has improved and the overall shortfall has decreased. The valuation disclosed a surplus of R134.1 million in respect of pensioners and a shortfall of R214.2 million in respect of members.

The fund's financial condition has improved, with the overall funding level increasing 83,1% to 88,6% on the DCF method of valuation.

The regulations of the fund have been amended with effect from 1 July 2004, so that the Committee of Management is able to levy a separate surcharge on local authorities which grant excessive salary increases, thereby causing a financial strain on the Fund to the detriment of other steakholders.

The employers are no longer permitting members to join the Fund, so that it is effectively closed to new members. This means that the average age will increase over time which, in turn, means that the required rate of contribution will also increase

Thus, once the surcharge ceases, the underlying rate of contribution will not be sufficient to meet the cost of the benefits. It is necessary to set aside a reserve to hold assets equal to the expected shortfall. For this reason a "Contribution Reserve is held equal to the present value of the shortfall in terms of the Financial Services Board's Circular PF117 for the 4 years to 2012 when it is expected that the surcharge will cease.

Benefits:

- : Pension age 65 Years
- : Final average Salary Average annual pensionable salaries during the last year of service.
- : Pension on retirement at pension age 2.1% of final average emoluments per year of continuous service.
- : Lump sum on retirement at pension age 5.5% of final average emoluments per year of service.
- : Pension on retirement because of ill-health (minimum ten years continuous service) Pension as for retirement at pension age
- : Lump sum on retirement because of ill-health (minimum 10 years continuous service) Lump sum as for retirement at pension age
- : Lump sum on retirement because of ill health (less than ten years continuous service) The greater of the resignation benefit or twice the members contributions
- : Surviving Spouses pension on death in service 1.05% of final average emoluments per year of continuous service that the member would have had at the pension age.
- : Surviving Spouses pension on death of pensioner 1.05% (0,77% in the case of a pensioner who retired before 1 July 1999) of final average emoluments per year of continuous service.
- : Lump sum on death in service Annual pensionable emoluments

Post retirement medical aid contributions.

The municipality operates on 6 accredited medical aid schemes, namely Bonitas. Discovery Health, Hosmed, Key-Health, LA Health and SAMWU Medical Aid Scheme, Pensioners continue on the option they belonged to on the day of their retirement.

The last post-employment health care benefits actuarial valuation in terms of IAS19 was done by Delliotte and Touche for the period ending 30 June 2009. For the financial period ending 30 June 2010 Ernst and Young undertook the valuation in accordance with the requirements of Professional Guidance Note (PPN) 301 of the Actuarial Society of South Africa.

The accrued liability amounted to R 290.45 million as at 30 June 2009 according to the previous valuation report. A projection of this result assuming that all actuarial assumptions are realized as at 30 June 2010 is R 309.22 million. The accrued liability calculated in this valuation is R 310.12 million, reflecting an unexpected loss of R 0.9 million

A reconciliation of Msunduzi's accrued liability for the year ending 30 June 2010 is set out below.

Year ended	30	June	2010
------------	----	------	------

		•

Group

Municipality

The landfill site provision represents management's best estimate of the municipality's rehabilition liability based on an valuation provided by an external consultant on the remaining useful life of the landfill site. The provision's change in estimate amounts to R 13 779 153.41.

Alien vegetation provision.

According to the National Environmental Management Act, 1998 (Act No. 107 of 1998) the municipality was encouraged to recognise a provision in this regard.

The Department of Agriculture has since 2006 provided considerable support to the Msunduzi Municipality in terms of clearing listed alien invasive plants.

The Msunduzi Municipality's involvement and responsibility is effectively operational support to the Department of Agriculture terms of clearing listed alien invasive plants.

Valuations on land and buildings are performed every 4 years. The last general valuation came into effect on 1 July 2010. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

A general rate of 18 % for 2010 (2009: 18%) is applied to property valuations to determine assessment rates.

The new market valuation was implemented on 01 July 2009.

In-kind benefits

The Mayor, Deputy Mayor, Speaker and Mayoral Committee Members are full-time. Each is provided with an office and secretarial support at the cost of the Council.

The Mayor and the Deputy Mayor each have the use of separate Council owned vehicles for official duties.

The Mayor and Deputy Mayor have security and an official driver at a cost to Council.

40. Prepaid Electricity

Commissions - are calculated on sales from prepaid electricity sales made by vendors on behalf of the Council.The commissions are included in the general expenses category of the statement of financial performance.

In the 2006/2007 financial year two vendors had defaulted in depositing amounts received from prepaid sales. As a result no commission was paid to them. The defaulting vendors are Sweet waters and Phayiphini who had ceased trading in January 2007 and October 2006 respectively.

The amounts of R55 723 and R75 896 respectively are deemed to be irrecoverable for the 2005/2006 financial year. Also the amounts of R13 980 and R15 671 being the movements for the 2006/2007 year are deemed irrecoverable. The matter is being handled by the legal division.

Operating lease payments represent rentals payable by the group for certain of its office properties. Leases are negotiated for an average term of two years and rentals are linked to an increase for an average of two years. Operating lease payments represents payment for a contract namely H. Collins (Compen Building). No contingent rent is payable.

Operating lease payments represent rentals payable by the group for rental of photocopy machines and fax machines. The contract has been extended for a period of four months.

42. Contingencies

Refer to appendix J for list of contingent liabilities.

43. Related parties

The NCT tree farming (Pty) Ltd manages timber plantations established on Council owned land on behalf of the Council by a management agreement. NCT is entitled to a 5% management fee based on net profit.

Safe City has been formed as a partnership with the business community to combat crime in the city. Council allocates a grant in aid to the entity.

45. Events after the reporting date

The valuation roll entry for a property included in the investment property is reflected in the valuation roll at a market value of R220 million. The effective date of the valuation roll is 01 July 2009. A tolerance check was done by the valuation section and it was discovered that the property was incorrectly valued and corrective measures were taken to adjust this value with the correct value of R5 580 000 in the supplementary valuation roll (4) which will become effective on 1 April 2011. The asset register will be adjusted therefore in the 2010/2011 financial year.

50. Electricity & water losses

Electricity I	osses
---------------	-------

Units purchased - kWh 1,735,836,294 1,679,141,913 1,735,836,294 1,679,141,913 Units sold - kWh 1,531,293,203 1,518,447,404 1,531,293,203 1,518,447,404 Loss - kWh 204,543,091 160,694,509 204,543,091 160,694,509 Electricty loss as a percentage 12 10 12 10 Electricity loss in rand value 66,483,628 60.052.372 66,483,628 60.052.372

The acceptable norm of electricity loss is 3%. The significant electricity losses of 204,543,091 kWh (2009: 160,694,509 kWh) occurred during the year under review, which resulted material revenue losses to the municipality.

The loss above the norm is due to theft, distribution losses, illegal tampering of electricty meters and can also be attributable to the ageing infrastructure.

Water losses

Water loss in rand value	63,066,030	32,422,512	63,066,030	32,422,512
Real losses - KI	19,233,312	10,413,860	19,233,312	10,413,860
Water loss as a percentage	33	19	33	19
Losses - Kl	20,626,505	20,626,505	20,626,505	11,807,053
Apparent losses - Kl	(1,393,193)	(1,393,193)	(1,393,193)	(1,393,193)
Units purchased -KI	58,492,009	58,492,009	58,492,009	55,426,244
Units sold - KI	37,865,504	37,865,504	37,865,504	43,619,191

The acceptable norm in developing countries of water loss is 20%. The significant water losses of 19,233,312 kl (2009: 10,413,860 kl) occurred during the year under review, which resulted material revenue losses to the municipality.

The loss above the norm is due to theft, distribution losses, illegal tampering of water meters and can also be attributable to the ageing infrastructure

Water and electricity distribution management was implemented by the Provincial Intervention Team(PIT). PIT has identified and stopped several illegal connections. A 5 year strategic plan for reduction of non-revenue water and a similar plan for electricity management has been drafted for the next 5 years.

Operation Pitbull was established to:

- audit all electricity and water meters and conduct a data clean-up
- check electricity mini circuit breaker (MCB) values
- check for illegal tampering of meters
- check for theft of electricity and water

Action taken against perpetrators is as follows:

- Consumers with a direct connection where the meter has been by-passed
- o An average consumption was back charged for a maximum period of three years
- o The MCB charge was back charged for a maximum period of three years with a maximum MCB value of 100 amps.
- o Both electricity and water services were removed where theft of consumption was found.
- o These consumers were subjected to a further audit within 14 days and if theft had resumed the following action was taken
 - -Services removed
 - -Illegal cable removed
 - -Consumers were cautioned that they would be criminally charged for theft
 - -Domestic consumers were charged an additional fee of R10000 and Commercial consumers R250000
- Consumers with MCB's of a higher value than billed for
- o The consumer was back charged for three years at 100Amps.
- o Consumers were cautioned and advised to do a load test to establish the correct MCB requirement
- o Consumers were requested to make application for the correct size MCB

Central Stores - net write up of general ledger

110,444

110,444

The background to this adjustment is that during this period there was a lack in management and internal controls were very weak added to this is that there was no segregation of duties. Procedures and processes were not followed and there was a total breakdown of controls. This could have been a combination of theft and gross inefficiency regarding the recording of transactions.

Cable stores - net write down of general ledger

(372,587)

(372,587)

This variance arose through the theft of cable from the cable yard. Copper is a high value commodity in the scrap metal market place. The thefts took place over a period of time and all have been reported to the South African Police as well as our Internal Security.

Edendale stores - net write down of general ledger

(25,153)

(25.153)

The above variance was due to the lack of management and internal controls at this store. After the retirement of the senior storeman at Edendale the junior staff were relocated but the stock was left there, We had a break in and all the copper water fittings were stolen. This matter was reported to Internal Security as well as the South African Police.

Quarterly inventory counts are to be performed going forward. An inventory management plan has been drafted which indicate the procedures that have been implemented with regard to receipts, issuing, safegarding and physical verification of stores items. Monthly reconciliations are also being performed. A inventory policy is being drafted as part of the Supply Chain Management policies and procedures.

54. Going concern

The Msunduzi Municipality currently are experiencing serious financial challenges which have necessitated Provincial Government intervention in terms of section 139 (1) (b) of the Constitution. The financial crises came to be because of poor controls, rampant corruption amongst senior staff, failure to prepare the mid-year adjustments budget and the 2010/11 budget in time and other issue relating to poor internal control and procedures, which has placed tremendous pressure on the municipality's liquidity ratio and financial sustainability.

Although certain of the strategies have already being implementation by the Provincial Intervention Team, it is the assumption that it will take sometime for the municipality to recover.

The Provincial Intervention Team appointed by the Provincial Department of Corporate Governance drafted four Strategies consisting of a Financial Strategy, an Infrastructure Development Strategy, a Community Service Strategy and a Good Governance Strategy.

With regards to financial strategic is the following financial measures being implemented to achieve the turn around strategic of the municipality:

- 1.The MIG funds for the 2010/11 financial year is reprioritised in order to use funds for revenues enhancement projects including proper contract management
- 2.A comprehensive Debt Collection strategy has been developed to ensure a much more effective debt collection. This would result in increased levels in debt collection.
- 3.A project of fortifying electricity meters starting with high risk areas is implemented as a way of reducing electricity losses, thefts and illegal connections
- 4.A project for installing water district meters in order to establish water losses in the various distribution regions will be implemented in order to cope with the current water losses.
- 5.A new tariff structure has been developed for electricity and such structures will also be developed for water, sewer and refuse so that the correct revenue may be billed and collected. The tariff structures will take into consideration the funding of expenditure required for 2010/11, budget deficit for 2009/10 and affordability to the community.
- 6. The indigent policy will be reviewed so that only those who are legible actually benefit.

Consolidated Annual Financial Statements for the year ended 30 June 2010

Notes to the Consolidated Annual Financial Statements

	Gro		Munic	cipality
Figures in Rand	2010	2009	2010	2009

54. Going concern (continued)

- 7. Priority will be given to the updating of the valuation roll so that the municipality's revenue may be levied accurately, lesser objections and increased collections. A fully fledged exercise to recover debt will be in place from 1 July 2010.
- 8. Feasibility studies are currently performed in order to consider the viability of the airport, market and forestry.
- 9. Where need be, will loose relationships with several institutions be formalised in order to save cost.
- 10.Land or other assets identified can be disposed of to generate additional revenue for capital projects, R 20 million worth of land will be sold in the 2010/11 financial year. These sales were identified earlier in the 2009/10 financial year.
- 11. Council will reduce council funded projects to a minimal and maximise utilisation of external funding.
- 12. The Budget will focus on service delivery provision and nice to have items is eliminated from the budget.
- 13.An effective Supply Chain Management will be in place to eliminate abuse, corruption and theft.
- 14. Policies which were draining the council's cash, such as Locomotion, Overtime and Travel and Subsistence is being reviewed.

	The Mounduri	Municipality and its r	nunicipal ontitu : A	Appendix	<u>k - E</u> edget (Revenue and Expenditure) for the year ended 30 June 2010
	Actual 2010	Budget 2010	Variance 2010	Variance 2010	Explanation of Significant variances greater than 10% versus Budget
Description	R	R	R	%	
Revenue					
Property Rates	420.030.162	405,500,000	14.530.162	4	
Property Rates - Penalties and Collection Charges	20,284,950	33.906.200	(13.621.250)		Due to the change in rating, change from municipal valuation to MPRA. The impact could not be assessed.
Service Charges	1.159.300.660	1,132,740,512	26,560,148	(40)	Due to the change in raining, change from municipal variation to win ten. The impact could not be assessed.
Sale of Electricity	816.172.839	803,737,192	12,435,647	2	
Sale of Water	213.633.343	209.638.005	3,995,338	2	
Sewerage	76.207.067	69.176.113	7.030,954	10	Budget modelling was not conducted. The variation on sewerage service charges stems from the increase in water sales which impacts on sewer consumption.
Refuse	53,287,411	50,189,202	3,098,209	6	
Rentals Received	15,571,328	18,298,212	(2,726,884)		No analysis was done on the debtors, a percentage increase was applied by the previous Chief Finance Officer.
Interest earned - External Investments	5,453,509	12,682,277	(7,228,768)		The decrease is due to lower interest rates as well as the cash flow crisis that Msunduzi is faced with resulting in less funds being invested.
Interest earned - Outstanding debtors	22,464,504	19,811,757	2,652,747	13	The increase in interest is due to non payment of debt, hence
Fines	7,084,343	8,808,324	(1,723,981)		Due to termination of TMT contract production (fines) in terms of prosecuting has dropped.
Income for Agency Services	1,435,383	500,000	935,383		This revenue is generated by the fire deparment for emergency call-outs. It is so difficult to do a proper projection based on the nature of revenue.
					Business Units processed journals towards the end of the financial year without budget at the beginning of the year. In the 2010/2011 financial year provision has
Governments Grants & Subsidies	355.033.160	281.665.510	73.367.650	26	been made for capital grants and subsidies.
Public Contributions & Donations	-		-	-	
Other Income	499,511,441	848,339,541	(348,828,100)	(41)	
Total Revenue	2,506,169,440	2,762,252,333	(256,082,893)		
Expenditure Executive & Council	62,839,353.55	65,665,577.00	2,826,223.45	4.30	
Executive & Council	62,839,353.55	65,665,577.00	2,820,223.45	4.30	A new vote was created to balance the adjustments budgey shoortfall of R 572m for the bad debts provision due to high levels of expenditure and low collection
Budget & Treasury Office	530,226,012.68	1.084.043.667.00	553.817.654.32	51.09	A new vote was cleated to braine the adjustments budgey shortial of R 972m of the bad debts provision due to high levers of expenditure and low confection levels of revenue. (As per the Provincial Intervention Task Team)
Corporate Services	82.228.986.04	87.862.732.00	5.633.745.96	6.41	Tevers of revenue. As per the movincial intervenuor hask reality
Planning & Development	63.695.903.71	63.724.205.00	28.301.29	0.04	
Health	39.627.951.85	39.947.466.00	319.514.15	0.80	
Community & Social Services	49.852.309.59	48.499.679.00	(1,352,630.59)	(2.79)	
Housing	62.127.175.61	54,581,756.00	(7,545,419.61)	(13.82)	DOH Funding- Expenditure exceeded the budget due to excelerated housing delivery.
Public Safety	104,979,253.52	106,666,204.00	1,686,950.48	1.58	
Sport and Recreation	50,390,226.03	50,399,992.00	9,765.97	0.02	
Environmental Protection	60,453,736.51	61,665,517.00	1,211,780.49	1.97	
Waste Management	166,170,520.12	168,047,707.00	1,877,186.88	1.12	
Waste Water Management	36,984,566.37	36,922,375.00	(62,191.37)	(0.17)	
Road Transport	174,015,686.09	171,115,189.00	(2,900,497.09)	(1.70)	
Water	279,281,205.31	239,154,958.00	(40,126,247.31)		Budget for water purchases was not in line as per business units submission however an attempt was made during the budget adjustment to increase the
Electricity	981,414,823.49	862,046,649.00	(119,368,174.49)	(13.85)	Variance attributed to the shortfall for Electricity Bulk Purchases whereby an attempt was made to adjust the allocation during the budget adjustment process.
Other/Air Transport	8,812,083.51	8,213,962.00	(598,121.51)	(7.28)	The spiral had at 6 years and the spiral to the spiral and the NOT and had a few spiral and the
Other/Forestry	9,303,546.61 16.626.990.14	4,649,983.00 13.787.441.00	(4,653,563.61)		The original budget figures were not those submitted by the service provider, NCT and hence the true figures are completely different. This was an exceptionally good year with an increase in produce prices and an active new Agent on the market.
Other/Markets Other/Licensing & Regulation	2,938,550.14	2,937,507.00	(2,839,549.14)	(20.60)	This was an exceptionary good year with an increase in produce prices and an active new Agent on the market.
Less: Inter-Dept Charges	(39.879.250.52)	3.617.285.00	43.496.535.52		Over recovery on charge-outs on what income and expenditure was budgeted for.
Total Expenditure	2,742,089,630.35	3,173,549,851.00	431,460,220.65	1,202.40	To ver recovery on charge-outs on what income and experiolitie was budgeted to .
Total Experiditure	2,742,009,000.00	3,173,049,001.00	731,400,220.05	I	
Operating Surplus/(Deficit)	(235,920,190.84)	(411,297,518.00)	175.377.327.16	1
