1. MUNICIPAL VISION

Whilst we all agreed with our vision as below as it defines our current status in the Kingdom of KwaZulu Natal and inspiring us to strive for our City to be the City of Choice, this is an idea that we are aspired for together with community based structures, Non Governmental organizations, business sector, labour movements, traditional leadership, religious sector, youth and women formations, sport and cultural groups, institutions of higher learning, civic organisations and other interest groups. We strive to maintain and model our City Vision in order to be:

VISION 2035

WE ARE A CITY OF CHOICE SECOND TO NONE!

UMBONO KA-2035

SIYI DOLOBHA LEKHETHELO JIKELELE

1.1. VISION STATEMENT

Since we understand the mammoth tasks, challenges, potentials and capabilities that are existing in the City to enhance and where possible to turn around the architectural designs, planning and socio-economical limitations that were engineered and imposed through the systems of the previous government on the lives of South African society, this vision attempts to acknowledge our existing institutional and natural treasures, cultural diversity as our heritage and poses as a beacon of hope for all peace loving South Africans.

Our vision statement below must also be read alongside with our long term planning vision which is based on our invitation to all citizens of the City to begin to dream big about what will it takes to be a City of Choice and what our contributions thereof. Our invitation to all role players is to begin to Imagining Pietermaritzburg Beyond 2035 Vision whilst our short term realistic vision below represents our quantum leap towards our long term vision statement.

VISION STATEMENT

“A safe, vibrant City in which to live, learn, raise a family, work, play and do business”

UKUCHAZWA KWALOMBONO

“Idolobha elinokuphepha nokudlodlobala, ongahlala, ufunde, ukhulise umndeni, usebenze, udlale futhi ukwazi nokuhweba ngokukhululeka kulo”

1.2. MISSION STATEMENT

To ensure that the Municipality function effectively and in a sustainable manner in order to deliver services of excellence to the community.

Organizational Goals

- A healthy citizenry with access to affordable, quality health care.
- A safe city with low crime levels and quality living areas.
- An efficiently managed, financially viable and sustainable, city
- A well governed city underpinned by meaningful public participation
- A vibrant economic centre, attracting investment, supporting business development and creating jobs
- A city where all have access to habitable human settlements – decent houses, clean water and proper sanitation
- An environmentally sustainable and healthy city
- A well planned, spatially integrated city

2. STRATEGIC OBJECTIVES

2.1. FINANCIAL VIABILITY AND MANAGEMENT

Plan 1: Build a strong institutional and financial base and sustainability

Strategic Objective:

1. To promote sound financial management and reporting, effective budgeting and revenue enhancement

2.2. LOCAL ECONOMIC DEVELOPMENT

Plan 4: Create an environment for economic growth and development to enhance the municipal contribution to job creation and sustainable livelihoods through a Local Economic Development Plan

Organizational Objectives:

2. To stimulate economic growth through job creation, promotion of BBBEE, development of SMME's, co-operatives and agri-industry
3. To promote sustainable tourism.
4. To promote and stimulate business investment, retention and expansion

2.3. BASIC SERVICE DELIVERY AND INFRASTRUCTURE DEVELOPMENT

Plan 2: Improve quality living environments through basic access to water, sanitation, electricity, waste management, roads and disaster management

Strategic Objective:

5. To improve access to affordable housing and facilities that promote quality living areas.
6. To improve accessibility and maintenance of habitable human settlements and facilities
7. To provide a responsible facility for the disposal of waste in a manner that is socially and environmentally acceptable.

2.4. GOOD GOVERNANCE AND PUBLIC PARTICIPATION

Plan 5: Build a cohesive system of governance that translates deepening democracy into a meaningful sense to public participation

Strategic Objectives:

8. To develop an efficient, effective and accountable administration
9. To promote full participation of all stakeholders in the planning, implementation and decision making of the municipality.
10. To improve basic literacy of society with special focus on targeted groups

2.5. INSTITUTIONAL DEVELOPMENT AND TRANSFORMATION

Plan 5: Build a cohesive system of governance that translates deepening democracy into a meaningful sense to public participation

Strategic Objectives:

11. To build a productive, knowledge based organization that will respond adequately to the needs of the community and the city.
12. To develop the capacity and safety of our workforce.

2.6. ENVIRONMENTAL PLANNING & SOCIAL SERVICES

Plan 3: Provide safe, healthy and secure environment (environmental health and public safety)

Plan 6: Ensure integrated, sustainable spatial planning and development (planning, SDF, EMP)

Strategic Objectives:

13. To ensure that all communities have access to social Services
14. To contribute towards a health, safe and secure environment with special focus on children, youth, women and people with disability
15. To promote sports and recreation, and arts and culture
16. To promote a long term development vision and harmony in planning

3. OUR CITY GUIDING PRINCIPLES

To underpin all development activities:

- Ubuntu : Humanity, I am what I am because of who we are
- Hard Working : Passionate and committed to one's work
- Competence : Having requisite skills, knowledge, behavior and appropriate attitude in executing one's work effectively and efficiently
- Integrity : To maintain and demonstrate good governance and honesty

CLLR CHRIS NDLELA
CITY MAYOR

FOREWORD BY THE HONOURABLE MAYOR CLLR CHRIS NDLELA

As I write this foreword to the Integrated Development Plan for 2012/13 – 2016/17, I am mindful of the tremendous challenges that face our city and municipality, as we move forward into planning strategically for the next five years and beyond. Not only are we faced with huge service delivery backlogs and rising unemployment and poverty, but we are faced with dealing with serious financial issues that have affected our performance as a municipality.

This Integrated Development Plan which is the municipality's framework for development for the next five years, and for 2012/2013 in particular, comes at a time when the national government, through the State President Jacob Zuma and other senior government ministers, puts emphasis on the need for job creation and the eradication of poverty. The KZN Provincial Government is also in the process of implementing a series of projects to improve the quality of life for its citizens, like the Operation Sukuma Sakhe project. In this context then, our plans must reflect a balance between addressing service delivery backlogs and improving the conditions in which our people live, and social and economic development.

The municipality through consultation and interaction with various stakeholders, has agreed to focus the delivery programme for the next five years on a six point plan based on eight key organizational goals which are reflected in the document. We believe that this plan will go a long way to addressing the key national and provincial delivery priorities, and in so doing, our own service delivery and development priorities. As we move forward into the next five years we must ensure that we translate our vision and goals into a workable plan, that sufficient funding is available for its implementation, and that we put measures in place for monitoring and evaluating our performance.

I will be leading the way for our municipality to reach out to the community at large, civil society organizations, the business community and tertiary institutions to encourage active participation in the delivery of this plan, so that we can take responsibility collectively for the development of our city and its citizens. Through your participation the municipality will achieve its goal of being more accountable and transparent. If we all work together as one, we will surely deliver a city that we can all be proud of – “a safe, vibrant city in which to live, learn, raise a family, work, play and do business”.

CLLR THOBANI ZUMA DEPUTY MAYOR

MR. MXOLISI A NKOSI
CITY MANAGER

FOREWORD BY MSUNDUZI CITY MANAGER: MXOLISI NKOSI

I have taken office as the Municipal Manager at a point in time when the Msunduzi Municipality is at a crucial cross-road in the lifetime of its existence. As we are all well aware that since March 2010, the municipality has been under a Section 139(b) intervention in terms of the Constitution of our country. In a nutshell, a section 139(b) is when all **executive and administrative** authority, previously vested in the Council and the Accounting Officer, is vested in a ministerial representative, commonly referred to as an Administrator, as identified by the MEC for Cooperative Governance and Traditional Affairs.

At a Council meeting held on the 15th December 2011, it was announced by the Head of Department from CoGTA, Ms N Qhoboshiyane that the MEC has officially withdrawn the intervention that had been invoked in terms of Section 139(b) of the Constitution. This was a turning point in the history of the Msunduzi Municipality as this announcement, by implication, was a display of confidence, on the part of the MEC, that the Municipality has successfully come through the turbulent motions of the intervention process and is now capable, both at a strategic and operational level, to steer the ship on its own.

One of the influencing factors that led to the withdrawal of the intervention was the fact that, under the leadership of the then Administrator, Mr. Sibusiso Sithole, Council had successfully completed the process of appointing a Municipal Manager- this was one of the key outputs of the intervention process and it is here where the cross-road begins- the cross over from a municipality that has been under administration for the past two (2) financial years to a municipality that now has to stand on its own two feet and be true to its constitutional mandate of being a developmental local government.

I am most humbled to have been appointed as the captain of this ship that will see the municipality turn this historical tide. Of course, being the captain comes with its fair share of accountability and responsibility. The Municipal Finance Management Act (MFMA) defines it as the Accounting Officer. My primary role as the municipal manager is to provide strategic leadership that will result in the successful implementation of programmes and projects at operational level. This role is further expounded by the fact that it is at this crucial stage whereby the Municipality is in the post-administration phase and the citizens of this City are an anxious audience awaiting to be recipients of efficient service delivery and community upliftment. My strategic approach will therefore focus on compliance, service delivery, revenue generation and the depoliticization of the organization.

Local government, within a democratic dispensation, has had to be regulated through various legislation and it is my job, in my role as the Accounting Officer, to ensure compliance with these laws and regulations. It is my view that we must not see the laws applicable to the functioning of local government as restrictive, but rather as a means to regulate the way in which we do business in order to eliminate the elements of fraud and corruption.

The Constitution of our Country clearly outlines the service delivery obligations that rest upon the sphere of local government. The Constitution goes further to say that service delivery must be developmental in nature such that the role of local government is not just limited to the provision of services but that that such provision must be developmental in nature. This involves, amongst other things, ensuring that all sectors of the community have access to at least the minimal level of basic services. This will require a rigorous move towards eliminating all existing backlogs and ensuring that the poorest of the poor have access to basic services through our indigent support programmes.

Besides the developmental role that local government is called to play, municipalities are also expected to maintain existing infrastructure which, in most cases, is aged and in a state of ill repair. The third generation Integrated Development Plan (IDP) therefore needs to reflect a balancing act between providing access to basic services to new recipients and the maintenance of existing infrastructure to avoid power cuts, water leaks, pot holes, etc.

Underpinning successful service delivery is the availability of funds to do so. Whilst a substantial amount of funding is made available through the National and Provincial fiscas through conditional grants such as the Municipal Infrastructure Grant (MIG) and others, the only way that the Municipality will realize service delivery to its fullest potential is by ensuring optimal revenue generation by collecting payment due for services rendered by the Municipality. In addition to debt collection, the municipality needs to develop and implement a Revenue Enhancement Strategy that will increase our reserves to enable us to plan and implement capital projects beyond the provision of grant funding.

Central to the successful implementation of service delivery within available financial resources and according to the legislative prescripts, is managing the administrative and political interface which bedevils most municipalities within the country. When managed correctly, the relationship between the administrative and political forces within the municipality serves as a catalyst for accelerated service delivery to the communities whom both officials and politicians alike are here to serve.

SECTION A: EXECUTIVE SUMMARY

Development in South Africa is between developed urban areas and uneven developed peri-urban and rural areas. Central to our democracy, peace and freedom is the provision of service delivery, poverty eradication and economic growth that will result to reduction of unemployment and better life for all citizens.

1. INTRODUCTION

All over the world, every citizenry as colorfully as they are, dream of living and breathing in an environment and society free from diseases, hunger, fear, crime, accidents, violence, discrimination, poverty, hatred and lifelessness. This is the background at which all municipalities and cities are striving for in shaping their visions and strategies to bring about an environment worth living for and a society that celebrates its life and success stories.

It is our purpose for existence as the City of Choice to make strategic choices that will make us champions of a cooperative governance vision for a better life for all. Our strategic roadmap that we share with our strategic partners reflects and mirrors our commitments to service delivery, eradication of poverty and unemployment as well as to re-Imagining Pietermaritzburg Beyond a vision 2035; this is the life beyond this IDP. Any strategic planning must be molded in such a way that our Integrated Development Plan does not become a wish list but a realistic plan with specific targets and indicators that forms the City's delivery package for five years and beyond. This journey ahead of us cannot be realized without clear and specific sector plans that are collectively planned and developed with specific targets. Gone are those days where the role of local government leadership, be it politically or administratively was viewed more ceremonially than running a very serious business that contributes towards changing societal life in its totality. The municipal life is guided by legislation and its performance is measured through Performance Management System (PMS) which is guided by balance score-card perspective and Service Delivery and Budget Implementation Plan (SDBIP)

In order to bring common understanding to various stakeholders and to demonstrate our commitment towards sustainable and integrated development and growth of our economy, society and environment; the Integrated Development Planning forms the basis of our development strategy and approach. The Integrated Development Plan then becomes our guiding development plan packaged and reflected according to the five national Key Performance Areas (KPA) and provincial KPAs. The national KPAs are used here to define the level and measure of development and performance of our City:

- **Good Governance and Public Participation** – we are accountable to the city' citizens, various stakeholders and different levels of government through various assessment tools. Assessments conducted by the MEC for the Department of CoGTA, AG and other stakeholders are intended to indicate how and what level of involvement of various stakeholders, particular in planning, development and implementation of sector plans. It is expected that the municipality will also reflect its social transformation agenda and programs with specific bias towards vulnerable groups such as children ,youth and women and tangible programs that are aimed at promoting social integration, national pride, and social cohesion and human rights culture as pronounced in the constitution. Access to community amenities and eradication of poverty through interventions are deliberated further in our five year implementation plan

- **Local Economic Development (LED)** develops a clear plan and strategies through various stakeholders' involvement to ensure business confidence in the City and alignment of the budget and the IDP.
- **Municipal Transformation and Institutional Development** – the appropriateness of our transformation agenda with regards to our institutional arrangements regarding Human Resource Planning (HR Strategies) equity targets, organizational performance, skills development and interventions to improve the capacity of the municipality, etc.
- **Basic Service Delivery and Infrastructure Investment** form the basis of our infrastructure investment plan with clear programs of maintenance, targets and strategies that are reviewable annually. This plan underpins any innovations and programs for Local Economic Development, i.e. any lack of well planned and maintained infrastructure and infrastructural development plans mean less of economic growth
- **Financial Viability and Management** will reflect our internal control systems to ensure compliance and accountability of the municipality through our proper sound financial management plan and systems
- **Spatial Development Framework (SDF)** encapsulates the translation of our vision and strategies to indicate spatial expression and application of municipal sector plans. This will be explained under the SDF section and the progress in the refinement of the SDF.

Having labored on the City's constitutional mandate, in March 2010 the Msunduzi Municipality had serious financial crisis and that prompted the MEC for CoGTA in KZN to institute the intervention in terms of Section 139 (b). The intervention was prompted by among other things poor internal controls, hem point corruption among staff,.The MEC for COGTA appointed the Provincial Intervention Team (PIT) during March 2010 to assist to turn around the financial crisis of the Municipality and to develop an overall business plan. When the PIT took over, it was reported that the Municipality was sitting at R521m deficit and serious liquidity crunch (cash flow) due to the fact that the municipality decided to finance road projects to a tune of R111m and payments towards the remote metering system which was unbudgeted.

On developing a municipal turn-around strategy by PIT, huge savings were made based on the analysis of expenditure patterns (expenditure control committee was set up as well as a revenue enhancement committee) and a number of senior staff were suspended for further investigations on allegations of corruption and mismanagement.

In December 2011, the administration imposed according to section 139 (b) of the South African constitution was lifted on the basis that the municipality was out of the ICU and High Care of the hospital and currently striving to leave the General Ward to pursue a Financial Recovery Plan which intends to translate a Municipal Turnaround Strategy into operation plans.

2. LOCALITY AND OPPORTUNITIES

The Msunduzi Municipality commonly known as Pietermaritzburg or the "City of Choice" is located along the N3 at a junction of an industrial corridor from Durban and Pietermaritzburg and an agro-industrial corridor stretching from Pietermaritzburg to Estcourt. Regionally is identified at the cross section of the N3 corridor and Greytown Road corridor to the north, a tourist route to the Drakensburg and Kokstad Road to the South. It is the second largest city within KwaZulu-Natal and a contributor towards 80% of the GDP by 9 largest cities in South Africa.

It is the Capital City of the Kingdom of KwaZulu-Natal, and the main economic hub within uMgungundlovu District Municipality. Its location has a strong influence on regional channels of investment, movement and structuring of the provincial spatial framework for growth and development. It is the choice of best schools, technikons and university; home of Comrades Marathon, the Duzi marathon, the Midmar Mile, the Royal and Garden Shows and Art and Cars in the Park; choice of architectural heritage and close association with highly respectable history of individuals such as Gandhi, Mandela and Paton.

Pietermaritzburg is vibrant African City set in the breathtakingly beautiful KwaZulu-Natal Midlands. Steeped in history that speaks mainly IsiZulu, Afrikaans, English and Indian influences, and a growing number of IsiXhosa speaking after the incorporation of Umzimkhulu into KwaZulu Natal, with German influence on the far eastside of the City and a significant number of Sotho speaking within the area on the southwestern towns, the City is a cultural treasure-trove brimming with diversity and colour.

First attempts to establish a formal town were made by Afrikaans Settlers in 1838. The IsiZulu speaking people referred to Pietermaritzburg as “uMgungundlovu”, the “Place of the Elephant” and more appropriately the “Place of the King” signifies the Capital City status of the City. It is believed that the City was named after the Voortrekker leader Piet Retief and Gerrit Maritz. Actually, it is likely that the City was named after Piet Retief because his second name was Maritz. It is also believed that uMgungundlovu was the Head or Kraal (Isigodlo) of King Dingane.

This is the only City in the world that was declared a Capital City by a set of four different governments: In 1838, it was declared as Voortrekker Republic; during the British annexation of Natal and Cape under the Union of South Africa in 1910; in 1961 under the Nationalist government and recently under KwaZulu-Natal Provincial Government in 2004. The City is located at 660 metres above the sea level.

3. DEVELOPMENT CHALLENGES FACING THE CITY OF PIETERMARITZBURG

The City of Pietermaritzburg is not unique from other cities in the world that are caught in the vicious cycle of balancing the escalation of urban and rural developmental needs and assets management challenges. It is our belief that in a normal environment where the City is confronted by both new developmental and maintenance needs.

3.1. MSUNDUZI MUNICIPALITY TURNAROUND STRATEGY AND FINANCIAL RECOVERY PLAN

Among the priority areas raised by the PIT, and subsequently confirmed by management and councilors as well as relevant stakeholders through a series of workshops, the SWOT analysis was conducted and the issues raised were discussed and agreed to as priority areas:

- **Status Quo:** through situational analysis the identification of poor service delivery, inadequate controls, failure to conform to legislative requirements, policies, procedures, processes and in general governance matters
- **Four Turnaround Strategies were mooted:** consisting of a Financial Strategy, a Infrastructure Development Strategy, a Community Service Strategy and a Good Governance Strategy
- **Functional Areas:** were identified within these Strategic intents in order to draft an appropriate organogram for the municipality. The functional areas were aligned with the Turn-Around Strategy
- **Political Structure:** was developed in order to deal with the strategies as set out and portfolio committees were formed through that restructuring process
- **Administrative Structure:** was developed in order to implement and manage the strategies and through the implementation process of the structure, a number of anomalies were identified and the municipality resolved to revert to the 2008 organizational structure with some functionaries particular in Finance Department and other strategic areas retained. The review for the IDP 2012/13 to 2016/17 will then ensure a flat structure in order to ensure optimal performance within the administration.
- **Status quo of the Functional Areas:** problems and shortcomings were identified in the functional analysis stem from the SWOT exercise. The SWOT analysis revealed that the functional areas were not operating as a coherent unit and therefore rendered the municipality dysfunctional as a result of inadequate control and mismanagement. It is envisaged that the review for the organizational structure will be conducted by an independent agency or provider to avoid vested interests and to ensure that the structure is reviewed based on service delivery processes and outcomes and outputs.
- **Allegations, Investigations, Disciplinary-Civil and Criminal Action:** investigations on all allegations of mismanagement, fraud and corruptions are undergoing. This will continue until such time as deemed necessary. Senior staff suspended for further investigations into serious allegations. It is the intention of the Municipality to institute civil and criminal charges against the perpetrators where possible.
- **The City Development Strategy (CDS):** would be developed according to a list of terms of reference which would be developed by a team, and through those terms of reference, the vision would be revised as vision 2055. Through various stakeholders involvement, this process can take almost twelve months to complete.

- **Budgets, Financial Recovery and Revenue Enhancement:** The Draft Budget would be drafted in order to support the financial recovery, revenue enhancement and cost containment strategy and were developed to stabilize the financial affairs of the municipality. The budget for 2012/13 would be based on municipality affordability, expenditure control and cash-backed principle. All statutory increases were allowed for in the budget and the end result of the revenue required was used to determine tariffs, provisions were made for non payment of services as well as for a surplus to cater for seasonal estimated costs.
- **Action Matrix Recovery Plan:** A recovery plan was drafted in the form of action matrix with cost indications. It is envisaged that the Business Plan will run over a period of 3 years with a total cost estimated at R498 million.

3.2. STRATEGIES TO MITIGATE CITY CHALLENGES

Through the IDP review process, each business unit reviewed its strategies, projects and priorities based on the requests from various stakeholders within our communities and the Millennium Development Goals below were used as our targets to measure our performance. Our analysis of our strategies and resources available enabled the Municipality to present some of our strategies in line with the national targets. The Following Millennium Development Goals (MDG's) as adopted by the United Nations (UN) guided the South African Government to develop the National Goals for the Country:

- Eradication of experience poverty and hunger;
- Achievement of universal primary educators;
- Promotion of gender equality and empowerment of women;
- Reduction in child mortality;
- Improvement of material health;
- Combating HIV/AIDS, malaria and other diseases;
- Ensuring environmental sustainability; and
- Developing a global partnership for development.

Emanating from our analysis in section F under Economic Development business unit, the Municipality has developed a number of strategies that will underpin our Local Economic Development Plan. Thus far, our District Municipality in partnership with other municipalities within the district developed the LED framework and finalized the City Local Economic Development Plan will be fine tuned around the uMgungudlovu District LED framework.

Specific programs and KPIs are reflected in section I in the IDP that deals with the Organizational Performance Management System to ensure that the City is on the right track to endavour to halve unemployment by 2014. Part of finalizing the economic plan, beside our analysis of the City's economy in the IDP, specific interventions will be quantifiable in terms of our targets per annum and projected estimates to realize our targets by 2014. The skill development strategies that are projected in section I in terms of specific objectives and KPIs are integral part of our LED strategies.

- Introducing effective and sustainable poverty reduction strategies Povert reduction strategies cut across various strategies in the organization, a consolidated povert reduction strategic program will be mooted during this financial year and clear targets would be set.
- By 2010 – every individual / household should have access to clean running water and sanitation. Basic water within 200 m for all by 2008 will be provided according our service delivery strategies. Since water provision is a moving target like other service delivery targets, then the provision of basic water to all residents would be revised according to the current backlog.
- By 2012 – every individual / household should have access to electricity. Electricity – make 9 840 electrification connections by 2012/13 [that will be an average of 1 640 per annum].

- By 2007 – the bucket system must have been eradicated; but unfortunately the Municipality missed a small fraction of this target and only fourty residents have been identified recently to be attended to during this current financial year and 2012/13
- Fortunately, the City dealt with this project quiet earlier and it was reinforced by our VIP projects that caters mainly for rural communities
- Universal provision of free basic services This was long time implemented and the list grows day by day. Depending on the growth of our economy and reduction of unemployment, we hope that more and more people that are classified as indigent will find themselves back into the economic mainstream and be able to afford basic life style.
- Access to housing for all by 2014, Housing to roll out 2 500 low-income houses per annum. -Housing:to facilitate development or construct 1 000 housing units for middle to high income groups in Pietermaritzburg.Housing to facilitate 400 middle-income rental units by 2010/11 and beyond, ie.100 per annum. Housing: Subdivide and sell 2 000 stands by 2013/14, ie. 290 stands per annum.
- Sanitation for all by 2010. Sanitation: to provide sanitation to all by 2011/12 [off the National target by 2 years].
- Upgrading of roads: upgrade all gravel roads in Edendale and Vulindlela in 25 years. In order to ensure accessibility of communities inside out, could mean a moving economy, therefore, our reflection on 2008/09 capital budget, our main priorities then were based on road upgrades and that intervention links directly with izimbizo community needs.

Having listened to the chief commander the Honourable President JG Zuma, the State of the Nation Address presented the following 10 priority areas for the government and country as a whole;

10 Priority Areas from the Medium Term Strategic Framework (2009-2014)

1. Speed up Economic Growth and transform the economy to create decent work and sustainable livelihoods.
2. Introduce a massive programme to build economic and social infrastructure.
3. Develop and implement a comprehensive rural development strategy linked to land agrarian reform and food security
4. Strengthen the skills and human resources base.
5. Improve the health profile of all S. A.
6. Intensify the fight against crime and corruption.
7. Build cohesive, caring and sustainable communities.
8. Ensure sustainable resource management and use
9. Pursue African advancement and enhance international corporation
10. Build a developmental state, by improving public services and strengthening democratic institutions.

Through the IDP review, the municipality reflected on these 10 priority areas and recommended an alignment of Sector Plans with a view to reconstruct the GEDI (Greater Edendale Development Initiative) and Vulindlela Rural Development Initiative into development agencies and to align with the new National and Provincial Departments and government initiatives to facilitate such initiatives at the local government sphere.

Aligning the Municipal 10 Point Plan (Municipal Turnaround Strategy) in relation to the Medium Term Strategic Framework. The Msunduzi Turnaround strategy was developed along the following Local Government Turnaround 10 Point Plan:

1. Improve the quantity and quality of municipal basic services to the people in the areas of access to water, sanitation, electricity, waste management, roads and disaster management
2. Enhance the municipal contribution to job creation and sustainable livelihoods through Local Economic Development (LED)

3. Ensure the development and adoption of reliable and credible Integrated Development Plans
4. Deepen democracy through a refined Ward Committee model
5. Build and strengthen the administrative, institutional and financial capabilities municipalities.
6. Create a single window of coordination for the support, monitoring and intervention in municipalities
7. Uproot fraud, corruption, nepotism and all forms of maladministration affecting local government
8. Develop a coherent and cohesive system of governance and a more equitable intergovernmental fiscal system
9. Develop and strengthen a politically and administrative stable system of municipalities
10. Restore the institutional integrity of municipalities

In developing the under-mentioned priority areas, the Local Government 15 priorities as following were taken into considerations and a number of possible interventions were identified and recommended.

1. Accelerate the service delivery programme on basic services; water, sanitation, electricity, human settlements, refuse removal, roads etc
2. Address immediate financial and administrative problems in municipalities
3. Regulation to stem indiscriminate hiring and firing
4. Eliminate fraud and corruption in municipalities
5. Ensure and implement a transparent municipal supply chain management system
6. Strengthen Ward Committee capacity and implement new ward governance model
7. Include national and provincial commitments in IDPs
8. Differentiated responsibilities and simplified IDPs
9. Funding and capacity strategy for municipal infrastructure
10. Restructure the Municipal Infrastructure Grant (MIG) and Local Government Equitable Share
11. Intergovernmental agreement with metros and 21 cities on informal settlement upgrade
12. Rearrange capacity grants and support programmes, including Siyenza Manje
13. Upscale Community Works Programme
14. Implement Revenue Enhancement – Public Mobilisation campaign
15. Launch ‘good citizenship’ campaign, focusing on governance values to unite the nation

Summary of developmental challenges or priorities raised by the Premier of the Province of KwaZulu-Natal, Dr Zweli Mkhize during his inauguration, where he highlighted the following priorities:

1. Develop a plan of action in relation to governance and principles of continuity in change.
2. Empowering and strengthening government institutions including Local Government and Local Economic Development.
3. Address special needs in commercial and rural agriculture through mobilization of required resources such as capital, skills and training.
4. Strengthening education, social and health care services.
5. Aligning the Provincial economy with the rest of the country and the world through technological skills, trade, services, investments, etc.
6. Transforming the bureaucratic nature of public administration to a responsible government that is driven by objectives and targets.

The State of the Nation Address by President JG Zuma.

President JG Zuma of the Republic of South Africa addressed National Parliament and the nation as a whole in Parliament, Cape Town in the evening of February 2012. Among the critical development items he covered in his speech, the following are worth mentioning;

- **Job creation:** In 2011 365 000 new jobs created and he acknowledged that despite government' efforts, we are not off the woods yet
- **Mining:** The President mentioned a beneficiation strategy, and clarified that there were no promises for nationalization. He went on saying that the government was still committed to creation of favourable and globally competitive mining sector, promoting industry to attract investments and achieve both industrial growth and much anticipated transformation .
- **Infrastructure development:** He mentioned five major geographical focused programmes in various provinces that would intend to connect mining, transport and agriculture
- **Housing:** R1 billion guarantee fund would be made available to promote access to loans for people earning too little to qualify for home loans and too much for RDP house and this would commence in April 2012
- **Electricity:** The President emphasized the need to save electricity tightly until the Medupi and Kusile power stations are operational. He also eluded to the government commitment to research to renewable energy sources
- **Education:** The government emphasised its commitment to better education. He commended the upward swing on matric pass results and that Grade R entrants are rising, and raised a concern about 120 000 seven to 15 year old that are not in schools
- **Health:** The President commented about the government commitment to refurbishment to hospitals and nurses' homes, as well as the fight to reduce non-communicable diseases like diabetes, heart diseases and hypertension.
- **Land reform:** The government acknowledged that the willing-seller, willing buyer principle has not worked and only 8% has been achieved from 30% 2014 target, and that the land reform green paper was released last year
- **Labour brokering:** The government seeks to eliminate any forms of abuse practice and hoped that a common ground would be reached in due course
- **Social cohesion:** A number of heritage sites would be revamped including the following-the graves for heroes of struggle, the presidential guest house in Pretoria which was renamed after former ANC leader Sefako Makgatho and the diplomatic guest house renamed after Johnny Makhathini

The President declared a war on potholes and a fund was set aside to be used to sustain our infrastructural assets, the municipality can explore ways of accessing these funds.

State of the Province Address

Premier called for commitment from the nation to work together to achieve our goals by addressing the following priorities;

1. Rural development/Agrarian reform and food security
2. Creating decent work and economic growth
3. Fight crime
4. Education
5. Health
6. Nation building and Good Governance

A concerted effort between private and public sector partnerships were fundamentals in reaching the goals and vision of our beautiful South Africa.

4. THE PURPOSE OF THE IDP

4.1. CONSTITUTIONAL AND LEGAL DICTATES

The Constitution of the Republic of South Africa puts into context the role that local government has to play within the broader spectrum of government, governance, democracy and development. Of particular importance are:

- Chapter 3: Co-operative Government
- Chapter 7: Local Government
- Chapter 10: Public Administration
- Chapter 12: Traditional Leaders
- Chapter 13: Finance
- Part B of Schedules 4 & 5

Furthermore, the Constitution has given rise to a range of enabling legislation, critical to the transformation of local government. For example, inter alia:

- Municipal Structures Act, 1998;
- Municipal Systems Act, 2000;
- Municipal Finance Management Act, 2003;
- Municipal Property Rates Act, 2004; Etc.

4.2. THE REVIEW OF THE IDP IN ACCORDANCE TO STATUETTES

In accordance with Chapter 5 of the Municipal System Act, 2000, the IDP is intended to provide spatial, institutional, social, economical, infrastructural, environmental and technological solutions to our City challenges.

The basis and the justification for this review process emanates from the legislative mandate, Section 34, Chapter 5 of the Local Government Systems Act, act 32 of 2000 as amended, quoted below.

“Annual review and amendment of integrated development plan A municipal council –

- (a) must review its integrated development plan;
 - (i) annually in accordance with the assessment of its performance measurements in terms of section 4; and
 - (ii) to the extent that changing circumstances so demand; and
- (b) may amend its integrated development plan in accordance with the prescribed process”

5. SCOPE OF THE IDP

The very first Integrated Development Plan for the City was completed in June 2002, and through that document, progress reports were prepared and presented intended to address those IDP gaps highlighted by the MEC for Local Government, Housing and Traditional Affairs. In October 2002, the Municipality realized that the cost for backlogs and new challenges in the City surpasses the limited budget that we had, then the application for the Restructuring Grant was prepared. It was through the Restructuring Grant that enabled the Municipality to embark on projects linked to the City’s Revenue Enhancement Program, almost thirty projects, including the City Hub and Organization Transformation were identified.

This is the 11th review process of the IDP or this is Third Generation IDP which is linked to the third term of office of the councilors. Other sources of funding such as Municipal Infrastructure Grant (MIG), Expanded Public Works Program (EPWP), Municipal Capital and Operating budgets and grants from MIIU, DPLG, DBSA, National Treasury, made significant impact on the City's revenue enhancement, institutional capacity and service delivery.

This document is intended to cover the following:

- a. Compiling and documenting a consolidated assessment of the attributes of, and the existing level of development within the municipality (current reality)
- b. Identify the basic needs of the residents using reputable data available
- c. Collecting information on potential programmes and projects which have been identified
- d. Establishing development priorities for the municipal area
- e. Preparing a set of objectives to form the context for the development a broad policy framework as part of the comprehensive IDP
- f. Identifying the key elements of this policy framework including a spatial framework plan, disaster management etc
- g. Formulating development strategies
- h. Assessing the potential projects identified within the context of addressing basic needs and development priorities and formulating new projects
- i. Formulation of a prioritized list of projects
- j. Development of the City Scorecard that can be translated and linked to the long term planning based on re-imagining Pietermaritzburg Beyond Vision 2035, a programme as propagated by the South African Cities Network (SACN in the form a City Development Strategy) and Local Government, Housing and Traditional Affairs
- k. Identifying the institutional structure and arrangements required to ensure the efficient functioning of and operation of the municipality
- l. Providing the basis for the preparation of a capital and operating budget for the 2012/2013 financial year
- m. Providing a framework to guide public and private sector investments and developmental activities.

6. GOOD GOVERNANCE AND PUBLIC PARTICIPATION

6.1. THE IDP REVIEW PROCESS

The review process of the IDP had culminated in the development of clear strategic interventions, programs and projects and possible solutions towards the City Challenges. This process has located Community Participation as a cornerstone and as a guide in reviewing our IDP and much was learnt through the analysis of the community needs that result in the following findings.

6.1.1. Community Participation

- a. The process leading to the budget for financial years 2005/06, 2006/07, 2007/08, 2008/09, 2009/10, 2010/11 2011/12 and 2012/13, the Mayor and his team comprised of "members of Exco and councilor and management" consulted with various communities through izimbizo (community consultative meetings) that were held across the City representing five Area Base Management areas or zones of the Municipality. Those izimbizo were intended to showcase the draft budget/IDP for financial years 2005/6, 2006/07, 2007/08, 2008/09, 2009/10 and 2010/2011, 2011/12 and 2012/13 financial years. The needs as expressed by communities would be made available on request as a set of report that accompanied the approval of the IDP by Exco and Full Council.

- b. Various consultations and engagements with various stakeholders such as ward committees, the partnership called Msunduzi Initiative for Development Innovations which is comprised of the University of KwaZulu-Natal (UKZN-PMB) , Pietermaritzburg Chamber of Business (PCB) and Msunduzi Municipality invited diverse interest groups on 20-21 October 2009 to the City Strategic Summit to identify possible strategies and practical interventions on local economic environment, training for economic growth and sports to turnaround the live of city residents. A list of projects were identified and possible action plans were to be developed by all stakeholders whereby different champions would be assigned tasks through different task teams that will be accountable to different clusters and those interventions would be aligned to the IDP Review Process.
- c. It must not be forgotten that part of developing this IDP, emanated from the lessons that we learnt during the Department of Provincial Local Government (DPLG) and the South African Cities Network (SACN) hearings by nine cities in South Africa that are member cities of SACN, jointly producing almost 80% of the Gross Domestic Products (GDP). Again those hearings held by DPLG subsequent years through Multi-Sector Departments IDP Assessment Workshops and stakeholders forums in April assisted the Municipality in assessing its IDP. The Process Plan for 2010/11 that was approved by Full Council last year was drafted on the basis of those IDP gaps identified by the Inter-departmental Team through the leadership of the Department of Local Government and Traditional Affairs.
- d. The preparation and consolidation of the IDP programs and projects were informed by izimbizo minutes and report, master plans, SBUs strategic plans, submissions from ward needs, inputs by some stakeholders and submission by Ward Committees. When the ward committees were re-established in November 2007 and August 2011 during the new term of councilors, during Budget/IDP reviews in November 2011, the ward committees supplemented the list of ward needs that were previously populated during the public participation meetings.

There is a program to capacitate the ward committees to avoid them from becoming inactive like most ward committees within municipalities before. Some of the inputs came from interest groups like LA21, religious leaders, University of KwaZulu-Natal (UKZN) and Chamber of Business (PCB) under the Memorandum of Understanding (MOU).

6.1.2. Ward-based City Challenges from Izimbizo meetings

It is the hope and commitment of the IDP that in a very near future once the Municipality finalized the Ward-based profile through a localized survey, the budget and the IDP will be based on ward plans using the Community Based Planning (CBP) process. In developing the budget and the amendments of the IDP, Izimbizo minutes and report guided the review process for 2012/13 and only ward 4 was very fortunate to undergone the CBP process sponsored by CoGTA last year, and all the needs expressed were analysed like tike others.

Whilst some attempts were made to address those gaps identified, we have acknowledged that the process to develop comprehensive plans is a process on its own, which cannot be completed within one financial year. We are proud to say that some of the plans that were previously unavailable and now are in place, such as the 5 Year Financial Plan, Environmental Policy, Environmental Framework, Housing Delivery Plan etc.

The izimbizo analysis is a comprehensive list of needs based on a number of frequency a need reappears on surveys conducted during izimbizo ward committees submission, minutes of izimbizo, feedback from meetings of ward councilors as they are supported by attendance registers and submissions by interest groups.

As part of the IDP review, all Strategic Business Units (SBU) were requested to break away for their strategic workshops and the izimbizo minutes and report were circulated to them to guide discussions on prioritization of needs and projects.

6.1.3. Ward-based needs

Mayoral Izimbizo meetings held on 27 November 2011 for ward committees and 30 November 2011 for various stakeholders and consultative meetings with various interest groups and stakeholders held meetings prior and on 20th April 2012 on the draft budget for 2011/12 and IDP, including the submissions from Ward Committees and five traditional leaderships (Amakhosi), have categorized needs according to ward needs and national key performance areas (KPA's).

Surveys conducted during the course of the Izimbizo have been analyzed according to five management areas of the Municipality. A consolidated analysis including the minutes and the surveys has been compiled. All of the above analyses provide an indication of needs of community members as:

- City - wide based
- Management area based
- Ward based

6.1.4. Prioritisation of Community Needs

The table below indicates issues that have been raised by the community in terms of their importance. Taken from both the minutes and the surveys, needs and/ or issues of importance have been categorized according to the 5 national KPAs with a specific emphasis on 3 national KPAs based on their ranking. Last year on 27 November and 30 November 2011, the City Mayor, the members of Executive Committee and the Management Committee held public consultations to maximize the public participation of members of public and various stakeholders on the development agenda of the municipality.

Some of the areas of needs below have peculiar, historical and strategic nature and have been expressed for several years and their resolutions would make a significant difference in the lives of those communities affected. Vulindlela Area has for years expressed the need for access roads in almost all the nine wards. Where the access roads have been constructed, they are left in a messy state that when it rains, the roads cannot be used.

The other strategic need that people in Vulindlela have expressed is the need for rural housing. The Greater Edendale Area has for more than a decade expressed the need for private land to be purchased from private landowners so that development could be implemented in the area. They are requesting that the process be fast-tracked since Department of Land Affairs, Fisheries and Forestry has offered funding for this purpose. 2012 is declared as the year for infrastructural refurbishing and development as well as Job Creation, which therefore means that we are called upon to work together with the private sector and communities to create jobs for unemployed people.

MSUNDUZI MUNICIPALITY WARD NEEDS ANALYSIS 2012

TOTAL NUMBER OF PEOPLE RESIDING WITHIN MSUNDUZI MUNICIPALITY – 616730

(Source: Community Survey 2007)

TOTAL NUMBER OF HOUSEHOLDS WITHIN MSUNDUZI MUNICIPALITY - 134390

(Source: Community Survey 2007)

***NB: Following this sheet is a graphical representation as per the above

TOTAL WARD NEED REQUESTS ANALYZED - 1589 = 100%

% BREAKDOWN OF NEEDS FOR WARDS 1 – 37

RANKING OF NEEDS WITH BACKLOG ALIGNMENT

NO.	NEED	%	NO. OF REQUESTS	BACKLOG	NATURE OF REQUESTS
1	Refuse Collection	2%	26	37.5% backlog for refuse removal at least once a week. Source - Msunduzi Municipality Consolidated Billing Records & SMME Reports 2011 (R. Rajah)	Communities complained that the municipality is failing to keep their communities clean as the pickup of refuse is not constant and is leading to environmental risks for the elderly and young kids as the refuse is not collected for lengthy periods of time and then starts to decompose and smell.
2	Housing	6%	95	60.5% of people are living in formal dwellings whilst 8.60% of people are residing in informal dwellings leaving a backlog of 30.9%. Source - Community Survey 2007	Housing requests include the request for RDP houses and houses in general.
3	Roads	8%	123	16.40% backlog for road construction. Source - Msunduzi Municipality Roads & Stormwater Records 2011 (S. Mbimbi)	Requests for roads predominantly centered around the building of new roads, link roads, access roads and tarred roads where there has never been roads constructed before.
4	Toilets & Sanitation	4%	65	0.50% of Households within Msunduzi are still utilizing the bucket system whilst 10.40% have no toilet facilities all together. Source - Community Survey 2007 The Sanitation Backlog for Msunduzi is 11.16% for the community with access below RDP levels. Source - Department of Water Affairs and Forestry 2011	Toilets & Sanitation requests include requests for the building of new toilet & sanitation systems especially where they have houses but no toilet facilities.
5	Electricity	3%	44	6.25% backlog for new electrification installations. Source - Msunduzi Municipality Electricity Department Records 2011 (M. Mthembu)	Electricity needs included new installations of electricity in households which do not have electricity all together, and also the installation of pre-paid meters.
6	Water	3%	41	3.78% backlog for water supply to communities with access below RDP level. Source - Department of Water Affairs and Forestry 2011	Water needs included new installations of piped water to households and the ability to use water within the household through taps in order to do their necessary washing and cleaning.

NO.	NEED	%	NO. OF REQUESTS	BACKLOG	NATURE OF REQUESTS
7	Good Governance	29%	456	Unknown	Requests under good governance included the following - communities wanted to be informed about the IDP process, to be involved in the budget process, for ward committees to be established, for the municipality to strengthen relationships between communities and their councilor, for nepotism to be eradicated, many ward requests cited that councilors must not be involved in the hiring of people.
8	Economic Development	6.31 %	108	33%	It also included the issue of youth development, job creation, training and skills development, small business establishment & other aspects in order to strengthen the economy
9	Repairs & Maintenance	21%	341	Unknown	Repairs & Maintenance included requests for the upgrades of roads, rehabilitation of community facilities like halls and parks, fixing of potholes, building of speed humps, attending to sewage blockages, repairing of burst water pipes, repairs to RDP houses where roofs are leaking,
10	Halls / Community Centers	6%	96	Unknown	Request for halls and community centers hinged around the construction of new halls and community centers which are multi-purpose in nature in order to enhance community development by social cohesion (building to be used by all community members irrespective of colour)
11	Street Lighting	3%	51	Unknown	Street lighting includes street lights & high mast lights in order to make areas safe from criminal activities as there are large areas with no street lights
12	Sportsfields	3%	50	Unknown	Communities want sportsfields in their respective areas, sportsfields they can use as per their needs in order to strengthen community unity and social engagement.
13	Crèches	2%	37	Unknown	Communities want the municipality to build crèches or early childhood development centers where parents can leave their children during the day whilst they are at work.
14	Clinics	2%	31	Unknown	Communities want to see the municipality ensuring there are clinics in close vicinity of their wards either permanently established or by way of mobile clinics as it is costly to travel to access the health care facility as many are unemployed.
15	Bridges	1%	17	Unknown	Communities have requested the construction of bridges and foot bridges.
16	Taxi Ranks	1%	8	Unknown	Communities are tired of standing in the rain in long ques waiting for public transport, they want the municipality to provide either taxi ranks or taxi shelters.

ALIGNING THE BUDGET WITH THE COMMUNITY NEEDS AND MATTERS OF GOVERNANCE

The Msunduzi Municipality is committed to redressing and addressing the needs of the citizens of the City and value the inputs that are made during the izimbizo, ward committee meetings, stakeholder consultations and concerns raised in our complaints register.

During the period of May and December 2011 and 2012, the IDP and Budget consultations with members of public and various stakeholders as well as consultations and engagements that were held with members of public and stakeholders in May 2010 with members of parliament under the Parliamentary Adhoc Committee, the Municipality will endeavor to respond to some of the issues and concerns raised during those consultations, indeed under the limited resources and financial constraints.

The Msunduzi Municipality through the Turn-around Strategy, which forms the basis of the IDP and draft Budget for 2012/13 and beyond, is committed to turnaround the municipal financial crisis and improve the efficacy of governance and service delivery. It must be noted though that the approach to consider some of the needs raised by various stakeholders, the following approach will dictate:

- City-wide based needs;
- Management area based needs and/ or
- Ward based needs.

Ideally, the finalization of the budget is to balance the budget allocations on prioritized community needs and address matters of governance as dictated by the Msunduzi Turn-Around Strategy and through the Financial Recovery Plan

6.2.4 MSUNDUZI MUNICIPAL TURNAROUND STRATEGY

In preparation for the budget 2010/11 the MEC for the Department of Cooperative Governance and Traditional affairs intervened in terms of Section 139 (b) of the MFMA, 2003, and the Provincial Intervention Team was deployed to investigate mismanagement in the management and operations of the organizations through the strategic planning and consultations with various stakeholders inside and externally, the PIT developed the Business Plan and strategies to turnaround the finances and operations of the municipality.

The following critical projects were identified to turn around the municipality's finances.

- Water District Meters
- Protective Structures Electricity
- Cleansing of Debtors Data
- Consolidation of Billing
- Credit Control
- Debt Collection
- Demand Management Electricity
- Eskom Negotiations
- Surcharge
- Leverage
- Illegal Entities

6.3. MEC's COMMENTS AND MATTERS OF EMPHASIS FOR THE 2011/12 INTEGRATED DEVELOPMENT PLAN

It is the intention of the IDP team and other IDP committees to ensure that the gaps as identified by the MEC for the Department of Local Government and Traditional Affairs and Auditor General findings are addressed accordingly and interventions are planned properly. The following are the gaps and projects as identified by the MEC in 2011/12 review.

These are critical comments as they were raised by the MEC for Local Government and Traditional Affairs as IDP matters of emphasis and observation summarize as follows:

Municipal Transformation and Institutional Development

- Your IDP review must be in accordance with the assessment of your performance measurements in terms of Section 4 of MSA.
- In terms of the Institutional Capacity, I note that it is aligned to Powers and functions and that critical and high level posts like that of Municipal Manager, Deputy Municipal Managers etc are vacant which may contribute to reliance on external providers.
- A number of the Human Resource (HR) Policies / Strategies have been developed including the Staff Retention, Employment Equity and Workplace Skills Plan.

Local Economic Development

- Local Economic Development is institutionalised in terms of management arrangements that are in place to support LED

Basic Service Delivery and Infrastructural Investment

- Your IDP has prioritised reducing backlogs in water, sanitation and electricity and the provision of Free Basic Services to the indigent.
- Staff vacancies are high in service sub unit

Financial Viability and Financial Management

- Qualified audit was noted with concerns, therefore, your implementation of your Financial Recovery Plan needs to occur in order to improve financial viability and sustainability in your municipality.

Good Governance and Community Participation

- The status of the Communication Plan / Strategy needs to be clarified in the 2011 / 2012 IDP

Spatial Development Framework

- Absence of localized realities (area based plans) as to how they inform the SDF
- Improve linkages between the SDF and Municipal Capital Investment Framework in order to facilitate the implementation of the SDF with other municipality.
- Further improvement is required in terms of spatially representing your capital projects, especially in light of your municipality forming part of the Western Corridor Development.
- Develop a Land use Management Scheme and the deadline is 14 April 2014

General Comments

Municipalities were reminded about the upcoming Census in October 2011 and encouraged to take advantage of this initiative by mobilising the communities within the municipal area to participate in the Census to ensure that the results are a true reflection of the areas demographic profile. We were reminded to communicate with the Department of Community Safety and Liaison regarding the incorporation of a Community Safety Plan into our IDP.

Promotion of Access to Information Act (PAIA)

In line with the Promotion of Access to Information Act, we were advised to ensure that the work of the municipality is PAIA compliant, which will be in line with promoting good governance by our municipality.

Implementation of the Provincial Flagship Program

We were reminded once again to embrace the structures that are already in existence in our district such as Operation Sukuma Sakhe and District AIDS Council, which are co-ordinated by the District Municipality and that IDPs feature provincial programs in the War Against Poverty.

Municipal Turnaround Strategy (MTAS)

It was acknowledged that our Municipality incorporated information regarding MTAS in the IDP and the information was well linked to all KPA's.

Consideration for Western Corridor (N3) Development

We were advised that the Western Corridor Development which is the area from the Ethekwini Metro to Howick (N3) is to be considered in our next IDP.

Consideration for Community Based Planning

It was recommended that our Community Based Plan (CBP) be replicated in other wards of our municipality and we were urged to clearly incorporate CBP into the IDP and the next step will be moving towards implementation of the CBP.

Implementation of KZN Planning and Development Act 6 of 2008

We were reminded that the KwaZulu-Natal Planning and Development Act, 2008 (Act No.6 of 2008) (KZN PDA) as promulgated and came into effect on 1 May 2010 and the first Amendment to the Act has been developed and will be released for public comment.

We were reminded and encouraged to publish our KZN PDA Delegations in the Government Gazette, if not done already. In the absence of published delegations, development applications cannot be processed and any decisions taken are *ultra vires*.

Once the Steering Committee is appointed, will develop Norms and Standards for the following topics: Urban densification; Spatial imperatives for public capital investment; Provincial norms and standards on rural land use; Protection and enhancement of the character of KwaZulu-Natal's landscapes and sustainable energy usage. We are further more requested to incorporate the Norms and Standards into our IDP and scheme, as they become available.

Schedule 1 of the KZN PDA provides application processes, time frames and administrative functions. These processes need to be strictly adhered to and will in future be monitored by the Auditor-General.

Chapter 8 of the KZN PDA provides enforcement measures to deal with illegal development. You are encouraged to use these new improved measures to deal with illegal development in your municipalities.

Provincial Growth and Development Strategy and Provincial Spatial Development Framework

The Provincial Executive Council has adopted the 2011 Provincial Growth and Development Strategy (PGDS) and Provincial Spatial Development Framework (PSDF) which they required to be factored into the IDP

The PGDS and PSDF therefore provide a sound platform for vertical, horizontal and spatial alignment. It is therefore imperative for all municipal IDPs and municipal Spatial Development Frameworks (SDFs) to be aligned with this overall provincial strategic framework in order to optimise synergies between national, provincial and municipal growth and development programs.

It was also specified that the extent to which municipal IDPs are aligned to the PGDS and PSDF will be a specific consideration in the credibility assessment of the next round of IDPs, and COGTA the Department of Economic Development and Tourism, with support from the Provincial Planning Commission. A District Wide Development Planning Shared Services will be providing support to local municipalities on this subject.

Overall Credibility Assessment of our IDP

The content and the quality of our IDP was appreciated, however we were reminded that whatever is included in the IDP has a budget and implemented accordingly.

6.4. AUDITOR-GENERAL'S FINDINGS

It was exciting news that the Msunduzi Municipality received an unqualified opinion from the Auditor-General for the Financial Year 2010/2011.

Section 166 of The Municipal Finance Management Act No. 56 of 2003 requires every Municipality to have an active and participative Audit Committee which is in place that serves as an advisory body on matters relating to (i) internal audits (ii) controls (iii) risk management (iv) accounting policies (v) review of financial statements and (vi) performance evaluation amongst others.

Having the Municipality receiving an unqualified report, some of the issues raised by the AG were mentioned under the Executive Summary in details and the Municipality is determined to address those issues in order to strive for clean audit for 2011/2012 financial year and beyond.

The Audit Committee exists and responsible to follow up on AG Findings and to ensure that an Action Audit Plan is developed to address those gaps as identified by AG. The following indicates those comments raised by the AG and course of action thereof by the Municipality.

6.5 ACHIEVEMENTS MADE ON AUDITOR GENERAL FINDINGS FOR 2009/10 TO DATE

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 47	Opening balance of irregular expenditure restated	The restatement of prior year figures was done in terms of GRAP. In the current year AFS will be reviewed by Internal audit and Audit Committee prior to submission to AG.	DMM: Financial Services	May 2012	The irregular expenditure register is in place, the guidelines and procedures are also in place and has been communicated through corporate communication. a report to condone and regularise the expenditure incurred is work in progress to be submitted to Council by end of May 2012.	Target Partially Met	Irregular expenditure register.
2	EX 65	Extension to contract	The contract was advertised and now is in the evaluation stage. The process will be completed by 15 March 2012 The contract register has been developed with the assistance of Provincial treasury SCM unit. The register has all contracts and the termination dates. This will enable SCM to monitor and verify validity periods of all contracts.	DMM: Financial Services		Expenditure has been regularised by Council, contract cancelled as of 30/04/2012. new contract awarded still attending the objection by two bidders. Appeals officer appointed by 4/05/2012	Target Met	EXCO Resolution, regularisation report
3	EX 79	Irregular expenditure in respect of meter reading contract not disclosed	Include as part of condonation report iro of irregular expenditure. A register of irregular and wasteful expenditure has been developed and is maintained by the Manager Creditors SCM to submit an action plan to prevent the splitting of orders / A Full report has already been submitted to the AG during the year end audit. This matter has been exhausted, we did submit a detailed report to the AG with copies of all the relevant documentation as well as all the requested documentation by the AG.	DMM: Financial Services		The condonation report was submitted to Council and the expenditure incurred for the period July 2010 to June 2012 was regularised and condoned. The contract will be terminated by end of June 2012	Target Met	Condonation report and Council resolution.
4	EX 61	Splitting of orders to circumvent procurement process		DMM: Financial Services		Irregular expenditure is in place	Target Met	register
						SCM to submit an action plan to prevent the splitting of orders / A Full report has already been submitted to the AG during the year end audit. This matter has been exhausted, we did submit a detailed report to the AG with copies of all the relevant documentation as well as all the requested documentation by the AG. Procurement plan is in place	Target Met	procurement plan

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
5	EX 66	Awards to persons in service of the state and service of the municipality	1. Finance unit to approach the accountant general for an opinion on the matter - with the intention of gaining access to the System. 2. To investigate the option of a system to test contracts being awarded to people in the employ of the state.	DMM: Financial Services		A meeting with AG has been arranged for 17/05/2012 to discuss the possibility of handing over our supplier database for analytics as was done last year by the AG. And a possibility of Council having to purchase the similar system.	Target Partially Met	date of meeting 17/05/2012
MATERIAL LOSSES:								
1	EX 27	Distribution losses	1. Design of 30 new PRV zones 2. Replace 6km of defective pipeline in the CBD 3. Hathorns reservoir repair 4. Domestic meter replacement/maintenance 5. Metering unmetered areas 6. Rest of initiatives	DMM: Infrastructure Services	2012/06 /30	1. No Additional Zones have been implemented due to budget reduction. Installation of 3 PRV zones in the CBD is scheduled to be completed in June 2012 2. 3.9km of pipe has been replaced 3. Contract Award is imminent pending the objection Period 4. Contract Award is imminent pending the objection Period 5. Contract Award is imminent pending the objection Period 6. Will commence in Phase 3 of the Project	Target Partially Met	PSC Progress Report
			1. Council appointed IDT to undertake an assessment of our infrastructure. It is envisaged that the old transformers will be replaced thus reducing transformer losses. 2. Audits are being carried out to curb tampering and the theft of electricity.	DMM: Infrastructure Services	Ongoing	1. Assessment of infrastructure completed. 2. Ad-Hoc audits are being conducted	Target Partially Met	IDT REPORT
2	EX 87	Unauthorised expenditure	Proper Budgeting principles needs to be followed. Proper working papers need to be compiled and filed. Depreciation figures will be requested from the service provider before the approval of final budget in May. Amortisation table will be used to calculate interest charges.	DMM: Financial Services	28 March 2012 / 31 May 2012	These unauthorised expenditure has been addressed in the 2012/13 approved budget	Target Met	Approved 2012/13 budget. Submission received from the relevant section

GOING CONCERN

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 72	Financial recovery plans	1. Municipality to approach National Treasury for assistance in developing a long term financial recovery plan. 2. Collection rates need to be improved. 3. Recovery of arrear debt 4. Write-off of old debt 5. Cleaning the debtors database	DMM: Financial Services	On Going	- Workshop with National Treasury to be conducted on 03 April 2012; - The Write-off process is being reviewed to ensure that credit control processes have been exhausted prior to a write off recommendation. - Ratepayers with multiple property ownership are being reviewed within the process of issuing final demands with a view to pursue a targeted approach to credit control methods. The collection rate is targeted at being improved. - The database clean-up process is a work in progress however, human resources are very limited which is hampering the progress. - Service provider has been appointed to assist with data cleansing and to help improve collections. Council has approved a contract with Munsoft to mms statements to account holders. Approx. 5000 accounts where invoices fell within the returned mail category will be addressed through this process. The non-revenue water project being conducted by the Water Section will also aid in the data clean-up program. - Financial recovery plan was developed to deal with going concern matters.	Target Partially Met	

PREDETERMINED OBJECTIVES

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 6	Planned and Reported indicators/measures are not well defined Internal control deficiency Management does not review and monitor compliance with applicable laws and regulations in ensuring that the planned and reported indicators/measures are clearly defined, unambiguous and aligned to the IDP to ensure that the data is collected and reported on consistently.	Consultations sessions to be conducted with Business Units to ensure that KPI's are SMART.	Municipal Manager	01-Jul-11	Consultation sessions were held prior to the finalization of the SDBIP 2011/2012. KPI's are smart	Target Met	SDBIP 2011 / 2012

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
2	EX 15	Planned and reported performance targets not specific, measurable and time bound Internal control deficiency Management has not undertaken a process to clearly define the key performance indicators to ensure that the achievement of targets set is specific, measurable and time bound.	Consultations sessions to be conducted with Business Units to ensure that KPI's are SMART.	Municipal Manager	01-Jul-11	Consultation sessions were held prior to the finalization of the SDBIP 2011/2012. KPI's are smart	Target Met	SDBIP 2011 / 2012
3	EX 9	Reported targets not reliable as inadequate supporting source information was provided Internal control deficiency • Management does not prepare performance reports that are supported and evidenced by reliable information. • Management does not implement proper record keeping in a timely manner to ensure that complete, relevant and accurate information is accessible and available to support performance reporting • Documentation and records are not properly managed and maintained	Business Units to be made aware that they must keep a record of documents in support of information in the form of a Portfolio of Evidence (PoE).	Municipal Manager	01-Jul-11	All Business Units have been made aware that they must keep a record of documents in support of reported information in the form of a Portfolio of Evidence (PoE). The OPMS unit is currently short-staffed to ensure that each Business Unit does keep a PoE. Quarterly SDBIP reports do ask for a reference to the source document. Once performance agreements are in place for appointed S57 managers it is hoped that this problem will cease as PoE's will be required for their quarterly assessments.	Target Partially Met	SDBIP 2011 / 2012
4	EX 08	Content of the Integrated Development Plan (IDP) incomplete	The 2012/ 2013 IDP is to include the the relevant organizational scorecard that will be the direct link between the IDP and the PMS, including backlog information.	Municipal Manager	31-May-12	The finalized 2012/ 2013 IDP, presented to Council for adoption, does include the the relevant organizational scorecard that will be the direct link between the IDP and the PMS, including backlog information.	Target Met	Approved IDP & Council Resolution of Meeting held on 30 May 2012

COMPLIANCE WITH LAWS AND REGULATIONS

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 38	Payments not made within 30 days of receipt of invoice Internal control deficiency Non-compliance with applicable laws and regulations are not addressed in a timely manner as creditors are not paid within the required 30 days.	Every month we will run a list of all orders that are older than 30 days and follow up with the business units if there are no invoices. We will also run a list of outstanding invoices that might need more supporting documents. Strong action will be taken against creditors who sit with invoices and not pay them on time or advise business units of additional information before the payments are made.	DMM: Financial Services	30-Jun-12	Identification of long outstanding invoices started and some suppliers are being attended to.	Partially met	N/A
2	EX 11	The audit committee did not perform its function as required by the MFMA and charter Internal control deficiency - Council did not ensure that the audit committee promotes accountability and service delivery through evaluating and monitoring responses to risks and providing oversight over the effectiveness of the internal control environment including financial and performance reporting and compliance with laws and regulations - Management has not exercised oversight responsibility over reporting and internal control and the functioning of the Audit Committee as an effective tool to address the risks to the achievement of sound governance and good internal controls. The audit committee therefore could not fulfill its responsibilities as set out in legislation and in accordance with accepted best practice.	Audit committee fully constituted for 2011/12 - 5 Meetings held to date - Minutes submitted as evidence- AC to evaluate I/audit @ year end. Risk Register discussed- risk response plan also discussed at AC meetings- & is included in minutesAudit committee fully constituted for 2011/12 - 3 Meetings held to date - Minutes available for inspection - immediate - Performance review to be undertaken in May 2012 of Audit Committee - Report to be available in June 2012	Municipal Manager			Target Met	

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
3	EX 2	Internal audit did not perform its functions as required by the MFMA Internal control deficiency - The internal audit function did not assist management in maintaining efficient and effective controls by evaluating those controls to determine their effectiveness and efficiency, and by developing recommendations for enhancement or improvement. - Management did not ensure that there is an adequately resourced and functioning internal audit unit that identifies internal control deficiencies and recommends corrective action effectively - Internal audit did not fulfill its responsibilities as set out in legislation and in accordance with accepted best practice and standards.	Internal Audit Plan Approved on 25 November 2011 - final Plan approved 27 February 2012 Minutes & Plan submitted as evidence	Municipal Manager			Target Met	
4	EX 17	Risk management and the risk assessment process was not conducted by management Internal control deficiency - Management did not ensure that appropriate risk management activities were implemented to ensure that regular risk assessments are conducted and that a risk strategy to address the risks is developed and monitored. - The municipality has not determined a risk strategy/action plan to manage risks affecting the organization during the period under review. - The municipality has not identified and analysed the likelihood and impact of risks affecting the organization during the period under review.	Risk Assessment report completed 19 January 2012 - Report submitted as evidence	Municipal Manager			Target Met	

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
5	EX 58	Poor recovery of long outstanding debtors	The plan of action to deal with the internal control deficiency is as follows: The Credit Control and Debt collection policy have been reviewed to enhance revenue collection. The changes and additiond to the policy will need to be approved by Council. A proposed structure in terms of the credit control section is awaiting approval. this structure will enable the section to be more efficient in terms of revenue collection. A procedure manual is currently being compiled to define roles and responsibilities of staff members and to aid in maintaining controls. 1. Show recovery plan of government arrear debt 2. Apply credit control and debt collection policies effectively 3. Review processes regarding disconnections and re-connections.	DMM: Financial Services	31-May-12	• All policies have been reviewed to enhance revenue collection. The policies are awaiting Council approval. • The Credit Control structure has been reviewed and is awaiting Council's approval. • Credit Control processes are being revised and streamlined to create a more collection focused approach. The introduction of contacting account holders with high value arrears telephonically is yielding positive results. The impact of the final demand process and the regular review of the top 100 debtors is being analysed. However, lack of resources is hampering progress. All credit control procedures are being documented in a manual to facilitate collection processes. This is a work in progress document.	Target Partially Met	
		Internal control deficiency Credit and debt management policy and procedures are not established and communicated throughout the entity to ensure that management directives are being carried out and that the outstanding debt is collected in a timely manner.						
6	EX 7	Performance agreements were not signed with section 57 managers in acting positions	Performance Agreement of S57 Managers will be dealt with once the MM's performance agreement has been finalized	Municipal Manager	Ongoing – as and when s57 Managers are appointed	MM & DMM IS have been appointed, and signed their performance agreements	Target Partially Met	performance agreements
		Internal control deficiency • Lack of processes to effectively monitor adherence to the MSA and its regulations. • The accounting officer does not exercise oversight responsibility over the signing of performance agreements and completion of related performance evaluations for Section 57 managers						

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
7	EX 14	Excessive overtime worked	Corporate Services to obtain action plans from all business units. Corporate services to monitor implementation of action plans on a monthly basis	DMM: Corporate Services	Monthly	Business Units have been requested to submit action plans to Corporate Services that will be monitored on a monthly basis	Target Partially Met	
		Internal control deficiency • Non-compliance with applicable laws and regulations are not addressed in a timely manner • Inadequate monitoring and enforcement of internal controls relating to overtime management						
8	EX 3	Lack of timely adoption and implementation of performance management system	Performance Management Policy Framework to be developed and approved	Municipal Manager	30-Jun-12	The (draft) Performance Management Policy Framework has been presented to the Audit Committee but has not been adopted for the current financial year.	Target Partially Met	Draft Performance Management Policy
		Internal control deficiency The accounting officer does not exercise oversight responsibility over compliance with laws and regulations relating to the adoption and full implementation of the performance management system.						
9	EX 5	Non existence and functioning of a performance audit committee	Quarter 1 (2011/12) performance report submitted as evidence	Municipal Manager	Ongoing	Quarter 1 report completed and submitted	Target Partially Met	Quarter 1 report
		Internal control deficiency The audit committee does not promote accountability and service delivery through evaluating and monitoring responses to risks and providing oversight over the effectiveness of the internal control environment including financial and performance reporting and compliance with laws and regulations.						

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
10	EX 4	Internal auditing on performance measurements were not conducted	Quarter 1 (2011/12) Performance Audit & - Quarter 2 (2011/2) submitted as evidence	Municipal Manager	ongoing	Quarter 1 (2011/12) Performance Audit & - Quarter 2 (2011/2) completed	Target Partially Met	Quarter 1 (2011/12) Performance Audit & - Quarter 2 (2011/2)
		Internal control deficiency - The review of performance information is not included in the internal audit plan and does not form part of the agenda for discussion with the audit committee. - The entity does not identify risks to the achievement of performance reporting objectives.						
11	EX 57	MFMA-116(2): Monitoring of contracts	Business units to provide monitoring reports on their relevant contracts to SCM to consolidate all reports and submit the accounting officer.	DMM: Financial Services		he monitoring tool has been designed and forwarded to all business unit- project managers, SCM to meet the Business units for the completion of the monitoring reports. SCM to consolidate monitoring reports and submit for the MM's attention accounting officer. April contracts performance appointments with project managers will be finalised by 18 May 2012	Target Partially Met	Completed monitoring forms
		Internal control deficiency The accounting officer did not implement adequate procedures to ensure that the internal policies and procedures pertaining to the procurement policy are effective and adhered to.						
12	EX 53	Fruitless and wasteful expenditure incurred	Registers to be kept and maintained on a monthly basis. We will also investigate each case and where appropriate we will recover money from responsible official. The only exception will be where the invoice was received late from the mail.	DMM: Financial Services	30-Jun-12	We have started enforcing the recovery of wasteful and fruitless expenditure from responsible officials by notifying relevant business units of any wasteful, fruitless and unauthorized expenditure	Target Partially Met	N/A
		Internal control deficiency Processes are not in place to prevent and detect fruitless and wasteful expenditure. Registers are not in place/or maintained to record unauthorised, irregular fruitless and wasteful expenditure. These are not regularly followed up to ensure that monies are recovered when applicable and that the appropriate action on financial misconduct is taken in line with the MFMA.						

CASH AND CASH EQUIVALENTS

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 36	Weaknesses in internal controls relating to bank and cash Internal control deficiency • Bank reconciliations are not prepared on a monthly basis and reviewed by the appropriate level of management. • Management does not implement monitoring controls over daily and monthly processing in respect of bank and cash management.	A system is to be put in place for reviewing & signing of Bank Recons.	DMM: Financial Services	Ongoing	Bank Reconciliations are reviewed on a timely basis.	Target Met	Bank reconciliations submitted and reviewed timely as at 30 April 2012
2	EX 59	Bank and Cash – reconciling items not cleared on a timely basis Internal control deficiency Long-outstanding items on the bank reconciliation are not investigated and resolved on a timely basis.	RESOLVED - Auditors recommendation implemented. Current bank reconciliations available for inspection.	DMM: Development Services	Completed	RESOLVED - Auditors recommendation implemented. Current bank reconciliations available for inspection.	Target Met	Bank Recon Document

EMPLOYEE COSTS

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 75	Management of vacancies Internal control deficiency Effective HR management to ensure that adequate and sufficiently skilled resources are in place is not implemented and monitored by council and management.	1. critical posts - to be filled. All priority posts (\$57 / Internal Audit) will be completed by the end of June.	DMM: Corporate Services	Ongoing	MM has been appointed, DMM Infrastructure has been appointed, DMM Finance (CFO) has been appointed. Internal Audit Manager - post has been advertised.	Target Partially Met	Employment Contracts
2	EX 33	Employee cost - Non compliance with overtime policy Internal control deficiency Inadequate monitoring and enforcement of internal controls relating to overtime management	Refer ex 14	DMM: Corporate Services	Refer ex 14	Refer ex 14		Refer ex 14

EXPENDITURE

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 68	MIG payments	1. To follow guidelines in relation to accruals - confined to specified dates as per MFMA.	DMM: Infrastructure Services	Ongoing	Guidelines in relation to accruals - confined to specified dates as per MFMA are being adhered to.	Target Partially Met	Internal Minutes
		Internal control deficiency Inadequate implementation of controls over daily and monthly processing and reconciling of transactions to supporting documents						

INVENTORY

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 12	Weaknesses in controls over inventory noted	1. stock counts to be conducted quarterly & internal audit is invited to oversee the process. variances to be recorded and reported annually for the year end to account on the financials and a report is to be submitted to Council . Proper reconciliations to be performed and Variances from quarterly stock counts to be investigated and resolved.	DMM: Financial Services		1. stock counts are now being conducted quarterly internal audit is invited to oversee the process. variances are being recorded and reported annually for the year end to account on the financials and a report is submitted to Council . Proper reconciliations now are being performed and Variances from quarterly stock counts are being investigated and resolved.	Target Met	Quarterly Stock count reports and monthly stock reconciliations
		Internal control deficiency • Inventory is not appropriately safeguarded to prevent misappropriation and damage • Variances from quarterly inventory counts are not investigated and resolved on a timely basis to determine cause to allow for corrective action to be implemented.						

PROPERTY, PLANT & EQUIPMENT

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 57	Depreciation on fixed asset register does not agree to financial statements	Monthly recons between the asset register and general ledger to be done	DMM: Financial Services	On Going	monthly recons have been done	Target Met	Monthly Recons
		Internal control deficiency Reconciliation between the fixed asset register and the general ledger is not performed on a monthly basis and as a result differences are not followed up.						
2	EX 25	Asset reconciliation not performed monthly	Monthly recons between the asset register and general ledger to be done	DMM: Financial Services	On Going	Monthly recons have been done	Target Met	Monthly Recons
		Internal control deficiency A reconciliation of the fixed asset register and the general ledger was not performed on a monthly basis.						
3	EX 55	Asset count report not compiled and submitted to council	An annual electronic movable asset verification to be conducted to address the audit finding and a report to be compiled to management reporting on the outcome of the verification	DMM: Financial Services	On Going	Report on progress of asset verification has been submitted to Manco (tabled on 21 /05/2012) to request urgent intervention from management to assist in finding a way forward to resolve challenges faced	Target Partially Met	Report to Manco
		Internal control deficiency The accounting officer does not exercise oversight responsibility over internal controls relating to asset management.						

ACCOUNTS RECEIVABLE

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 51	Reconciliation of long terms debtors not performed Internal control deficiency - The amount per the debtors system is not reconciled to the amount per the general ledger. - Debtors reconciliations are not prepared and reviewed by the appropriate level of management. - Management does not implement proper record keeping in a timely manner to ensure that complete, relevant and accurate information is accessible and available to support financial reporting	The General Ledger on the Promis Expenditure system needs to be corrected	DMM: Financial Services	On going	A report is currently being prepared to obtain authority and approval from the Municipal Manager to : Correct the balances in the General Ledger by processing journal entries in the current financial year.	Target Partially Met	Copies of documents which illustrate the action that has thus far been taken with the various roleplayers in order to resolve such query

REVENUE

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 46	Grants register not maintained Internal control deficiency Management does not implement proper record keeping in a timely manner to ensure that complete, relevant and accurate information is accessible and available to support financial reporting.	A grant register to be developed and maintained	DMM: Financial Services	On going	Grant register developed and maintained.	Target Partially Met	Grant register
2	EX 71	Manual rateable valuation reconciliation not performed Internal control deficiency Actual revenue (rates levied) is not compared to budgeted revenue (as per rateable valuation roll totals) on a monthly basis and explanations are not provided for significant variances.	A reconciliation of the valuation roll against the promis income system is performed once a year. We are currently in the process of completing the reconciliation.	DMM: Financial Services	On going	The valuation roll and the promis income system is reconciled after every supplementary valuation roll (SV) due to the fact that all adjustments on the Promis Income system arises from the SV. In addition, the valuation roll and the Promis Income System will be reconciled at financial year end as well.	Target Partially Met	

OTHER

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1	EX 73	No policy/procedure to identify subsequent events Internal control deficiency Documented policies and procedures relating to subsequent events are not in place	The procedure to identify subsequent events has to be incorporated in the financial year-end plan as per GRAP 14 (events after reporting date)	DMM: Financial Services	30-Jun-12	The procedure to identify subsequent events has been incorporated in the financial year-end plan as per GRAP 14 (events after reporting date) - the plan includes the collection of information from various business units in order to complete the notes that are required for the Completion of the AFS.	Target Partially Met	Minute to all DMM's and PM's for the required information
2	EX 26	Shortcomings in SCM policy Internal control deficiency Inadequate review and monitoring of supply chain management policy to ensure it complies with applicable supply chain management regulation requirements	the SCM policy has since been reviewed and adopted by 29 September 2011 by full Council. The reviewed policy is inline with the MFMA SCM Regulations all deficiencies that were identified by AG on 2010 SCM policy were attended to.	DMM: Financial Services		the SCM policy has since been reviewed and adopted by 29 September 2011 by full Council. The reviewed policy is inline with the MFMA SCM Regulations all deficiencies that were identified by AG on 2010 SCM policy were attended to. Completed.	Target Exceeded	Concil resolution and completed SCM policy checklist

INFORMATION TECHNOLOGY

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1		INFORMATION TECHNOLOGY GOVERNANCE	All remediation that will take place will be in line with COBIT. Thereafter a full COBIT rollout will have to be undertaken.	DMM: Corporate Services	30-Jun-12	All 18 policies and procedures that have developed so far are in line with COBIT standards. There are further 15 that are work in progress and once all have been done they will be submitted to Manco for approval.	Target Partially Met	Project Plan Line 29
1.1		INFORMATION TECHNOLOGY RISK AND INTERNAL CONTROL						

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1.1.1		Lack of Information Technology Governance Framework Internal control deficiency Leadership: Lack of implementation of appropriate key controls • Management had not developed an IT Governance framework due to lack of in-house skills. • A third party service provider was appointed during September 2011 to remediate the prior year audit findings, however the remediation process had not commenced at the time of the audit.						
1.2		INFORMATION TECHNOLOGY SERVICE PERFORMANCE Lack of IT Performance Management Framework						
1.2.1		Internal control deficiency Governance: Inadequate identification and management of risk • The municipality had not implemented an IT governance framework that incorporates a performance management framework due to lack of in-house skills.	Develop Quarterly ICT Progress Report to CS Portfolio Committee	DMM: Corporate Services	01-Jan-12	Quarterly Usage and Statistic Report submitted to Corporate Services	Target Met	Corporate Service Portfolio Committee Report from ICT
1.2.2		Lack of Vendor Performance Management Internal control deficiency Leadership: Implementation of appropriate key controls • Management had not developed an IT Internal Control Framework that includes monitoring and managing the service delivery of service providers. • Management had appointed a third party service provider during September 2011 to remediate the prior year audit findings, however the remediation process had not commenced at the time of the audit.	All SLA's to be examined and refreshed in accordance with the criteria recommended by the AG. Because of the age of most of our hardware, it is near impossible to find anyone who will want to maintain it. We need to find funds to replace all equipment that is End of Life	DMM: Corporate Services	30-Aug-12	As most of our Equipment is end-of-life, it is exceeding difficult to get SLAs reviewed. This is mainly the reason why we are on month-to-month contracts. Funding that we have set aside for the replacement of this aged equipment has unfortunately be withdrawn.	Nil Achieved	Email from Nkosi, Lindelani Nkosi [Lindelani.Nkosi@ts.fujitsu.com] and Dimension Data

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1.2.3		Lack of Software Licence Contracts Internal control deficiency Leadership: Lack of implementation of appropriate key controls • The municipality had not renewed the software licence contracts with service providers.	Formalise Refuse management system licence and go out to tender for the Contour prepaid system.	DMIM: Corporate Services	30-May-12	RMS has been replaced and a new SLA is in place. A tender has been published for the replacement of the Electricity Prepaid System	Target Partially Met	RMS License Agreement with Landfill site manager and Tender advertisement document for Prepaid System
1.3		ORGANISATIONAL STRUCTURE						
1.3.1		Lack of IT Training Programme Internal control deficiency Leadership: Implementation of appropriate key controls • Lack of formal planning being conducted for training.	Develop ICT Staff Training Plan	DMIM: Corporate Services	29-Feb-12	Draft ICT Training Plan has been developed	Target Partially Met	Draft ICT Training Plan
1.3.2		Lack of Formally Documented Roles and Responsibilities for System Owners Internal control deficiency Leadership: Implementation of appropriate key controls (policies and procedures) • The municipality did not have the relevant IT policies that define the roles and responsibilities for system owners.	Draw up a Roles and Responsibilities Guide for all System Owners	DMIM: Corporate Services	15-Mar-12	Draft Roles and Responsibility Guides have been developed and documented	Target Partially Met	Draft Roles and Responsibility Guide

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
1.4		INFORMATION TECHNOLOGY STRATEGIC MANAGEMENT						
1.4.1		Outdated IT Strategic Plan						
		Internal control deficiency Leadership: Lack of implementation of appropriate key controls • The municipality had not finalised developing the business strategy.	Develop a draft Master Systems Plan which will be the guiding document for the overall Strategic Plan	DMM: Corporate Services	30-Jun-12	Master Systems Plan partially completed. On about page 112 of envisaged 180 pages	Target Partially Met	MSP available in draft.
2		SECURITY MANAGEMENT						
2.1		INFORMATION TECHNOLOGY SECURITY						
2.1.1		Lack of Information Technology Security Policy						
		Internal control deficiency Leadership: Implementation of appropriate key controls • Management had not developed and implemented an Information Security Management System (ISMS) and the associated IT security policies due to lack of in-house skills.	Develop Information Technology Security Policy in line with AG's recommendations	DMM: Corporate Services	30-May-12	Draft IT Security Policy completed	Target Partially Met	Draft IT SECURITY Policy

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
2.1.2		Lack of Information Technology Security Officer Internal control deficiency Leadership: Implementation of appropriate key controls: • Management had not developed and implemented an Information Security Management System (ISMS) and fully delegated the associated roles and responsibilities for security management.	This post needs to be included in the new program	DMIM: Corporate Services	30-Jun-12	Although we currently have an IT Security officer, the incumbent is neither experienced nor trained for the level that is required by the AG	Nil Achieved	None available
2.2		OPERATING SYSTEM SECURITY						
2.2.1		Lack of Operating System Security Standards and Procedures Internal control deficiency Leadership: Implementation of appropriate key controls: • Management had not developed and implemented an Information Security Management System (ISMS) including policies and procedures for OS security practices.	Develop Operating System standards for Windows and Sun Solaris	DMIM: Corporate Services	30-Mar-12	Operating Systems Standards for Windows and Sun Solis have been developed and are available in draft	Target Partially Met	Operating Systems Standards for Windows and Sun Solaris
2.2.2		Inadequate Security Parameter Settings on the Windows 2003 Operating System Internal control deficiency Leadership: Implementation of appropriate key controls • Lack of an Information Security Management System (ISMS) and the associated security policy settings standards.	To develop policy settings and guidelines for Windows 2003 in order to enhance standardization and to offer greater security to all Councils IT assets including information and data.	DMIM: Corporate Services	29-Feb-12	Draft Windows 2003 Parameter Settings Policy has been written	Target Partially Met	Draft Windows 2003 Parameter Settings Policy

2.3. NETWORK SECURITY

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
2.3.2		Lack of Policies and Procedures for Firewalls	Develop a policy and a procedure that seeks to adequately protect our IT resources from malicious external attacks including spam and viruses. As we have a Wide-Area-network we could be vulnerable to all types of intrusive attacks.	DMIM: Corporate Services	30-Jun-12	WIP	Nil Achieved	
2.4		DATABASE SECURITY	Develop Change management policy and procedure for Data Base Administrators so that whenever changes are made, they could be rolled back easily. This is also necessary for the purposes of continuity.	DMIM: Corporate Services	30-Jun-12	WIP	Nil Achieved	
2.4.1		Lack of Monitoring of Activities of Database Administrators						
		Internal control deficiency Leadership: Implementation of appropriate key controls • Management had not developed and implemented an IT Internal Control Framework that includes adequate monitoring and detective controls over the activities of Database Administrators.						
3		USER ACCESS CONTROL	Develop formal policies and procedures for the User Account Management. This entails giving or not giving access to the system at certain times, like weekend lock-outs etc.	DMIM: Corporate Services	29-Feb-12	Draft Policy and Procedure Manual has been developed	Target Partially Met	Draft Policy and Procedure manual available
3.1		USER ACCESS CONTROL						
3.1.1		Lack of Formalised User Account Management Standards and Procedures						
		Internal control deficiency Leadership: Implementation of appropriate key controls • Management had not developed and implemented an Information Security Management System (ISMS) and the associated User Account Management policies due to lack of in-house skills.						

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
3.1.2		Inadequate User Account Settings on Windows 2003 Internal control deficiency Leadership: Implementation of appropriate key controls. • Lack of an Information Security Management System (ISMS) and the associated policies and procedures for administering user account settings. • Lack of a Security Officer to oversee and enforce consistent user account settings	To implement a policy that will restrict the number of people who have administrative rights on Windows 2003. This must also address locking out of users who have not logged in after a certain period of time.	DMM: Corporate Services	31-May-12	A full Active Directory listing has been extracted so as to determine which users settings need to be changed	Target Partially Met	Recommendation list from the Active Directory Extract
3.1.3		Generic User Accounts on the Applications Internal control deficiency Leadership: Implementation of appropriate key controls. • Lack of an Information Security Management System (ISMS) and the associated policies and procedures for administering user account settings; and • Lack of in house skills to extract user lists from outsourced applications and dependence on third parties for extraction of user lists.	All generic users need to be identified and either deleted or renamed to a person that is traceable. This must apply to every single system in council.	DMM: Corporate Services	30-Jun-12	Currently in Progress	Nil Achieved	
4		PROGRAM CHANGE MANAGEMENT	Establish a formal Change Control standards and procedures for all the mainstream Revenue related systems. This will enable us to track where and when change were made to what system and will give us the ability to reverse a change in the case of a problem.	DMM: Corporate Services	29-Feb-12	Draft Change Control Standards Policy has been developed	Target Partially Met	Draft Change Control Policy
4.1		APPLICATIONS PROGRAM CHANGES						
4.1.1		Lack of Change Control Standards and Procedures for Applications Internal control deficiency Leadership: Implementation of appropriate key controls • Management had not implemented an IT internal control framework incorporating application change control standards and procedures due to lack of in-house skills.						

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
4.1.2		Lack of Application Change Control Documentation	To develop formal change control documentation for the program changes applied to the key applications (Promis, Payday, MetVal, Contour, TCS, RMS, Payday, Fresh Market). The reason for this is that these software packages are handled by outside companies and this policy will enable us to manage them more efficiently.	DMM: Corporate Services	31-Mar-12	Draft Application Change Control Policy written	Target Partially Met	Draft Application Change Control Policy written
4.1.3		Internal control deficiency Leadership: Implementation of appropriate key controls Management had not implemented an IT internal control framework incorporating application change control standards and procedures due to lack of in-house skills.	Develop procedure for the monitoring of changes to application software to ensure that only approved changes are made to our systems. This will help to eliminate changes that are unauthorised and are made will ill-intent	DMM: Corporate Services	29-Feb-12	Draft Monitoring of Access to Production Environment Policy has been written.	Target Partially Met	Draft Monitoring of Access to Production environments Policy - Action Plan line - 9
5		FACILITIES AND ENVIRONMENTAL CONTROLS	Develop a procedure that will validate the use of the restricted areas in the ICT section. This needs to be aided by a Biometric access control system that will give access to authorized staff only and logs will be kept that will record the entry and exit to the Main Data Centre.	DMM: Corporate Services	29 Feb 2011	A draft Physical Access Procedure to the Data Centre as been written. We still need to extend the Biometric system to the entrance of the Main Data Centre. Quotes are currently being obtained for the extension of this system.	Target Partially Met	Draft Physical Access Control Review and Revalidation Procedure
5.1		PHYSICAL ACCESS AND ENVIRONMENTAL CONTROLS FOR THE MAIN COMPUTER ROOM						
5.1.1		Lack of Adequate Physical Access Controls to the Municipality Main Computer Room						
		Internal control deficiency Leadership: Implementation of appropriate key controls Management had not implemented an Information Security Management System (ISMS) that included policies, processes and procedures for controlling physical access to the computer room						

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
5.1.2		Lack of Adequate Environmental Controls in the Main Computer Room	To develop formal, approved environmental control standards and procedures for the main Data Centre. If the temperature or humidity falls below, or exceeds certain set parameters, then Operations staff are SMSed so that corrective action can be taken to avoid any damage to equipment.	DDM: Corporate Services	31-May-12	WIP	Nil Achieved	
5.2		PHYSICAL ACCESS AND ENVIRONMENTAL CONTROLS FOR THE COMPUTER ROOMS AT THE LANDFILL SITE AND THE MARKET	Develop a Physical Access Control procedure for both the Landfill Site and The Freshmarket. These sites do not have specialized environments on-site in which to house the IT equipment.	DDM: Corporate Services	29-Feb-12		Target Partially Met	Draft Physical Access Control Policy for RMS and FreshMarket
5.2.1		Lack of Adequate Physical Access Controls to the Computer Rooms at the Landfill Site and the Market Internal control deficiency Leadership: Implementation of appropriate key controls • The offices at the Landfill site and Market where the RMS and Fresh Market servers were being housed were not designed to be computer rooms.						
5.2.2		Lack of Environmental Controls around the RMS and Fresh Market Servers Internal control deficiency Leadership: Implementation of appropriate key controls (policies and procedures): • The RMS and Fresh Market servers were not housed in the formal Municipality Main Computer Room.	Develop an Environmental Control Policy for Landfill and Market because of the different environments in which they operate	DDM: Corporate Services	29-Feb-12	A draft Environment Control Policy for the Market and Landfill has been written. At Landfill, the server now resides on the premises of the new service provider and at the Market, we have an air-conditioned, locked room that houses the server.	Target Partially Met	Environmental Control Policy for landfill and market

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
6		DATA CENTRE OPERATIONS Lack of Procedures for Managing Network Operations	Develop procedures for managing the municipality's Wide Area Network (WAN) and Local Area Network (LAN). This will include a schedule of health checks that will need to be performed on key pieces of equipment.	DMM: Corporate Services	30-Jun-12	NIL	Nil Achieved	
6.1.1		Internal control deficiency Leadership: Implementation of appropriate key controls: Management had not developed and implemented an Internal IT Control Framework including data centre operations policies and procedures due to lack of in-house skills.						
6.1.2		Lack of System Software Change Control Procedure Internal control deficiency Leadership: Implementation of appropriate key controls • Management had not developed and implemented an Internal IT Control Framework including software change management policies and procedures due to lack of in-house skills.	To develop a formally documented and approved system software change control procedure that will cater for any changes that are needed to be made to Operating System in the Windows and Unix environments. This will include User Acceptance testing that will have to be signed off by us.	DMIM: Corporate Services	29-Feb-12	Draft System Software Change Control Policy has been written	Target Partially Met	Draft System Software Change Control Policy Action Plan Line 10
6.1.3		No Formal Capacity Planning Internal control deficiency Leadership: Implementation of appropriate key controls (policies and procedures): • Management had not developed and implemented an Internal IT Control Framework including capacity planning policies and procedures due to lack of in-house skills.	Develop a formal capacity plan for all Msunduzi's IT systems. Assume a growth in data values of 10% per annum. Regular disk volume checks will also be necessary so that alarm bells can be sounded once certain pre-defined thresholds have been breached.	DMIM: Corporate Services	31-May-12	WIP	Nil Achieved	

ITEM	AR PARA. NO	ITEM DESCRIPTION	PROPOSED ACTION TO BE IMPLEMENTED	RESPONSIBLE PERSON	TARGET DATE	PROGRESS 31 MAY 2012	ACTUAL ACHIEVED	SOURCE DOCUMENTS:
7		INFORMATION TECHNOLOGY SERVICE CONTINUITY	To develop and document a plan that would help the Municipality recover from a disaster in that all mission critical systems would be available within critical timeframes	DMM: Corporate Services	30-Jun-12	A draft Disaster Recovery Plan has been written. This is a paper-based plan and still needs to be backed up by the existence of physical hardware. It is possible that the servers we intended replacing, be used as DRP servers based at another location in the City. But with funding being withdrawn, it is not possible for this to happen now.	Target Partially Met	Draft DRP document
7.1		INFORMATION TECHNOLOGY CONTINUITY AND DISASTER RECOVERY						
7.1.1		Lack of a Disaster Recovery Plan Internal control deficiency Leadership: Implementation of appropriate key controls • Management had not implemented an adequate DRP.						
7.2		BACKUPS	To develop backup standards and procedures to ensure that backups would be regularly performed for the key applications and operating systems i.e. (Windows 2003, Unix, Promis, Payday, Metval and RMS) The retention strategy will speak to the cycling of backup media, and their retention periods for the various systems.	DMM: Corporate Services	03-May-12	WIP	Nil Achieved	
		Lack of Data Backup and Retention Strategy						
7.2.1		Internal control deficiency Leadership: Implementation of appropriate key controls • Management had not developed and implemented an IT internal control framework that included formal backup standards and procedures.						
COMPLIANCE WITH LAWS AND REGULATIONS								
1	EX 59	Signed returns on conditional grant spending not submitted Internal control deficiency The municipality does not have appropriate means (eg checklists) for monitoring compliance on a regular basis.	To implement a compliance checklist to monitor compliance on a regular basis, including timely submission of returns, documents and any information as may be prescribed.	DMM: Financial Services	Ongoing	A compliance checklist is being implemented. Returns are submitted timeously.	Target Met	

SECTION B: SITUATIONAL ANALYSIS

1. INTRODUCTION

Msunduzi Municipality is located along the N3 at a junction of an industrial corridor from Durban to Pietermaritzburg and an agro-industrial corridor stretching from Pietermaritzburg to Estcourt. At a regional scale, it is located at the cross section of the N3 corridor and Greytown Road corridor to the north, a tourist route to the Drakensberg and Kokstad Road to the south. It has the second largest urban centre within the province of KwaZulu-Natal and the main economic hub within Umgungundlovu District Municipality. Its location has a strong influence on regional channels of investment, movement and structuring of the provincial spatial framework for growth and development.

After the December 2000 election five previously independent entities were amalgamated to form the Msunduzi Municipality:

- Pietermaritzburg - Msunduzi TLC;
- Ashburton TLC;
- Vulindlela (rural);
- Claridge and
- Bishopstowe.

The implications and challenges arising out of that amalgamation process are summarized below:

PERIOD	NAME	AREA	POPULATION
Up to 1994	Pietermaritzburg	150 sq km	176 590
1995 to 2000	Pietermaritzburg-Msunduzi TLC	251 sq km	373 910
Since 2000	The Msunduzi Municipality	649 sq km	523 470

2. THE POPULATION OF MSUNDUZI

The total population of the Msunduzi Municipality, according to the Census of 2007, was made up as Follows: The population of Msunduzi has grown at a steady rate of 1.2% per annum:

POPULATION 1996	POPULATION 2001	PERCENTAGE GROWTH	POPULATION 2007
523470	553224	6%	616730

In terms of age and gender, the population is divided as follows:

	MALE %	FEMALE %
0 - 5 yrs	12	10
6 - 12 yrs	15	13
13 - 18 yrs	14	12
19 - 25 yrs	15	14
26 - 35 yrs	17	17
36 - 45 yrs	12	13
46 - 55 yrs	8	9
56 - 65 yrs	4	6
66 - 75 yrs	2	4
76 - 85 yrs	1	2
86+	0	0

COMMUNITY SURVEY 2007: BY TOILET FACILITIES AND MUNICIPALITY	
Flush toilet (connected to sewerage system)	82062
Flush toilet (with septic tank)	5875
Dry toilet facility	13613
Pit toilet with ventilation (VIP)	6307
Pit toilet without ventilation	22458
Chemical toilet	2300
Bucket toilet system	414
None	1362

NB: As far as the city is concerned we have completely eradicated the bucket system.

3. HOUSEHOLDS AND HOUSEHOLD SERVICES

TOTAL NUMBER OF HOUSEHOLDS	
Census 2007	134390

One of the biggest challenges in terms of access to basic services is the extension of free basic services to farming areas.

COMMUNITY SURVEY 2007: BY ACCESS TO WATER AND MUNICIPALITY	
Piped water inside the dwelling	79813
Piped water inside the yard	33601
Piped water from access point outside the yard	14688
Borehole	1100
Spring	1126
Dam/pool	265
River/stream	1555
Water vendor	733
Rain water tank	202
Other	1308

Water is provided by both Umgeni Water and the Municipality. There is a current backlog of 14 063 individual water connections in the Vulindlela and Edendale areas. The city also has a significant number of unaccounted water losses which amount to approximately 36% per annum.

In terms of sanitation, the largest backlog rests within the Vulindlela area which currently has a backlog of 30 000 VIP units.

**COMMUNITY SURVEY 2007: BY ENERGY/FUEL FOR COOKING AND MUNICIPALITY**

Electricity	117051
Gas	2088
Paraffin	10209
Wood	4592
Coal	250
Animal dung	69

COMMUNITY SURVEY 2007: BY ENERGY/FUEL FOR LIGHTING AND MUNICIPALITY

Electricity	122567
Gas	174
Paraffin	1340
Candles	9366
Solar	128
Other	816

Electricity is provided by Eskom and the Municipality. According to the Census of 2001, a total of 14.4% households did not have electricity. In terms of electricity there is a significant backlog in the provision of street lights which currently is estimated at an amount of R5 million per annum. Electricity losses are currently approximately 8%.

There is an average 2% household growth per annum. In order to address housing backlogs, an estimated 2500 houses need to be constructed per annum. As the demand for rental housing increases, the municipality needs to facilitate the construction of at least 500 middle-income houses per annum.

4. SOCIAL DEVELOPMENT:

4.1. EDUCATION AND TRAINING:

The Pietermaritzburg area of the City is a centre of educational excellence, in both provincial and national contexts. Pietermaritzburg is a seat of the University of KwaZulu Natal and is home to several other institutions of higher learning (technikons; technical colleges; FETs; etc.). In addition, Pietermaritzburg is home to a host of both private and government owned institutions of primary and secondary education.

Even within the rural and per-urban areas, schools within the Msunduzi Municipal area are situated within the national standard of a primary school within 2km and a secondary school within 5km. A continuous challenge is the standard of school buildings and access to schools in various areas within Edendale and Vulindlela.

4.2. LIBRARIES:

Information is a strategic resource for economic, social and personal development. The public library service of the municipality is a critical interface between people and information resources. Although public libraries serve a range of educational, cultural and recreational functions, at this stage of South Africa's development, their most vital role is arguably the empowering of individuals and communities, and supporting life-long education.

The major role of public libraries at present is therefore seen as information provision. There are currently 9 libraries within the urban core of the city. The central library has recently undergone renovations to include a children's wing. Currently, there are libraries within the rural areas. These areas therefore depend on school libraries, which in most cases are significantly small or non-existent.

4.3 HEALTH AND WELFARE SERVICES:

4.4. MSUNDUZI POWERS AND FUNCTIONS

In relation to powers and functions, the Municipalities have implementing mandate of National and Provincial policies regarding socio-economic development and political life of the Municipality as enshrined in the Constitution.

In the context of Local Government functions, the District Municipalities then have co-ordination role and provision of bulk service infrastructure. The template below was done to clarify the Msunduzi functional role of implementing agencies and responsible officials.

FUNCTION/ POWER	RESPONSIBLE OFFICIALS BASED ON THE APPROVED ORGANOGRAM	WHO HAS AUTHORITY TO PERFORM FUNCTION/ POWER	PERFORMED BY MUNICIPALITY/ EXTERNAL SERVICE PROVIDER? SECTION C: DEVELOPMENT STRATEGIES

1. INTRODUCTION

This is the most critical area in the IDP which requires clear and concrete evidence to ensure that the community's needs as reflected here-in are addressed properly through our strategies, programmes and projects. As part of the IDP review process, we embarked on a series of consultation with various stakeholders to review and package the City's strategies, the City vision, mission statement, goals and guiding principles.

All the submissions by various stakeholders were circulated to relevant Strategic Business Units (SBUs) to guide Strategic Business Units' strategies and submission of programmes to the IDP office. Thereafter, the IDP team analysed all the programmes and projects submitted against the list of challenges facing the City.

Then, we advised the SBUs to adjust their submissions to match with the City's challenges. We attempted to align the City's goals with the 2014 targets by National Government, the National Key Performance Areas and the City Strategic Focus Areas and Balance Scorecard.

The City's Guiding Principles were interrogated against the challenges facing the City and the prioritization as reflected through the pie graph indicates the percentages and priorities in terms of the allocation of budgets and the requirement of alternative funding. The analysis on challenges indicated the magnitude of challenges facing the City as unsensitized. It is our belief that the IDP review has opening up possibilities to develop City Development Strategy, a lead to Key Performance Indicators (KPI) and aligning the Budget and the IDP.

The strategy planning process cannot be complete without factoring the **Provincial Growth and Development Strategy** and **Provincial Spatial Development Framework** in order to align the City development with the District and Provincial strategic roadmap. This will be done in line with Five National Priorities, the Twelve National Outcomes and 2030 Vision for the Province of KwaZulu-Natal. The seven strategic goals and thirty strategic objectives will be taken into consideration to chart the growth and development agenda for the City

2. THE CITY DEVELOPMENT STRATEGY

The South African Cities Network has defined the City Development Strategy as "an action plan for equitable growth, developed and sustained through participation, to improve the quality of life of all citizens". According to the UN Habitat, the most important product of a city-wide strategy that turns the city into an engine of equitable economic development and has a direct impact on poverty reduction, local economic growth and improved governance.

Municipality has acknowledged that the IDP as it stands required to be prioritized whereby the integrated sector plans, specific priorities and indicators would be set and guided by a long term strategic plan. Part of the IDP review for 2012/13 used izimbizo feedback and the City Development Strategy (CDS) processes as components to review the IDP.

It was also acknowledged that the MEC's reports for 2002/03 in particular and those of 2003/04, 2004/5, 2005/6, 2006/07, 2007/08, 2008/09, 2009/10, 2010/11 and 2011/12 made reference to more or less similar kind of gaps that the City needed to address. Part of long term planning which is in line with the refinement of the Spatial Development Framework is to begin to re-imagining Pietermaritzburg beyond 2035.

This mode of thinking and mindset based on long term planning that will assist the decision makers and their constituencies to realize that development and planning is inseparable and development and growth cannot be realized overnight. As long as the City tries to find its strategic trust and direction under the backdrop of endless challenges facing the City, limited staff capacity and limited resources.

The CDS came as a catalyst to reinforce the revisioning of the future as captured under our Strategy Roadmap. Once the CDS is completed, our Strategic Direction would be replaced by the CDS and the IDP would be a reflection of integration of various sector plans defined in terms of clear priorities, clear indicators and targets, projected over five years.

3. THE CITY OF CHOICE

Part of re-imagining the Strategy Roadmap of the City under the CDS process, the Vision was adjusted as following:

WE ARE A CITY OF CHOICE SECOND TO NONE

3.1 The Vision Statement

To be a safe, vibrant City in which to live, learn, raise a family, work, play and do business

3.2. MISSION STATEMENT

To ensure that the Municipality functions effectively and in a sustainable manner in order to deliver services of excellence to the community.

Organizational Goals

- A healthy citizenry with access to affordable, quality health care.
- A safe city with low crime levels and quality living areas.
- An efficiently managed, financially viable and sustainable, city
- A well governed city underpinned by meaningful public participation
- A vibrant economic centre, attracting investment, supporting business development and creating jobs
- A city where all have access to habitable human settlements – decent houses, clean water and proper sanitation
- An environmentally sustainable and healthy city
- A well planned, spatially integrated city

4. STRATEGIC OBJECTIVES

4.1. FINANCIAL VIABILITY AND MANAGEMENT

Plan 1: Build a strong institutional and financial base and sustainability

Strategic Objective:

1. To promote sound financial management and reporting, effective budgeting and revenue enhancement

4.2. LOCAL ECONOMIC DEVELOPMENT

Plan 4: Create an environment for economic growth and development to enhance the municipal contribution to job creation and sustainable livelihoods through a Local Economic Development Plan

Strategic Objective:

2. To stimulate economic growth through job creation, promotion of BBBEE, development of SMME's, co-operatives and agri-industry
3. To promote sustainable tourism.
4. To promote and stimulate business investment, retention and expansion

4.3. BASIC SERVICE DELIVERY AND INFRASTRUCTURE DEVELOPMENT

Plan 2: Improve quality living environments through basic access to water, sanitation, electricity, waste management, roads and disaster management

Strategic Objective:

5. To improve access to affordable housing and facilities that promote quality living areas.
6. To improve accessibility and maintenance of habitable human settlements and facilities
7. To provide a responsible facility for the disposal of waste in a manner that is socially and environmentally acceptable.

4.4. GOOD GOVERNANCE AND PUBLIC PARTICIPATION

Plan 5: Build a cohesive system of governance that translates deepening democracy into a meaningful sense to public participation

Strategic Objectives:

7. To develop an efficient, effective and accountable administration
8. To promote full participation of all stakeholders in the planning, implementation and decision making of the municipality.
9. To improve basic literacy of society with special focus on targeted groups

4.5. INSTITUTIONAL DEVELOPMENT AND TRANSFORMATION

Plan 5: Build a cohesive system of governance that translates deepening democracy into a meaningful sense to public participation

Strategic Objectives:

10. To build a productive, knowledge based organization that will respond adequately to the needs of the community and the city.
11. To develop the capacity and safety of our workforce.

4.6. ENVIRONMENTAL PLANNING & SOCIAL SERVICES

Plan 3: Provide safe, healthy and secure environment (environmental health and public safety)

Plan 6: Ensure integrated, sustainable spatial planning and development (planning, SDF, EMP)

Strategic Objectives:

12. To ensure that all communities have access to social services
13. To contribute towards a healthy, safe and secure environment with special focus on children, youth, women and people with disability
14. To promote sports and recreation, and arts and culture
15. To promote a long term development vision and harmony in planning

5. OUR CITY GUIDING PRINCIPLES

- **Ubuntu** Humanity, I am what I am because of who we are
- **Hard Working** Passionate and committed to one's work
- **Competence** Having requisite skills, knowledge, behavior and appropriate attitude in executing one's work
- **Integrity** To maintain and demonstrate good governance and honesty

6. STRATEGY MAPPING

NATIONAL KEY PERFORMANCE AREAS	STRATEGIC ISSUES
1. BASIC SERVICES	1.1 Telecommunications 1.2 Community and public facilities 1.3 Solid waste disposal 1.4 Housing 1.5 Land use management systems
2. SOCIAL DEVELOPMENT SERVICES	2.1 Education 2.2 Health 2.3 Social security 2.4 Community safety 2.5 Disaster management 2.6 Gender, youth and people with disabilities 2.7 Sports and recreation 2.8 HIV and Aids 2.9 Community and public facilities 2.10 Land reform 2.11 Environmental sustainability 2.12 Arts and culture 2.13 Cemeteries and crematoria
3. ECONOMIC DEVELOPMENT SERVICES	3.1 Local economic development 3.2 Tourism planning 3.3 Agricultural development 3.4 Cooperatives and SMMEs 3.5 Public private partnerships 3.6 Business support and development
4. INSTITUTIONAL DEVELOPMENT AND TRANSFORMATION	4.1 Batho Pele 4.2 Performance management 4.3 Human resources 4.4 Information technology 4.5 Administration
5. GOOD GOVERNANCE AND PUBLIC PARTICIPATION	5.1 Integrated development planning 5.2 Policy development 5.3 Public participation 5.4 Internal audit 5.5 Anti-corruption strategy
6. FINANCIAL VIABILITY AND MANAGEMENT	6.1 Budgeting and reporting 6.2 Revenue enhancement 6.3 Expenditure control 6.4 Financial management

SECTION D: SPATIAL AND ENVIRONMENTAL PLANNING

1. INTRODUCTION

During late 2005/06 financial year the Municipality through the Corporate Strategic Planning Business Unit contracted the expertise of the Udidi Development Consultants (Udidi) and Iyer Rothaug Collaborative (IRC) to undertake the project on the SDF refinement as per their project proposals. Part of the scope was to suture together various disintegrated studies and plans that were done previously by the Msunduzi (Old City of Pietermaritzburg) and consolidate a number of pieces of work generated by the uMgungundlovu District and align with the Provincial Spatial Plan along primary and secondary corridors and nodal points to avoid duplication and wastage of limited resources.

In preparation of the review of the IDP 2012/13 – 2016/17 and beyond, the SDF was revised. Through the review of the SDF the Municipality began a process of developing local area plans for the following corridors and nodes:

- Entry Corridor.
- CBD Central.
- Northdale CBD
- Taylors Halt Node.
- Mason's Mill Node.
- Scottsville/New England Complex.
- Ashburton/Lynnfield Node.
- Ambleton City.

Developments regarding the N3 Corridor, few projects have been identified which will be considered as part of local area plans and Land Use Management of the corridor. The Msunduzi Municipality is currently revising the three existing Town Planning Schemes as part of the Integrated Land Use Management Scheme.

This assignment could not be undertaken in isolation, therefore, at the macro level, the alignment in refining the City' SDF lays the foundation at the micro level for the Provincial Spatial Economic Development Plan which is the implementation strategy of the PADS which is in line with NSDP.

The principles of the Provincial Spatial Economic Development Plan is that the economic development and growth opportunities should be channeled into activity corridors and nodes that are adjacent or link the main growth centers, therefore, the following should be consider in terms of urban and rural development planning and in determination of budget expenditure patterns:

- **Primary node** – eThekweni
- **Secondary** – Richards Bay, Msunduzi, Newcastle and Port Shepstone; eThekweni to uMhlathuze eThekweni, Msunduzi and uMgeni
- **Tertiary Nodes** : • uMhlathuze, Ulundi to Vryheid (sc1)Kokstad to Umzimkhulu to Umsunduzi (sc2) Msunduzi, Nkandla to Ulundi (sc3); Ulundi, Nongoma and Pongolo; Libombo SDI to Maputo; Port Sheptone; St Faith to Ixopo; Maphumulo, Ndwedwe and Dube; Ukhahlamba corridor; Weenen, Nkandla and Eshowe; Manguzi to Swaziland; Makhathini Flats; Greytown, Msinga and Madadeni; Nkandla, Nqutu and Vryheid; Mtubatuba and Nongoma

The biggest leap jump that we expect out of this assignment is to take the City beyond the apartheid planning and designs which were the basis of our City and most cities in South Africa. It is our belief that when the framework is presented, it will renew hopes and inspire new dreams, invoke the identity of the City of Choice, unlock economic vibrancy and opportunities, restore and lay a foundation of the confidence in the South African business and commitment to work for our beloved country.

2. MSUNDUZI SDF REVIEW

2.1. BACKGROUND

- 2.1.1. The Spatial Development Framework (SDF) is an integral part of a Municipality's IDP. It represents the spatial expression of the Council's development vision, and should therefore be reviewed regularly to take into account changing circumstances.
- 2.1.2. Council's existing SDF was adopted during 2009 the current SDF was revised during the course of 2011/12 financial year as part of the IDP review for 2012/13 -2016/17, and the development vision and the vision statement were revised for 2035 Vision as follows:

Vision 2035

"We are a City of Choice Second to none."

2.2. THE VISION STATEMENT

A SAFE , VIBRANT CITY IN WHICH TO LIVE , RAISE A FAMILY, WORK, PLAY AND DO BUSINESS.

2.3. MISSION STATEMENT

To ensure that the Municipality functions effectively and in a sustainable manner in order to deliver services of excellence to the community.

2.4. LEGISLATIVE FRAMEWORK

- 2.4.1. The SDF is guided by, amongst others, the following:

- The Development Facilitation Act (DFA)
- The Provincial Growth and Development Strategy (PGDS)
- Environmental Conservation Act (ECA)
- The National Environment Management Act (NEMA)
- Accelerated and Shared Growth Initiative for South Africa (ASGISA)
- National Spatial Development Perspective (NSDP)
- Provincial Spatial Economic Development Strategy (PSEDS)

- 2.4.2. As the regulations formulated in terms of the Municipal Systems Act, 2000 provide the legal requirements for the content of a Municipality's SDF, they are quoted in full hereunder:

- (a) give effect to the principles contained in Chapter 1 of the Development Facilitation Act, 1995 (Act No. 67 of 1995);
- (b) set out objectives that reflect the desired spatial form of the municipality;
- (c) contain strategies and policies regarding the manner in which to achieve the objectives referred to in paragraph (b), which strategies and policies must-
 - (i) indicate desired patterns of land use within the municipality;
 - (ii) address the spatial reconstruction of the municipality; and
 - (iii) provide strategic guidance in respect of the location and nature of development within the municipality.
- (d) set out basic guidelines for a land use management system in the municipality;

- (e) set out a capital investment framework for the municipality's development programs;
- (f) contain a strategic assessment of the environmental impact of the spatial development framework;
- (g) identify programs and projects for the development of land within the municipality;
- (h) be aligned with the spatial development frameworks reflected in the integrated development plans of neighbouring municipalities; and
 - (i) provide a visual representation of the desired spatial form of the municipality, which representation –
 - (ii) must indicate where public and private land development and infrastructure investment should take place;
 - (iii) must indicate desired or undesired utilization of space in a particular area;
 - (iv) may delineate the urban edge;
 - (v) must identify areas where strategic intervention is required; and
 - (vi) must indicate areas where priority spending is required".

2.4.3. The principles contained in Chapter 1 of the Development Facilitation Act set out what should be achieved through planning processes as well as the administrative processes dealing with development proposals and applications. Of specific relevance to the SDF Review are the principles contained in paragraph a) of Chapter 1:

Policies, administrative practice and laws should:

- (i) provide for urban and rural land development;
- (ii) facilitate the development of formal and informal, existing and new settlements;
- (iii) discourage the illegal occupation of land, with due recognition of informal land development processes;
- (iv) promote speedy land development;
- (v) promote efficient and integrated land development in that they:
 - promote the integration of the social, economic, institutional and physical aspects of land development;
 - promote integrated land development in rural and urban areas in support of each other;
 - promote the availability of residential and employment opportunities in close proximity to or integrated with each other;
 - optimize the use of existing resources including such resources relating to agriculture, land, minerals, bulk infrastructure, roads, transportation and social facilities;
 - promote a diverse combination of land uses, also at the level of individual erven or subdivisions of land;
 - discourage the phenomenon of "urban sprawl" in urban areas and contribute to the development of more compact towns and cities;
 - contribute to the correction of the historically distorted spatial patterns of settlement in the Republic and to the optimum use of existing infrastructure in excess of current needs; and
 - encourage environmentally sustainable land development practices and processes.

2.5. THE CURRENT SPATIAL FRAMEWORK PLAN

2.5.1. The current Spatial Framework Plan forms part of the Municipality's 2002 IDP. It sets out the purpose of the Plan, and identifies the following principles to guide development:

- Compaction
- Integration
- Densification
- Restructuring the City
- Meeting Land Use Needs
- Identification of areas of economic development potential

- 2.5.2. The Framework Plan sets a number of spatial goals and elaborates on the guiding principles, as well as the basic planning concepts utilised in the plan, such as movement systems, corridors and nodes.
- 2.5.3. The plan identifies concepts which require special attention, and areas where more detailed planning has been done, or was still required at the time. These include the Greater Edendale area, the Central Area and the high potential agricultural land in the west of the Municipality. It also makes recommendations with regard to areas for densification, amenity protection, and more flexible planning controls.

2.6. THE DRAFT SDF REVIEW

2.6.1. Background

- i) The approach adopted by the Municipality for the SDF review is the formulation of Spatial Development Frameworks for four spatial areas or Area Based Management Sectors (ABMS). From these plans, an overall SDF for the entire Municipality is distilled at an appropriate level of abstraction. The four ABMS are:
 - Northern Area.
 - CBD, Ashburton, Eastern Areas.
 - Vulindlela.
 - Greater Edendale.
- ii) In the process of integrating the four ABMS plan, a certain level of integration and rationalisation is necessary to ensure consistency and legibility.

2.6.2. Planning Design Guidelines

- i) In addition to the legislative provisions referred to in paragraph 2, the following planning principles guide the SDF Review:
 - **Urban densification**
 - **Integration**
 - **Sustainability**
 - **Compaction**
 - **Redressing imbalances**
 - **Quality Urban Environment**
- ii) The review was also informed by the SDF for the Umgungundlovu District Municipality, which identifies Msunduzi as the primary node in the District, and inter alia recommends the upgrading of certain tourist routes and the establishment of bypass routes to ease congestion in and around the primary node. Alignment with the SDF's of adjoining Municipalities will be required before the reviewed SDF is finalised.
- iii) Dewar's generic concept as illustrated in the following diagram is utilised to achieve the planning principles.

2.6.3. Historical Context

- i) In order to understand the challenges associated with the current form of the city and the planning and development interventions that will be required to address these challenges, we must remind ourselves how the current municipal boundaries came about.

As illustrated in figure 1, the Msunduzi Municipality Area consists of three district areas, each of which is home to approximately 200'000 people i.e.

- The former borough of Pietermaritzburg
- Greater Edendale
- The Vulindlela Tribal area

- ii) During 1850's, development was concentrated mainly in the central grid which by and large coincides with the existing CBD. Together with the surrounding townlands it made up the borough of Pietermaritzburg.
- iii) In 1848, the Zwartkop location to the west of the borough was declared. The boundaries of this area remained unchanged, and subsequently became the Vulindlela Tribal Area.
- iv) During the 1970's, the Edendale area was established as a separate administrative entity as part of the Government's apartheid policy. At the same time, in an effort to force people out of townships which formed enclaves in so-called white areas, investment was curtailed into infrastructure and maintenance in areas like Sobantu, leading to a deterioration of residential amenities.
- v) At this stage the city as we know it was administered by four different authorities i.e. the Pietermaritzburg Municipality, the Kwa-Zulu Government (Vulindlela), the Department of Co-Operation and Development (Greater Edendale) and the Development and Services Board (Ashburton and Fox Hill). As astonishing as it might seem, these areas were planned and developed in isolation of each other, despite their obvious functional and economic interdependence.
- vi) In 1995, the Pietermaritzburg TLC was established with the Greater Edendale area and other areas to the east being incorporated into the city. This was followed in 2000 by the creation of the present municipal area, which brought Vulindlela and additional areas to the east and southeast into the city.
- vii) Although these interdependent areas now form one administrative entity, the outlying area generally still function as dormitory areas to Pietermaritzburg where most of the economic activity is concentrated. One of the primary objectives of the SDF is therefore to reduce the racial separation, spatial segregation and development inequality produced by colonial and apartheid planning.

2.6.4. Planning and Development Informants

- i) The application of general planning and development principles and concepts are influenced by the local context. The following informants shape the SDF;
 - The strategic location of the Municipality on the N3, providing high levels of accessibility between major urban centers and adjacent provinces.
 - The City's status as the Provincial Capital and the primary node in the District, and as an emerging metropolitan area.
 - Present development patterns and the interaction between residential and employment areas, and the availability of facilities to communities.
 - The present transport infrastructure focused on the central area, and low levels of connectivity between the peripheral areas.
 - Physical and topographical constraints.
 - Environmental consideration.
 - Relatively low levels of access to urban services and facilities for some communities.
 - Pockets of poverty and unemployment and low levels of participation in the local economy by low income communities.
- ii) These informants are analysed and discussed in detail in the contextual framework, and the SDF's for the ABMS's.

2.6.5. The Main Elements and Structure of the SDF

- i) In general terms, the planning principles and concepts which underpin the current SDF remain applicable, especially those that conform to the legislative guidelines as set out in paragraph 2 above.

- ii) The draft SDF largely refines and builds on the current SDF, and is aimed at restructuring the radial existing form of the city through;
 - *The introduction of additional Mobility and Arterial roads to create a more functional road lattice to facilitate movement with alternative options. It also attempts to improve access to areas previously marginalised from the local economy.*
 - *The establishment of a series of nodes in both the urban and rural components of the city distributed in such a way that communities are within reasonable travelling distance of the services offered at these nodes.*
 - *Mixed use corridors that extend a limited distance from the CBD, and activity spines in focused areas along some of the major routes, without undermining the primary mobility function.*
 - *The location of new residential developments in relatively few areas within an Urban Growth Boundary, to create a compact and efficient city, contain urban sprawl and conform to basic environmental objectives.*
- iii) The consolidated SDF 's main departure from the current SDF is in the reduction and rationalisation of proposed nodes and development corridors.

2.6.6. The SDF Map and its designations

- i) In order to improve legibility while maintaining basic orientation, the cadastral layer has been removed from the base map. The main categories of existing land use are shown as a faint backdrop, with lower order uses such as corner shops, minor educational facilities and clinics being absorbed into the dominant surrounding land uses. Exceptions are made in cases where such existing facilities are at a higher order or serve as major landmarks, e.g. Edendale and Greys Hospitals, UKZN and Maritzburg College.
- ii) **Nodes**
A hierarchical system of nodes is proposed, based on existing levels and patterns of development, and the distribution of future development and transport linkages, to ensure optimum accessibility to goods and services through equitable distribution. The various nodes are distinguished in terms of whether they are:
 - Existing and to be maintained at that level
 - Existing at a lower level and to be extended and consolidated into a higher level node
 - New nodes to be introduced and phased in over time and as thresholds occur.
- a) **The CBD Node**
This is the heart of the City, and consists of the core and the frame surrounding it. The core contains the full range of uses associated with a CBD, while the frame accommodates transitional uses at a lesser density. The so-called CBD extension node, which includes the recently developed Motor World, the Bird Sanctuary Site, the Midlands Mall and the RAS has been incorporated into the CBD Node.
- b) **Regional Multi-Use Node**
This level of node includes a retail component between 75 000 m² and 120 000 m², and serves a regional function. In addition to retail, it can include a wide range of compatible uses. There is one existing Regional Multi-Use Node (Liberty Mall and the surrounding area, and one in the Edendale area).
- c) **Community Multi-Use Node**
These serve a community function, and would have a retail component ranging from 25 000 m² - 40 000 m². Can also accommodate a wide range of compatible uses, and the SDF distinguishes between existing community nodes to be maintained at existing levels, those with the potential for expansion and future nodes. Essentially, the Edendale Node will be consolidated at this level, and a new node of this type will be induced at Shenstone.

d) Neighbourhood Multi-Use Node

These operate at a neighbourhood level, and have retail components of between 5 000 m² and 12 000 m². These types of nodes occur in two forms, viz as mono use nodes that are pure retailing, and those that are multi-use. Again, the SDF identifies existing nodes to be maintained or expanded, and future nodes.

e) Focus Multi-Use Node

This node includes light industrial, warehousing and “big-box” retailing and other uses not normally found in the other nodes, and is located at Camps Drift.

f) Administration Node

This node is on the edge of the CBD Node and includes Greys Hospital, Carter High School and the Town Hill Hospital Grounds, to which the Provincial Parliament is likely to relocate.

iii) Corridors

a) Provincial Priority Corridor

This is the N3 which has been identified as a priority development corridor by the Provincial Cabinet. Its prime function is to serve as a long-distance movement corridor, and although the agglomeration benefits of the corridor should be optimised, this should not interfere with its primary function. Consequently, development will be located at or near some intersections.

b) Activity Spines

Generally referred to as development corridors, these occur along major arterials leading into or from the CBD Node. A mix of complementary land uses including retail, office, entertainment and residential; about half a street block in width fronting onto the arterials, are to be encouraged, but only in specific areas.

c) Arterial Roads and Bypasses

These existing and proposed roads are aimed at improving accessibility, alleviating congestion in and around the core, and opening up areas previously excluded from the local economy. In the case of future roads, the alignment shown is merely diagrammatic.

iv) Land Use Designations

A range of standard designations are employed, and to improve legibility of the map the main categories of existing land use are shown as a backdrop.

In the case of residential areas, the map distinguishes between:

- a) *existing residential areas (formal, informal and rural) where improvement and/or upgrading is required, and*
- b) *future formal residential areas.*

The exact boundaries and magnitude of future development can only be determined through more detailed assessments, and are subject to obtaining the prescribed statutory approvals. To discourage urban sprawl, an Urban Growth Boundary is suggested along the southern and south-western sides of the Municipality.

Expansion of other areas are constrained by the topography, and to the north-east and eastern side of the Municipality (Ashburton) an Agriculture, Smallholding and Eco-tourism designation is suggested. In these areas, the main objective is to maintain the existing character, and in addition to agriculture, rural/eco-tourism activities are to be encouraged. Land subdivision should not be supported if it will jeopardise the agricultural viability of existing farming operations, and large-scale land transformation should not be allowed

2.6.7 SPATIAL PRESENTATION OF CAPITAL PROJECTS PART OF INFRASTRUCTURE INVESTMENT PLAN

3. UKUBUYEKEZWA KOHLAKA LWENTUTHUKO YEZINDAWO “SDF” LWASEMSUNDUZI

3.1 IMVELAPHI

- 3.1.1. iSpatial Development Framework (SDF) iyingxenywe yohlaka lohlelo lwentuthuko oludidiyelwe owaziwa ngokuthi iIDP. Loluhlaka lungombono wezentuthuko yomkhandlu, kanti kumele uhlale ubuyekwezwa ukuze kubonakale izinguquko eziyaye zibe khona.
- 3.1.2. ISDF yomkhandlu ekhona njengamanje yayiphasiswe ngonyaka ka 2009, kanti okuyimanje iyabuyekwezwa ukuze kufakwe nombono womkhandlu wentuthuko ohamba uze ufike kunyaka ka2035 onesingqi esithi.

uMbono ka-2035

“Siyidolobla Lekhethelo Jikelele”

UKUCHAZWA KWALOMBONO

Idolobha elinokuphepha nokudlondlobala, ongahlala, ufunde,ukhulise umndeni, usebenze, udlale futhi ukwazi nokuhweba ngokukhululeka kulo

- 3.1.3. Ekufezeni lombono, mkhandlu uzogadwa isibophezelo sokuqinisekisa ukufika kwentuthuko, ukuqinisekisa lokho ezinye zezinto ezibalulekile ilezi ezilandelayo:

Ukulungisa izinhlelo ngobuqotho ukuze ukusebenza kwamasipala kuqimisekise ukuthi umasipala usebenza ngokweqophelo eliphezulu njengesisekelo ukuqinisekisa ukulethwa kwezidingo zomphakathi.

3.2 IMITHETHO EYISISEKELO

- 3.2.1 Ukwenziwa kwe SDF kugadwa ikakhulukazi ilemithetho eyisisekelo elandelayo:

- The Development Facilitation Act (DFA)
- The Provincial Growth and Development Strategy (PGDS)
- Environmental Conservation Act (ECA)
- The National Environment Management Act (NEMA)
- Accelerated and Shared Growth Initiative for South Africa (ASGISA)
- National Spatial Development Perspective (NSDP)
- Provincial Spatial Economic Development Strategy (PSEDS)
- NLTTA

- 3.2.2 Njengoba imigomo inqunyiwe kumthetho wezinhlalo zohulumeni basekhaya iMunicipal Systems Act, umthetho 32 ka 2000 inikezela ngokusemthethweni indlela iSDF yomkhandlu okumele yenziwe ngakhona, ngaphansi uhlu lwalemigomo ebekiwe:

- a) Inikezela ukusebenza kwemikhomandlela ekwisigaba sokuqala se DFA, 1995 (Umthetho. 67 ka 1995)
- b) Ibeke amacebo akhombisa isimo sendawo efiswa ngumkhandlu
- c) Inamacebo okuhamba nemigomo nemibandela ngokwendlela yokuphumelelisa (yokuzuza) amacebo lawa adalulwa engenhla (b), imaphi amacebo okuhamba nemigomo kufanele:
 - i) Aveze izindlela zokusebenziswa komhlaba ezifiswayo ngaphansi kwaMasipala
 - ii) Ibhekelele ukuvuswa kabusha kwe ndawo kaMasipala; bese
 - iii) Inikeza unakekelo oluphusile ngokubekeka kanye nendlela yentuthuko ngaphansi kukaMasipala

- d) Ibeke ngokusezingeni imibandela yohlelo lokuphatha ukusetshenziswa komhlaba ngaphansi kukaMasipala
- e) Ibeke i “capital investment framework” lwezinhlelo zokuthuthukisa UMasipala;
- f) Ibe nokuhlolwa okuphusile komthelela kwezemvelo kwiSDF
- g) Iveze izinhlelo nemisebenzi yentuthuko yomhlaba ongaphansi kaMasipala
- h) Ihambisane neSDF evezwe kwi Pulani yentuthuko ephelisiwe (IDP) yoMasapala abangomakhelwane; bese
 - i) Inikeza umfanekiso obonakalayo ye “Spatial Form” kaMasipala,
 - ii) kufanele iveze ukuthi intuthuko yomhlaba wompakathi wonkana nowo muntu oyedwa ne investment yenqalasizinda ingenziwa kuphi.
 - iii) kufanele iveze ukusetshenziswa kwendawo okufunakalayo nokungafuneki kwendawo kwi ndawo
 - iv) Iveze umphetho wedoloba
 - v) Iveze izindawo lapho ekudingeka khona ungenelelo oluphusile iphinde
 - vi) iveze izindawo ezidinga uxhaso olukhethekile

3.2.3 Imigomo eshicilelwe esigabeni sokuqala seDevelopment Facilitation Act ikhombisa ukuthi yini okumele ibe yimiphumela ekuhlweni kwezentuthuko kanye nokubhalisa izicelo kanye nezinhlelo zentuthuko. Okuhambisana kakhulu nokubuyekizwa kwe SDF, ileyomigomo eshicilelwe kwinklamvu a) etholakala kwisigaba sokuqala se DFA:

Imigomo nemithetho ye “administrative practice” ifanele:

- i) Ukuletha intuthuko ezindaweni ezisemaphandleni nasemadolobheni.
- ii) Ukwenzalula intuthuko yezindawo ezihlelekile nezingahlelekile, ezikhona nezintsha zokuhlala.
- iii) Ukuvimbela ukusebenzisa umhlaba ngokungemthetho.
- iv) Ukugqagqazela ukuthuthukiswa komhlaba ngokusheshayo.
- v) Ukugqagqazela ukuthuthukiswa komhlaba ngokwanele futhi nokuhlangene.
 - Ukugqagqazela ukuthuthukisa umhlaba okuhlanganisa ezenhlalakahle yomphakathi, ezomnotho, nokuhleleka, nangokwakheka komhlaba ngokwendalo,
 - Ukugqagqazela intuthuko ehlanganisile emaphandleni nasemadolobheni
 - Ukugqagqazela ukuba khona kwezindawo zokuhlala nokuvuleleka kwamathuba emisebenzi ezindaweni ezisemaduze noma lezi zindawo zihlanganiswe ndawonye
 - Ukusentshenziswa kwemkhakha ekhona ngokwanele ibandakanye imikhakha ethintene nezolimo, umhlaba, ezimbiwa phansi, izinqalasizinda, ezokuthutha, nezinto zomphakathi.
 - Ukugqagqazela ukusentshenziswa komhlaba okuxubile, nasemhlabeni womuntu oyedwa noma emhlabeni ehlukenisiwe.
 - Ukuvimbela ukugqagqana kwezindawo ezingamadolobha, bese kuxhaswa intuthuko yamadolobha ahlange.
 - Ukuxhasa ekulungiseni izindawo
 - Ukugqagqazela ukulandela imikhuba kanye nezindlela okuyizona ezibheke ezemvelo.

3.3. iSPATIAL FRAMEWORK PLAN EKHONA

3.3.1. Njengamanje iSpatial Framework Plan siyingxenywe yombiko womkhandlu iIDP okuwuhlelo lwentuthuko edidiyelwe ka 2002. Lokhu ke kunikeza inhloso yezinhlelo, kanti futhi inikeza lemgomo elandelayo engumkhombandlela yentuthuko:

- Ukuhlanganisela ezentuthuko
- Ukudidiyelwa kahle kwezinhlelo
- Ukwandiswa kwemiphakathi
- Ukuhlolwa kabusha kwedolobha

- Ukuhlangabezana nezidingo zokusentshenziswa komhlaba
- Ukukhomba izindawo ezingabamba iqhaza ekuthuthukiseni umnotho

- 3.3.2. Le “Framework Plan” inikeza imiphumela elindelekile embalwa, kanti futhi ithinta nakwimikhombandlela egadile kanye nendlela esentshenzisiwe ukwenza izinhlelo ezenziwe, okufaka ukusentshenziswa kwama “movement systems”, “corridors” kanye nama “nodes” (izindlela zokuhamba kanye namathuba avelayo).
- 3.3.3. Loluhlelo luveza izindlela ezidinga ukunakwa ngokucophelela, kanye nezindawo lapho izinhlelo eziseqopheleni eliphezulu esenziwe khona, noma obekusadingeka ukuba izinhlelo zenziwe. Lezizindawo zifaka inxenyekazi enkule iEdendale ne Imbali, inxenye enkulu yedolobha (Central Area), kanye nomhlaba onothe kakhulu ngokwezolimo osentshonalanga nomkhandlu (Vulindlela). Kuloluhlelo kukhona neziphakamiso zokwandisa imiphakathi, ukuvikeleka kwezakhiwo, kanye nemigomo yezinhlelo zentuthuko efanelekile kwezinye izindawo.

3.4. iSDF ESABUYEKEZWA

3.4.1 Imvelaphi

- i) Indlela Umkhandlu owayikhetha ukwenza iSDF, yaba ukusungula iSpatial Development Framework yezigceme ezine ezaziwa ngokuthi ngama “Area Based Management Sectors (ABMs)”. Kuzokwenziwa iSDF yendawo ngayinye, kube sekwenziwa iSDF eyodwa yomkhandlu wonkana esezingeni elifanelekile. Lezi zigceme ezaziwa ngama ABMS ilezi ezilandelayo:
1. Northern Area.
 2. CBD, Ashburton, Eastern Areas.
 3. Vulindlela.
 4. Greater Edendale.
- ii) Ekuqhubekeni kokuhlanganiswa kwezinhlelo zalezizindawo ezine, izinga elithize lokuhlanganisa izinhlelo libalulekile ukuze kuqinisekiswa intuthuko ephumelelayo.

3.4.2. Umlando

- i) Ukubona izinkinga ezihambisana nesimo sedolobha, kanye nokuhlela okudinga ukwenziwa ukulungisa lesisimo, kuyofanele sizikhumbuze ukuthi imingcele yomkhandla yaqhamuka kanjani. Njengoba kukhonjisiwe ebalazweni 1, indawo yomkhandlu uMsunduzi uhlukeni izinxenye ezintathu, eziyikhaya kubantu abalinganiselwa ku 200’000.
- Idolobha lasePietermaritzburg
 - Greater Edendale
 - Vulindlela Tribal area
- ii) Ngeminyaka yo 1850’s, intuthuko yayenzeka kakhulu maphakathi nedolobha, okuhambelana kakhulu nendlela imaphakathi ledolobha libukeka ngakhona njengamanje. Ngokuhlanganiswa namadolobhana aseduze kwakheka indawo eyabizwa ngokuthi iPietermaritzburg.
- iii) Kwathi ngonyaka ka 1848 kwaqanjwa indawo eyabizwa nge “Zwartkop” ngasentshonalanga kwedolobha. Imingcele yalendawo ayizange ishintshe, kanti yagcina isibizwa ngendawo yaMakhosi i“Vulindlela”.
- iv) Ngeminyaka yo 1970 kwasungulwa indawo yase Edendale njengendawo ezimele yezokubhalisa eyayingaphansi kohlelo lukahumeni wobandlululo. Ngesikhathi esifanayo, emizameni yokukhipha abantu emalokishini, okwenza ukuthi kwakheke amaqulu ezindaweni ezazibizwa ngezabelungu, ukuntshalwa kwezimali kwaba kuncane ngakwezengqalasizinda, lokhu kwaholela ekutheni ukunakekela izindawo ezinjengo Sobantu kube sezingeni eliphansi ngedlela yokuthi izakhiwo zokuhlala zaba sezingeni eliphansi.

- v) Njengamanje, njengoba sazi ukuthi idolobha lalilawulwa imikhandlu emine, ngamanye amazwi, Umkhandlu Pietermaritzburg, Uhulumeni waKwaZulu (Vulindlela), Umnyango “Co-Operation & Development” (Greater Edendale) kanye nebhodi “Development & Services Board (Ashburton & Fox Hill). Lokhu kungabukeka kumangalisa, kepha lezi zindawo zahlelwa zaphinde zathuthukiswa ngokubandlululana ngayinye ngayinye, kwangabhekwa ukusebenzisana kanye nokudingana kwazo ngakwezomnotho.
- vi) Ngonyaka ka 1995, kwasungulwa iPietermaritzburg TLC kwathiwa indawo yase Greater Edendale nezinye izindawo ezingasempumalanga zahlanganiswa nedolobha. Lokhu kwalandelwa ngonyaka ka 2000 ngokusungulwa kwendawo yomkhandlu ekhona njengamanje, okwaholela ekutheni izindawo ezinjengo Vulindlela kanye nezinye izindawo ezizungezile ezingasempumalanga kanye naseningizimu-mpumalanga zihlanganiswe nedolobha.
- vii) Noma ke lezi zindawo ezidinganayo sezenza umkhandlu owodwa, ezinye zezindawo eziqhelile zisasebenza njengezindawo zokuhlala nje kuphela ezakhele iPietermaritzburg, lapho ezohwebo zenziwa khona kakhulu. Esinye sezimpokophelo saloluhlaka lokuthuthukisa izindawo (SDF) kungukwehlisa izinga lokuhlukana kwezinhlanga, intuthuko engalingani eyayikade yenziwe ukudliwa kwemihlaba (Colonialism) kanye nokuhlela ngesikhathi sobandlululo.

3.4.3. Imigomo elandeliwe ye“Planning Design”

- i) Ukwenezela kwimithetho sisekelo enikeziwe embikweni wesibili, lokhu okulandelayo eminye imigomo yokuhlela izindawo egada ukucuntshungulewa kweSDF:
 - Intuthuko eqhubekayo
 - Ukulungisa ukungalingani
 - Ukuhlanganisela kwentuthuko
 - Ukuhlanganiswa kahle kwezinhlelo
 - Amadolobha ahleleke ngendlela
 - Ukwandiswa kwemiphakathi emadolobheni
- ii) Lokhu kucuntshungulwa kweSDF kufake phakathi neSDF yomkhandlu Umngungundlovu District Municipality, kuleSDF uMsunduzi uvezwe njengendawo ebalulekile “primary node” emkhandlwini Umngungundlovu wonkana. Yingakho ke ngokunjalo kuneziphakamiso zokusimamisa izinga lemingwaqo okuhamba kuyo izivakashi, kanye nokusungula eminye imigwaqo emincane ukuze kwehle isiminyamina eduze kanye nakuyo i“Primary Node”. Kubalulekile ukubandakanywa kwamanye amaSDF’s yemikhandlu eyakhelene noMsunduzi kungakapheli ukubuyekizwa kwaleSDF.
- iii) Lesi sithombe esilandelayo saziwa njenge “Dewar’s generic concept”, kanti sikhombisa indlela esentshensiziwe ukuze kufezuke imikhombandlela yezokuhlelwa kwezindawo.

3.4.4. Izinto ezibalulekile ekuhlelweni kwezentuthuko

- i) Ukusetshenziswa kwemigomo efanelekile yezokuhlela nezentuthuko, iholwa izinto ezisuke zikhona kuleyondawo. Ngakho ke lokhu okulandelayo yikhona okuhola iSDF kulendawo:
 - Ukwakhiwa komgwaqo onguthela wayeka uN3, okwenza ukuba kufinyeleleke kalula kwamanye amadolobha amakhulu kanye nezinye izifundazwe ezakhelene nomkhandlu.
 - Isimo sedolobha ukuba yiNhlokodolobha yesifundazwe saKwaZulu-Natali, ukuba yi “Primary Node” yomkhandlu uMgungundlovu wonkana, kanye nokudlondlobala kwedolobha ngokuba yi “Metropolitan Area”.
 - Isimo sezentuthuko esikhona njengamanje, ukubambisana kwezindawo zokuhlala nezokusebenza, kanye nokuba khona kwezidingo nqangi emiphakathini.
 - Izinga lengqalasizinda yezokuthutha ebheke kakhulu endaweni emaphakathi nomkhandlu, kanye nezinga eliphansi lokuxhumana kwezindawo ezisekupheleni kwendawo yomkhandlu.

- Izinga eliphansi lokuthola ama“services” kanye nezinye izidingo zomphakathi ezisemadolobheni.
- Izingqinamba zokwakekha komhlaba ngokwendalo
- Ukunakekelwa kwezemvelo
- Ububha, ukuswelwa kwemisebenzi kanye nezinga eliphansi lokuzibandakanya kwezomnotho wendawo kwemiphakathi eholo kancane.

- ii) Lezi zinto ezinikezwe ngaphezulu zishiwo zaphinde zacuntshungulwa kahle kwi ‘Contextual Framework’ kanye nakuma SDF yama ABMS.

3.5 Okubalulekile kanye nokuma kwayo iSDF

3.5.1. Isingeniso

- i) Imikhomandlela yezokuhlela kanye nezindlela okuyizona ezigada iSDF zibalulekile kanti ziyasetshenziswa, ikakhulukazi leyo ehambisana nemithetho eyisisekelo, ekhona kumucu wesibili ongenhla.
- iii) Lendlela ibuye iqonde ekutheni kusungulwe i-“road lattice”, ezokwazi ukunikeza izindlela eziningi zokuhamba ezikhululekile, kanye nokuhleleka kwemigwaqo okucacile nama “nodes” ahlelekile, ngamanye amazwi ukuhlukaniseka ngezigaba ezahlukenene kwama “nodes” ahlukane kusukela kwamancane kuze kuyofika kulawo amakhulukazi asenthenziswa abantu bomkhandlu wonkana.

Ukusentshenziswa kwendlela yamawele “Nodes and Corridors” yikhona osekdumile kuleminyaka eyisihlanu eyedlule. Sekubonakele-ke nokuthi kwezinye izindawo lokhu sekuke kwasentshenziswa ngendlela engafanelekile. Lokhu-ke sekubonakale ngokuthi yonke imigwaqo emikhulu esezingeni lokuba phecelezi “Major Limited Access Mobility roads and Major Arterials” kuvele kuthiwe uyi“Corridor” okanye uyi“Spine”, kanti nala kukhona ukuphithizela “Major activity foci located along such a road” okuthize khona kulowomgwaqo kuvele kuthiwe yi“Node”

- iv) Ekusentshenzisweni kwayo lendlela okuhle, igqugquzela ukubekwa kwezakhiwo ezahlukeneyo kuyona lemgwaqo. Akukaze kwenzeke ukuthi kube khona izinkomba zokuthi lendlela ixhasa indlela eyaziwa ngokuthi i“Ribbon Development” ekusungulweni kwalendlela. Lendlela yokuhlela ezentuthuko iqonde ukuthi ama“nodes” angafani kanti futhi ahlukane ngokufanele, ngokujwayelekile ayaye ahlukane ngebanga elingango 2km ukusuka kwenye. Lokhu kwenzelwa ukuthi abantu abaningi bakwazi ukuhamba bafike kulezi zindawo. Kusezindaweni ezikhethiwe kuphela, la kutholakala khona inxanxathela yokusentshenziswa komhlaba ibekwe eduze kwayo lemgwaqo emikhulu, kanti lokhu kubizwa nge “Mixed-use corridor”.
- v) Ngeshwa, lendlela yama “corridor” isixhunyaniswe neyama “mixed-use”, okungayona inhloso noma into enhle neze. Sekuze kwaba khona ngisho nomkhuba wokuthi kubekwe ama“nodes” noma ikuphi nje la kukhona lemgwaqo engothela wayeka.. Ngokusobala, kukhona amazinga ahlukeneyo ama “nodes” angawezohwebo, njengoba emadolobheni amakhulu kuba khona ama“nodes” asezingeni lokuba isigaba sesihlanu kanye nokunzelwa kwezinhlobo ezintsha zenxanxathela yezitolo. Okanye okungaba khona ama“nodes” amahhovisi, isibhedlela okanye ezokubhalisa (Administration) angaba kude kulawa manye ama“nodes”. Okuyaye kungabi iyona indlela yokwenza izinto, ukuzama ukufaka wonke lama“nodes” kuzigaba eziyi “Primary, Secondary and Tertiary” ezinhlalweni ezenziwayo, ikakhulukazi ezingeni leSDF, lokhu akusiyo indlela eqotho.
- vi) iSDF esabuyekwezwa, ilungisa iphinde yakhele phezu kweSDF esikhona vele, kanti ihlose ukuthuthukisa idolobha ngalezi zindlela ezilandelayo:
- Ukungeniswa kwemigwaqo “Mobility and Arterial roads” ezokwenza ukuthi imigwaqo isebenze kangcono, enezindlela zokuhamba eziningi. Ibuye futhi yenze ngcono ukufinyelela ezindaweni ezazikade zishaywe indiva phambilini.

- Ukusungulwa kwama “nodes” amaningi ezindaweni zedolobha ezisemadolobheni kanye nezisemakhaya, kumele abe sezindaweni ezihambeka kalula kuzona umuntu athole izidingo ngqangi ezitholakala kuwona lama “nodes”.
- Ama “Mixed-use activity spines” anebanga elifingqiwe ukusuka maphakathi nedolobha (CBD), asezindaweni ezihlelekile emigwaqweni emikhulu, kodwa angacekeli phansi ukuhamba okukhululekile “primary mobility function”.
- Ukubekwa kwezentuthuko zezindawo zokuhlala, ezindaweni ezincane ezisemngceleni wokukhula kwedolobha “Urban Growth Boundary” ukwenza idolobha elihlangene kanti futhi elihlelekile, elihlonipha imigomo nemibono yezemvelo.

vii) Ukubuyekwezwa kwaleSDF, kuqonde ikakhulukazi ekwehliseni inani nasekubhekeni ama “nodes” nama “corridors” entuthuko afanelekile.

3.5.2. Ukusentshenziswa kwalezi zidlela eMsunduzi

i) Ukuze kugwemeke ukungaboni ngaso linye, ekusentshenzisweni kwalezi zindlela kuzosentshenziswa lamagama alandelayo. Kanti isithombe esikhona langaphansi, sikhombisa izinto ezahlukeni ezihlanganisa zonke lezi zindlela.

- “Mobility Roads” Esikhundleni sokuyibiza ngama “corridors” lemigwaqo iyobizwa ngama “Mobility Roads”, njengemigwaqo okungangeneki kuyo noma ikuphi lemigwaqo izokuba nama “Nodes” kanti noma iluphi olunye uhlobo lwentuthuko oluzoba kuyona noma eduze kwemigwaqo, luyobekwa ezimpambanweni zemigwaqo ezifanelekile.
- “Arterial Roads” Nalemigwaqo izokuba nama “Nodes” ezimpambanweni zemigwaqo ezifanelekile. Kanti kungenzeka ukuthi kube khona izakhiwo ezithize eduze kwayo lwemigwaqo “Spines”, ezinjengezinkudla ezinkulu zezemidlalo, izibhedlela, izikole zamabanga aphezulu kanye nezinye izakhiwo ezingafaneleka, okungenzeka nokuthi zingabi nhlobo ingxenywe yaleyo “Node”. Imigwaqo emisha ehlongozwayo yokulekelela ikhuphule izinga lokuxhumana kwezindawo iphinde inciphise izinga lesiminyaminyana sezimoto nayo ibonisiwe kwiSDF.
- Ama “Nodes” ayohlukaniswa ngokwezinga lwezohwebo uma ehlobene nezomnotho, noma uma ezothuthukiswa eduze kumbe ezindaweni zokubhalisa. Ama “Nodes” azosungulwa ngokubheka abantu abadingakalayo ukuxhasa leyo “Node”, ukuze kungathiwa konke lakuphambana khona imigwaqo sekuyi “Node”
- “Mixed-Use Corridors” Lokhu khona kuzoba khona ezindaweni ezikhethekile kuphela, ngamanye amazwi kulezo zindawo lapho i “Arterial Road” isuka phakathi nedolobha (CBD) noma kuma “Nodes” asondelene kakhulu.

ii) Uhlelo lweSDF luveza uhlukaniso phakathi kwalezi zinto ezilandelayo: (bona nesithombe)

• IMIGWAQO

- Imigwaqo evela isikhona-(zonke izinhlobo zemigwaqo)
- Imigwaqo edinga ukulungiswa noma ukwandiswa
- Imigwaqo emisha-(zonke izinhlobo zemigwaqo)

• “NODES”

- Ama “Nodes” avele asekhona azoyekwa esezingeni akulona njengamanje.
- Ama “Nodes” ahlanganisiwe noma akhulisiwe, lapho lama “Nodes” azokhushulwa izinga lawo ukuze abambe iqhaza elisezingeni eliphezulu.
- Kuzosungulwa ama “Nodes” amasha, aphinde abekwe ezingeni elifanele.

3.6 ISITHOMBE ESIYISIBONELO SEMIHLAHLA NDLELA YEZOKUHFLELA

3.6.1 iMap yeSDF kanye nokuchazwa kwayo

- i) Ukuze kwenziwe ngcono ukubukeka kweMap, kodwa kube kuvela zonke izinto ezibalulekile, abanye bolayini basusiwe “cadastral”. Izinhlobo zokusentshenziswa komhlaba ezikhona njengamanje ziboniswe ngokufufuyela. Lokhu kufaka phakathi izinto ezinomthelela omncane njenge zitolo ezincane, izindawo zokufunda ezincane, imithola mpilo. Kodwa ke izinto ezinemithelela emikhulu zona ziboniswe zangqama, okubalwa kuzo izibhedlela ezimbili iEdendale kanye ne Greys, isikhungo sezemfundo ephakeme iUKZN, kanye nesikole iMaritzburg College.

ii) “Nodes”

Ukuphakanyiswa kokuhlelwa kwama “Nodes” ngezigaba ezahlukene, kusukela ekutheni kukhona izigaba nezindlela ezahlukene zezentuthuko kanye nokuxhumana ngezokuthutha, ukuze kufinyeleleke kalula ezintweni ezithenngwayo kanye nezidingo ngqangi ngendlela elinganayo engachemile. Lama “Nodes” ahlukahlukene asungulwe ngalezi zindlela ezilandelayo:

- Ama “Nodes” avele esekhona, futhi adinga ukuyekwa asezingeni akulona.
- Avele esekhona kodwa asezingeni eliphansi, kanti adinga ukukhuliswa aphinde ahlanganiswe ukuze abe ama “Nodes” asezingeni eliphezulu.
- Ama “Nodes” amasha azosungulwa, okuyothi uma kuhamba isikhathi abuyekwe, abekwe ezingeni elifanele uma nenani labantu abalisebenzisayo likhula, kodwa azokhonjiswa ezingeni eliqondiwe.

a) “CBD Node”

Lena inhliziyo yedolobha, kanti inomgogodla kanye nonqenqema olusemaceleni kwayo. Imaphakathi linenxanxathela yokusentshenziswa komhlaba okuhambisana ne “CBD”, kanti unqenqema nalo lunezinye izinto kodwa esibalweni esiphansi. Lokho okubizwa nge “CBD” ekhulisiwe okufaka phakathi izinto ezisanda kwakhiwa ezinjenge “Motor World”, “the Bird Sanctuary Site”, “Midlands Mall” kanye ne “RAS” sekufakwe kuyona i “CBD Node”

b) “Regional Multi-Use Nodes”

Lelizinga le “Node” lufaka phakathi izakhiwo zohwebo ezisemhlabeni osukela esibalweni esingu 75 000 m² kuya ku 120 000 m², kanti futhi isentshenziswa umkhandlu wonkana. Ukunzela kwezohwebo, kungangena izinto eziningi ezifanele. Okwamanje iyodwa i “Regional Multi-Use Node” ekhona okuyimanje okuyi “Liberty Midlands Mall” kanye nezindawo ezakhelene nayo, kanti enye isahlongoziwe endaweni yase Edendale.

c) “Community Multi-Use Nodes”

Loluhlobo lwe “Node” lubhekene nezidingo zomphakathi, kanti luba nezohwebo emhlabeni onesibalo esisuka ku 25 000 m² kuya ku 40 000 m². Lama “Nodes” afaka phakathi izinto eziningi ezifanele, kanti neSDF ihlukanisa kahle ama “Community Multi-Use Nodes” avele esekhona, futhi adinga ukugcinwa akulesosimo, namanye afanele ukukhuliswa, kanti amanye awangesikhathi esizayo. iEdendale Node yona izohlanganiswa kulelizinga, kanti i “Node” entsha izosungulwa endaweni yaseShenstone.

d) “Neighbourhood Multi-Use Nodes”

Lawa-ke wona ama “Nodes” asebenza ezingeni lomakhelwane, kanti ezohwebo ziba semhlabeni osuka ku 5 000 m² kuya ku 12 000 m². Ngenjwayelo lama “Nodes” aba izinhlobo ezimbili, okungaba uhlobo olulodwa lokusentshenziswa komhlaba okungezohwebo kuphela noma kube izinhlobo eziningi. Ngokunjalo futhi iSDF iwatholile lama “Nodes”, amanye awo azodinga ukuyekwa asezingeni akulona amanye azokwandiswa, kanti amanye azobuyi asungulwe ngesikhathi esizayo.

e) “Focussed Multi-Use Node”

Loluhlobo lwe “Node” lufaka phakathi izinto ezinjengezimboni zokukhiqiza ezincane “Light Industrial and Warehousing”, nezohwebo ezaziwa nge “big-box”, kanye nokunye ukusentshenziswa komhlaba okungatholakali kwamanye ama “Nodes”, lokhu kukhona endaweni yase Camps Drift.

f) “Administration Node”

Loluhlobo lwe“Node” lutholakala ekupheleni kwe“CBD Node” kanti lufaka phakathi isibhedlela iGreys, isikole iCarter High School, kanye neTown Hill Hospital Grounds la okuyikhona okusethubeni futhi okusahlongozwa ukuthi iphalamende lesifundazwe liyiswe khona.

iii) “Corridors”Imigudu

a) i“Corridor Ebalulekile Esifundazweni / Limited Accessibility Mobility Road”

Le“Corridor” ingumgwaqo onguthela wayeka uN3, kanti lomgwaqo uyi“Corridor” yezentuthuko ebaluleke kakhulu, eyanqunywa yikomiti lesifundazwe eliphezulu (Provincial Cabinet).

Umsebenzi walo omkhulu ukuba yi“Corridor” exhumanisa izindawo eziqhelelene, noma ukuhlanganiswa kwezomnotho kuwona lomgwaqo kumele kusekwe, kodwa akumele kuphazamise umsebenzi wayo omkhulu. Ngendlela ehleliwe, kuyoba khona intuthuko ethize eduze kwezindawo lakuhlukana khona imigwaqo kuwona lomgwaqo onguthela wayeka.

b) “Activity Spines”

Ama“Activity Spines” ajwayele ukubizwa ngama“Corridors” entuthuko, kanti avame ukuba emigwaqweni emikhulu esuka noma eya kwi “CBD Node”. Inxanxathela yokusentshenziswa komhlaba okuhambisanayo, okubalwa kuyo ezohwebo, amahhovisi, ezemidlalo kanye nezindawo zokuhlala.

Mhlawumbe ingxenye yezakhiwo ezibheke kuwo lowomgwaqo kumele sigqugquzelwe, kodwa ezindaweni ezikhethwe kahle.

c) “Arterial Roads and Bypasses”

Lemigwaqo esivele ikhona neminye esahlongoziwe, kuhloswe ukuba yenze ngcono ukufinyelela kanye nokwehlisa izinga lesimimnyamina emaphakathi nedolobha, kanye nokufika kalula kwezinye zezindawo ezazikade zibandlululiwe phambilini.

Esimweni semigwaqo emisha ehlelelwe isikhathi esizayo eminye yawo ikhonjiswe ngomdwebo.

iv) Ukukhonjiswa kokusentshenziswa komhlaba

a) Kusentshenziswe izimpawu ezahlukahlukene ukuze kwenziwe ngcono ukubukeka kwebalazwe (Map), kanti ngokunjalo ukusentshenziswa komhlaba okukhulukazi kukhonjiswe ngokufiyela ngemuva.

Lelibalazwe (Map) esihlukanisa izindawo zokuhlala ngalendlela elandelayo:

- Izindawo esezivele zikhona (ezihlelekile, ezingahlelekile nezasemakhaya), okuyilapho ukwenziwa ngcono kwazo kudingeka, kanye
- Nezindawo ezihlelekile okungezesikhathi esizayo.

iSDF ayikhombisi ngokugcwele inani labantu abozohlala kulezi zindawo zokuhlala ezihlelelwe isikhathi esizayo. Lokhu kwenziwa ukuthi loludaba kuyomele lulungiswe ngokuphelele kwi pulani yomkhandlu yezindlu kanye nakusomqulu wokuphatha kokusentshenziswa komhlaba “Land Use Management System”.

Imingcele kanye nobubanzi bentuthuko ehlelelwa isikhathi esizayo, ingatholakala ngokwenza ucwaningo olunzulu, kanye nokuthola eminye imithetho eyisisekelo egunyazayo mhlawumbe ebhalelwe lesi sikhathi esizayo. Lomfanekiso olandelayo ukhombisa amanani ezindlu okungenzeka ukuba zakhiwe kulezi zindawo ezihlongoziwe.

UMFANEKISO 1: UBUBANZI BALEZI ZINDAWO ZENTUTHUKO EZIHLONGOZIWE KANYE NAMANANI EZINDLU EZINGAKHIWA

ABMS	Total ABMS (hectares)	Extent (hectares)	Dwelling Units/Lots per ha	No. of Dwelling Units/Lots
Future Formal Residential				
Northern	6,551.28	1,300.90	10/ha	13,000
CBD/Eastern/Ashburton	22,639.15	4,041.77	10/ha	40,000
Imbali/Edendale	8,971.18	819.28	15/ha	12,200
Vulindlela	25,209.68	0.00	0.00	0
	63,371.29	6,161.95		65,200
Future Economic Opportunities				
Northern	“	0.00	0.00	0
CBD/Eastern/Ashburton	“	508.73	8/ha	4,000
Imbali/Edendale	“	148.37	8/ha	1,000
Vulindlela	“	224.01	8/ha	28
				5,100

- b) “Future industrial areas”: Lezi zindawo zezimboni zizokuba khona ikakhulukazi ngokukhulisa lezi esezivele zikhona, kanti ezohwebo eziphezulu kanye nentuthuko yamahhovisi iyobekwa kuma “Nodes” ahlangoziwe nakuma “Activity spines”
- c) Ukuze kungakhuthazeki ukukhula kwedolobha ngendlela engahlelekile, kuyobaluleka ukwenza umngcele wokukhula kwedolobha “Urban Growth Boundary” ngasenxenyeni eshona ngaseningizimu ntshonalanga nendawo yomkhandlu.
- d) Ukukhuliswa kwezinye izindawo, kuvinjwa izingqinamba zokwakheka komhlaba ngokwendalo, kanti engxenyeni eshona ngasenyakatho nasempumalanga yomkhandlu kuhlongozwe intuthuko ekalelekile (Longer Term Development Areas). Njengamanje lezi zindawo kuphakathi kokuthi azithuthukisiwe noma zisentshenziswe ezolimo, kanti kusukela ekuhlawumbiseleni okukhona kanye nakuzinhloso zeSDF, angeke zidingeke ekukhulisweni kwedolobha esikhathini esifushane nesiphakathi nendawo esizayo. Inhloso enkulu, ukugcina kuphindwe kwenziwe ngcono izindawo zasemakhaya esezikhona, lapho ukusentshenziswa komhlaba okusahamba phambili ezolimo, okuxhaswe ezokuvakasha ezisezingeni eliphansi. Ukushintshwa kokusentshenziswa komhlaba okukhulu, kuzomele kungagqugquzelwa, kanti lapho intuthuko ehlongozwe khona uma kungahambisani nalemigomo, kuyodingeka ukuthi kwenziwe umbiko osezingeni eliphezulu oyokhombisa isidingo nokubaluleka kwaleyontuthuko, okuhambisana nezinhloso zeIDP kanye nezeSDF, ukunikezela kwezidingo ngqangi, indlela yokufinyelela, intuthuko eyoba khona isikhathi eside kanye nezinye izinto.
- e) “**Restricted Use Areas**”: Lezi izindawo ezingeke zathuthukiswa nganoma yini, ngenxa yesimo sesemvelo ngokwakheka komhlaba. Izintaba zakhona zime kabi umqansa wakhona ungaphezu kuka 1:3, kunemifula, kanye nezindawo ezivikelwe ngoba zibalulekile ngaphansi kwezemvelo. Ukuphathwa kwalezi zindawo kongokwesikhathi esizayo kuyovezwa ngokuphelele kwipulani yomkhandlu yokuphathwa kwezemvelo “Environmental Management Framework”, esenziwa njengamanje.
- f) “**Rural Service Centers RCS’s**”: Lezi izindawo ezikhonjiwe, lapho kuzoba khona izidingo ngqangi ezahlukeneyo ukuze zisentshenziswe imiphakathi entulayo. Lezi izindawo ezibalulekile, lapho izidingo ngqangi eziningi zitholakala khona. AmaRCS’s asukele kwiicebo elaziwa ngokuthi yi “Rural Service System”, elibhekele ukwaba ezohwebo ngedlela ehlelekile (okufaka phakathi ukulethwa kwezidingo ngqangi ngendlela ebonakalayo), ezindaweni ezikhonjiwe eziphithizelayo (Node), ezisemigwaqweni yezokuthutha.

Ukuhlanganiswa kwezohwebo, kususelwa ekutheni kumele kuhlomule abantu abaningi, ngamanye amazwi ukusebenzisa ingqalasizinda ngokuhlanganisela, ukushiya emakethe, kanye nokukhiqizelana izinto. Inani labantu abadinga izidingo ngqangi endaweni ilona eliyosho ubuningi balezo zidingo ngqangi eziyoba khona kulezi zindawo, okusho ukuthi uma inani labantu abazidingayo lilikhulu, nazo ziyoba zininngi

- g) **“Urban Agriculture”**: Lokhu kuqode ukusho ukuthi izindawo ezisengxenyeni yedolobha, kodwa zinothile kukhiqiza ezolimo, okuyomele zibekwe eceleni ngesizathu sokuthi kukhiqizwe okudliwayo kuzo. Ukunyezela, ezinhlosweni zendawo kanye nezokuphepha kokudla, lokhu kugcinwa kwalezi zindawo kuhambisana nezinhloso zokuvikela imvelo.
- h) **“Communal Agriculture”**: Lokhu kuqode ukusho ukuthi lezi izindawo esezivele sezisetshenziselwa ezolimo ngokuhlanganyela komphakathi, kanti futhi zinethuba lokuthuthukiselwa ezolimo olusezingeni eliphakame kunalokhu eziyikhona njengamanje, ngalokhu kungagqugquzelwa ukugwebindlala. Lezi izindawo ezingasentshenzisela izingadi zomphakathi noma okanye amadlelo asentshenziswa ngumphakathi.
- i) **“Corridor Opportunity Areas”**: Ngokwemigomo yesifundazwe, kunezindawo ezigudla umgwaqo onguthela wayeka uN3 ezifanele ukuba zithuthukiswe ukuze kukhuliswe umnotho. Lapha eMsunduzi lezindawo zitholakala empambanamigwaqo engenela eLynfield Park / Lion Park kanye nongenela eAshburton. Kuzobaluleka ukuthi kwenziwe amaLocal Area Development Plans alezizindawo ukuze kuzohlelelwa ukuthuthukiswa kwazo.

4. IDENTIFICATION OF EXISTING AND POSSIBLE NODES

NO.	NAME	RANK	LOCALITY	DESCRIPTION
1	Elandskop	Secondary	Vulindlela	Existing social and business infrastructure.
2	Santi	Secondary	Vulindlela	Existing social and business infrastructure. Supported by a taxi rank.
3	Zinqamu	Primary	Vulindlela	Significant social and business infrastructure. Located at the intersection of a Primary and Secondary Corridor.
4	Emafakatini	Primary	Vulindlela	Significant social and business infrastructure. Adjoining area densely populated.
5	Taylors Halt	Primary	Vulindlela	Major concentration of business and social services. Flat vacant land for further expansion. Centrally located within the Vulindlela area - Situated on the Primary Development Corridor.
6	KwaMpande	Tertiary	Vulindlela	Situated at a significant intersection. Potential to improve access to social and business opportunities.
7	Gezubuso	Tertiary	Vulindlela	Situated on the Primary Development Corridor - supporting a large concentration of people.
8	Ngubeni	Tertiary	Vulindlela	Potential for expansion into a Tertiary node.
9	Mtoqotho	Primary	Vulindlela	Strategically located within the Vulindlela area - supporting a dense concentration of people.
10	Sweetwaters	Primary	Vulindlela	Major concentration of business and social facilities. Densely populated.
11	Sinathing	Tertiary	Sinathing Road	Potential for expansion into a Tertiary node.
12	Unit S Azalea	Primary	Azalea	Situated at a proposed major intersection. Potential for expansion into a Primary node.
13	Willowfountain	Secondary	Willowfountain Road	Built around existing social infrastructure.
14	Georgetown	Primary	Edendale	Existing social and business infrastructure. Layout based on a grid pattern.
15	Caluza Edendale	Secondary	Edendale	Situated on the Primary Development Corridor. Major intersection point.
16	Caluza Harenwood	Tertiary	Caluza Road	Identified in the Edendale Private Landowners Initiative.
17	Machibisa - Mabulala	Tertiary	Machibisa Road intersection	Community facility node. Identified in the Edendale Private Landowners Initiative.
18	Dambuza - Eringini	Tertiary	Dambuza - Machibisa Road	Community facility node. Identified in the Edendale Private Landowners Initiative.
19	Quarry	Tertiary	Willowfountain - Route 9 Road	Potential industrial node.
20	Imbali	Primary	Imbali Central	Potential industrial and commercial expansion.
21	Qokololo	Secondary	Edendale Road - Route 13	Commercial mixed use expansion.
22	Imbali Office	Tertiary	F J Sithole Road	Administration and mixed use development.

NO.	NAME	RANK	LOCALITY	DESCRIPTION
23	Masons Mill	Primary	Edendale Road	Built around an existing industrial complex. Potential commercial expansion.
24	Slangspruit	Tertiary	Newport Drive	Mixed use development at major intersection.
25	Foxhill	Tertiary	Foxhill - Ambleton	Mixed use development at major intersection.
26	Southgate	Secondary	Bisley	Existing commercial centre.
27	Ashburton	Tertiary	Ashburton	Peri-urban area. Potential expansion into a tertiary node
28	Polly Shorts	Secondary	Mkondeni	Existing commercial complex adjoining an industrial area.
29	Hayfields - Cleland Road	Primary	Hayfields	Existing commercial complex supported by Petrol filling stations, caravan park and vacant land visibly position along the N3.
30	Jesmondene	Tertiary	Hayfields - Murray Road intersection	Potential node supported by a bed and breakfast facility.
31	Alexandra Park	Secondary	Alexandra Park	Regional sports park.
32	Durban Road	Primary	Scottsville Central	Existing commercial node.
33	New England Road	Secondary	Scottsville	Casino and Turf Club development. Potential for commercial expansion.
34	Mayors Walk	Secondary	Prestbury	Existing commercial node - Potential railway land development.
35	Cascades	Secondary	Chase Valley	Existing commercial and node.
36	Corobrick	Primary	CBD Extension	Regional shopping centre.
37	Eastwood	Primary	Bishopstowe Road	Potential expansion into Primary node. Adjoining industrial land
38 [1]	Northway	Primary	Ottos Bluff Intersection	Existing Commercial node - adjoining industrial complex. Situated on Primary Development Corridor.
38 [2]	Manchester Road	Primary	Willowton	Major industrial and Comerica complex.
38 [3]	Debi Place	Primary	Northdale	Existing commercial node.
38 [4]	Greytown Road	Primary	Raisethorpe	Existing Comerica node.
39	9Copesville	Tertiary	Copesville	Potential tertiary node.
40	Bishopstowe	Secondary	Bishopstowe	Potential tertiary node - situated as the intersection of Wartburg and Table Mountain Roads.

5. INTEGRATED ENVIRONMENTAL ANALYSIS

A CLEAN AND HEALTHY ENVIRONMENT IS EVERYONE'S RIGHT.

The Msunduzi Municipality plays a facilitator' role in environmental governance stands at the forefront of the EMF and the effectiveness in fulfilling this role is critical in ensuring good environmental outcomes in the area. The municipality must provide their environmental protection functions such as storm water management, water and sanitation services and refuse removal as well as promoting environmental governance in the area.

The Municipality has raised environmental awareness, instigated training of staff and enabled the development of management systems to improve the environmental governance functions of the municipality. Concern has however been raised that the Msunduzi Municipality does not have sufficient resources to adequately address the environmental functions. This lack of resources will only be intensified should Msunduzi achieve a Metropolitan Council. The Municipality's IDP identifies the environment as a strategic priority area for the City and stresses the need for finding solutions in the environmental arena. The City's Development Strategy has integrated environment in its strategic objectives, and the development of an Environmental Management Plan that had given rise to its Integrated Environmental Management (IEM) Policy.

The Local Agenda 21 Environmental Forum was originally established in the late 1990's in terms of the Agenda 21 Treaty of 1992 and was the first LA 21 initiative following the Durban/21 Programme. The Forum exercises an oversight function and its role is essentially to ensure implementation of Council's Environmental Policy. It is one of the committees in council with the membership from civil society, and therefore, constitutes best practice in terms of good environmental governance. The LA 21 Forum is expected to play a critical role in the implementation of the EMF and the SEMP.

5.1. Topography Geology

Pietermaritzburg is situated in the basin of Msunduzi River and its tributaries. Escarpment rises approximately 400m above the city to the west and north west. Altitude within municipality ranges from 495 to 1795 above sea level and the municipality generally slopes from west to east. The mountains around the city bowl create a distinction between urban and rural parts of the municipality. While this has provided opportunities to manage the urban/rural interface, it has limited the city's expansion potential resulting in the formation of a number of small urban hubs outside the city.

Predominantly lithologies present in the Msunduzi municipal area are comprised of sedimentary rocks of the Ecca Group and Dwyka Formation which form part of the lower Karoo Supergroup. The aforementioned sediments are extremely intruded by Jurassic post-Karoo dolerite sheets, dykes and sills that intermittently outcrop the entire municipal area.

5.2. Climate and Air Quality

The climate and local weather in Msunduzi are strongly influenced by topography; the higher lying areas in the north and west of the municipality are cooler and receive more rainfall. The average annual temperature varies between 16,3 degree Celsius and 17,9 degree Celsius. Msunduzi falls within a summer rainfall area characterized by dry winters and wet summers with thunderstorms being very common in summer. Average rainfall within the Municipality varies between 748mm to 1017 mm per annum.

There are four sources of air pollution

- * A increase in vehicle volumes and traffic congestion in peak hours, particular in the CBD, main arterial routes, and vehicles on the N3 highway that pass through the city centre
- * A large number of industries within Msunduzi are old and operate old technologies that have higher emissions than modern alternatives
- * Formal and informal settlements in and around the Edendale Valley that use coal and firewood for heating and cooking
- * Burning of sugar cane and brush wood from cleaned plantations especially if the wind direction is not considered prior to burning contribute to smoke and particulate matters

5.3. Soil and Land Capacity

Soils within the Municipality varies. The topography, rainfall patterns and geology have resulted in the high agricultural potential of the area., however, large portions of highly productive agricultural land have been developed for other uses such as housing. The remaining areas of high productive agricultural land occur mainly on communally owned land in the Vulindlela area. Poor agricultural practices in these areas are affecting the productivity of the land

5.4. Bioresource Groups within Msunduzi

Moist Highland Sourveld, occurs only in a small portion of the municipality along the western border near Elandskop. Soils in the municipality are relatively deep, highly leached and strongly acidic. Fertility is low, but physical properties are favourable which result in a short growing season.

Most of the Vulindlela in the west, is characterised as Moist Midlands Misbelt. The potential of the soils of BRG are high, in spite of the fact that they are leached and the inherent nutrient status is very low with problems of phosphorous fixation and aluminium toxicity. The high potential of the arable areas of this BRG has meant that little value has been placed on the veld and veld management practices have been poor, including excessive burning, particularly during the season of active grass growth, followed by continuous selective overgrazing. These practices have largely destroyed the palatable grass species and resulted in grassland of low pastoral value

Moist Coast Hinterland Ngongoni Veld, occurs in the northern parts of the municipality including Sweetwaters, Raisethorpe, Copesville and Bishopstowe. Soils of the area are acidic and leached and injudicious burning, coupled with selective overgrazing, have resulted in a very poor quality veld cover.

Dry Coast Hinterland Ngongoni Veld Bioresource group occurs on over 20% of the municipality and reaches from north to south down the middle of the municipality. This bioresource group has limited potential due to low rainfall. A past history of early burning, in fact burning at any time of the year, coupled with selective overgrazing. The Coast Hinterland Thornveld covers mainly the area in which the city occurs, and the Valley Bushveld bioresource group occurs in a small area in the far eastern parts of the municipality

5.5. Rivers and Wetlands

The Msunduzi constitutes almost entirely one catchment. The majority of water produced in the Msunduzi catchment goes towards servicing and supplementing Durban water requirements, while Msunduzi sources the majority of its water from the Umgeni catchment. The Msunduzi River and its tributaries is an important feature of the municipality landscape. Water quality varies between catchments, but the impact of the city is evident from decrease in water quality. Despite all odds, the municipality received a blue dot status as a positive indication that the municipality endeavors to manage and reticulate its water resource in terms of best practice.

The 1971 Convention on Wetlands of International Importance especially as Waterfowl Habitat, otherwise known as the Ramsar Convention, promotes conservation and sustainable use of wetlands. While no Ramsar sites occur in the Municipality, this Convention has stimulated interest in the protection of wetland systems within South Africa. There are currently no bylaws dealing with the protection and or management of wetlands. The Municipality is however in the process of re-drafting the Public Open Space Bylaws and have agreed to include wetlands in the new draft

5.6. Biodiversity

At the United Nations Conference on Environment and Development held in Rio de Janeiro in 1992, otherwise known as the Rio Summit, the following treaties were adopted: Convention on Biological Diversity; and United Nations (UN) Convention on Climate Change.

In addition to the treaties adopted, three non-binding instruments were also adopted as follows:

- Rio Declaration on Environment and Development;
- Forest Principles; and
- Agenda 21

The topography, geology and other land characteristics in the Msunduzi gave rise to diverse habitats and species richness. High levels of transformation have resulted in a significant loss of natural habitat and hence a range of species. In terms of the study conducted by the biodiversity specialist, 20186 ha or 31% of the municipal area is classified as having conservation importance, only 853.5 or 1.35% of the municipality is formally protected.

A total of 56 animal species, 20 plant species and 8 vegetation types are regarded as being of particular biodiversity significance. A high number of rare or threatened species occur within the municipality and three species are thought to have become extinct and at least 20 species of frogs have previously been recorded. There are endemic fish species that raise the ecological value of sub-catchments.

5.7. Urban Greening and Street Trees

The beautification and greening of development include large scale housing projects has not been adequately planned and funded, resulted in new residential areas not being provided with street trees, developed parks and well managed open spaces.

5.8. Access to Basic Services

The majority of the Msunduzi has adequate bulk water supply, but areas such as Vulindlela will require additional reticulation in the near future. Rapid growth in areas such as Ashburton will require upgrade and extension of reticulation system. The current water demand exceeds the 99% assurance yield of the Umgeni system, and in order to secure reliable supply in the future augmentation from other system will be required.

It is estimated 72% of households have refuse removed weekly, the remainder either do not have access to these services (3%) or utilize their dumps (36%) for waste disposal.

51% of households have access to full waterborne sanitation facilities and 4,3 to septic tanks. Msunduzi has a high reliance on pit and bucket latrine systems and one in three households in Msunduzi do not have adequate access to sanitation.

5.9. Cultural Heritage

The National Heritage Council Act (No. 11 of 1999) allows for the establishment of the National Heritage Council. The Council consists of a representative of each province, nominated by the member of the executive council (MEC) concerned, as well as the chairperson of:

- The Council of the South African Heritage Resource Agency (SAHRA);
- The National Archives Commission;
- The Heraldry Agency;
- The Board of the National Library;
- The Council of the Northern Flagship Institution;
- The Council of the Southern Flagship Institution; and
- Any other body or institution the Minister of the National Department for Arts, Culture, Science and Technology considers relevant.

The main duties of the Council are to advise the Minister on heritage matters and coordinate, develop, promote and protect the national heritage. The council also coordinates the activities of public institutions involved in heritage management to ensure that the management of heritage resources is undertaken in an integrated manner.

In KwaZulu Natal, the KwaZulu-Natal Heritage Act (No. 10 of 1997) provides for the establishment of a statutory body known as Amafa aKwaZulu-Natali (Amafa), to administer heritage conservation on behalf of the provincial government of KwaZulu-Natal.

Amafa is responsible for the care for, maintenance repair and management of historically important sites, architecturally important buildings, public monuments and memorials, military cemeteries and other important graves, traditional burial places, archaeological and palaeontological sites and artefacts, rock art, meteorites, historical shipwrecks, important cultural objects (and the trade therein), and the traditional building techniques of the people of the Province of KwaZulu-Natal.

At a local scale the municipality assists in cultural heritage resource management through identification of cultural heritage resources in the town planning scheme. The Municipality also provides for the management of cultural heritage resources specifically buildings through their building inspectorate. The Natal Museum houses a database of mainly archeological sites that was used to inform the study. The Natal Museum also houses numerous archeological and anthropological collections.

Msunduzi has an extremely rich cultural, architectural, historical and archaeological resource base that collectively makes up the heritage resource of the area. The study conducted pointed out 646 heritage resource points and 32 heritage resource zones within the Msunduzi area. These consisted of architectural resources, archaeological resources, historical and cultural resources.

5.10. Waste Management and Solid Waste Pollution

Widespread of illegal dumping domestic and industrial waste as well as indiscriminate littering has reached epidemic proportions. This anti-social and illegal behavior degrades the natural environment including streams, open spaces, vacant lots, building sites, roads and streets. Illegal dumping has a negative social impact as well as health implications for residents. The costs of cleaning dumped waste and littering is insignificant higher than managing the waste at source or through existing mechanisms which places an unnecessary burden on rate payers and siphons money away from development projects.

5.11. Catchment Hydrology

The Act requires the identification of the 1:100 year floodline on development plans and places the responsibility for the management of development and flood events on the local council. The Disaster Management Act, 57 of 2002 also places responsibility on local council's to develop Disaster Management Plans and a Disaster Management Centre for all disasters including flooding.

5.12. Surface Water Resources

As noted above, while the Ramsar Convention and The WHO Policy - Health for All in the 21st Century do not refer specifically to the management of rivers, they do provide guidelines for limiting impacts that will affect surface water. The Ramsar Convention provides for the protection of wetland habitats while the WHO Policy provides for the provision of basic services, which is one of the key factors influencing water quality in the uMsunduzi Catchment.

The Camps Drift Park By-law (Ordinance 25 of 1974) focuses on the use of Camps Drift Park by the public and manages surface water through placing restrictions on fishing and prohibitions on the disposal of waste in the watercourse. The solid waste by-laws, while not dealing directly with the management of water quality, have relevance as they are used to prevent solid waste disposal in rivers, waterways, catchments, sewers and stormwater drains.

5.13. Agriculture

There are a number of international conventions/ agreements/ protocols that affect agricultural productivity indirectly. These include but are not limited to:

- *United Nations Convention on Climate Change;*
- *Cartagena Protocol on Genetically Modified Organisms (GMO's);*
- *Ramsar Convention on Wetlands of International Importance;*
- *Rome declaration on World Food Security and the World Food Summit Plan of Action;*
- *State of Food and Agriculture 2006 produced by the Food and Agriculture Organisation of the United Nations; and*
- *International code of conduct on the distribution and use of pesticides.*

While agricultural development is not a key function of the Municipality, Msunduzi does have bylaws with implications for agricultural development, for example, the draft Public Open Space By-Laws. These by-laws allow for applications to be made to the municipality to undertake specific agricultural activities within public open spaces as part of urban agriculture.

5.14. Road Infrastructure

The N3 is the only national road that exists in Msunduzi. The N3 and all off-ramps and associated infrastructure is the responsibility of the National Roads Agency Limited. Provincial and District roads are the responsibility of the Provincial Department of Transport. All remaining roads in the Municipality are the responsibility of the Msunduzi Roads Department.

5.15. Electricity

Bulk electricity is provided to Msunduzi Municipality by Eksom while the Municipalities City Engineers are responsible for the reticulation within the municipal area.

5.17. Socio-economic analysis and planning policy review.

The Accelerated and Shared Growth Initiative for South Africa (Asgi-SA) and the National Spatial Development Perspective (NSDP) are the most prominent national policies that impact and inform provincially and local development planning. Asgi-SA provides a framework for growth and development and sets targets economic growth nationally.

The NSDP serves as a spatial expression of the national development vision. The NSDP identifies the N3 as one of the national development corridors, and Pietermaritzburg as one of the critical nodes along this investment corridor.

The Provincial Spatial and Economic Development Strategy (PSEDS) has been developed as a provincial translation of the NSDP and component of a new Provincial Growth and Development Strategy (PGDS) for KwaZulu-Natal. PSEDS recognises the strategic location and development potential of Msunduzi, and accordingly identifies it as a secondary node and a regional urban centre with good existing economic development and the potential for growth.

The NSDP at a national level and PSEDS at a provincial scale support the vision for a post-apartheid South African City. The idea of a “new South African City” first emerged in the Reconstruction and Development Programme in 1994, and was further conceptualised in the Development Facilitation Act No. 67 of 1995 (DFA). Attempts have been made to realise this vision through the following initiatives:

- *Development of Land Development Objectives (LDOs);*
- *The Urban Development Strategy (UDS);*
- *The Urban Development Framework (UDF) based on requirements of the second United*
- *The 2001 White Paper on Spatial Planning and Land Use Management.*

5.18. Conclusions and Recommendations

This report demonstrates that there is currently a progressive legal framework under which environmental aspects can be managed and the development and implementation of the EMF can be achieved. This legislation stipulates both what needs to be achieved and the responsibility for actions to be taken. National government has a critical role to play in environmental governance and DEAT is demonstrating their commitment through financial support for developing the EMF.

Further through strategic tools such as the SDF and the IDP, awareness of environmental considerations is growing. There is however evidence of weak intergovernmental relations around environmental matters. This is demonstrated by the fact that the Provincial Spatial and Economic Development Strategy (PSEDS) which influences the development direction in the province, is weak in terms of environmental considerations.

The Msunduzi Municipality's IEM Policy will form the baseline for the desired state of the environment to be developed as part of the SEA Phase of the EMF. The policy will also be reviewed against the current environmental conditions and priorities for the area. The LA 21 Forum is a best practice example of good environmental governance and will play a critical role in the implementation of the EMF.

Msunduzi Municipality has support from national and provincial government, as well as other organs of state (service providers) in terms of performance of environmental protection functions but capacity and resources at the local level will be critical for the implementation of the EMF. The IDP highlights the environmental governance constraints that require attention and the Metro proposal and EMF will provide opportunities to address these constraints. Further implementation of the EMF will require that the EMF guide future decisions and as such the existing decision-making structures will need to be reviewed to incorporate environmental considerations.

This may be achieved by incorporating priority environmental issues in the Municipality's Performance Management System. Strategic environmental issues should ideally be expressed against Key Performance Areas so that appropriate plans and budget can be allocated to ensure that core functional areas of the municipality are delivered in an environmentally sustainable manner. This should include consideration of environmental impacts resulting from the municipalities other functions such as the provision of basic services.

STUDY ON GREATER EDENDALE MINI SDF

6.1. INTRODUCTION

A study on the economic life of the Greater Edendale was commissioned and the input below was captured with some insight, requires a revolutionary transformative approach from the apartheid form of planning of the historically repressed and neglected township into an urban Pietermaritzburg place of high quality representing the single biggest investment in the city's future.

The Business Plan done advocates and facilitates the adoption of a developmental local government system, which is committed to working with citizens, groups and communities to create sustainable human settlements which provide for a decent quality of life and meet the social, economic, and material needs of communities in a holistic manner. This is the biggest town planning and urban renewal initiative currently under way in South Africa, eclipsing both the Cato Manor in the Durban Metro and the Alexandria Renewal Project in Gauteng.

It will provide a variety of housing choices for both poorer and affluent residents in identifiable neighbourhoods.

Phase one is under way and is concerned with addressing the title deeds chaos, created by the previous government administration.

Phase two will kick-start the physical development, including the installation of underground water reticulation, and sewerage systems, overheads electrification, and road networks.

The Business Plan will also promote low scale commercial and community facilities within residential neighbourhoods and explore industrial activities within the service nodes. It will also promote agricultural and resource harvesting type activity within the flood plains and stream lines.

The initiative is expected to unlock the potential of creating the Greater Edendale into a City within the City.

Several poverty alleviation and eradication strategies will be explored and deployed, in view of the labour-intensive nature of the anticipated projects.

6.2. HISTORICAL BACKGROUND

Edendale has a unique place in the settlement history of South Africa and its humble beginnings are captured in a publication [A New Portrait of an African City Africa by Laband and Haswell ed] as follows:

In 1851, 100 Christian families of Giqua, Pondo, Sotho, Tleokwa, Hlubi and Swazi origin, settled on the farm Welverdiend, renamed Edendale. They purchased the farm on a share basis with, and under the guidance of, their missionary James Allison. There, they laid out a village in Voortrekker grid pattern and built their houses in European style - each in important respects pursuing an economic existence, but all united by an affiliation to the mission, church, school and the community.

Georgetown became a self sufficient mission community with profitable gardening lots, a nearby tannery and a mill and wicker works, prolific in its days, selling its wares as far away as Cape Town. Trading with other areas was a viable source of income.

Georgetown became an educational centre and in 1888, Georgetown men formed the Funa-malungelo [the society of those who seek rights] and sought unsuccessfully to obtain municipal status. Throughout, its history Edendale would suffer for want of Borough recognition.

This was largely because a short-sighted colonial government refused to see even Christian and civilized Africans as having the capacity to adopt colonial local government.

Extract by S Meintjies

By rural to urban African migrants who rented land from the landowners. The failure to accord Edendale municipal status led to overcrowding and slum conditions as the area's economic base was undermined and the rights of the Edendale community were denied. Despite apartheid's not-so-subtle attempts to deprive the people of Edendale of their identity and to erode their cultural base, the Edendale area is renowned nationally for producing more than its fair share of national struggle leaders and old Edendalers are to be found in positions of leadership in both the public and private sectors in South Africa.

In December, 2001 the Msunduzi Municipality took a bold decision to begin the tortuous process of resolving the land-legal issues and bringing development to the area. In order to assist landowners who had lost control and possession of their land to their former tenants, the Msunduzi Executive Council resolved, in a dramatic reversal of policy that, provided the finance could be raised, it would purchase privately-owned land with a view to developing the area.

This was the genesis of GEDI, the Greater Edendale Development Initiative. GEDI has now spawned a social development arm, the Greater Edendale Development Forum, which represents no fewer than 34 organisations in the greater Edendale area.

6.2.1. Poverty Eradication Strategy

In 2003 Msunduzi Municipality applied for funding from Urban Management Programme and United States Agency for International Development for the development of a Poverty Reduction Strategy in the Greater Edendale Area. This was part of the Greater Edendale Development Initiative. Built Environment Support Group was contracted by Msunduzi Municipality to facilitate the development of the strategy.

[a] The objectives:

- To understand the poverty dynamics in the Greater Edendale.
- To find out the role played by various stakeholders in the Greater Edendale Area in the fight against poverty.
- The role of Msunduzi Municipality in poverty reduction.
- Incorporation of the Poverty reduction Strategy into the IDP of Msunduzi Municipality.
- Mobilisation of resources for the implementation of the Poverty Reduction Strategy.

[b] Methodology:

Inception Report

Justification for the selection of the Greater Edendale Area as a pilot for the development of the poverty reduction strategy
Identification of the stakeholders for the project
Use of participatory research methods
Clarification of objectives of the project

[c] Poverty Profile

The extent of poverty in the greater Edendale Area
How poverty manifests itself in Edendale
Causes of poverty in Edendale
Contemporary efforts to fight poverty

[d] Consultations

Various stakeholders were consulted on their role in poverty reduction:

[e] Schools:

Most schools invited members of the community to use the land on the school premises to start vegetable gardens which were used for the feeding scheme. The surplus would be sold to generate income that helps subsidise school fees for those who could not afford to pay. Schools also ran Adult Basic Education classes. Teachers also assisted households to apply for child support grants.

[f] Churches

Most churches in the Greater Edendale area are involved in feeding schemes, income generating projects and HIV/AIDS Support Groups.

[g] Community Based Organisations

There were more than 50 Community Based Organisations in the Greater Edendale Area, mostly focusing on income-generating projects, health, environment, ABET and Arts, Sports and Culture.

[h] Non-Governmental Organisations

NGOs played a significant role in capacity building for CBOs in the Greater Edendale Area. Most of the NGOs are based in city of Pietermaritzburg.

They provide a variety of services, ranging from feeding, early learning, skills training, advocacy and lobbying, housing and environmental issues. Some of the NGO's have formed Networks like CINDI and PACSA.

[i] Ward Committees

The Ward Committees plays an important role in assisting people to access municipal services. This helped improve the relationship between communities and Msunduzi Municipality, as people felt that they were participating in the process of improving their lives. Multi-stakeholders consultation

In November 2003 a multi-stakeholders consultation was held at Sinodale Centre.

The purpose was to consolidate the findings of the various consultations. Participants in this event identified seven focus areas: The extensive work outlined above provides a foundation for poverty reduction which can be replicated in other areas of the municipality. Should such replication be decided upon, GEDI would be more than prepared to assist in launching the process.

- I. Food Security and Environment
- II. Safety and Security
- III. Local Economic Development
- IV. Education and Training
- V. Land Tenure and Housing
- VI. Health
- VII. Household and Social Issues

[j] Towards Community Participation and Municipal-Community Partnership

The participants at the multi-stakeholders consultation unanimously agreed to the formation of Greater Edendale Development Forum to co-ordinate the activities of the seven Focus Groups towards poverty reduction.

They also drew up a declaration to be signed by Msunduzi Municipality and Greater Edendale Community towards a Municipal-Community Partnership against poverty.

The Greater Edendale Development Forum was formed in 2004 and has been registered as a Not-for-Profit Organisation through the NPO Directorate of the National Department of Social Development.

The Forum works with Ward Councillors and Ward Committees, and is also represented on the Greater Edendale Development Initiative Project Committee. Greater Edendale Development Initiative provides support to the Forum and the Focus Groups to promote community participation. GEDI also helps with mobilization of resources for the implementation of the Focus Groups Plans.

[k] Way Forward

The extensive work outlined above provides a foundation for poverty reduction which can be replicated in other areas of the municipality. Should such replication be decided upon, GEDI would be more than prepared to assist in launching the process.

6.3 LOCAL ECONOMIC DEVELOPMENT

The Msunduzi Municipality has identified the Greater Edendale Area as a priority area for social and economic development. In response thereto, consultants were appointed to prepare a Local Economic Development Strategy of the Greater Edendale Area.

A number of strategic programmes designed to unlock the development potential of the GEA and mobilise stakeholders in support of its development have been developed and are now at different stages of implementation.

The LED Strategy was developed based on the following Scope of Work:

- *Undertaking an inventory, assessment and identification of gaps in existing research (including background material and organizations).*
- *Socio-economic analysis, which includes an assessment of the HIV and AIDS rate, poverty assessment, income & expenditure profile, etc.*
- *Economic analysis including a sector analysis and a proposed Edendale business and labour market survey.*
- *Spatial analysis.*
- *An analysis of the economic sectors and the demand for goods and services within the Greater Edendale Area.*
- *Integration with the IDP and the Poverty Reduction Framework.*
- *A SWOT analysis of the area and the economy to identify the competitive advantages and disadvantages.*
- *Identification of possible strategic interventions.*
- *Defining programmes and identifying potential projects.*

The Local Economic Development Strategy for the Greater Edendale Area is developed within a framework of developmental local government and emphasizes developmental LED.

It puts greater emphasis on addressing severe problems of unemployment and poverty, while creating a framework for investment and economic growth.

Its intention is to contribute to the achievement of the general Municipal development vision and economic development strategies specifically.

6.4 ORGANISATIONAL STRUCTURE AND INSTITUTIONAL ARRANGEMENT

Apartheid has fundamentally damaged the spatial, social and economic environments in which people live, work, raise families, and seek to fulfill their aspirations. Local government has a critical role to play in rebuilding local communities and environments, as the basis for a democratic, integrated, prosperous and truly non-racial society. The Constitution of the Republic of South Africa mandates local government to:

- *Provide democratic and accountable government for local communities.*
- *Ensure the provision of services to communities in a sustainable manner.*
- *Promote social and economic development.*
- *Promote a safe and healthy environment.*
- *Encourage the involvement of communities and community organizations in the matters of local government.*

Local government must also promote the Bill of Rights, which reflects the nation's values about human dignity, equality and freedom, and uphold the principles enshrined in the Constitution. Within the framework of the Constitution, the basis for a new developmental local government system is presented, which is committed to working with citizens, groups and communities to create sustainable human settlements which provide for a decent quality of life and meet the social, economic and material needs of communities in a holistic way.

The establishment and functioning of GEDI is defined and is informed by the above Developmental Local Government vision.

6.6 TRANSPORTATION: EDENDALE/NORTHDALE CORRIDOR PROJECT

The Edendale/Northdale Corridor project is to develop an improved transportation corridor extending from Georgetown in Edendale through the CBD to Northdale over a length of about 17km.

The Vision for the project is described as:

Advancing the city of choice through affordable, sustainable and integrated mobility in the Pietermaritzburg Metropolitan Area with specific emphasis on the Edendale-Northdale Corridor.

The Mission to guide the project is defined as:

To promote public transport and non-motorised transport along the Edendale/Northdale Corridor by improving infrastructure and services through integrated transport and land use developments.

6.7 INTEGRATED ENVIRONMENTAL MANAGEMENT PLAN

Consultants were appointed to undertake an Environmental Assessment Study of the Greater Edendale Area. The Study was deemed imperative in the forward planning and development of the area and consequently, informing the creation of an integrated and sustainable urban environment.

In terms of the National Environmental Management Act, sustainable development means the integration of social, economic and environmental factors into planning, implementation and decision making so as to ensure that development serves present and future generation. The International Council for Local Environmental Initiative uses the following definition which is focused specially at service provision at a local level: "Sustainable Development is development that delivers basic environmental, social and economic services to all residents of a community without threatening the viability of the natural, built and social systems upon which the delivery of these systems depends".

6.8 LAND USE MANAGEMENT SYSTEM

To advance the development of the Greater Edendale Area in an integrated and co-ordinated manner and to lead the land acquisition and housing delivery programme, it is recorded that:

- *The Greater Edendale Area has been the subject of a macro planning analysis and has been divided into 18 Functional Area. Broad brush plans have been prepared for each of the functional areas detailing the role, character, spatial features and key development interventions that are required in order for the functional area to reach basic performance levels.*
- *The Edendale Corridor Functional Area was identified, by the Executive Committee, as a priority project towards the development of the Greater Edendale Area. The Executive Committee directed that a planning study be conducted in order to produce both necessary plans, as well as to produce a methodology, to be followed for the planning of the balance of the Greater Edendale Area.*
- *In this case, the provision of basic needs and security of tenure locked within an urban renewal strategy were recognised as the principal elements of the project. This urban renewal strategy was further debated within a broader planning context where, the need to prepare a 'physical framework plan' at an urban landscape level promoting the revitalisation of the area was recognised and deemed imperative.*
- *In so saying, the nature and the character of the project was primarily framed within this context.*

Accordingly, the principle components of the pilot study were:

- *To establish a detailed physical Development Framework suitable to direct and manage investment within the Corridor.*
- *To identify the location and extent of key development opportunity zones and the associated physical, institutional and financial requirements to enable development within them.*
- *To prepare conceptual design solutions for each development opportunity.*
- *To identify critical actions required for each of the above to be implemented including the assembly of land, detailed design actions required, establishment and or refinement of land use and environments management mechanism, assessment of infrastructure requirements such as access, sewerage disposal etc.*
- *To evaluate and prepare recommendations regarding existing outstanding development applications and or enquiries within the Corridor.*
- *To prepare order of magnitude costs and budgets for the establishment of public infrastructure necessary for facilitating development.*
- *To priorities phasing of development within the Corridor as a whole and within each development opportunity zone.*

On return of technical comments from the various business units, the Edendale Corridor Framework plan will be finalised and presented to the Executive Committee to be adopted as part of the IDP. Moreover, by way of the Grant funding made available by the DBSA, the planning of the remaining functional areas will be proceeded with.

6.9. ACHIEVED MILESTONES AND ACTIVITIES BY GEDI TO DATE

- 6.9.1. Through various initiatives embarked on, Gedi is now accepted by Edendale community as a gateway to the Council and various business units
- 6.9.2. The involvement with the Legal Committee has contributed towards resolving most of the land problems
- 6.9.3. GEDI acquired, built and operating then best Geographical Information System in the Council
- 6.9.4. There are various community based projects that are completed and ongoing
- 6.9.5. A number of NGOs, CBO and crèches are now registered and capacity building training have been provided
- 6.9.6. Heritage sites have been identified and preserved such as the Msimang House
- 6.9.7. Ward profiling, collecting data on skills profile of the area, economic projects have been introduced
- 6.9.8. Urban agricultural projects in 14 wards, funded by DED and DAEA and more funding proposals are finalised
- 6.9.9. Secured grant funding to resolve Land Legal and Private Land Issues during 1998 and 2005
- 6.9.10. Capturing of housing details for all informal settlements on private Land during 2002 to 2005
- 6.9.11. Transfer of state and private land to Municipality
- 6.9.12. Process of acquisition of 326 tract of private of Private Land
- 6.9.13. Establish a benchmark for property evaluations of Private Land 9 (upgrading of tenure)
- 6.9.14. Resolution of Historical Land Legal Issues (Cadastral and Deeds of Office Records)
- 6.9.15. Resolving the issue of Deceased Estates in Edendale
- 6.9.16. Procure and create system to register historical discount benefit scheme transactions (state attorney)
- 6.9.17. MOU with KZN Public Works and Msunduzi for state land acquisition
- 6.9.18. Appointment of Land Titles Adjustment Commission

7. DEVELOPMENT CHALLENGES FACING GEDI

Despite all the initiatives realised, there are some teething changes as follows:

- 7.1. Land Legal Issues, preventing finalisation of transfers
- 7.2. Those houses built over boundaries delay finalization of General Plan (IA matters)
- 7.3. Illegal occupation of houses invaded by adjacent beneficiaries (affecting transfers of houses to approved beneficiaries)
- 7.4. Insufficient resources to finalize and close-out projects and manage current projects (DOHS has been approached for additional funding)
- 7.5. Accreditation process

SECTION E: SECTOR INVOLVEMENT

1. SECTOR DEPARTMENTS/DISTRICT AND MSUNDUZI MUNICIPALITY IDP: ALIGNMENT

There are various technical committees that are in place to address various programmes for water, sanitation, roads, transport, land reforms, economic development, etc. Our main challenge is to participate fully at the high level forum that was formed and launched in 2007 at the Royal Showground in response to Premier's call for a high level forum at the District level to address issues of intergovernmental.

This initiative would be championed at the District level by the District. Membership of such a forum would be comprised of the municipal managers and mayors of the eight municipalities as well as district managers of the sector departments.

It is the City's hope that this forum would shape its agenda and begin to look at issues specifically relating to the Capital City Status; the metro status; service agreements; alignment of systems and personnel; backlogs facing the City etc. There is an IGR forum at the district level at which the Msunduzi Municipality sits as the member and the issues of co-operative governance are deliberated. It is hoped though that, this forum would begin to deliberate on issues of long term planning and mobilize necessary projects specific funding.

2. CO-EXISTENCE OF THE LOCAL GOVERNMENT AND THE TRADITIONAL LEADERSHIP

It was long before the promulgation of the KwaZulu-Natal Traditional Leadership and Governance Act, NO. 5 of 2005, the Municipality spearheaded participation and the role of amakhosi within the Msunduzi Municipality 2007/08; 2008/09, 2009/10; 2010/11; 2011/12 financial years in preparation for 2012/13 – 2016/17 five year IDP sector plans.

The Municipal Structures Act states that, "Traditional Authorities that traditionally observe a system of a customary law in the area of a municipality may participate in the proceedings of Council of that municipality, and those traditional leaders must be allowed to attend and participate in any meeting of the Council".

In order to realize the above legislative dictate, the Speaker has had meetings with Amakhosi falling under the jurisdiction of Msunduzi Municipality. Those meetings were a huge success with the attendance of the MEC: Finance & Economic Development (KwaZulu Natal), the Mayor, and Chief Whip. Izinduna serving under various areas of Amakhosi were also in attendance as well as Ward Councillors and representatives from the Ward Committees.

The initiative by the Speaker had been well received by the Council and the following issues were highlighted in order to build on this relationship:

- a) ***Amakhosi being invited to all meetings of the municipality and participate in discussions***
 - Amakhosi have been allocated to Council's standing committees in order to be actively involved in the discussions happening in those meetings. They will also be attending Executive Committee and Full Council meetings.
- b) ***Provision of an office for Amakhosi at the City Hall and supporting staff***
 - An office has been allocated for Amakhosi in the City Hall.
- c) ***Providing financial support for programmes and projects***
 - An undertaking has been made by the Municipality to financially support projects in the areas of Amakhosi which are aimed specifically in enhancing an understanding of Msunduzi's history and cultural heritage. The Msunduzi Municipality respected the existence of traditional leadership and various consultations were held with Amakhosi when the preparations for local democratically elected governments prior and post 1994 as well as izimbizo earlier and in April 2006/2007 to date.

As we believe that the legislation restores the dignity of the institution of traditional leaders, the Msunduzi welcomes the establishment of Traditional Council of Traditional Leaders at the District level. We also reiterate the Premier's speech that such structures will be vehicles for promoting peace, development and democracy at the local level. As the municipality founded on principle to serve our communities, we embrace the co-existence of traditional leadership and democratically elected councilors to ensure efficacy in delivery of services to communities.

3. INTERNATIONAL AND INTERGOVERNMENTAL RELATIONS

3.1. International Relations

It is without saying that the increased global competitiveness and local competitiveness have direct impact in and between our cities. Due to this phenomenon, Msunduzi Municipality had to foster a Twinning of Cities with cities like Hampton, Virginia Beach and Atlanta (Agreement was recently signed) in United States of America; Zhengzhou and Guangzhou in China; Wuhan in Taiwan and Lincoln in United Kingdom.

Such engagements had benefited all cities involved and more lessons were learnt. It is also on the same breath that Msunduzi has to foster such relations with cities within the African continent to realize some of the objectives as expounded in the African Union (AU), New Partnership for Africa Development (NEPAD) and cross-borders' challenges facing the Southern African Development Countries (SADC).

Joint overseas trips between the sector departments and Msunduzi Municipality represented by both officials and political heads had renewed hopes for sustainable and coordinated economies at the provincial and local levels. In addition to these engagements above various departments through interaction with the Municipality had allocated the following projects and funds for the city.

4. SECTOR DEPARTMENTS INVOLVEMENT

Many endeavours are made to make the Intergovernment Relations a reality and the following clusters are existing at the district level.

The finalisation of this model from inside-out the municipality is to streamline these structures in order to improve communication internally and externally, whilst doing that, we need to bring on board sector departments in a more practical and realistic manner not as a lip service to the IDP process as well as other stakeholders and interest groups such as ward committees, business, CBO, NGOs, religious sector, amakhosi etc.

The Cluster Model has led to the establishment of shared services in the District, which also lead to better utilisation of resources. Shared services are now used in the fields of Internal Audit, Performance Management, Integrated Development Planning and Information and Communications Technology. This approach is having the effect that our family of Municipalities in the District are all benefitting from the scarce resources and expertise available within the District.

4.3. SECTOR DEPARTMENTS

DEPARTMENT OF HOUSING				
Responsibilities	3-5 Programmes	Cashflows	Start of Project	KPA Supported by the Programme

SECTION F: IMPLEMENTATION PLAN

1. INTRODUCTION

The Municipality is structured according to the National Key Performance Areas (KPA's) in order to ensure comprehensiveness in programmes and to meet desired outcomes in the execution of the City's mandate. There are five strategic business units/departments that are responsible for various programmes, projects and plans and they are linked to the KPA's in the following order:

***Infrastructure Development,
Financial Management,
Community Service Delivery and
Good Governance.***

Despite the alignment of the business units according to the National KPA's the performance agreements for DMM's are cutting across the KPA's with different waiting depending on focus areas and this is consistent with the organization PMS. In order to ensure compliance, communication and supporting of various operations within and externally to the Council, the Corporate Business Unit (CBU) acts as the umbilical cord within and between the administration and the political leadership.

2. MUNICIPAL TRANSFORMATION AND INSTITUTIONAL DEVELOPMENT

There are critical structures of the IDP that are in place to ensure and maximize community and stakeholders participation. The Msunduzi Council; the Executive Committee; Portfolio Committees and subcommittees; the Management Committee, the IDP Broad Planning Technical Committee, the Stakeholders Sector Fora; Ward Committees; five Traditional Councils within the municipal area are playing critical roles towards contributing in the socio-economic lives of the people of Pietermaritzburg. The five Area Based Management zones of the City are running offices in those ABM areas to ensure the accessibility of services to the rate payers and beneficiaries of those services. In the Vulindlela area, offices are running at some of the traditional council offices, whilst the municipality is in the process of building multi-purpose centres in those zones that are not provided with such centres.

The municipality participates in the District Traditional Council together with other municipalities at the District level. In order to put some of the structures in perspective, the following points are intended to explain the running, coordination and alignment of the IDP.

2.1 The Msunduzi Municipal Council

- (a) Receive regular (monthly) reports on the progress of the IDP Review.
- (b) Will be required to consider and adopt amendments to the IDP.

2.2. Executive Committee

- (a) Manage, through the City Manager (or alternate) the review process.
- (b) Recommend the IDP review process to the Council.
- (c) Recommend the IDP revisions to the Council.
- (d) Allocate resources for reviewing the IDP.

2.3. The IDP Steering Committee (meeting regularly monthly)

- (a) comprising of:
 - (i) The Mayor
 - (ii) The Deputy Mayor
 - (iii) The Executive Committee Members
 - (iv) IDP Champions (elected from the different party caucuses)
 - (v) City Manager (or alternate) [chairperson]
 - (vi) Strategic Executive Managers
 - (vii) Two SAMWU representatives

- (viii) Two IMATU representatives
- (ix) The IDP coordinating Team
- (b) Provide terms of reference for all reviewing and planning activities
- (c) Commission IDP planning studies, programmes and projects.
- (d) Process, summarize and document outputs from sub-committees, teams etc.
- (e) Recommend amendments to the contents of the IDP
- (f) Prepare, facilitate and document meetings and workshops
- (g) Ensure alignment and participation in the determination and prioritization of plans and programmes in the spirit of cooperative governance (to be negotiated)

2.4. Executive Management Committee

- (a) Comprising:
 - (i) City Manager or alternative
 - (ii) Strategic Executive Managers or alternatives
- (b) Facilitate and coordinate the activities of IDP Technical Task Teams
- (c) Provide technical advise and input
- (d) Develop proposals for the IDP steering Committee to consider
- (e) Communicate and implement the programmes and projects in the IDP.
- (f) Clear bottlenecks and manage relationships between stakeholders.

2.5. Municipal Manager IDP Coordinating Committee (MMIDPCC)

- (a) Comprising of:
 - (i) City Manager (or alternate)
 - (ii) Administrative Support
- (b) Prepare the IDP review Process Plan
- (c) Identify resources people
- (d) Coordinate and manage the components of the planning process, including:
 - (i) Stakeholders' involvement
 - (ii) Meeting deadlines
 - (iii) Horizontal and Vertical Alignments
 - (iv) Compliance with national and provincial requirements

3. INSTITUTIONAL ANALYSIS

3.1. Introduction

A general observation across programmes within local government, a general perception is that government employees tend to work less than their counterparts in private businesses, and associated with that low staff morale; excessive time is taken to complete jobs, resulting in low productivity. The available human resources are not used to their full potential. It was Council's desire to ensure that at the end of its term there remains a highly motivated and productive workforce delivering efficient and cost effective services. This concern was raised in 2006/2007 financial year, even though some staff members were promoted through the placement process, a lot is desired in this regard. Unfortunately the placement process is to be completed, particular the job evaluation process and the job writing process were complete.

The following strategies were put in place to advance the goals of the municipality.

- Introduction of self-directed teams
- Out sourcing of non-competitive functions
- Mechanisms to measure and compare productivity
- Integration, rationalisation in service delivery
- Review of human resources policies
- Introduction of performance management system (to cascade to the lower levels in the organisation)
- Application of staff management systems (Discipline, motivation, training and others)
- Staff and skills audit
- Workforce planning and human resources development

4. ORGANOGRAM

The Municipal Organizational Structure (Refer Organogram above) consists of 5 separate business units headed by a Deputy Municipal Managers (DMM) who reports directly to the Municipal Manager.

MUNICIPAL STAFFING AND BUDGETS 2008/2009	
Total number of municipal staff currently employed	3156
Total number of vacancies	2238
Total numbers of approved positions	4899
Total estimated operating budget 2010/2011	2,2
Actual operating budget 2009/2010	
Total capital budget 2009/2010	619
Total actual capital budget 2009/2010	
Total staff budget 2009/2010	528
Indicate the estimated rates income for 2009/2010	
Indicate the actual rates income for 2009/2010	
Indicate the total estimated grant income for 2009/2010	2098
Indicate total actual grant income for 2009/2010	
Indicate total estimated income for services charges for 2009/2010	
Indicate total estimated income for services charges for 2009/2010	

ORGANIZATIONAL STRUCTURE – MANCO

- City Manager: Mr. Mxolisi Nkosi;
- DMM: Corporate Services: Dr MB Ngubane (Deployed by COGTA)
- DMM: Financial Services: Ms N Ngcobo
- DMM: Infrastructure Services: Mr Thokozani Maseko
- DMM: Development Services: Mr V Mtshali (Deployed by Cogta)
- DMM: Community Services: Mr S DubazanA (Deployed by COGTA)

All the director posts the incumbents are deployed, with the exception of the Municipal Manager and the DMM for Infrastructure Services which was the post filled in January 2012. The acting posts have been advertised and all the directors' posts would be filled before the end of 2012/13 Financial Year

FUNCTIONAL AREAS

The following functional areas have been identified in order to develop a fully functional organisation to deal with the identified problem areas.

4.1 FINANCIAL MANAGEMENT AREA

- **Budget and Treasury Management**
 - Budget and Tariffs
 - Annual Financial Statements
 - Management Accounting
- **Supply Chain Management**
 - Tenders
 - Quotations
 - Creditors Database

- **Expenditure Management**
 - Contract Management
 - Payments
 - Remuneration
 - Inventory Management
- **Revenue Management**
 - Billing
 - Rates
 - Credit Control
 - Debt Collection
 - Cash Receipts and Banking
 - Customer Care
- **Financial control and Cash Management**
 - Cash Management
 - Financial Systems Management
 - Reconciliations

4.2 INFRASTRUCTURE SERVICES

- **Municipal Infrastructure planning, funding, maintenance and development Management**
 - Municipal Infrastructure Grants
 - Municipal Infrastructure Planning
 - Fleet Management
 - Mechanical Workshop
 - Asset Management and Maintenance
 - Housing and Human settlement development Management
 - Housing
 - Town Planning
 - Valuations
- **Electricity distribution Management**
 - Administration
 - Maintenance
 - Planning
 - Networks
 - Connections
- **Water distribution and sanitation Management**
 - Administration
 - Maintenance
 - Planning
 - Networks
 - Connections
 - Sanitation
- **Roads and Stormwater**
 - Administration & Planning
 - Maintenance
 - Storm Water

4.3 COMMUNITY SERVICES

- Health Services and Clinics
- Libraries
- Cemeteries
- Environmental Health
- Community Services Provision Management
- Parks
- Sport and Recreation
- Municipal public works
- Public Safety, Enforcement and Disaster Management
- Traffic
- Licensing
- Public safety
- Fire fighting services
- Disaster Management
- Area Based Management
- Waste Management
 - *Waste Removal*
 - *Refuse Collection*
 - *Landfill sites*
 - *Transfer Stations*

4.4 CORPORATE SERVICES (GOVERNANCE)

- Committee Services
- Legal Services and Legislative Compliance
- Corporate and Legal
- Bylaws
- Delegations Management
- Policies, Processes and Procedures
- Human Resources Management
- Performance Management
- Labour Relations
- Recruitment and Selection
- Occupational Health
- Job Evaluation
- Training and Development
- Employee Relations
- Information Management
- Management Information Systems
- Secretariat
- Information Centre
- Printing
- Information Systems Technical Support

4.5 CORPORATE BUSINESS UNIT: MUNICIPAL MANAGERS OFFICE

- Marketing and Public Relations Management
- Tourism
- Marketing
- Public Relations
- Call Centre
- Events Co-ordination
- Performance Management
- Internal Audit and Compliance
- Internal Audit
- Enterprise Wide Risk Management
- Compliance
- Mayor's Office
- Deputy Mayor's Office
- Speaker's Office
- Chief Whip's Office
- Integrated Development Planning

4.6 ECONOMIC DEVELOPMENT

- Economic Development and Planning
- Local Economic Development Management
- Market
- Forestry
- Integrated Development Planning
- Service Delivery and Budget Implementation
- Airport
- Housing
- Town Planning
- Valuations

4.5 RESTRUCTURING AND PLACEMENT

The progress made towards the successful restructuring of the organization, the appointment of the senior management team, the development of the appropriate relevant policies and procedures thereof, has set the place of fundamental focus to enhance service delivery internally from a Personnel perspective.

The first five year term of a democratized and developmental local government, so the culmination of many projects and projects which were predominantly driven by the Council's obligation to Law finalize the restructuring of the organization and to promote services in respect of the IDP.

The finalization and adoption of the new organizational structure underscored our quest for principle of total quality management and sound governance. That was further intensified by the steadfast sense of commitment of the Placement Committee who together with co-operation of the Unions and mutual interest of Council, took the Msunduzi Municipality to another level. During the birth of this team spirit, the Placement Committee encountered the challenge to place approximately 3400 employees. The placement process eventually met all the expectations. That resulted in quite a small percentage of disputes being received.

Only 120 of which 100 of them were resolved internally and the 20 were referred to South African Local Government Bargaining Council for determination through Conciliation and Arbitration. The victorious acknowledgement of the "organizational fit" was accomplished where ultimately only 4 employees remained in the "Corporate pool" as being unplaced. Of critical importance during this process, the City of Choice also heeded to the call within the social responsibility framework in respect of job creation.

The decision to employ those employees who rendered a service to the municipality via Labour Brokers was also adopted. Approximately 78 and 71 temporary employees were appointed to positions within A, B and C bands respectively.

5. PERFORMANCE MANAGEMENT SYSTEM (PMS)

There were challenges in cascading the performance management system to all levels of the municipality so that each individual may understand their role within the municipality in achieving the set goals. Since 2002 the performance management contracts were only signed with the City Manager, Strategic Executive Managers reporting to the City Manager and Process Managers.

In the meantime, the Municipality is phasing in the PMS in order to be implemented fully, never-the-less, the Service Delivery Budget Implementation Plan (SDBIP) was used as the municipal tool to monitor and evaluate the organizational performance and the Annual Performance Report is generated from the SDBIP.

Part of the IDP review for 2011/2012, the Municipality was able this time to prepare the IDP using the following template that will align the Organizational Performance Management System with other processes such as the Budget, SDBIP and PMS.

6. EMPLOYMENT EQUITY

The City of Choice, like all government structures had the birthmark of the entrenched key apartheid policies. The staff component at strategic positions did not reflect the demographics of the municipal area and the approved Equity Plan had to be activated to address the imbalances created by apartheid employment policies.

Past employment practices have created an organisation not fully representative of the people of the municipal area, with African males and females not equally represented at the senior structures of the organisation.

In the past 5 years we sought to meet those goals set out in the equity plan by ensuring that 25% of the designated staff are on affirmative action programme with requisite resources to develop them, that is, 2% of the salary bill be invested in developing staff from designated groups.

To date, the City of Choice has complied with the required provisions of the Employment Equity Act.

7. HUMAN RESOURCES DEVELOPMENT

(Education and Training: City's Approach to skills and Development towards the economic Development and Growth of the City)

The Municipality through Human Resources Development Unit under the Corporate Services Department is the custodian or champion for skills development on behalf of the Municipality. Various training interventions are conducted through different levels in the organisation.

There are training programmes that are attended to equip the employee in order to improve the quality and standard of service delivery. The Workplace Skills Plan is developed along the LGSETA guideline. Almost what is due to the municipality in terms of the training rebates is collected on an annual basis in full.

Whilst the Human Resources Development Unit is tasked to improve the competency of our employees the unit is also responsible to work in partnership with various departments and training providers and communities to improve the level of skills, knowledge and behavior of our employees and citizens to be active participants in the city and the economic development and growth of the city. The Following inputs provide insight to various programmes and projects.

7.1 Workplace Skills Plan Profile

- 28, 66% of total employees have NQF Level 1 and below
- Less than 27.04% of employees have NQF 2, 3, 4
- 13% have NQF 5 and above
- 74.26% of directors, Corporal Managers and preferential have NQF level 6 and above
- 46.04% of technicians and trade makers have NQF 5 and above.

7.2 Skills Priority

- Apprenticeship electrical and mechanical
- Leadership: Construction, carpentry, fitting and turning, LED and IDP
- Targeted 50% of total people with NQF 1 and below

7.3 Internship

Linked to LGSETA skills area such as Finance, Valuations, Audit, Supply Chain Management, ICD, Land Survey, Civil Engineering, GIS, Public Admin.

7.4 Bursaries

Internal Bursaries

- 10 bursaries and 2 scholarship
- Linked to LGSETA Scarce Skills Priority Areas

External Bursaries

- 10 Bursaries made available
- Linked to LGSETA Scarce Skills: Property Valuations, Environmental Management, Technical, Electrical, Civil and Town Planning.

7.5 A LEARNING NATION - LIBRARY SERVICE

The city prides itself with the existence of many excellent centres of tertiary education, private colleges and the public school system. Our challenge then as the city is to take advantage of these resources for the betterment of our citizens especially for those that are and those that were less privileged. Since 2003, we have worked tirelessly with the Natal Society Library and have assumed this function since 2004. Following this amalgamation, city provision of library services has been aligned and improved dramatically. The establishment of a special children's library at the main library has given the city the ultimate legacy for the future of our children. Records show that the children's library has the highest use records in 2003 and 2004, and not only is the expansion timely for the next decade, but shows the rate at which knowledge is quickly being absorbed in the municipality among its youth. Use of the library continues to rise, and there is now more than double the record 2003 figure.

The new R31 million children's reference library is the best in Southern Africa, and boasts state of the art technology and caters for all children, irrespective of ability. The library was been funded by a joint Council (R4 million), Carnegie Cooperation (R14 million), and KZN Library Services (R13 million) agreement. The inclusion and rollout of these services has also been extended to the wards. A new library has been built by KZN Library Services in Eastwood. Systems in Georgetown and Northdale Libraries are also now aligned.

7.6 RETENTION AND ATTRACTION STRATEGY

The Municipality has developed and adopted the policy on Staff Retention and Attraction to address the scarce skills phenomenon. It is the belief of the municipality that through recruitment the application of the staff Retention and Attraction Policy will contribute towards assisting the Municipality to meet its objectives as expounded in the IDP. The objectives of this policy are:

Beside a payment of remuneration maybe pitched at a market rate of a particular post the Municipality has the scarce skills development strategies. Employees and non-employees are contracted to learnerships on scarce skills training, bursaries are granted in some of the following discipline i.e architects, tour planning, quantity surveyors, engineer, mechanical engineer, land surveyors, professional valuers etc. Coaching and mentoring, job satisfaction surveys and career pathing are part of the Policy. Through the implementation of this policy then a need will rise to develop a succession policy which will be carefully interrogated within the context of retention of the skills in the organization and addressing the growing unemployment even among those young people that have graduated at our institutions of higher learning.

8. GOVERNANCE

In order to deal with problems of staff morale the Corporate Services made sure that Council affairs are run in an effective, efficient, transparent, accountable, consultative and cooperative manner. This was done in line with the Batho Pele principles. The unit spread its services across four areas: licencing, printing, secretariat and information.

9. LICENCING

The successes of the licencing unit in one year were attributed to the placement of requisite staff who helped in doubling the revenue collection. On a comparative scale in 2004 the section collected R128 000, but in 2005 within six months the section had already collected R239 000. One of the highlights has been the clean up campaign which has been successfully carried out with the new team in prosecuting for illegal posters on street lamps and signs affixed on tress. The section has also been able to effectively enforce bylaws such as dog bylaws and bill posting bylaws.

10. INFORMATION

The introduction of the DocuSoft Document Management System has made it easier for many of the municipality's documents to be made available on the Internet despite the challenges of accessing this facility through the server. The Information Centre managed to pack, index and transfer archive boxes that previously were scattered across the municipality.

Within the development of human resources in general there has been steps taken forward to ensure maximum participation of communities in training and skills development. There were few areas where this was done but there was no general coordination from a centralised place, that is, the political programmes needed to speak to administrative ability to handle such needs. Overall within the municipality there is still a need to understand issues of performance management and the incentives that are linked to it.

11. INFORMATION TECHNOLOGY AND COMMUNICATION

- 11.1. At the heart of many world-class organizations, is a core of people dedicated to ensuring business intelligence and alignment across all business units in pursuit of better service delivery for our customers. This new model signifies the advances made in the knowledge economy, a factor that seeks to encourage the corporate world to think beyond the economic parameters incorporating many different strands of expectation from communities, clients and investors alike.
- 11.2. In the past few years the Municipality has been involved in creating the necessary strategic platform for business transacting in a truly aspirant metropolitan council, putting in place the essential elements necessary for meeting the business model of a third generation municipality through improved connectivity, forward planning, access to information, area-based management strategies and corporate asset management, all of which are geared to ensuring faster enhanced management decision-making and turnaround times, increased workforce productivity through better systems and connectivity, and ensuring that operational concerns are addressed through a focus on efficiency and effectiveness.

The Corporate Strategic Planning Business Unit, which is no longer existing in the same format, together with the currently ICT unit conceptualised some turnaround strategies of the municipality by implementing the competency-based process reengineering model of the Council to bring efficiency gains to both internal customers and the community through clearly defined work processes to avoid wastage and duplication of effort, while at the same time, redefining competencies in line with management and Council decisions to offer better, cost-efficient and faster services to communities and business.

This redefined business model's aim was to evaluate what was currently being done, understand the true business requirements for the process, and then either re-engineer or develop a completely new process that seeks to translate the strategic business unit's IDP strategic inputs and thereby, paving the way for practical implementation of the Council's decisions across the entire organization. With most functions realigned to create synergy across the organization due to either being irrelevant, duplicative or entrenching silos work patterns, the unit has ensured that business unit needs across the Council are addressed in a coordinated fashion through the following process management areas:

The adoption of the new structure in 2003 saw the establishment of an IT unit charged with the responsibility of deriving maximum value out organizing IT resources to create value in the municipality and its various stakeholders, internally and externally.

Current legislation governing municipalities, among other pieces of law in the public service, has enabled Msunduzi to put in place the required information technology and systems. In line with the IDP, the unit acts as change agent for transforming internal IT processes along Batho Pele principles and the State information Technology Agency's IT House of Rules, which has resulted in an enhanced infrastructure and systems that support performance in the business units and, ultimately, ensure better communications capability in the Council, support management decision-making by providing information and data that is reliable.

The IT unit has also been instrumental in assisting with the roll-out plan for Community Service Centres through the provision of infrastructure, systems and secure network services. The benefits of the service will result in improving services to communities by serving them where they live, which will bring down the transacting costs for thousands of families and businesses as there will be no need to travel unnecessarily to the city centre in order to pay for services, thus leaving them with more money to use where its required.

In the context of the municipality's broader vision, the provision of services at these centres will ensure alignment with other activities of government such as Multi-Purpose Community Centres (MPCC) by assisting with other daily important services such home affairs applications, registrations of births and deaths, accessing the internet for information on opportunities available in the economy and many other uses that communities need in order to improve their lives.

The existence of disparate information systems and outdated hardware prior to 2000 and into the year has also been largely addressed, as the Council has now adopted a Master Systems Plan at a strategic level to begin a process of aligning all IT to both the plan and IDP as well as providing a much-needed strategic fit and functional integration. This has meant instituting a unified electronic image for the Council (msunduzi.gov.za domain) and a centralized internet and email service serving the entire Council. Realising also the need for the unit to provide value add to the city's finances, the implementation of least cost routing systems and continued joint ventures with other vendors such as cellular and fixed line providers have resulted in savings to Council of 27% in fixed line usage and 6% in cellular usage savings.

These activities have a marked bearing on the consumer and ratepayer, as they minimize and keep costs to a bare minimum. A decision register has also been acquired to meet the city's urgent need for an automated information system which assists Portfolio Committees and Executive Committee of Council with the tracking and implementation of resolutions taken, archival and retrieval of pertinent data. The networking infrastructure was completed in April 2004 including the consolidation of departmental local area networks at Municipal Market, Parks & Recreation, the Fire Station, City Hall, Publicity House and Art Gallery as the next level in the project.

This will also include Electricity, Duoll Road and Municipal Stores. The networking infrastructure is being extended to include:

- ***Northdale library, using ADSL connectivity and a secure link***
- ***George Town library, using ADSL connectivity and secure link***
- ***Main library with a dedicated link (future)***
- ***A Diginet link to SITA for PALS access***
- ***Eastwood library (future)***

The provision of these services will ensure that the municipality remains at the forefront of technology, adheres to government's e-government strategy, and thereby, providing improved turn-around times through the implementation of a 'one-stop-shop" and increase internal capacity to handle transactions and contribute to the skilling of communities in the use of technology at the Community Service Centres in outlying areas. This makes the unit not just a provider of solutions, but a technology enabler for communities and businesses as well as ensuring that our communities are not overtaken by technological developments irrespective of their geographical positions.

11.3. Corporate Asset Management

The strategic repositioning of the municipality in terms of being a productive, sustainable, well-governed and inclusive city depends also on the effective and efficient utilization of assets and people, and nowhere is this more evident than in corporate asset management.

The unit has, since its establishment, been instrumental in streamlining asset acquisition, utilization and disposal. All Council assets, moveable and non-moveable, are now bar-coded and a record kept thereof and obsolete stock is kept to a minimum, thereby reducing wastage of funds which could be better utilized elsewhere in line with the Asset Management Policy. Income has also been generated through the sale of obsolete and redundant assets.

An efficient fleet management service has also been put in place, and 80% of all Council vehicles are now fitted with Co-Driver units to ensure optimum usage, fuel management and reduction of downtime. The fleet is also linked to CAMIS, ensuring that proper records are kept, even historical ones.

The function of the unit also involves implementation and management of a centralized fleet service and stores and also completion of the Council's spatial development framework. The framework assists Council on the route development has to take and already a Land Use Management Plan together with other Town Planning Scheme Clauses and maps for the entire municipality have been implemented. This has allowed the municipality to do accurate scenario planning for, say, five, ten and even twenty year periods which is a necessary tool if the municipality is to cater for its future expansion.

The existence of high growth areas in the city has also been guided by this framework and land use management for both business and settlement in a short, medium and long term. The Land Disposal Policy for Council Owned Land has been developed and implemented, which will therefore see to the sustainable use of land as it is not a renewable resource. Currently, all properties in the municipality have been evaluated for the Valuation Roll. The central areas of the city are being revitalized and re-planned. Already, the unit has secured income for the municipality through the sale of 70 Council owned residential properties at market rates, contributing significantly to the city's finances. Another property has been provided to a private organization to run an HIV/Aids clinic as part of the network to combat Aids in the municipality.

12 ECONOMIC DEVELOPMENT

12.1. Introduction

Local Economic Development is defined by the World Bank as an opportunity offered to local government, the private sector, the not-for-profit sectors and the local community to work together to improve the local economy.

Having said that one can not under-estimate the serious threats that are posed by the global economic meltdown against our fundamental values and principles in pursuing a better life for all citizens. Hence many gains are attributed to our sound economic system, one cannot shy away from these critical factors that are mitigating against our gains, the growing scarges of poverty among our citizens, unprecedented levels of unemployment and shattered levels of economic growth. These three factors if not understood and collectively attended to by government and private sector are likely to distort our gains where lives were sacrificed for peace, freedom and democracy. South Africa as one of the global players and the leader in the African Continent can not escape the economic recession, it then calls upon South Africans, brothers and sisters in the Continent to go back to the basics and tighten our belts.

12.2 Background

12.2.1. The implications of global economic integration have changed the role of cities worldwide. Cities are now critical role players in the global economy. They are central units in which the national and international GDPs are dependent. For instance, the City of Choice and its fellow members in the SACN collectively account for +/- 80 % of the GDP of the Republic of South Africa. As a result, the developmental agenda of government at local level has also meant tying community development together with business development to overcome distorted spatial economies in cities. A need to focus more on skills and human resource development for economic growth has emerged. Economic growth and poverty eradication have become the central organizing themes of our IDP, budgets and business plans.

12.2.2. The municipality boasts many comparative advantages for economic development of communities and business. As the capital of KZN, the city boasts a viable infrastructure necessary for the needs of a diverse range of stakeholders, from government to big business to small enterprises. The proximity of the city to both port, rail and road infrastructure, has made it, in the past 10 years and rising in the last five, a destination of choice for many investors, and already much interest has been shown in the city by foreign and local investors, some of whom have moved operations to the city not only due to our business drives, but more so for the unique mix of business and quality of life evident in all the parts of the city.

- 12.2.3. The strategic objectives of the city have been in alignment with the IDP and have also met with the approval of the business community, which has a partnership stretching beyond operational issues, but also includes strategic partnerships such as the first amalgamated chamber of business to be formed, further entrenching the cohesive relationship business has with us.
- 12.2.4. The city has also developed a spatial understanding of the economy which is essential because we cannot perpetuate apartheid Spatial Planning as we need to deal with the real issues facing our economy not only as a city but as a country and province. Due to apartheid planning, market led approaches to business development was rife, and did not make provision for community development, leaving many people outside the boundaries and realm of economic activity and development. This trend has led to jobless growth and widened inequality in the city. The identification of land, in accordance with the municipality's IDP and Land Use Management Plan, has been achieved, and a CBD extension node achieved.
- 12.2.5. The development of the Msunduzi Local Economic Development strategy would need to take into account the Accelerated Shared Growth Initiative of South Africa (ASGISA) imperatives and ensure the alignment and coordination thereof, with the Provincial Growth and Development Strategy (PGDS)
- 12.2.6. Signs of the rise in confidence in the city were noted with the first successful investment conference in 2000, followed by another in 2003 which ushered in such flagship developments as the Waterfront Development, multi-million rand development in one of the municipality's prime areas of development; the Duzi River with its annual international events and panoramic views of the city, the Liberty Midlands Mall and inner city rejuvenation. As Capital of the province, business confidence has more than been cemented by the movement of the legislature from Ulundi, and a Capital Coalition has been formed to further enhance the role of the city as capital of the province.
- 12.2.7. Our efforts at attracting listed and export oriented companies into the municipality have also been equally successful, and have earned the municipality the enviable reputation of being a "can-do municipality" with our proactive stance towards development. The development of the Liberty Midlands Mall, the relocation of Alltube, a major exporter of aluminium radiator tubing to countries such as China and Europe for the automotive industry to the city and Plexicor, a UK-funded bathware operation and many other businesses to the city have all been proof of our ability to "seal the deal". These have contributed significantly to the rates base, thereby further improving the city's finances.
- 12.2.8. Our investment friendly incentive packages rank among the best in the country and are competitive internationally as well among many third generation municipalities. Since August 2001, the concession of more than 40 new investments, and a similar number of expansions, have resulted in the creation of more than 7000 new jobs.

12.4. Economic Review

The quarterly analysis of the city's economy, which has been undertaken since 2003, indicates that economic activity continues to increase at a rapid pace, with the increase for 2006 being 26%. Business confidence remains high, and at the end of 2006 stands at 83, mirroring the figure for the country as a whole. In summary, business is saying that present business/trading conditions are good, sales are expected to be better, and they are expecting to expand their businesses and to employ more people.

The recent development in economic downturn has painted a bleak future for most cities and the Msunduzi Municipality has been approached by companies that are finding difficulty to operate under these trying conditions, through engagements with those companies, various strategies and approaches will be explored particular for those companies dependent on foreign export to begin to explore products required by domestic markets.

Having the former Minister of Finance said that South Africa will not pay out bailout to ailing companies then the Municipality will follow the same position and further more, the MFMA rules against that. Hopefully the Department of Trade and Industry will be invited to provide guidance in this regard.

The city's economy continues to be consumer driven, with the real estate and business services sectors, and the wholesale and retail sectors having the most number of businesses. However, in terms of total turnover, the manufacturing sector is dominant contributing more than 35% of total turnover.

KEY SECTORS	% OF TOTAL NUMBER OF BUSINESSES	% OF TOTAL TURNOVER
Real Estate and Business Services	73,5	15,6
Wholesale and Retail	7,1	23,5
Social and Personal Services	4,2	1,8
Catering and Accommodation	3,6	3,1
Construction	3,6	1,2
Farming, agriculture, forestry	3,3	10,3
Manufacturing	2,5	35,1

SECTOR DISTRIBUTION OF THE ECONOMY	
KEY SECTORS	% OF ECONOMY
Consumer sales and other services	54
Manufacturing	16
Retail	13
Training	8
Hospitality and tourism	6
Professional and financial services	2
Other trade	1

KEY MANUFACTURING SUB-SECTORS	
SUB-SECTOR	%
Food and Beverages	15,3
Metals products, machinery and equipment	12,4
Paper, publishing and printing	10,7
Petroleum, chemicals, rubber and plastics	10,0
Motor vehicle parts, accessories, bodies, trailers	8,2
Wood and Furniture	7,2

One of the key factors in the growth of the city's economy has been the elevation of the city to provincial capital status. This has resulted in the structured move of government departments from eThekweni (Durban) to Msunduzi (Pietermaritzburg) which has seen a significant increase in the number of government officials, and the concomitant demands of people for accommodation, consumer goods and other services.

12.5. Strategic Goals

The following strategic goals form the basis of the current economic development strategy for the city:

- Development of all appropriate sectors of the local economy
- Development and retention of all businesses, formal and informal
- Reducing poverty and creating sustainable communities (halve poverty by 2014)
- Creation of jobs (halve unemployment by 2014)
- Skills development for the local economy
- Promotion of investment and development in the manufacturing sector
- Accessing funding for local economic development

12.6. Strategies

12.6.1 Establishment of an Economic Development Business Unit

The current structure is under review in line with the review of the municipality's organisational review process. The revised unit must be staffed quickly with the relevant skilled personnel.

12.6.2. Promotion of the retention and expansion of local businesses

Formulation of a dedicated visitation programme for local businesses, across the various sectors, promoting dialogue between businesses and the municipality, providing a platform for airing grievances and resolving problems; making the resources of the municipality's Investment Facilitation Team and the council's investment incentives available to local businesses.

12.6.3. Establishment of a socio-economic data base

Utilisation of the UKZN Business School, as well as the District Municipality for the collection and analysis of data which will be utilised for profiling and understanding the Pietermaritzburg economy, and to generally inform the work of the business unit.

12.6.3. To promote and attract inward investment

Work closely with Trade and Investment KZN, the provincial trade and investment agency, to showcase the city as an investment destination; continually review the city's business investment incentives so that they are attractive to investors; provide an efficient one-stop-service through the Investment Facilitation Team for investors; work closely with the other business units to ensure that the city is seen as a well-managed, well-served city which is good for business; develop and distribute appropriate marketing material.

12.6.4. Promotion of key sectors within the city's economy

In addition to the footwear and leather, wood and furniture, aluminium, tourism and auto-components sectors, establish other key sectors through interaction with the relevant stakeholders; develop learnerships through FET, DIT and business skills agencies for the development of skills for the key sectors; develop special incentives for the key sectors; develop a strategy for the participation of emerging entrepreneurs in these sectors.

12.6.5. To promote, co-ordinate and maximise economic development from events taking place within the city

Develop a strategy with the organisers of events like the Comrades Marathon, Duzi Marathon, Midmar Mile, Art in the Park, Royal Agricultural Show, etc. to maximise benefits for the city.

12.6.6. To facilitate a co-ordinated approach to tourism promotion

Develop a tourism development plan for the city; establish the role that Pietermaritzburg Tourism, and other community tourism agencies will play in the implementation of the plan; develop a strategy that will obtain maximum benefit for tourism service providers.

12.6.7. To make land available for development

Aggressively market available industrial and commercial land; use the land audit to identify and prepare more land for industrial development; develop a metropolitan planning initiative that will, in addition to providing more land for development, integrate the entire metropolitan region and attempt to undo previous apartheid planning

12.6.8. To promote Black economic empowerment and entrepreneurial development

Work closely with the Provincial Government, FET and DIT colleges, and the School of business to develop programmes for entrepreneurial development; utilise inward investments for promoting joint ventures with emerging entrepreneurs; provide a one-stop-service for first time entrepreneurs; develop community based projects; promote and co-ordinate the activities of agencies promoting SMME's; access Provincial Government funds for the establishment of cooperatives and for SMME support and development.

12.6.9. To manage and develop informal traders

Develop an informal and street trading management plan; establish a forum for the participation of various stakeholders, including the formal sector; develop a programme for the progression of informal traders into the formal sector.

12.6.10. Establish an economic stake-holders coalition

Develop a new, comprehensive metropolitan economic development strategy, formulated and implemented by a coalition of economic stakeholders, including the city, private sector, tertiary sector as well as the non-governmental sector, such that a common vision, strategy and plan emerges, and is widely supported.

12.7. Local Economic Development

In developing the City's economy, some serious considerations and alignment must be addressed in executing our strategies above. Some of the areas that would feature prominently are as following:

12.8. Provincial Growth and Development Strategy, National Spatial Development Perspective and Provincial Spatial Plan

The Accelerated and Shared Growth Initiative of South Africa (ASGISA) is the South Africa's overriding economic development strategy which is under the stewardship of the Deputy President of South Africa that seeks to reduce unemployment to be below 15% and halve the poverty rate to less than one-sixth of households.

ASGISA proposes an annual growth rate of 4,4% or higher between 2005 and 2009 and an average growth rate of at least 6% of Gross Domestic Product (GDP) between 2010 and 2014. There are obvious limitations and constraints as pointed out by ASGISA. Nevertheless, these constraints as expounded in the ASGISA are unlocked by various interventions categorized in the following Key Performance Areas:

- Infrastructure programs
- Sector investment strategies
- Skills and education initiatives
- Second economy interventions
- Macro-economic issues
- Public administration issues – governance

In redeveloping and refining the LED and finalizing the City Development Strategy, the alignment with ASGISA must be attained. The PGDS and NSDP are framework for future economic development, reference points for three spheres of government in terms of analyzing and debating the comparative development potentials, providing key areas of tension and /or priority in achieving positive spatial outcomes with government infrastructure investment and development spending and provide a national government strategic response to development.

Then, part of understanding our strategic focus along the PGDS and NSDP, the following questions are critical to ask in order to find possible interventions as Municipality:

- *Where should government/municipality direct its investment and development initiatives*
- *What kind of spatial forms and arrangements to realize our overall objective as a country of a democratic nation, social and economic inclusion*
- *Can the government as a whole capitalize on complementarities and facilitate consistent decision making*
- *Move beyond mere focusing on integration and coordination procedures to establishing processes and mechanisms that would lead to strategic co-ordination, interaction and alignment.*

The Provincial Spatial Plan provides solutions to the questions above. Clear nodal points and corridors are identified and specific priorities for the Province are defined. This plan guides all departmental budgeting patterns in order to make feasible impact on service delivery. Any refinement of our Spatial Development Framework has to talk to and align with the Provincial priorities.

The Provincial priorities are reflected as following:

- *Strengthen governance and service delivery*
- *Sustainable economic development and job creation*
- *Integrating investments in community infrastructure*
- *Developing human capability*
- *Developing a comprehensive response to HIV and AIDS*
- *Fighting poverty and protecting vulnerable groups in society.*

12.9. Some Critical projects to ponder on:

12.9.1. Freedom Square Development Project

Beside good thoughts that went through in developing the quality of the inner city as well as jobs that were created in developing this project, in anticipation, some serious thoughts must factor in terms of transportation networks around this project.

12.9.2. Airport and Market Viability

The airport and Municipal Market have been identified by the Municipal Infrastructure investment Unit as viable sources of revenue which should receive priority in the municipality for Private Public Partnerships. Public partnerships can create the opportunity to get the basics right through shared skills, resources and efforts, and also extract returns for taxpayers in the form of greater value for money, efficiency and meeting developmental objectives. The partnerships created will also aid in the turnaround of the entities, and thereby increase turnover and skills transfer.

12.9.3. Practice of Local Economic Development

The practice of local economic development can be undertaken at different geographic scales. A local government pursues LED strategies for the benefit of its jurisdiction, and individual communities and areas within a local government's jurisdiction can also pursue LED strategies to improve their economic competitiveness. Such approaches are most successful if pursued in partnership with local government strategies.

12.10. LED

LED it is thus about communities continually improving their investment climate and business enabling environment to enhance their competitiveness, retain jobs and improve incomes. Local communities respond to their LED needs in many ways, and a variety of approaches can be taken that include:

- *Ensuring that the local investment climate is functional for local businesses;*
- *Supporting small and medium sized enterprises;*
- *Encouraging the formation of new enterprises;*
- *Attracting external investment (nationally and internationally);*
- *Investing in physical (hard) infrastructure;*

- Investing in soft infrastructure (educational and workforce development, institutional support systems and regulatory issues);
- Supporting the growth of particular clusters of businesses;
- Targeting particular parts of the city for regeneration or growth (areas based initiatives);
- Supporting informal and newly emerging businesses;
- Targeting certain disadvantaged groups

12.11. Msunduzi Municipality Tourism Development Plan

This plan was developed in 2004 in a consultative workshop represented by the following stakeholders:

Black Economic Empowerment, Community Tourism Organization, Department of Environmental Affairs and Tourism, Department of Economic Development and Tourism (KZN), District Municipality, Executive Committee, Gross Domestic Product, Haley Sharpe Southern Africa, IDP Team, KwaZulu Natal Government, KwaZulu Natal Authority, Local Economic Development, Living Standards Measure, Midlands Meander Association, Pietermaritzburg Tourism, Pietermaritzburg Chamber of Business, Quality of Life, Regional Tourism Organization of Southern Africa, Strategic Environmental Assessment Small, Medium and Micro Enterprise, Tourism Business Council, Tourism KwaZulu-Natal, Visiting Friends and Relatives, Wild and Environmental Society of South Africa, World Travel and Tourism Council, World Tourism Council, World Fund Nature.

A vision was agreed to and mission, goals were developed during the consultation process but unfortunately this plan did not take off the ground in its totality because there was not an implementation agent to oversee the implementation of those agreed strategies and projects.

The Municipality agreed to set an entity guided by section 78 of the System Act. Concurrently the Pietermaritzburg was tasked by the Municipality to do Tourism marketing and Information provision whilst the Msunduzi Tourism was tasked to explore the township tourism and BEE programs.

In view of the municipal financial situation during the course of 2009/2010 financial year, the review for 2010/2011 according to the template below informed by the Msunduzi Turnaround Strategy

12.12. Msunduzi Housing Sector Plan

The housing delivery programme of the municipality is sanctioned by the Constitution of South Africa, and is intended to give effect to the right to housing as enshrined in the Constitution. It occurs mainly in the form of state funded, low cost housing in which the municipality serves as a developer. The Provincial Department of Human Settlements provides funding, monitors progress against targets and assures quality.

Some of the key issues facing Msunduzi municipality, can be summarised as follows:

- Urbanisation;
- Population growth;
- Informal settlements;
- Urban sprawl;
- Project approach to housing development;
- Rural-urban interface;
- Availability and suitability of land;
- Structure of the city;
- Slow pace of housing delivery;
- Mono-functional settlements.

The housing need for Msunduzi is informed by various sources, including statistical analysis of data and the income profile of the population residing in Msunduzi, which provides perspective into the extent of housing demand and need in the municipality within each of the programmes available for delivery.

The housing need is indicated as follows:

- 38 508 households earn an with income below R4800 per month;
- 33 330 households without formal shelter;
- ±13 500 households in informal settlements;
- 22 550 households with income below R9 600 per month.
- Social housing need is estimated at ±14 000.

The typology of the need are categorised as follows:

- **Slums clearance:** Burgeoning informal settlements is one of the key human settlements development challenges facing Msunduzi Municipality.
- **Rural housing** need is concentrated mainly within Vulindlela ABM by virtue of it being the only major rural area within Msunduzi Municipality.
- **Gap market:** The gap housing market comprises people who typically earn between R3 500 and R10 000 per month, which is too little to enable them to participate in the private property market, yet too much to qualify for state assistance.
- **RDP Units.**
- **Social/rental housing.**

12.13. The housing supply situation is as follows:

- A total of 40 housing projects are being administered by the municipality at present.
- A total of 30 056 housing subsidies for these projects have been applied for.
- To date 25 657 houses have been built and 4 399 houses still have to be built.
- 60% of projects are located in Edendale/Imbali ABM.
- 22.5% of projects are located in the Central areas ABM.
- 17.5% of projects are located in the Northern ABM.

Planned housing projects are as follows:

- Total of 37 519 planned sites within Msunduzi.
- These projects are valued at R466 160 000.00 and will be implemented over a five year period.
- 8 419 (22%) planned sites within Edendale/Imbali (southern areas).
- 4 100 (11%) planned sites within the northern areas.
- 25 000 (67%) planned sites within Vulindlela.
- 3 085 planned rental housing units.

The Human Settlement Development Strategy for Msunduzi Municipality embraces the vision statement in the IDP, and refined in various sector plans including the SDF and EMF. It is within this context that Msunduzi Municipality will promote the development of sustainable human settlements on a progressive basis which are affordable, safe and secure. The long-term goal is to transform existing and develop future settlements as sustainable human settlements within the framework of developing a well governed, sustainable, productive and inclusive city. The primary aim of the Human Settlement Plan is to facilitate the creation of sustainable human settlements and provide a range of housing products in safe, accessible and affordable locations.

12.14. Its objectives are as follows:

- To eradicate and clear the city of all slums by 2014.
- To accelerate development and consolidate human settlement development in line with the national policy directives and the IDP of the municipality.
- To contribute towards spatial transformation and creation of an efficient settlement and spatial pattern.
- To facilitate rapid and cost-effective release of land for human settlement development purposes.
- To build capacity for effective human settlement development.

- 12.15.** Msunduzi Municipality will make a direct intervention in housing delivery generally, with the following being the priority areas of intervention:

Informal settlements if understood as being not only a housing issue (in the narrow ‘shelter’ sense of the word), but more importantly in terms of access to the urban environment as well as valuable social networks which develop over time and are generally localized and settlement specific. This suggests strongly that the responses to informal settlements should similarly be focused more on the various issues of access and social capital/social networks, than the provision of houses and tenure as first priorities.

Approaches to Slums Clearance include the following:

- Conventional informal settlement (‘in-situ’) upgrading entails the re-development of an informal settlement in a comprehensive and relatively complete fashion in respect of housing, tenure and infrastructural services.
- Self help / community driven: A variation of the above theme is that of self-help or community driven housing (previously known as ‘people’s housing processes’).
- Relocations may affect only a portion of settlements or the entire settlements and may be temporary (e.g. to a temporary relocation area) or permanent (i.e. to another green-fields project site).
- Identifying, acquiring and services alternative land: A ‘twin-track’ approach to addressing informal settlement is widely accepted, where upgrading is accompanied by the rapid provision of serviced land for settlement, or ‘managed land settlement’.
- Alternative tenure forms need to be considered and which can create the platform for future tenure upgrade if it is considered appropriate and functional.

12.16 IMPLEMENTATION FRAMEWORK

The housing process provides the basis for the proposed organisational structure, which consists of an Administrative, Planning and Implementation component. The satisfactory functioning of the Housing Unit can only be achieved, once all the posts are filled. The current lack of skills and capacity is a definite shortcoming in the efficient functioning of the Housing Unit.

The functions of the components are as follow:

Administration:

- Management of Council Rental Stock;
- Management of a Housing Waiting List.

Planning:

- Receive requests for new projects;
- Feasibility investigations for new projects;
- Packaging projects for approval by DoHS and other funding agencies i.e. NHFC;
- Slum Clearance;
- Payments to contractors and/ consultants

Implementation:

- Implementation and management of the Infrastructure construction programme;
- Implementation and management of Top Structure construction programme;
- Management of beneficiary administration;
- Ensure that sustainable human settlements are created
- Payments to contractors and/ consultants.

This proposed restructuring and merging of two units would contribute toward the achievement of housing targets by Msunduzi Municipality.

PERFORMANCE MANAGEMENT

A variety of measures can be used in the assessment of performance management for housing delivery. These include, but are not limited to, the following:

- Number of units delivered;
- Funding utilised;
- Size of housing backlog;
- Progress against milestone specific projects;
- Assessment of impact made by housing development; and
- Integration of settlements and quality of places in settlements

MSUNDUZI PROPOSED ORGANIZATIONAL STRUCTURE FOR HUMAN SETTLEMENT UNIT

12.17 INFORMAL SETTLEMENTS IN MSUNDUZI MUNICIPALITY

LIST OF INFORMAL SETTLEMENTS

No.	Name	No. of structures	Area	Action	Comment
				Upgrade / Relocate	
1	Swapo C	1956	Northern	Upgrade	Private land needs to be acquired
2	Swapo A	1848	Northern	Relocate / upgrade	Relocate to adjacent. Project upgrade including rental units
3	Swapo B	1854	Northern	Relocate / upgrade	
4	Masson	217	Northern	Relocate / upgrade/rental

The Msunduzi Housing Unit has developed a set of Key Performance Indicators (KPI's), against which they measure their progress. The KPI's that were developed for the implementation of the Msunduzi Housing Sector Plan are set out in the 5 year organizational and departmental scorecards towards the end of the IDP.

13. SERVICE DELIVERY AND INFRASTRUCTURE INVESTMENT

13.1 INTRODUCTION

The provision of infrastructure to enable better service delivery is a challenge that has been set as a key strategic priority within the municipality. Whilst efforts since the adoption of the IDP in 2002 were concentrated on enhancing the financial status of the municipality, it was as well meant to reach those communities that since restructuring have become part of our growing city. Serving a population of half a million people (628 370) placed an increasing burden on the municipality to make meaningful impact on the lives of ordinary people. Set against the backdrop of a government programme that wanted to see people receiving free basic services like water, sanitation, electricity and better roads infrastructure, the programmes of the Msunduzi Municipality were tailored to meet the needs of mostly rural areas that in the past were not part of the Municipality.

Since the amalgamation of different Transitional Local Councils (TLC's) the combined structure saw a rise in the needs of the people who needed services provision. There was a general inequality, inequity, lack and inadequate service delivery particularly in rural areas. Where services existed they were fragmented or at a single centralised place without reaching the periphery. To curb this, the Municipality saw a need to develop a proper land use plan to provide a framework for service delivery.

The Municipality's vision is that the above problems should be curtailed to provide adequate, equitable, appropriate and sustainable service provision. To achieve this venture, the five-year vision is to align our programmes in the IDP with those of other tiers of government and developmental agencies.

13.2 HIERARCHY OF PLANNING DOCUMENTS

The Municipality has adopted the following hierarchy of strategic and service delivery plans:

13.2.1 Of the documents indicated above, the following plans are in existence:

- *Infrastructure Investment Plan (2007 – 2012);*
- *Draft Water Services Development Plan (2008);*
- *Bulk Water Master Plan (2005);*
- *Bulk Sanitation Master Plan (2005);*
- *High Voltage Primary Network Refurbishment and Upgrading Plan;*
- *Electrification Plan;*
- *Housing Delivery Plan (2008);*
- *Maintenance Plan (Software Driven);*
- *Integrated Transport Plan (2002);*
- *Edendale Major Roads Plan (2005);*
- *Transportation Plan (Easing Congestion);*
- *Road Safety Plan (2007);*
- *Road Asset Management Plan; and*
- *Buildings Asset Management Plan.*

13.2.2 The following plans are being developed:

- *Water & Sanitation Asset Management Plan (60%);*
- *Electricity Asset Management Plan (60%);*
- *Comprehensive Integrated Transport Plan;*
- *Non-Motorised Network Plan; and*
- *Public Transport Plan.*

13.3 INFRASTRUCTURE STRATEGY AND INVESTMENT PLAN (ISIP)

13.3.1 The Infrastructure Strategy and Investment Plan (ISIP) was developed in 2007 with a five year horizon to 2012. The Plan seeks to provide a strategic direction in ensuring provision of sound, safe, environmentally friendly and sustainable infrastructure services to all residents of Msunduzi Municipality. Fundamentally, the plan seeks to contribute significantly to the achievement of the Millennium goals and meet the national deadlines for basic service delivery.

13.3.2 The ISIP highlights the staffing situation in the various Sub-Units responsible for infrastructure services delivery:

SERVICE SUB-UNIT	NO. OF POSTS	NO OF EMPLOYEES	VACANT POSTS
Transportation	63	28	35
Roads	707	221	486
Building Management	99	62	37
Water & Sanitation	388	269	119
Electricity	327	278	49
Housing	136	44	92

The above figures clearly indicate the inadequacy of the staffing levels in the service sub-units. In particular, the shortage of competent engineers and technicians across the sub-units is a cause for concern.

13.3.3 Service Backlogs and Strategy

SERVICE	BACKLOG DESCRIPTION	ESTIMATED COST	STRATEGY	KPI
Sanitation	21 325 VIP's	R85 m	Clear in 3 years (2012)	No. of VIP's built
	22 563 new sewer connections	R512 m	Clear backlog in 12 years (2022)	No. of households connected
	20 km of sewer pipe renewal and upgrade	R20 m	Clear backlog in 3 years (by 2012)	Kms of pipe laid
	Eliminate 9 452 conservancy tanks	R216 m	Clear backlog in 13 years (by 2022)	No. of tanks
	Eradicate 6 480 midblocks in Sobantu, Imbali & Ashdown	R60 m	Clear backlog in 5 years (2014)	No. of midblocks eradicated
	Construction of new treatment works (+ 30 ML/day)	R180 m	Construct by 2016	Treatment plan
Water	Install water standpipes to 5704 households	R0,5 m	Clear backlog by 2011/12	No. of households benefitting
	22 498 households needing individual connections	R91 m	Clear backlog by 2013/14	No. of households
	Renewal of 160 km of old waterpipes	R100 m	Clear backlog by 2011/12	No. of kms
	Reduce unaccounted for water from 36% to 20%	R125 m	Clear backlog by 2014	%
	Bulk infrastructure (reservoir pipes)	R80 m	Clear backlog by 2014	No.

SERVICE	BACKLOG DESCRIPTION	ESTIMATED COST	STRATEGY	KPI
Electricity	9 975 households to be electrified	R22,5 m	Clear backlog by 2014	No. of households
	Refurbish, upgrade & replace 20 transformers (>15 MVA) & switchgear	R197 m	Clear backlog by 2014	No. of transformers
	Maintenance & reinforcement of network	R113 m	Clear backlog by 2014	Budget expenditure
	Building one new substation in Hilton	R40 m	Construction to commence in 2010	No. of substations
Roads	Upgrading of 989 km of gravel/graded/gravseal roads	R3 billion	Clear backlog in 25 years (2030)	Km of roads built
	Construction footbridges, water crossings/footpaths	R74 m	Clear backlog by 2014	No. bridges/footpaths
	Major road extensions (130km)	R536 m	Clear backlog by 2022	Km of road constructed
	Road resurfacing	R83 m	Clear backlog by 2012	Km
	Drainage & stormwater systems	R48 m	Clear backlog by 2014	Expenditure
	Bus & taxi facilities	R57 m	Clear backlog by 2014	No. of facilities
Buildings	Maintain Council buildings	R20 m	Clear backlog by 2012	Budget
	Construct public & community facilities	R95 m	Clear backlog by 2017	Budget
Housing	Construct 25 000 (67%) for Vulindlela	R m		No. of houses
	Construct 8 410 (22%) for Greater Edendale	Rm	Clear backlog by 2017	
	Construct 4 100 (11%) for Northern Areas	Rm	Clear backlog by 2017	
	Construct 3 085 for social housing units	R m	Clear backlog by 2016	No. of houses
	1 000 Bank Charter houses	R150 m	Clear backlog by 2016	No. of houses
	2 000 serviced stands to be sold	R100 m	Clear backlog by 2014	No. of stands
Fleet Management	737 vehicles to be replaced	R300 m	Clear backlog by 2014	No. of vehicles

13.4 ELECTRICITY

13.4.1 Backlogs

The backlogs are as indicated in the section above.

To a large extent, neither Council nor Eskom have large areas that can be electrified that do not have access to electricity. Most backlogs are temporary backlogs in the sense that they are low-income houses with electrification projects underway. However, there are also infill and informal settlements that are in need of electricity grid connection.

The Municipality will investigate the possibility of providing grid electricity or alternative energy sources at minimal cost to the informal settlements in undevelopable areas and in-fills that do not have proper planning. However, the downside of it is that with the current influx of illegal settlers, providing electricity can be reviewed as encouraging the settlements thereby putting more pressure on to the Municipality's financial resources. The Council needs to come up with a sustainable position on this matter noting that regularizing the settlements takes long.

The households without electricity service may therefore be due to:

- The households that have applied for electricity, either because they cannot afford the service or they were missed somehow when marketing was done in the areas. These households are at liberty at anytime to apply for service.
- The households may be in infill sites where households have only recently been developed, Eskom and Council will provide services in these areas if it is practical to do so and funding is available.
- The development may not have been planned in accordance with town planning norms as explained above. According to the current Council policy, no electricity service will be provided if the position of roads and other services is known to obviate requests at future dates for electricity services to be moved. As explained earlier the Council may consider reviewing this policy noting that regularizing settlement in some of these areas is taking years and some people continue to live under unbearable conditions.

13.4.2 Institutional Arrangement

The electricity business is a sub-unit within a business unit of the Municipality. A Section 78 Assessment was done and Council resolved to ring-fence the Electricity Sub-Unit and form a Municipal Entity in preparation for the REDS formation. The electricity service within Council's current licensed area of supply operates as a trading service and is required to prepare a balanced budget, income statement, balance sheet and cashflow statement. The business has been making modest profit over the years.

13.4.3 Human Resource Capacity

Pietermaritzburg Electricity has a critical shortage of skilled management and technical expertise. The Sub-Unit requires 9 x engineers, 12 x technologists/technicians and 14 x electricians to be able to operate at optimal level. The electrification programme is funded by the DME and the Municipality funds the rest of the capital and operating budget. Due to competing service delivery needs, the financial resources provided by the Municipality are inadequate to implement the desired programmes.

13.4.4 Financial Capacity

Electricity projects are funded mainly from two sources, ie. the Department of Mineral and Energy Affairs and the Council budget. Due to competing needs Council resources, the funding that is being made available to electricity projects on a yearly basis is inadequate. More financial resources need to be mobilised to clear the huge maintenance, refurbishment and electrification backlogs.

13.4.5 Service Levels and Alternatives

The Municipality confirms to the National standards in providing electricity or energy to all residents.

Basic Service:	5-8 Amp for grid supply and/or non-grid supply
Intermediate:	20 Amp supply
Full:	Amp supply

For non-grid supply, especially informal settlements, Pietermaritzburg Electricity is exploring ways of providing alternative sources of energy.

13.4.6 Quality of Service

The service standards for the Electricity Business comply to NRS 047/48 to a large extent. A Service Charter informed by NRS 046/47/48 was developed and provides a measure of performance. However, to the ageing infrastructure, customers are experiencing more frequent outages due to equipment failure. More financial resources therefore need to be ploughed into electricity asset maintenance.

13.4.7 Service Providers

Eskom is licensed to supply electricity in the Greater Edendale and Vulindlela areas, while Pietermaritzburg Electricity (Municipality) provides service in the remainder of the Msunduzi Municipality and certain areas outside this area.

13.4.8 Electricity Infrastructure Development

The provision of electricity in Msunduzi area is demand driven. Developers or consumers apply for a connection for a particular purpose and the Municipality's obligation is to provide the required quality and quantity of electricity. Other capital expenditure projects are driven by the increased demand for electricity and/or the need to maintain the electricity assets to ensure quality and reliability of supply.

The demand triggers the need to plan for additional capacity and/or location and extent of the electricity network distribution. Eskom is the sole bulk supplier of electricity to the Council and hence there is mandatory need for co-ordinated planning between the two entities.

13.4.9 Sources of Energy

The Municipality provides grid electricity only. A feasibility study for demand side management that seeks to minimize the usage and wastage of electricity energy is underway. It will also explore the possibility of providing alternative sources of energy in its area of jurisdiction especially in areas without grid network.

13.4.10 Planning of Infrastructure Development

To ensure the electricity service is able to provide a reliable, quality, timeous and financially sustainable service to communities.

It is important to know:

- The number and type of customers;
- Present demand;
- Projected increase in demand for electricity;
- Demand patterns and
- Location and timing of proposed new housing, commercial and industrial developments.

The spatial development framework (SDF) gives incite into the possible zoning and developmental pattern of various settlements and establishments which ideally, should inform the capacity and extent of electricity infrastructure development.

However, the Municipality does not have an updated SDF and future demand capacity requirements are estimated by applying the growth rate to the existing demand. This method of forecasting is not adequate and safe; hence a spatial development framework is critical. Since electricity development projects are demand driven, they cannot be easily grouped and identified in the IDP as would happen for other projects. Council is obliged in terms of the Electricity Act, 1987 as amended, and its license to operate electricity undertaking that is issued by the National Electricity Regulator (NER) to provide an electricity service to anyone who is in a position to pay for such a service.

Supply projects are identified as the demand arises except for capacity enhancement projects which are identified in the Master Plans and this is done at least 10 years before the need arises.

13.4.11 Electrification

The majority of the electrification projects are linked to low income housing projects and new housing developments. The electrification of low income houses is funded by the Department of Minerals and Energy. A number of electrification project requests have been made from various stakeholders including the informal settlements.

The challenge for informal settlement requests is that the areas are not planned and hence it is difficult to ascertain the electrification routes. Some informal settlements are on private properties and others are situated on land that is not developable. Council does not develop or install infrastructure on private property.

The other challenge is that installing infrastructure on undevelopable land is tantamount to wasteful expenditure as the settlement will be disbanded in future.

13.4.12 Infrastructure Status and Maintenance

The Electricity Business assets are aging and the maintenance costs to clear the backlog are huge. There are a total of ten transformers that are more than 38 years old which need replacement or refurbishment. The average replacement cost per transformer is R5m. The Municipality has embarked on a 10 year transformer replacement program. Other assets such as switchgears need to be replaced on a yearly basis.

The electricity network assets must be maintained to ensure safety and reliability of supply. Sufficient operating funds must be provided to perform this task to the required standards laid down by law and the department's electricity license. Adequate capital funding must be made available to provide the electricity service when demanded by the development (customer) and/or to increase the network capacity or location to meet expected demand for electricity. A five-year capital programme for the primary system expansion is available together with a motivation for detailed projects.

13.4.13 Electricity Asset Risk Management

Vandalism, tampering and theft of electricity assets is on the increase. More protection and fraud prevention strategies are needed to safe-guard electricity assets. In view of the municipal financial situation during the course of 2010/11 and 2011/12 financial years, the review for 2012/13 according to the energy sector plan is captured under section I, organizational scorecard.

13.5 WATER

13.5.1 Backlogs

The backlogs are as shown in the previous section.

The backlogs refer primarily to the number of households still to be served with potable water within a 200 m radius as per the national policy and households still to have individual house connections.

13.5.2 Institutional Arrangement

The Water and Sanitation is a sub-unit within a Business Unit of the Municipality. A Section 78 Assessment is currently underway to determine the best mechanism for service delivery. The assessment will explore the possibility of forming joint entities with other water utilities like Durban Metro, uMgungundlovu District and Umgeni Water. Depending on the resolution of Council the Sub-Unit might be ring-fenced and a Municipal Entity.

The Water and Sanitation Sub-Unit operates a trading account which has to break-even. Over the years the account has been making a loss mainly because of high unaccounted for water losses of $\pm 43\%$. The current water losses as at 28 May 2012 for non-revenue water is 50% and water leaks, 26%.

13.5.3 Human Resource Capacity

Technical capacity is inadequate in the Water Sub-Unit. The Unit is currently run with one Engineer and eleven Technologists and Technicians, instead of the desired staff levels of six Engineers and twenty-one Technologists and Technicians. The total staff complement as per the approved organogram is short of 129 employees.

13.5.4 Financial Capacity

The Water programmes and projects are funded mainly from three sources, ie. Council (40%) and MIG (55%) budgets, and DWAF (5%) grant funding. Significant amounts have been allocated to service provision, resulting in appreciable reductions in backlogs over the years. MIG funding will remain the main source of funding for water projects in the next three years.

13.5.5 Service Levels and Alternatives

Service Level 1

- i) water of supply from communal standpipes; and
- ii) ventilated improved pit latrine located on each site.

Service Level 2

- i) un-metered, fixed quantity water delivery connection to each stand; and
- ii) ventilated improved pit latrine or similar approved on site sanitation system located on each site.

Which service must be provided to consumers at the fees set out in the schedule of fees determined by the Council provided that:

- i) the average water consumption per stand through the unmetered water connection for the zone or group of consumers in the zone does not exceed 6kl over any 30 day period; and
- ii) the Council may adopt any measures necessary to restrict the water flow to service level 2 consumers to 6 kl per month.

Service Level 3

Must consist of:

- i) a metered full pressure water connection to each stand; and
- ii) a conventional waterborne drainage installation connected to the Council's sewer.

If a consumer receiving Service Level 2 contravenes condition in sub- paragraph b(i):

- i) the Council may install a meter in the service pipe on the premises, and
- ii) the fees for the water services must be applied in accordance with section 6.

The level of service to be provided to a community may be established in accordance with the policy or resolution of Council and subject to the conditions determined by Council.

13.5.6 Quality of Service

The expected quality of service is stipulated in a Service Charter developed for infrastructure service standards. The Service Charter standards were informed by the minimum service standards articulated in the Water Service Regulations. Feedback from customers also assisted in the development of the Service Charter. There is, however, need to workshop staff on the Service Charter and establish a monitoring mechanism for performance against the Service Charter.

13.5.7 Service Providers

For the water provision, Umgeni Water provides potable water to rural schemes including Vulindlela areas and the Water and Sanitation Sub-Unit provides the rest of the Municipality. The Municipality was designated a Water Services Authority as from the 1st of July 2003 through a Government Gazette. The conferment of the Water Services Authority status makes the Municipality legally responsible for ensuring that all residents have access to basic water. Umgeni Water is therefore acting as a mere service provider whose mandate is dictated by the Municipality. Negotiations are underway to either formalize the relationship with a Service Level Agreement or handing over the schemes to the Municipality through a sale agreement.

In view of the municipal financial situation during the course of 20010/11 and 2011/12 financial years, the review for 2012/13 water sector plan is captured under section I, organizational score-card

13.6 SANITATION

13.6.1 Backlogs

The backlogs refer to households without:

- i) Sanitation facilities at all; and
- ii) waterborne sewage facilities connected to the sewerage network of the Municipality.

Currently most parts of Greater Edendale are served by conservancy tanks which need emptying on a regular basis. The Municipality has since decided to eliminate all conservancy tanks by connecting the affected households to the existing sewerage network. This has created another level of service backlog, despite it being an upgrade.

A number of houses in Ashdown, Imbali, Sobantu and Georgetown have their sewage connected to midblocks which cause a nuisance to houses near their location, and pose a health risk whenever they overflow. The Municipality is eradicating all sewage midblocks and huge backlogs exist. The backlogs are as indicated in the earlier section.

13.6.2 Institutional Arrangement

The Sanitation Section falls under the Infrastructure Services Business Unit and is part of the Water & Sanitation Sub-Unit.

The Section is responsible for the construction, operation and maintenance of the sewerage network facilities in the Municipality. The sewage treatment is contracted to Umgeni Water through a service agreement. The Municipality is only responsible for the Lynnfield Park sewage treatment plant which has through put of 100m³/day.

A Section 78 Assessment is currently underway to establish the most efficient and effective mechanism for providing the sanitation service.

13.6.3 Human Resource Capacity

As per the comment under the Water Section, the Sanitation Section is grossly under-staffed technically.

13.6.4 Financial Capacity

The majority of funding (about 70%) for the Sanitation service is coming from the Municipal Infrastructure Grant (MIG). Basic sanitation is, in the main, wholly funded by MIG and sewerage network extensions are mainly funded by the Municipality (about 80%). R107 million has been made available for the construction of VIP's for the next five years. The Municipality has committed to do sewerage network extensions in Azalea, Unit H and Woodlands areas in the next three years.

13.6.5 Service Levels and Alternatives

The Municipality has the following levels of service in its Sanitation system:

- i) Pit latrines;
- ii) On-site water system; and
- iii) Waterborne off-sit sewage system.

The three levels of service are still necessary in Msunduzi due to the diversity of settlement patterns. However, the Municipality has decided to upgrade the on-site waterborne system to off-sit sewage system in low-income houses due to the operational failures that have led to high health risks to the affected communities. However, properties with large standards (+ 2 000 m²), like Ashburton, can still use the septic tank system without posing any health risks.

The pit latrines are suitable for semi-rural and rural areas, and informal settlements.

13.6.6 Quality of Service

The developed Service Charter stipulated clearly the minimum service standards expected of the Section. The Service Charter complies with the Wastewater Effluent Standards and Water Services Act.

13.6.7 Service Providers

The Greater Edendale and Vulindlela areas have been inadequately serviced in the past, resulting in very unhealthy living conditions and widespread pollution of rivers. In 2002 we endeavoured to replace all conservancy tanks and informal pit latrines; draw-up an asset maintenance and operating programme; and ensure that all existing and new industrial areas were fully reticulated. As a start, 3 300 VIP toilets were built.

The Msunduzi Municipality is responsible for and provides sanitation services to the whole area of its jurisdiction. It has a service agreement with Umgeni Water to treat the sewage for the City. The Municipality operates and maintains 100 m³/day sewage treatment plant for Lynnfield Park development.

In view of the municipal financial situation during the course of 2010/11 and 2011/12 financial years, the review for 2012/13 according to the sanitation sector plan, is captured under section I, organizational score-card

13.7 ROADS & TRANSPORTATION

13.7.1 Backlogs

The backlogs on the upgrading of roads in Edendale, Copesville and Vulindlela are indicated in Section 14.1. Some of the major roads include:

INTERCHANGES WITH THE N3:

i) Greytown Road	R240 m
ii) Mkondeni	R30 m

NEW ROADS/EXTENSIONS/LINKS:

i) Oldfield Road – Market Road link	R7 m
ii) Burger Street Ext	R18 m
iii) Retief Street Ext	R8 m
iv) Ottos Bluff – Connor Road link	R45 m
v) Route 7B	R5,5 m

TRAFFIC CALMING:

(Old City & Greater Edendale)	R6,6 m

ASHBURTON:

Bellevue Distributor	R17,5 m

VULINDLELA:

Upgrade roads : 544 km	R1,7 bn

EDENDALE:

Edendale Bulk Roads Master Plan shows a

total of 32,5 km new roads planned	R114 m

Upgrade of roads (445 km)	R1,3 bn

13.7.2 Institutional Arrangement

The Roads and Transportation Sub-Unit is responsible for the planning, design, construction and maintenance of roads, public transport facilities, bridges, footbridges, stormwater and drainage systems. It operates in consultation with the Department of Transport and the uMgungundlovu District Municipality, who are authorities with similar responsibilities for different levels of facilities.

13.7.3 Human Resources Capacity

The Roads and Transportation Sub-Unit is reasonably staffed. However, the number of qualified and experienced Engineers and Technologists leaves a lot to be desired. The Sub-Unit has no registered Engineer and three professionally registered Technologists against a desired complement of five Engineers and thirteen registered Technologists. The use of consultants is therefore prevalent to make up for the shortfalls.

13.7.4 Financial Capacity

MIG is funding 60% of the road upgrading projects in Vulindlela and Edendale. The Council funds 80% of all major road extensions and expansions, with the remaining 20% coming from grant funding from the Provincial and National Departments of Transport. The backlog for the upgrading of the gravel roads is so huge that substantial amounts of additional funding is required.

In the 2005/06 financial year, MTAB granted the District Council funding for the Integrated Transport Plan feasibility study. MTAB is also funding the Northdale/Edendale corridor transportation study which seeks to improve the movement of passengers, goods and services between the two economic nodes. More funding is required to study all the N3 interchanges, service roads to lower traffic volumes of the N3, conduct the City Centre traffic situation and construct the necessary road network.

13.7.5 Service Levels & Alternatives

The Council adopted the road guidelines stipulated in the “Infrastructure, Services and Facilities Road and Drainage Guidelines” document. The Municipality has since developed an asset management plan that stipulates the conditions and frequency of conducting condition analysis and asset maintenance.

13.7.6 Quality of Service

The quality of service is as stipulated in the Service Charter.

13.7.7 Service Providers

The Msunduzi area is serviced by a number of road service providers. The South African National Roads administers the N3 corridor, KZN Department of Transport is responsible for provincial, district and local roads in the rural areas of Vulindlela, Bishopstowe and the UMgungundlovu District Council should be responsible for district roads. A number of developers have signed service agreements which bestow the responsibility of maintaining roads on the developer.

The Municipality is responsible for all other roads and tracks in the City. Due to the huge road network backlog in Vulindlela area, the Municipality is assisting DOT in developing and maintaining the roads. In view of the municipal financial situation during the course of 2010/11 and 2011/12 financial years, the review for 2012/13 according to the road and transportation sector plan is captured under section I, organizational score-card.

13.9 FLEET MANAGEMENT

13.9.1 Institutional Arrangements

The Municipality maintains its fleet acquired through finance lease in the majority of cases.

13.9.2 Human Resources Capacity

The shortage of Mechanics is a major cause of concern.

13.9.3 Financial Capacity

The acquisition of vehicles and plant assets is funded by Council budget. Due to the inadequacy of funding, the Municipality uses finance leasing to acquire the assets.

13.9.4 Quality of Service

The provision of vehicles and plant in good condition and at the appropriate time is essential for effective service delivery by all Business Units of the Municipality. Ageing vehicles are making it difficult to achieve this objective. Huge investments are therefore required in Fleet Management to improve the quality of service.

13.9.5 Service Providers

Service providers include the specialist garages, suppliers of vehicles and vehicle management systems. It is important to select the service providers carefully. In view of the municipal financial situation during the course of 2009/2010 financial year, the review for 2010/2011 according to the template below informed by the Msunduzi Turnaround Strategy

13.9.6 Backlogs

The age analysis of vehicles is as shown in the table below:

PLANT / VEHICLE AGE ANALYSIS BY TYPE							
Plant/Vehicle Type	No. of Items	0-5 YEARS		5-10 YEARS		10-15 YEARS	
		Amount	%	Amount	%	Amount	%

Reduction in fleet size due to sale of vehicles that were uneconomical to repair & accident damaged vehicle

INFRASTRUCTURE DEVELOPMENT, SERVICE DELIVERY AND MAINTENANCE RECOVERY PLAN

15.1. Poverty Eradication

Almost without doubt the biggest challenge for any new dispensation is the eradication of poverty among its people. As part of co-operative governance, we have established co-ordinated mechanisms of delivery in this area through our partnership with other sectors of government and civil society. Our approach has been to target all areas where there are pockets of poverty, and to systematically eradicate the problem through empowering communities with the tools and mechanisms to start their own projects and sustain them.

The Shosholozza Programme of the municipality which was funded to the tune of R7,5 million including all wards to speed up responses to small developmental issues, also yielded a number of poverty eradication projects in poultry farming, sewing projects, block-making and community gardening, all supporting many families and helping keep many mouths fed and clothed in the absence of formal jobs. In addition, the BESG projects in many wards have also provided jobs to curb unemployment through employing grass-cutting, another problem which has been addressed in the city. A total of 90 temporary labourers were employed in this way, and also to eradicate alien invasive vegetation. In Dambuza, we have tackled the problem of soil erosion and dongas in this way as well through temporary workers.

15.2. Parks, Sport and Recreation and 2010

The city has struck a good balance between its natural and built environments through careful planning and development. Our quality of life has largely been reinforced by the natural surroundings which we live in that add peace and recreational opportunities for many of our people. However, there is still a lack of recreational opportunities in many disadvantaged communities. Part of this challenge is being addressed through the unit by ensuring that development takes into account the need for communities to have access to these services.

The upgrade of the Oval Cricket Stadium, one of a few worldwide with a tree on the grounds also saw the coming to the city of the 2003 ICC World Cup, and created 500 temporary jobs. The Oval was also equipped with a unique wind vane featuring none other than Jonty Rhodes, one of the city's best examples of sporting prowess.

In preparation for the 2010 World Cup Council's representatives visited Germany to see first hand how non-host cities used the World Cup to benefit their residents. The representatives were also on a fact finding mission about how economic spin-offs are achieved in these cities. Subsequently, Harry Gwala Stadium was upgraded to a maximum capacity of 15 000 people, to hold the fan parks, which is one of the routes that the city will use to spread the World Cup atmosphere. Thus far the Harry Gwala Stadium has hosted PSL matches including the biggest crowd puller Kaizer Chiefs, Sundowns, Orlando Pirates and other PSL teams.

15.3. Cemetery and Crematoria

The municipality has reviewed its strategies on Cemetery and Crematoria Sector Plan, in a nutshell, this sector plan as proposed propagates among other things alternative burial methods. This is in response to the fact that the city is running out of burial areas like any other cities, according to our investigations. In order for the city to come up with a vibrant as well as proactive strategies in response to Cemetery and Crematoria Plan, a process to involve various stakeholders through dialogs and debates can begin to tease some of the religious and cultural sensitivities in propagating alternative burial methods.

SECTION G: PROJECTS FOR 2012/13 -2016/17 AND BEYOND

The list of projects below provide a list of projects the Municipality intend to implement for 2012/13 and outer financial years. It must be noted though that those projects that fall under the outer years can be adjusted not completely to accommodate the prioritization process on an annual basis.

DETAILED PROJECTS LIST AS PER THE SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN (SDBIP) FOR THE BUDGET YEARS ENDED 2012/13) – 2016/17 AND BEYOND

INTEGRATED DEVELOPMENT PLAN CAPITAL AND OPERATING BUDGET

SECTION H: LONG TERMS FINANCIAL PLAN (LTFP) AND ORGANIZATIONAL SCORECARD

1. OVERVIEW

Various successful applications for grants were prepared by the Msunduzi and among those Restructuring Grant (RSG) that provided both the impetus and the funding for the implementation of systems and processes required to stabilize the City's finances. Prior to the implementation of the RSG in 2002, a number of accounts that were not reconciled for more than ten years were discovered.-

1.1 Implementation of Promis Billing System and Indigent Policy

1.1.1 Billing System: Promis System

The implementation of the new Promis income billing system enabled the Municipality to implement the monthly billing of rates and resultantly improved its cash flow. Coupled with this initiative, the charging of interest on all outstanding debt was also introduced on a monthly basis.

1.1.2 Credit Control and Indigent Support Policy

In an aggressive approach to streamline our credit control policy, particularly with regard to disconnections, a consortium was appointed to collect outstanding debt. Although this initiative had some teething problems, it was abandoned. Due to hikes in houses, inflation, food price, petrol etc, the City had reviewed the indigent policy by revising the free basic services to houses at the value of R120 000.

To strengthen this process, provision of free basic services to all Msunduzi residents in line with the Council Policy was also implemented. The Indigent Support Policy was revised thus ensuring that the Indigents are properly budgeted for.

New financial regulations were also developed during this period to tighten internal controls thus ensuring that fruitless, wasteful, and irregular payments are eliminated and only properly authorized spending takes place within limits.

There is also a commitment to undertaking regular credit rating to ensure the rating remains favourable thus facilitating access to external funding at favourable interest rates. This has proved successful as the Municipality gradually improved its rating. Planning to ensure that provisions in the budget are cash backed in terms of legislation has also been commenced and progress has also been made with the 100% implementation of GAMAP then GRAP and the restructuring of the Balance Sheet.

It was commended the involvement and contributions of the administrators, their team together with the cooperation of the political leadership, management of the administration and various stakeholders brought about the turnaround of the municipality and adopted the financial recovery plan..

It is business unusual at the Msunduzi but, with the commitment and the kind of work done so far in striving to meet the legislative deadlines; the municipal business score-card and limited budget weremade available for comment to all stakeholders and that made our commitment as the local sphere of government to service the entire community of Pietermaritzburg in line with the Batho Pele principles (putting people first).

In the history of the city finances, the municipality has never experiences such a serious financial crisis ever, this situation compelled the MEC for Co-Operative Governance and Traditional Affairs to intervene in terms of Section 139 (b) MFMA, 2005 on 15 March 2010. The Provincial Intervention Team (PIT) lead by Mr Johann Mettler and subsequently by Mr S Sithole was deployed to assist the municipality to stabilize its finances and municipality as the entity. When the PIT took over, it indicated that the budget for 2009/2010 had a deficit of R521. Allegations of corruption and mismanagement were leveled against senior management and a number of them are suspended. The administration was lifted by the MEC for COGTA on December 2011.

The total budget for 2012/13 is estimated at R2.9 billion hence the capital budget for 2012/13 is estimated at R230 million. No capital projects will be funded from council's own internal funds because there are no funds available. It is further not prudent to increase external debt (loans) at this point in time. It is envisaged that external borrowings will only be commenced with whenever the payment rate for services increased to acceptable levels. The budget for externally funded projects by the way of grants amounts to R230 million.

2. ALIGNING THE BUDGET WITH THE COMMUNITY NEEDS AND MATTERS OF GOVERNANCE

The Msunduzi Municipality is committed to redressing and addressing the needs of the citizens of the City and value the inputs that are made during the izimbizo, ward committee meetings, stakeholder consultations and concerns raised in our complaints register. During the period of May, November and December 2011, the IDP and Budget consultations with members of public and various stakeholders as well as consultations and engagements that were held with members of public and stakeholders in May 2010 with members of parliament under the Parliamentary Adhoc Committee, the Municipality will endeavor to respond to some of the issues and concerns raised during those consultations, indeed under the limited resources and financial constraints. ☐

The Msunduzi Municipality through the Turn-around Strategy and specifically the Financial Recovery Plan as adopted by Council last year form the basis of the IDP and draft Budget for 2012/13 and beyond, is committed to turnaround the municipal financial crisis and improve the efficacy of governance and service delivery. The following observations underpin our understanding of the community needs and the needs that will be raised at the consultations scheduled for the 15 and 18th April 2012, will be analyzed and considered in the preparation of the final draft budget for 2012/13 financial year. It must be noted though that the approach to consider some of the needs raised by various stakeholders, the following approach will dictate:

- *City-wide based;*
- *Management area based; and/ or*
- *Ward based.*

Ideally, the finalization of the budget is to balance the budget allocations on prioritized community needs and address matters of governance as dictated by the Financial Recovery Plan that emanated from the Msunduzi Turn-Around Strategy.

☐

The Table below indicates issues that were raised by the community in terms of their importance; this is graphically represented as follows:

MSUNDUZI WARDS 1 - 37 NEEDS ANALYSIS 2012: 1589 REQUESTS

It is evident from graphical illustration that good governance is the most crucial need to be addressed especially as the municipality adapting through the transition after the administration. Before the administration, the very most pressing need was the infrastructure investment in terms of the analysis of community need. Maintenance and repairs stood out high and this is based on lack of maintenance due to insufficient funds, Local Economic Development was also seen as a performance area that deserves urgent attention.

3. CITY FINANCES

3.1. MANAGEMENT OF DEBTORS

“People legitimately complain about the billing systems. People would not be complaining about billing systems if government did not make significant progress in rolling out the electrification and water provision programmes. However, the complaints point to the need for us to enhance the capacity of municipalities to ensure sustained delivery and to be precise in their administration of accounts,”.

Challenges Remaining/Action Plans

- Manage increasing Outstanding Debts
- Mid-Year Assessment 2012/13
- Write-off indigent debts.

Strategy to Reduce Debtors

- **Improve quality of billing information**
Implementation of a new Electronic / remote meter reading system
- **Ensure performance measurement criteria**
Implementation of performance agreements for every process manager, DMMs and managers reporting to the municipal manager

- **Fully implement the Credit Control Policy**
including Government Departments
- **Major Review of Policies (2012/13)**
Credit Control Policy
Indigent Support Policy

3.2. Proposed Tariff Charges

Description	2011/12	2012/13	ESTIMATED REVENUE
Electricity-Bulk and Others	21.6%	11%	1363b
Water	7%	17%	348m
Sanitation	8%	7%	114m
Refuse	8%	7%	75m
Equitable share		7%	339m
Property Rates	7%	7%	
Total Revenue			

3.2.1 Electricity

The Eskom price of bulk electricity supplied to municipalities will increase by 17.5% on 1 July 2012. The proposed electricity tariff increase for bulk is 11.% for bulk and and other.

3.2.2 Water

An increase of 17.5 by Umgeni tariff is broken down into -6.5% Umngeni tariff increase and -11% towards the construction of Spring Grove Dam would be charged as from 1 July 2012. The Msunduzi has adjusted the water tariff by 15% (R15.00) for residential and 17% for commercial and other users for the 2012/13 budget. Water tariffs are structured to protect basic levels of service and designed to encourage efficient and sustainable consumption.

3.2.3 Sanitation

The proposed sanitation tariff increase for the 2012/13 financial year will be 7%.

3.2.4 Refuse

The proposed refuse tariff increase for the 2012/13 financial year will be 7%.

3.2.5 Landfill Site

The proposed landfill site tariff increase for the 2012/13 financial year will be 7%.

3.2.6 Property Rates

The property rates revenue increase for the 2012/13 financial year will be 7%.

Property rates is the second largest revenue source totalling 19 per cent or R576 million and increases to R622 million by 2013/14. The following increases by category for the 2012/13 financial year are proposed:-

Vacant land	7%
Residential (primary rebate has been reduced by 1%)	7%
Small home business (new category)	7%
Business	7%

The Supplementary Valuation Roll will generate millions for the 2012/13 financial year.

3.2.7 Other Tariffs

The proposed on other tariff increase for the 2021/13 financial year will be 7%.

The above tariff increases are necessary in order to ensure financial sustainability, local economic conditions and the affordability of services, taking into consideration the municipality's indigent policy. The indigent policy will remain unchanged in terms of qualifying criteria.

Equitable Share

In respect of the Income projections the equitable share allocation for The Msunduzi Municipality for 2012/13 was R 304.8 million in comparison to the 2012/2013 which is estimated at R339 million.

General Expenses

General expenses have been increased in line with the National Guideline.

Repairs and Maintenance

Repairs and maintenance votes have been increased by 5% as per National Guideline. Vehicles budget were increased accordingly of the approved 2012/13 budget due to ageing of the existing fleet.

Lease Charges

Lease charges have been calculated according to the lease register.

- Housing rental=1.4

Interest Charges

Calculation of the above charges was based on the amortization table.

Operating Grants

Operating grants allocation to the municipality from National Treasury are as follows:

-Local Government Financial Management	R150m
-Municipal System Improvement	R800m
-EPW	R1501m

Allocation for Provincial grants amounts to millions for the 2012/13 financial year as shown on the table below.

New Votes

New votes are not included in the 2012/13 draft budget due to pending valuation.

- **Land sales: 1.3;**
- **sales of assets:1.7;**
- **Airport:2%; Market: 3%;**

Electrification prg	5000			
Rural Household Infra	4500			
Total	208,599			

4. CAPITAL BUDGET

In terms of the Division of Revenue Act (DORA) the Msunduzi Municipality has been allocated the R208,599M as capital grants for the 2012/13 financial year. years and is 34.51 per cent less when compared to the 2011/12 Adjustment Budget. The reduction is due to various projects being finalised in the previous financial year as well as affordability constraints in the light of current economic circumstances.

The capital programme decreases to R230 million in the 2012/13 financial year, further decreases in 2013/14 to R215 million and in 2014/15 to R180 million. For a substantial increase of the capital budget over the MTREF the municipal council should consider additional borrowings in each of the financial years of the MTREF. The repayment of capital and interest (debt services costs) has substantially increased over the past five years as a result of the aggressive capital infrastructure programme implemented over the past three years. Consequently, the capital budget remains relatively flat over the medium-term.

Explanatory notes to MBRR Table A1 - Budget Summary

- Table A1 is a budget summary and provides a concise overview of the City's budget from all of the major financial perspectives (operating, capital expenditure, financial position, cash flow, and MFMA funding compliance).
- The table provides an overview of the amounts approved by Council for operating performance, resources deployed to capital expenditure, financial position, cash and funding compliance, as well as the municipality's commitment to eliminating basic service delivery backlogs.
- Financial management reforms emphasises the importance of the municipal budget being funded. This requires the simultaneous assessment of the Financial Performance, Financial Position and Cash Flow Budgets, along with the Capital Budget. The Budget Summary provides the key information in this regard:
 - The operating surplus/deficit (after Total Expenditure) is positive over the MTREF
 - Capital expenditure is balanced by capital funding sources, of which
 - Transfers recognised is reflected on the Financial Performance Budget;
 - Borrowing is incorporated in the net cash from financing on the Cash Flow Budget
 - Internally generated funds are financed from a combination of the current operating surplus and accumulated cash-backed surpluses from previous years. The amount is incorporated in the Net cash from investing on the Cash Flow Budget. The fact that the municipality's cash flow remains positive, and is improving indicates that the necessary cash resources are available to fund the Capital Budget.
- The Cash backing/surplus reconciliation shows that in previous financial years the municipality was not paying much attention to managing this aspect of its finances, and consequently many of its obligations are not cash-backed. This places the municipality in a very vulnerable financial position, as the recent slow-down in revenue collections highlighted. Consequently Council has taken a deliberate decision to ensure adequate cash-backing for all material obligations in accordance with the recently adopted Funding and Reserves Policy. This cannot be achieved in one financial year. But over the MTREF there is progressive improvement in the level of cash-backing of obligations. It is anticipated that the goal of having all obligations cash-back will be achieved by 2014/15, when a small surplus is reflected.

6. THE SERVICE DELIVERY BUDGET IMPLEMENTATION PLAN (SDBIP)

Finally, the Msunduzi Municipality would be able to finalize the prioritization of the IDP along with various plans, and the inputs on budget above reflect the budgeted projects for 2012/13 as prioritized and agreed by all stakeholders involved in the IDP and Budgeting process.

The list of objectives by sector departments and District are intended to highlight the direction these two spheres of governments have taken and to reflect how the Municipal objectives aligned with them. Where possible the SBUs can indicate how the City is progressing in terms of meeting the Millennium Development Goals in percentages. It must be borne in mind that all the Balance Score-card Perspectives were considered when the strategies and objectives were constructed and these perspectives are Finance; Customer; Internal Processes and Learning and Growth. They are aligned to Municipal strategic Priorities and Provincial Key Performance Areas (KPA) and Municipal Organization Structure is structured around the National KPA.

MSUNDUZI MUNICIPALITY LONG-TERM FINANCIAL PLAN (MLTP)

This draft Long-Term Financial Plan was developed during the IDP and Budget review process and it was used to create the budget for 2012/13, and would be adopted by Full Council before the start of 2012/13 financial year.

INTRODUCTION AND BACKGROUND

The Msunduzi Local Municipality (Msunduzi) is a Category B Municipality situated in Pietermaritzburg, which is also the Capital City of the KwaZulu-Natal Province.

Msunduzi commonly known as Pietermaritzburg or the “City of Choice” is located along the N3 at a junction of an industrial corridor from Durban to Pietermaritzburg and an agro-industrial corridor stretching from Pietermaritzburg to Estcourt. It is the second largest City within KwaZulu-Natal and a contributor towards 80% of the Gross Domestic Product (GDP) by the 9 largest Cities in South Africa. It is the main economic hub within the Umgungundlovu District and its location has a strong influence on regional channels of investment, movement and structuring of the Provincial spatial framework for growth and development.

The Municipality is experiencing financial challenges and recently prepared a Financial Recovery Plan (FRP) to assist it to recover from the current financial challenges and place it on a path to financial and service delivery sustainability. The Municipality is currently implementing the FRP.

During the preparation of the FRP it was reiterated that the Municipality needs to move beyond crisis and reactive management and short term planning. It was emphasised that a Long Term Financial Plan (LTFP) should be developed with clearly defined end goals that will change the future behaviour, resource allocation and growth and development of the Municipality. In addition, the LTFP should give effect to the Service Delivery Mandates of the Municipality, noting the service delivery imperatives and backlogs of Msunduzi as identified in the Integrated Development Plan (IDP).

The LTFP is primarily aimed at ensuring that the Municipality has sufficient and cost-effective funding in order to achieve its long term objectives through the implementation of the IDP and medium term operating and capital budgets.

Finally, the LTFP is intended to provide a financial and policy guideline to ensure that all future activities and planning initiatives are aligned to the LTFP so that Msunduzi can achieve sustainable Municipal service delivery and financial resilience in the long term.

OBJECTIVE OF THE LTFP

Given the purpose of the Municipality and the service delivery mandates and objectives as summarised in Section 2, the Municipality developed a LTFP to give effect to the above imperatives and challenges but in a sustainable manner and without reverting/deteriorating into a state of financial problems again.

The LTFP will be reviewed on an annual basis, and ideally all future budgets and financial planning processes must be aligned to the LTFP. In doing so, the LTFP should also be updated with at least the following information:-

- Any direct change in financial status or internal factors, other than previously predicted, which may influence the financial status and viability of the Municipality;
- Any changes in the economic and socio economic environment, other than previously predicted, which may influence the financial status of the Municipality;
- Any changes in the revenue base or composition which may have an impact on the financial viability of the Municipality;
- Any changes in the National or Municipal priorities as previously identified; and
- Any factors which may have an impact on the ability to implement previously identified projects.

The Msunduzi LTFP takes cognisance of the following additional factors:-

- **A collaborative and visionary process.** The LTFP does not just forecast the status quo into the future but considers different possible scenarios and involves all stakeholders, elected officials, line departments, and the public to help identify financial issues, develop consensus strategies, and ensure a successful implementation.
- **A combination of technical analysis and strategising.** Long-term forecasts and analysis are used to identify long-term imbalances and financial strategies are developed to counteract these imbalances or inequities.
- **An anchor of financial sustainability and policy development.** The plan develops big-picture and long-term thinking among elected and appointed Officials and also aims to ensure alignment and credibility of the IDP.
- **Long term in nature.** The plan should cover between five and ten years but some components take a longer view. For example, the plan may include a 20-year forecast of infrastructure needs. In this regard the key is to match this time horizon with the financial strategies of the Municipality.
- **Aligned to the Financial Recovery Plan.** The LTFP is not intended to replace the FRP but to rather supplement the FRP and the MTREF Budget of the Municipality.

Given the above, Msunduzi therefore needs to move from a point of financial problems to ensure that it attains complete financial health thereby improving service delivery to the Community it serves.

This can only be done in the medium to long term and the measure of success for Msunduzi in terms of the LTFP would be for Msunduzi to ensure that the Council's long term financial performance and position is sustainable. This will be achieved when planned long-term service delivery and infrastructure levels and standards are met:-

- Without unplanned or sporadic increases in rates and tariffs; and /or
- There is no disruption or cuts to services or service delivery due to lack of infrastructure management and old or ageing infrastructure.

- From a policy perspective the LTFP is aimed at ensuring that the Municipality has sufficient and cost-effective funding in order to achieve its long term objectives through the implementation of the medium term operating and capital budgets. The purpose of this LTFP is therefore to:-
- Ensure that all long term financial planning is based on a structured and consistent methodology in order to ensure the long term financial sustainability of Msunduzi;
- Identify assets (including human resources) investment requirements and associated funding sources to ensure the future sustainability of Msunduzi;
- Identify revenue enhancement and cost saving strategies in order to improve service delivery at affordable rates and tariffs; and
- Identify new revenue sources as funding for future years.

OBJECTIVES AND PRIORITIES OF THE MUNICIPALITY

The key strategic outcomes of Msunduzi that have been articulated in the 2012/13 IDP, considered and encapsulated in the LTFP includes:-

- **Plan 1:** Build a strong institutional and financial base and sustainability;
- **Plan 2:** Improve quality living environments through basic access to water, sanitation, electricity, waste management, roads and disaster management;
- **Plan 3:** Provide safe, healthy and secure environment (environmental health and public safety);
- **Plan 4:** Create an environment for economic growth and development to enhance the Municipal contribution to job creation and sustainable livelihoods through a Local Economic Development Plan;
- **Plan 5:** Build a cohesive system of governance that translates deepening democracy into a meaningful sense to public participation; and
- **Plan 6:** Ensure integrated, sustainable spatial planning and development.

The above outcomes are guided by the following principles that also underpin the LTFP to ensure alignment and consistency to all planning processes:-

- **Ubuntu:** Humanity, I am what I am because of who we are
- **Hard working:** Passionate and committed to one's work
- **Competence:** Having requisite skills, knowledge behavior and appropriate attitude in executing one's work effectively and efficiently
- **Integrity:** To maintain and demonstrate good governance honesty

CURRENT CHALLENGES WITHIN MSUNDUZI

Given the above service delivery and policy imperatives, it would be amiss not to mention the current challenges within Msunduzi, as the LTFP will also be guided by these. However, the LTFP attempts to address these challenges in a holistic and integrated manner to ensure that service delivery is improved but more importantly sustained over time.

Summary of challenges as per the initial assessments:-

- **Organisational Structure and Human Resource Matters:** The current structure was approved in 2008 and contains 4 899 approved posts of which 2 947 (60%) was filled as at the end of 30 June 2011. However, it should be noted that only 3 047 (62%) of the approved positions were funded in the 2010/11 financial year and that additional provisions may need to be made for other critical posts identified. The Municipality is in the process of starting to address the funding through the 2012/13 MTREF budget.
- **Governance:** The area of governance and oversight within Msunduzi needs to be strengthened for improved decision making and to ensure a smooth transition to institutionalise the recovery efforts arising from the Intervention, the implementation of the FRP and this LTFP, once approved.
- **Infrastructure and Asset Management:** Infrastructure Services are provided through Sub Units for Building and Facilities Management; Electricity; Fleet; Landfill; Project Management Unit; Roads and Transportation; and Water and Sanitation but there are huge backlogs and capacity constraints.
- **Information Communication and Technology:** The Information Communication and Technology (ICT) Department is responsible for inter alia, the services of Information Communications and Technology for the entire Municipality. This includes Desktop Support, Hardware Support, Computers and Equipment Purchase, Maintenance and Management of all Systems in the Municipality. These functions/services will need to be reviewed in light of the strategic direction of the Municipality as the current arrangements within ICT will not enable optimal service delivery in the future, especially

- considering that there are 36 legacy systems operating in the Municipality that will need to be updated and integrated into an Enterprise Resource Planning (ERP) System relevant to the needs of Msunduzi.
- **Economic Development:** The Economic Development Department is seen as the key driver for the development and refinement of the IDP, land surveys, planning and environmental management in the Municipality but planning in the Municipality needs to be further aligned to the National, Provincial and Local imperatives.
- **Audit Outcome for the 2009/10 and 2010/11 Financial Years:** For the 2009/10 and 2010/11 financial years the Municipality received qualified and unqualified (with emphasis of matter) audit opinions respectively and a detailed analysis was undertaken of the matters raised by the Office of the Auditor-General but not all areas have been addressed. The Municipality is in the process of addressing the audit outcomes.
- **Powers and Functions:** It should be noted that a number of services are being rendered at significant deficits and this is due to inappropriate costing of services, inefficiencies in operations, tariff structures, poor management of Staff, etc.
- The operating model has not been reviewed since the establishment of the Municipality and will require review to ensure provision of core municipal services and funded mandates.
- **Distribution Losses:** According to the Audited 2010/11 Annual Financial Statements, the Municipality recorded significant electricity and water distribution losses, amounting to R82 million and R75 million in the financial years 2009/10 and 2010/11 respectively.
- **Financial Challenges:** Msunduzi has financial challenges that arise from its institutional arrangements, operations and administration. Of significance are its declining collection ratios, reducing cash balances and increase in gross debtors.
- **Backlogs in Service Delivery and Infrastructure:** A summary of backlogs as at 30 June 2011 is set out below.

No.	Indicators	Unit of Measure/ Calculation	Annual		
			Demand	Baseline	Backlog
1	Number of Households with access to basic (or higher) levels of water	No. of Households	152 920	79 796	73 124
2	Number of households with access to free basic water	No. of Households	No Data Available	29 211	No Data Available
3	Number of Households with access to basic (or higher) levels of sanitation	No. of Households	152 920	55 468	97 452
4	Number of households with access to free basic sanitation	No. of Households	36 446	29 446	7 000
5	Number of Households with access to basic (or higher) levels of electricity	No. of Households	143 307	133 607	9 700
6	Number of households with access to free basic electricity	No. of Households	40 000	650	39 35
7	Number of Households with access to basic (or higher) refuse removal	No. of Households	108 227	61 950	46 277
8	Kilometers of new municipal roads constructed	Kilometers	2 232	1 380	852
9	Number of new houses constructed	No. of Households	56 000	29 000	27 000
10	Number of households in informal settlements provided with Water	No. of Households	Unable to determine.	10 300	Unable to determine.
11	Number of households in informal settlements provided with Sanitation	No. of Households	N/A	N/A	N/A
12	Number of households in informal settlements provided with Electricity	No. of Households	68 068	-	68 068

To address the above, the Municipality quantified the backlogs for access to new infrastructure and the refurbishment of existing infrastructure and this is set out below.

Asset	Total Backlog for Access to New Infrastructure	Annual Funding Required to Address the Total Backlog	Annual Funding Required to Address Existing Infrastructure Refurbishment	Total Annual Funding Required
Water Distribution	R396,5 m	R89,0 m	R145,0 m	R234,0 m
Sanitation	R1 073,0 m	R189,9 m	R52,4 m	R242,3 m
Roads, Stormwater and Transportation	R3 798,0 m	R106,0 m	R728,5 m	R834,5 m
Waste Management	-	R0,8 m	-	R0,8 m
Landfill Site	-	-	R5,6 m	R5,6 m
Electricity Distribution	R372,5 m	R36,3 m	R56,4 m	R92,7 m
Fleet/ Vehicles	R300,0 m	-	R105,0 m	R105,0 m
Total	R5 940,0 m	R436,7 m	R1 078,2 m	R1 514,9 m

In summary, the Municipality has determined that the total backlog for access to new infrastructure amounts to approximately R5.9 billion. The Municipality highlighted that approximately R436 million is required to address the backlog in an incremental manner, whilst the annual funding required to address existing refurbishments amounts to R1 billion. In total approximately R1.5 billion will be required annually to address these challenges.

Again, the Municipality should undertake a detailed exercise to confirm the service delivery backlogs and future IDP's and Budgets should cater for these on a prioritised basis. It should be noted that these backlogs are unlikely to be resolved in the short term given Msunduzi's financial and institutional challenges and this should at least be communicated to Communities or alternate funding sources should be investigated.

Going forward the Municipality must therefore ensure that the 2012/13 and all future IDP's includes a realistic financial plan (this LTFP updated on an annual basis after approval), covering a longer term period, to indicate how and when backlogs and other projects will be financed whilst working towards achieving financial sustainability.

This LTFP attempts to make provision for funds to be available to address some of the backlog in the medium to long term.

KEY DRIVERS FOR THE LTFP

An analysis of the Municipality's balance sheet reveals a significant number of infrastructure assets such as roads, stormwater drainage, water and sewer networks, electricity networks, buildings, etc to the value of R6.4 billion as at 30 June 2011.

Due to the nature of these assets and the utilisation thereof, they require regular maintenance before eventually being renewed or replaced and it is therefore important that Msunduzi implements appropriate strategies so that the cost of these asset maintenance and renewal programmes is fairly and equitably funded between current and future users. This processes known as intergenerational equity must ensure that each generation '*pays their way*' and meet the cost of the services and community assets they consume.

To ensure that Council's long term strategies are effective it is important to be able to measure performance against such strategies and in the interests of intergenerational equity it is also important that current users pay for services consumed in such a manner that at least a *surplus* is generated to fund replacement or renewal of assets in the future but that is consumed today. In addition, a surplus is critical to fund expansion of service delivery through access to new infrastructure.

The Municipality's long term financial sustainability is in effect dependent upon ensuring that on average its expenses are less than its associated revenues and that adequate funds are directed at maintaining, growing and enhancing the asset base of the Municipality, in particular the revenue generating assets of the Municipality.

These inter-dependencies are illustrated below: -

Therefore and to give effect to the LTFP, the following key ratios have been specifically selected to drive the future strategies, policies, operations and planning of the Municipality.

The Long Term Financial Plan is drafted with the following framework and outcomes in mind:-

- Remain consistent with the Municipality's current IDP and Priorities;
- To increase current service levels and standards;
- To increase Municipal credit rating without compromising its sustainability or the viability of its asset base;
- To provide for an asset replacement program over the ten year period to maintain the Municipality's infrastructure at acceptable service standards, with no large backlog of services To create a surplus in the medium term (2012/13 MTREF Budget), restructure existing loans and in the long term (2015/16 MTREF Budget) externally borrow monies to fund new and upgrade assets rather than purely grant funding, noting that the Municipality will need to have sufficient cash to make payments when due;
- To increase revenue collection and revenue base;
- To optimise internal operations with a view to focus on increasing and sustaining its asset base and service delivery Departments;
- The Plan is a moving document and will be reviewed on an annual basis and updated on an on-going three to five year basis moving forward and the Plan will be updated to incorporate any future Council decisions on policy, priorities, new initiatives or strategic direction; and
- Ensure that all surplus and reserves are cashbacked.

KEY FINANCIAL STRATEGIES OVER THE LONG TERM

Nature and Extent of Strategies Identified in the Plan

The Municipality has various strategies at its disposal to effect the changes needed for viability and sustainability of the Municipality but not all could be considered due to its' limited cashflow and institutional capacity.

Further and due to the long term nature of some of the strategies identified, the focus in the short term adopted the Pareto Principle (20% of activities that will contribute 80% to the successful implementation of the Plan) ensuring that the strategies adopted will have the greatest impact and that can be done within the financial and human resources capacity and capability at Msunduzi.

It should be noted that any other strategies not immediately addressed in this Plan should still be addressed in the long term and should not be ignored to enable a holistic and integrated and multi-pronged change to the financial and service delivery success of Msunduzi.

The strategies had to therefore ensure that the objective of a financial and service delivery turnaround can be achieved in the shortest possible timeframe and that they at least addressed the following: -

- *Reduction in expenditure on non-essentials and non-core activities and optimising current spending within the Municipality and ensuring growth, job creation and value for money;*
- *Increasing revenue through improved collections and billing efficiencies;*
- *Enhancing and sustaining the asset and revenue generating base of Msunduzi through proper asset management; and*
- *Ensuring proper administrative and governance arrangements in place to manage and address the key financial and service delivery challenges of the Municipality.*

Overview of Key Strategies Considered in the LTFP

Given the above and noting that several strategies have been developed and implemented during the intervention process but the impact of these have not fully materialised, the question that needs to be asked is whether stabilisation or recovery has been reached at Msunduzi and what impact this Plan will have on the Municipality to place it on a revised or new trajectory. Indeed, and relative to where the Municipality was twelve months ago, it can be concluded that a degree of stabilisation has been reached, but the nature of stabilisation and institutionalisation that has taken place is not anywhere near where it can be described as being sustainable or good enough to be at a point of irreversibility, noting that it would take at least approximately three to five years for the Municipality to fully implement and benefit from this LTFP.

This Plan is therefore critical to achieve the objective of viability and sustainability, as originally envisaged. Further, and as informed by the initial assessments, the following overarching strategies to address the challenges faced by the Municipality are therefore contained in the Plan:-

The combined impacts of these strategies are intended to address the core and underlying problems, which precipitated the decline in the first instance.

Successful implementation will also require greater political oversight and efficient and effective governance arrangements to drive and sustain the implementation of the service delivery mandate and Community expectations of the Municipality. These strategies are also intended to respond to both basic and complex challenges facing the Municipality.

Metropolitan Status and Potential Impact on Strategies

It is also emphasised that the initial decision of the Demarcation Board pronouncing that Msunduzi become a Metropolitan Municipality must also be managed going forward.

It is important to drive this process to conclusion and to ensure that all the conditions necessary for this status to be realised is indeed achieved.

Achieving a Metropolitan Status will also unlock additional revenue streams, such as sharing in the distribution of the national fuel levy, for the Municipality and further assist the Municipality on its path to recovery and sustainability.

The adoption by Council of the guiding principles and strategies set out in the LTFP and its successful implementation will ultimately be a major step towards achieving the above goal and driving the Municipality towards its potential Metropolitan Status.

SECTION 10: KEY RISKS TO THE LTFP

The LTFP proposes significant changes, particularly with regard to service delivery functions, financial administration, budgeting, financial discipline and governance. There will be a need for a regular review of the risks identified to ensure that as additional risks arise, timely mitigation strategies can be adopted and instituted.

The risks identified in the plan are summarised below: -

- **Non-implementation of Plans** - There are numerous plans and strategies developed over the years, which have not been implemented and a key risk is that implementation of strategies may still not take place. In order to mitigate this risk, the alignment and implementation of this LTFP should be regularly reported to Council.
- **Finalisation of Structure and Appointment of Key Personnel** – Msunduzi should ensure that the “operating model” of the Municipality is finalised as soon as possible and that the new structure reflects the future business of the Municipality and that key appointments are filled by 30 June 2012 to ensure ownership and accountability of the LTFP at least at Leadership level.
- **Poor Accounting and Record Keeping** - A key risk is that the outcomes of this LTFP may not be measured accurately because of poor accounting processes and the delay in the timeous updating of accounting records. Processes to update the accounting records regularly and to ensure that they remain up-to-date are required in order to mitigate this risk and the implementation of a new/updated Financial System may also go a long way to mitigate this.
- **Change Management** - From a change management perspective, urgent action is required to address some of the poor practices that may have occurred for many years and there is a need to strictly enforce new policies and procedures.
- **Community and Stakeholders** - There is a risk that there may be Community and Ratepayer resistance to certain aspects of the LTFP, such as budget cuts and the need to increase tariffs. This risk can be managed by effective, improved communication by Councillors, Officials of the Municipality and the Community. The Municipality must communicate effectively with the Community on all aspects of the Plan and provide regular feedback on progress, including the submission of this Plan to the Provincial Legislature.

These risks will require effective and focused management as their combined impact is likely to have far reaching and deleterious consequences and impact on the sustainability of the Municipality.

MONITORING AND EVALUATION

Finally, Msunduzi’s financial sustainability and resilience has been planned through modelling over ten years, the focus being on its financial performance, financial position, and statement of cashflows, as attached herewith.

The LTFP is based on a number of parameters and assumptions based on Msunduzi’s current position and challenges, and which have been developed to reflect a stabilisation and sustainable financial position over the planned period, also taking into account Msunduzi’s drive for a Metropolitan status.

This has been done to ensure that there is adequate resources and capacity to fund Operating and Capital Expenditure. The plan also seeks to address short term challenges and to achieve long term financial sustainability, while maintaining user charges/tariffs within acceptable levels so as not to undermine the local economy.

This LTFP will therefore have little or no value if it is not implemented and institutionalised holistically as the various components are integrated and cannot be implemented in isolation of each other even though certain aspects may only be implemented in the medium to long term.

The LTFP should also be adopted as a Policy Statement of Council and progress against the strategies set in this plan should feature as a regular item on Council’s Agenda.

KEY RATIOS TO BE ADDRESSED OVER THE LTFP PERIOD									
NO	DESCRIPTION	BASELINE 2012/13	2013/14	2014/15	2015/16	2016/17	2017/18	2018/19	RATIONALE
1	Overall Payment Ratio	91.5%	92.9%	92.8%	93.3%	93.8%	94.2%	95.2%	Ensure adequate collections to sustain operations and future cash requirements for growth and development.
2	Ratio of Administration to Service Delivery Costs	16%	16%	14%	13%	12%	11%	10%	To ensure that adequate funds are directed to service delivery Departments rather than internal support and administration.
3	Operating Budget Implementation Indicator	95%	95%	95%	95%	95%	95%	95%	Implement budget and achieve savings by driving internal efficiencies and productivity rather than curtailing service delivery activities.
4	Capital Budget Implementation Indicator	90%	92%	93%	95%	95%	95%	95%	Ensure that delivery is in terms of mandate and asset plans and capital expenditure is expended efficiently and effectively.
5	Repairs and Maintenance	12%	14.4%	16.9%	10%	11%	15.9%	12%	To make adequate provision for the maintenance of Council assets at acceptable norms.
6	Salaries Ratio	25.4%	25.2%	24.7%	24%	23.2%	22.6%	22%	Direct additional spend to repairs and maintenance and debt servicing costs.
7	Borrowing Costs	21.2%	18.9%	16.9%	14.4%	12.4%	10.6%	9.1%	Reduce grant dependency and leverage "own funding" for capital expenditures while ensuring the proper costing of services/tariffs.

7. MSUNDUZI ORGANIZATIONAL SCORE CARD 2012/13-2016/17

7.1 MSUNDUZI MUNICIPALITY 1 YEAR STRATEGIC SCORECARD

THE FOLLOWING ARE KEY PERFORMANCE INDICATORS EMANATING FROM SECTION 43 OF THE LOCAL GOVERNMENT MUNICIPAL SYSTEMS ACT AND REGULATIONS 5 (1)

THESE INDICATORS MUST BE INCLUDED UNDER THE RELEVANT BUSINESS UNITS 1 YEAR STRATEGIC SCORECARDS

No.	National Key Performance Areas	Strategic Business Unit	Compulsory Key Performance Indicators	Unit of Measure / Calculations
1	MUNICIPAL TRANSFORMATION AND INSTITUTIONAL DEVELOPMENT	Corporate Services	Budget spent on Work Skills Plan	Budgeted amount
				Actual amount spent
2				Percentage spent
3	BASIC SERVICE DELIVERY AND INFRASTRUCTURE DEVELOPMENT	Infrastructure Services	Number of people from employment equity target groups employed in the three highest levels of management	Number
4			Number (as well as percentage) of households with access to potable (drinkable) water	Number
5			Number (as well as percentage) of households with access to sanitation	Percentage
6			Number of households with access to refuse removal at least once per week	Number
7			Number (as well as percentage) of households with access to electricity	Percentage
8		Financial Services	Percentage of households earning less than R1100 per month with access to free basic services	Percentage
9	LOCAL ECONOMIC DEVELOPMENT	Development Services	Number of work opportunities created through LED development initiatives including Capital Projects	Number
10		Financial Services	Percentage of a municipality's capital budget actually spent on capital projects identified in the IDP	Percentage : Total spending on capital projects divided by total capital budget x 100
11			Financial viability in terms of debt coverage	Ratio: Total operating revenue received minus operating grants divided by debt service payments (ie. Interests plus redemption)
12			Financial viability in terms of cost coverage	Ratio: Available cash plus investments divided by monthly fixed operating expenditure
			Financial viability in terms of outstanding service debtors to revenue	Ratio: Outstanding service debtors divided by annual revenue actually received for services

The Municipality is phasing in the Performance Management System and to a certain degree currently the SDBIP is used as our performance management system in the organization. Having said that, various sector plans as expounded under section G form the basis of our organisational scorecard based on the various sector plans.

SECTION I: ANNEXURE

1. SPATIAL DEVELOPMENT FRAMEWORK

The Spatial Development Framework is covered in great detail under Section D in the form of the Executive Summary and the draft copy of the SDF as refined will be made available to the assessment team.

2. DISASTER MANAGEMENT PROGRAMME (PLAN)

A provisional programme is in place to mitigate threats and acts of disaster then it strikes. The municipality in the past has reacted and responded accordingly and effectively in dealing with the scourge of disaster and threats. In the meantime the municipality has identified those flash sports and analysis are conducted to prepare a comprehensive disaster management plan.

2.1 Disaster Management Program of the Msunduzi Municipality

Disaster Management Legislation (Disaster Management Act {act 57 of 2002})requires that a hazard / risk analysis for the area under consideration must be undertaken. This has nothing to do with response and relief measures other than that the more effective “Disaster Management Plans” are likely to become the need for response and rescue plans. Section 26g of the Municipal Systems Act, states that Disaster Management Plans must be part of the Integrated Development Plan. The term “Disaster Management Plans” refers to those remedial plans aimed at preventing or mitigating an identified risk. However the remedial measures for inclusion in the Disaster Management Plan can be formalized and a representative body of appropriate and qualified council official will have to meet to:-

- ***Confirm that the list is representative of threats / risk present.***
- ***Confirm and agree upon remedial measures.***
- ***Establish the potential cost***
- ***Prioritise remedial measures for inclusion in the Integrated Development Plan.***

The attached schedules of natural and manmade hazards and attendant problems are by no means an exhaustive list of occurrences / hazards / threats, but rather an overview of the things that have happened or have a potential to happen because these events occur frequently within the Msunduzi Municipality.

DISASTER RISK MANAGEMENT REMEDIAL MEASURES

Threats / Risks to the Msunduzi Municipality

NATURAL HAZARDS									
VULNERABILITY		CONSEQUENCE	PREVENTION / MITIGATION MEASURE	PRIORITY					
Flooding / Rivers	Jika Joe informal settlement	Loss of life/ Property damage/ personal assets							
	Umsunduzi low level bridge. Vehicles	Loss of life							
	Lower section Ashdown. Houses	Loss of life/ Property damage/ personal assets							
	Slangspruit . houses	Loss of life/ Property damage/ personal assets							
	Smero Bridge . vehicles /pedestrians	Loss of life

Civil unrest	Rallies, political meetings, pickets, strikes, marches	Work stoppages/ power failures, water failure, economic losses, serious disruption, Loss of life, Property damage						
Housing	Informal and substandard structures	On going maintenance /support						
Infrastructure	Poor maintenance	Infrastructure failure, high rehabilitation costs, Work stoppages/ power failures, water failure, economic losses, serious disruption, Loss of life						
Sport Recreation Rallies Fairs/Shows	Public Safety, security, fire, health,	Structural failure, Loss of life, economic losses, serious disruption, credibility						

SECTION H: APPENDIXES

Special Development Programmes

1. BACKGROUND

Most of the input under the situation analysis covers some of the aspects of this section. The following inputs intend to explain the municipality's response to some of the Socio-Economic Development Challenges. The input under the situation analysis covers some of the aspects of this section. The following inputs intend to explain the municipality's response to some of the Socio-Economic Development Challenges. The inputs below are extracts from various strategies eg youth, gender, HIV /AIDS and integrated environmental programme of the municipality.

APPENDIX A: YOUTH STRATEGY

2.1. Introduction

The Msunduzi Municipality is committed to full participation of youth in pursue for their noble course and belief that the future belongs to our youth. Any meaningful contributions that the City could make towards the empowerment of our youth should have positive impact towards their lives, sustainable, futuristic, educational, acknowledges cultural diversity, transparent, democratic and participatory.

That belief led the Municipality to establish the Youth Unit on and this unit is located under the City Mayor and coordinated by the Youth Coordinator whilst the activities of the unit are dictated by the Youth Council and other relevant stakeholders. Numerous consultative meetings and workshops were held by various youth formations to establish the Youth Council and to formulate various youth strategies. These strategies will be covered in details in this submission and the Youth Strategy Document will endeavour to pronounce the strategic linkages with the Msunduzi's overall vision, goals and strategies as reflected in the Strategic Direction of our Integrated Development Planning.

Part of developing those strategies required an amount of introspection, self criticism and solicitation of input from all its stakeholders, both internal and external. The process of shaping its strategic outlook and the methods of achieving that outlook are continuous but began with that initial step of identifying goals and the methodology of achieving them.

Having a youth strategic plan is crucial for the Msunduzi Municipality particularly as per the legislative requirement that requires a perspective to be established on government or municipality's contributions towards youth development. That perspective is established in policy, strategic and business plans which are all interlinked and form the basis for the implementation of all the Youth Units activities. The process of drawing up a Strategic Framework for the Msunduzi Youth Unit assumed a broad consultative format which saw a cross section of youth organisations, structures, enterprises as well as young men and women being included in the strategic planning process. Through the participation of these groups in the strategy formulation process, the Msunduzi Youth Development Strategy was designed to address the major needs, challenges and opportunities of young men and women regardless of race, disability and creed, accommodating all local municipal dynamics and specific sectoral issues.

Youth in the Msunduzi Municipality, through their structures, organizations and affiliations, were invited to a three-day strategic planning workshop where their views and aspirations on youth development were solicited and recognised. That also provided an opportunity for the proposed Msunduzi Youth Development Strategy to be interrogated in a structured manner by a broad cross-section of youth in Msunduzi. Delegates made input and commentary and structured debates were entertained to enrich the content of the youth strategy. This document captures all the input that was made by delegates and proposes a strategic route that may be embarked upon by the youth of Msunduzi. The benefit of such a process is that all stakeholders in youth development that were present, understand the direction that the Msunduzi Municipality will be embarking upon and the objectives to be achieved.

It should be noted that the process of strategic planning is continuous and the Youth Unit should monitor and evaluate the implementation of its strategy on an ongoing basis. Monitoring is crucial to ensure that the organisation does not lose sight of its chosen route and that remedial measures are taken to correct any deviations from the chosen strategy. This requires management capacity that is strategic in its orientation. Controls have to be put in place to ensure that objectives are achieved within predetermined guidelines and that there is adherence to policy guidelines and the Bylaws of the Municipality.

MANDATES:

- The Constitution (Chapter 2 of 1996)
- National Development Policy Framework (2002-2007)
- United Nations Conventions on the Rights of the Child (UNCRC) National Programmes Of Action Of Children in South Africa (Office of President) African Charter on the Rights and Welfare Of Children, The Health Act
- Msunduzi Municipality Integrated Development Plan

2.2. Background and Context

2.2.1. National Perspective

Prior to 1994 the South African youth development programmes occurred within racially segregated political, social, economic and cultural contexts. The African youth was the most oppressed of all race groups. This situation contributed directly to the current dilemmas and high levels of marginalization previously disadvantaged young women and men face today.

The apartheid government did not address the developmental needs of young men and women as a specific category. The particular needs, challenges or opportunities faced by young people were either ignored or not considered important enough to warrant more focused policy or programmatic interventions.

After 1994 Government recognised the importance of youth development for the fundamental transformation of South Africa and moved to address the needs of young women and men. The establishment of the National Youth Development Agency through the enactment of the National Youth Commission Act, 1996 (Act No. 19 of 1996) represents a major commitment by government to address the needs of youth in a committed and comprehensive manner. NYDA came as a merger between the National Youth Commission and Umsobomvu Youth Fund aimed at empowering youth in all aspects

In terms of the role that civil society has to play, the South African Youth Council (SAYC) was established in mid-1997 as a national, representative, non-governmental body of youth organization. The SAYC, “aims to develop and empower all young women and men through providing a forum for youth organizations to contribute to policy and programme development and to uphold the democratic gains of the country.”

The National Youth Commission Policy Document which was developed, submitted and approved by former President Nelson Mandela in 1997 was widely used by government departments as well as civil society institutions in conceptualizing and implementing youth development programmes.

The National Development Framework (2002-2007) was designed to provide guidelines for the mainstreaming of youth development as an integral part of the broader transformation project and programmes in South Africa.

2.2.2. Provincial Perspective

In 2003, the KwaZulu Natal Youth Commission facilitated a large scale consultation process with youth structures, youth development practitioners, government departments and civil society. The outcome was the development of a Draft Provincial Youth Policy which is part of the Municipality’s Integrated Development Plan and Implementation Strategy for KwaZulu Natal.

The KwaZulu-Natal Youth Policy's Vision is ***"... to create the conditions under which youth will be able to be the protagonists in their own development. For this to be achieved, programmes and projects must be oriented towards enhancing youth participation in civil society and political process..."***

The main aim of the provincial youth policy document is to:

- (a) Ensure that policy drives and informs youth development,
- (b) Identify priority areas and target groups,
- (c) Match the priority areas and target groups with appropriate interventions,
- (d) Identify the primary needs of different segments of the youth population and match them with implementation strategies

Where possible, a prioritised programme will reflect the broader aims of the national, provincial and local vision in line with IDP and corporate plan of the Municipality.

2.2.3. Youth Demographic Profile

According to the available data, youth form a large portion of the KwaZulu-Natal population and require urgent interventions in a number of key areas. According to the 1999 October Household Survey (OHS) conducted by Statistics South Africa (Stats SA), youth comprise 40.6% of the total KwaZulu population of 9 003 040 people, very similar to the national average. The pattern recurs within the youth population, which is dominated by younger cohorts (particularly 14-19 years old). If we combine children (aged below 14) and youth, they comprise three quarters (74%) of the total provincial population. As such, all provincial policies should be informed by the needs of the children and the youth.

The KwaZulu-Natal youth population is almost exactly evenly spread across urban (50.1%) and rural (49.9%) area. Beneath this overall figure are significant differences, however. African youth are more likely to be found in the rural (59%) than urban areas (41%); the opposite is true for youth of other races, nine out of ten of whom live in urban areas. (To be updated)

Population 1996	Population 2001	Percentage Growth:	Population 2007
523470	553224	6%	616730

	MALE %	FEMALE %
0 - 5 yrs	12	10
6 - 12 yrs	15	13
13 - 18 yrs	14	12
19 - 25 yrs	15	14
26 - 35 yrs	17	17
36 - 45 yrs	12	13
46 - 55 yrs	8	9
56 - 65 yrs	4	6
66 - 75 yrs	2	4
76 - 85 yrs	1	2
86+	0	0

2.2.4. Employment Status

Of the total provincial youth population, 45% are not economically active (comprising scholars, housewives, those receiving disability grants and so on), 29% are not employed while 26% are employed. In raw numbers, 1.5 million youth are not available for employment; just over 1 million are employed, while 900 000 are unemployed. The rate of unemployment for youth in KwaZulu-Natal stands at a massive 47%. (Status. S.A. 2001).

KwaZulu-Natal is also affected by the HIV/AIDS pandemic. A third of youth in the province already know of someone who died of AIDS. A third of youth have already had an HIV test. Current attempts by youth organisations to encourage HCT and MMC initiatives need to be supported for combating and managing the disease. Also by extension to use the Youth Unit to market and raise awareness among youth of the Of Health, Education, Social Development) and other organizations.

Aids Strategy program's by Council in partnership with other Government Departments (Department Of Health, Education, Social Development) and other civil society organizations.

2.2.5. Values and Attitudes

Attitudes on human rights issues vary widely and as a municipality, it is essential that commitments be made to instill a new ethos in youth as leaders and custodians of the future. This will restore our moral fibre where new values and attitudes are regenerated, in partnership with the Moral Regeneration Movement (MRM) and government departments.

2.3. Vision

"A caring city where all young people are able to realize their full potential in the context of integrated, holistic and sustainable youth development programmes that are responsive to the needs of young people, to ensure commitment and participation to city's efforts of becoming a youth friendly city, the capital of KwaZulu-Natal and the City of Choice".

2.4. Mission

"To facilitate, plan, manage, provide, and support youth programmes and activities within the Msunduzi Municipality, in a developmental, caring, participatory, dynamic, transparent, efficient and effective manner."

2.5 Values and Guiding Principles

Underpinning the youth development programmes for Msunduzi Municipality are the following values and guiding principles: Underpinning the youth development programmes for Msunduzi Municipality are the values and guiding principles that are the same as expanded in the strategic directions of the Municipality in SECTION C.

2.6. Key Stakeholders

- Youth Forums
- Youth Organizations
- Civil Society Organizations
- Government Departments
- Private Sector
- National Youth Development Agency
- Municipal SBU's and CBU's
- Community Based Organisations and Faith based organizations

2.7. Strategic Enablers

In order for the strategic plan to be implemented effectively, the following strategy enablers have to exist.

- Adequate human resources allocation.
- Commitment of the entire Msunduzi Youth Centre.
- Political will, support and commitment.
- Standardized and finalization of the Msunduzi Youth Development Strategy.
- Adequate allocation of financial resources.
- Consultation and clear lines of communication with all youth stakeholders in Msunduzi.

2.8. Conclusion

As a foundation for development and harnessing the latent energies of our youth, it is a pleasure that youth strategy was ratified at the highest decision-making level in the Msunduzi Municipality to enable it to be operationalised and for it to fulfil the aspirations of the Youth in the municipality.

APPENDIX B: GENDER STRATEGY

3.1. Background

This draft strategy is the City's response in addressing the IDP gap as pronounced by the MEC for Local Government and Traditional Affairs in 2003/2004; 2004/2005 and 2005/2006 IDP reviews regarding the lack of a gender programme in the Musunduzi Municipality. Most of the critical elements covered here were captured in order to underpin the Msunduzi Municipality response to gender equity. This document intends to present and guide our behavioural, attitudinal, processes, policy, programmes and projects implementation internally and externally.

The gender equity is the subject that can no longer be avoided at any levels of government, business and community. This subject is clearly pronounced by the Constitution of the Republic of South Africa which is the document above all other instruments that guides the gender programming. The Constitution has provided a platform for the establishment of a gender commission, now called the Commission for Gender Equality (CGE) which was passed in 1996. The CGE is a national independent body that has a mandate to promote gender equality through various means.

Even though there are guidelines on how gender initiatives should be run, there are no specific initiatives at a local government level and this is the initiative that Msunduzi Municipality seeks to adopt. Developing a strategic plan will help put the perceived vision into action as long as the policy processes are also aligned to this initiative.

The international instruments that have been used include among others, the African Women Charter on Women's Rights, the Beijing +10 reports, Convention for the Elimination of Discrimination Against Women, the International Labour Organization Gender Bureau and the International Declaration of Human Rights.

The national instruments that have been used as guidelines include the CGE with its Guidelines for Gender Initiatives, the Ministry, Women, Children, Person with Disability, youth and elderly, gender the guidelines from the South Africa COGTA Africa Government Association (SALGA) and guidelines from the Gender Advocacy Program. Amongst its priorities the following have been of key concern to the Msunduzi Municipality:

- Making recommendations on legislation which will promote gender equality
- Liaising with organizations /sectors of civil society which will promote gender equality
- Development and management of information on education programs
- Monitoring and evaluation of policies and practices of the different levels government statutory bodies, public and private businesses
- Research

The above processes though not exclusionary have been seen as priorities that will help integrate the powers and functions of the commissions to the strategic plan of the Msunduzi Municipality Gender Office.

The National Office on the Status of Women has set guidelines at all spheres of government, with the Office of the Premier having gender focal points as line functions. The office then initiates gender policy formulation and sees to it that policy is implemented. Actually this has been a cry within the Municipality to ensure that policy is implemented and when policy that is gender specific is not there it should be formulated and implemented.

After the Commonwealth Local Government Symposium, a working group was established with the object of influencing local government policy and ensure that strategies formulated from the symposium are put into action. For Msunduzi Municipality, there has been a relationship with the South African Local Government Association gender working group and with the chairpersons of the provincial local authority associations. The local government made a clear distinction between the internal and external transformation processes for gender equality.

Within the municipality, the Internal Transformation will be guided by the Employment Equity Act, the affirmative action practices which will seek to increase the representation of previously disadvantaged groups, including women and making the working environment more gender-sensitive. This means that the environment should be more conducive for women to thrive in their careers without regarding their various roles as mothers and as home makers. The conduct of the councillors will be guided by the rules of order which will in turn be monitored by the gender machinery. The management will also be evaluated.

External Transformation involves analysis, monitoring and evaluation of the policies and programs of the various business units to ensure that they promote gender equality. Msunduzi municipality has seen that there is a lag in both types of transformation and will hence seek to have a dual focus.

The focus though is to have a 50 % representation of women in the various political structures and community structures as well as in the administration of Msunduzi. Presently the number of women in serious positions is insignificant.

This process has been guided by extensive consultation within and outside the Msunduzi Municipality. A Gender Lekgotla was used as a platform to generate ideas that will guide programs and initiatives. This forum was composed of representatives from various political parties at local government levels, by representatives from civil society, by non-governmental organizations working mainly on gender issues, officials from the municipality, faith-based organizations, unions and community-based organizations.

However due to the realization that there have been many strategic plans which have not been effected due to lack of proper policy guidelines, this process is in parallel with policy processes that will guide and mandate the municipality in putting the strategy into action.

3.2. Introduction

Gender inequality has been a problem that came not only as a legacy of apartheid but also as a result of cultural and religious practices that exist in the area. The Municipality's location has a strong influence on regional channels of investment, movement and structuring of the provincial spatial framework for growth and development. Uniquely placed in Kwa Zulu Natal in which it is inhabited by a 20.6% of the South African population. This is one of the few municipalities that have taken a step in addressing inequalities in the area.

Gender mainstreaming has been an issue in various spheres of government and although expertise and programs have been put in place to achieve this, the results have not been satisfactory. The essence of this plan is to cope with change, that is constant in our everyday lives, deal with competition as the municipality pursues its development agenda in an effective, redistributive and yet non-destructive manner.

Msunduzi realizes that as implementation of policies has been decentralized, the strongest competitive force is among the very people who implement the policies. Strong competitive forces determine profitability and these are various stakeholders who have been influential in the formulation of this strategy.

The municipal posture vis-à-vis the historical background of the country, the skills gap amongst some of the proposed implementers, and lack of clear guidelines and principles for implementation of the internal strategies, make it mandatory to have a strategic review process. The gender machinery has to be repositioned and equipped to deal with all the change processes in the organization and as the national guidelines state. Respecting the rights of women is an important aspect of human rights and justice for all in a country. South Africa has been applauded as one of the countries that have honoured this right, although implementation at grassroots levels still needs to be worked on.

The government macro-economic policy has led to economic growth that is crucial for the reduction of poverty and inequality. For instance, the Growth Path that sought to reduce inequality through structural transformation has partially produced results at national government level but few results at local government level.

At a municipal level, there are gaps in the various municipal acts, which are gender blind in many respects. The previous IDP was also gender blind and although reviewing it is an ongoing process, a parallel process to incorporate gender activities should be started. In the same vein, a gap exists in linking what the municipality does and what the provincial and national gender structures do. It is therefore proposed that such a structure should be established as an ongoing process, starting with in co-operating various stakeholders in the gender forum from those levels both as technical advisors and providing a political backbone to our processes.

Msunduzi Municipality has identified the following opportunities that can be used to further gender empowerment programs:

- A country with reasonable resources, a viable economy and a business community who has a track record in South Africa's transformation
- A broad base of NGO and Civil Society groups that exist in Kwa-Zulu Natal
- Strategic positioning of the municipality in terms of the ability to coordinate other sectors that have been evident in the HIV/AIDS strategy
- Municipal infrastructure in place to bring such a task to fruition although capacity needs to be developed in various areas
 - Making use of war rooms to drive ward level
 - Political support and commitment

This document sets out the proposition for the role and direction of the Msunduzi Municipality in women empowerment and gender mainstreaming programmes. It is driven from a wide forum for consultation by enthusiastic organisations and individuals who seek to build a lasting legacy for generations to come. It takes account of the range and diversity of KwaZulu-Natal's civil society interventions and operations within the Msunduzi area of jurisdiction. It recognizes the impact of historical differences and seeks to correct them in a just and non-controversial manner. It acknowledges the international framework of gender programs, seeking to empower both men and women, but noting that empowerment of women is the empowerment of a nation.

The operational context raises new challenges and presents opportunities for the municipality to deliver on its mandate on development with the vision of seeing the programmes from the city of choice becoming best practice examples.

3.3. Legislative and policy framework

The overarching legislation is the Constitution of the Republic of South Africa in its Bill of Rights (Chapter Two). The statement says "the state may not unfairly discriminate directly or indirectly against anyone on one or more grounds, including race, gender, sex, pregnancy, marital status, ethnic or social origin, colour, sexual orientation, age, disability, religion, conscience, belief, culture, language and birth." Gender based discrimination is a rights based issue and it shall be handled by this strategy as such. This section will be translated as a guiding principle as follows: All persons within the Msunduzi Municipality shall be treated equally and shall enjoy the same rights, as such there shall be no discrimination on gender lines within the Municipality and in the external activities it engages itself in. This will therefore assist the Municipality in implementing its integrated development plan.

The second legislative framework is the National Gender Policy Framework that establishes guidelines for South Africa to correct the historical imbalances that have contributed to gender inequality. At an international level the policy frameworks, as aforementioned, stem from the Beijing conferences, the CEDAW and the African charter on human and Peoples Rights on the rights of women, and the International Labour Organization Conventions and Recommendations.

A Gender policy document will be developed as a parallel process to this strategic plan to specifically spell out the roles of the various committees in addressing gender imbalances.

3.4. Strategy

“Where Do We Want to be - Five Years from Now”?

As a municipality, Msunduzi has taken a decision to mainstream gender in all areas of its work and to be operational in empowering women in various identified key thematic areas. Consequently, the Municipality aims to develop gender programming competencies to various stakeholders especially those who will implement the program, through information provision, service provision, training and, human resource restructuring.

3.4.1. Purpose of the strategic plan

The purpose of the strategy is to ensure that gender is mainstreamed in all the Msunduzi Municipality activities and will be used as a tool to promote women’s empowerment in Msunduzi Municipality. It provides a framework with practical steps for implementation of the program so that all stakeholders know what they need to do.

It has an internal process that focuses on institutional gender mainstreaming and an external outlook that hinges on service delivery, community mandates and all the municipal development strategies. This shall include monitoring and evaluation activities and the purpose shall stand until the municipality has a 50 percent representation of women in all spheres, political and administrative.

3.4.2. Vision

“The Msunduzi Municipality shall strive towards being the best in the attainment of gender equality by correcting the historical imbalances and building a lasting legacy for generations to come.”

3.4.3. Mission

The Msunduzi Municipality shall:

1. ***Honour and respect the rights of women as enshrined in the Bill of Rights.***
2. ***Actively promote the advancement of gender equality in all structures.***
3. ***Work with all stakeholders to influence transformation and gender equality,***

Through an active participatory, non-discriminatory, transparent, equitable, supportive and redistributive manner

3.4.4. Specific objectives

3.4.4.1 The Overarching Principle

The underlying principle is therefore that of an integrated approach, acknowledging and redressing the past in a non discriminative and participatory manner. In this regard the principle of acknowledging diversity and change is our core.

3.4.4.2. Objectives

1. To promote all programmes that are being implemented at municipality level are gender sensitive.
2. To ensure that gender policies are developed and implemented more effectively.
3. To provide capacity and skills development programs are biased towards women.
4. To promote integration of gender programs in all three spheres of government (i.e. Local, Provincial and National).
5. To create a knowledge base on the heritage, lessons learnt, promising practices and experiences.
6. To monitor and evaluate the status of women in the municipality.
7. To conduct ongoing research relevant to the needs of women.
8. To integrate gender program

3.5. Target market

3.5.1. Women

The target market for this strategy includes all women in 37 Wards of Msunduzi Municipality with a lower age limit of 18 years of age and with no upper age limit. However discretion may be exercised in individual cases. The implementation shall start with the disadvantaged women as the high preference category.

3.5.2. Men

Men will be included in the various programmes regarding gender mainstreaming especially in capacity building activities, in community empowerment programs and in various projects that the municipality will be involved in.

3.6. Gender Programme of Action

The strategy was translated into the programme of action and the following details and themes are explained fully as enclosures in this document:

In a spreadsheet format the programme of action is defined along columns in strategic objectives, activity, responsible person, deadline, baseline data, targets or indicators and cost or budget required. The programme of action covers the tender management system, special projects and programmes, governance, economic growth and development, infrastructure, social services and development and institutional transformation as theme or subtitles of each spreadsheet. The onus to realise this programme of action rests with proper provision of resources, participants and champions or drivers of each project or programme.

3.7. Conclusion

A comprehensive Gender Strategy that was developed in consultation with various stakeholders is available and the above inputs form the basis for the overall strategy. There was consensus that a flagship program will be developed that shall seek to unite all the strategic business units. Within the action plan there are important days that connect the various activities within the gender based programs and link the Msunduzi gender activities also with the outside world. There are five main areas of interest in this strategy, namely policy, research, gender based projects, internal gender mainstreaming and advocacy. Policy will guide the designing of gender sensitive projects and will guide gender based service delivery within the municipality. It will seek to enforce the establishment of monitoring and evaluation tools. Research will help the municipality to produce gender aggregated data that will serve as a benchmark in all the activities. This research shall therefore be linked to policy and will be very helpful in internal mainstreaming. In addition to this, the strategic areas shall help us produce programs of action for the external activities, in service delivery and in the community. Advocacy processes shall link the processes and will help remove stumbling blocks against progress. To this end, an action plan has been developed with measurable indicators and time frames.

APPENDIX C: HIV / AIDS STRATEGY

STRATEGIC PRIORITY FOCUS 7

4.1. Community Centres

The main objective of the programme revolves around whether citizens in the municipality have the opportunities and capacities to share equitably in the socio-economic benefits of city life. Community services such as primary health care, water, sanitation, electricity and housing are inextricably linked to human rights and social equity, both of which are enshrined in the Bill Of Rights, Chapter 2 of the Constitution of the Republic of South Africa.

The regimented exclusion of most South Africans in the delivery of essential and basic services has meant that massive backlogs are evident in the skewed spatial development of the country, and local government has been mandated, in co-operation with other spheres of government, to deliver these services. As a developmental Council, the provision of essential services has been at the top of the priority list, and every effort, in consultation with ward Councillors and their communities, have shaped the delivery of these services to restore dignity and social equity in communities.

4.1.1. Health and Welfare

More than anything that has defined the city in the past five years, the city's response to health and welfare issues and particularly to the scourge of Aids, has been hailed as the hallmark of public-private-partnership success. The Msunduzi HIV/Aids Network, a network of community-based and Non-governmental organizations working in close association with the municipality, have been responsible for not only changing perceptions about the municipality and HIV/Aids, but have jointly contributed to the international recognition of the municipality's aggressive HIV/Aids Strategy which galvanized all sectors into a single network spread out across the entire city and surrounds. The strategy has also been adopted as a model of Best Practice by the Dubai International Award and also nationally within the South African Cities Network.

In 2004, an international award for the strategy was conferred on the city, confirming our belief that partnerships and decisive leadership can spare our people the humiliation and desperation associated with HIV/Aids. Furthermore, numerous other organizations in the city continue to make impressive gains in beating the effects of the pandemic as they work with disadvantaged, affected and infected people like children and women within the network. This has seriously raised our people's hopes, and provided ample opportunity for us as Council to do all in our power to beat Aids. The roll-out of Anti-Retroviral Treatment is also being fast tracked, and so far our people are taking advantage of the service.

Work with the elderly as part of Social Services and vulnerable groups such as street children and other children-at-risk continues through the unit, and support mechanisms especially for child-headed households are aligned to all functional units such as infrastructure services and facilities in terms of housing provision. Since 2002, the unit has been instrumental in providing clinic services in an integrated form, with new clinics established at ensuring that our communities have access to Primary Health Care (PHC) full packages and services. These interventions have made ours not only an inclusive municipality, but one with healthy and productive people.

APPENDIX D: INDIGENT POLICY

INDIGENT POLICY GUIDELINES / IMIQATHANGO YENQUBOMGOMO YABANHLWEMPU

It is without saying that the equitable share allocation to the Municipality has made it possible for the City to maximize the delivery of service particular to those areas that were previous disadvantaged by the previous systems of government. In 2004 when the City acquired its capital status, we saw a growing demand for housing, traffic congestion on our roads and triple hikes in housing prices. This scenario has been worsening by the growing inflation in the country and the high costs in the basic food stuff.

In lieu of the above the Municipality had reviewed the indigent policy in order to enable those that are at the bottom of the economic ladder to earn a living. During the IDP Review for 2010/2011 the municipality reviewed the Indigent Policy along with other policies and in terms of legislation on equity, all the properties in Pietermaritzburg would have a rebate for R150 000, that will mean that any property is valued at less than R150 000 and properties less than R150 000 will be exempted from paying rates.

Special Provisions

Child Headed Households

In the case of child headed households, the following conditions apply: The child-headed household be declared indigent after consultation with the Ward Councillor/s provided that the household income after death does not exceed R2036.00 per month. That the account be continued in the name of the deceased estate.

Flats

Where a resident lives in a flat, and is the account holder and is declared indigent upon application, the following conditions apply:

Water

A financial benefit that is equal to the value of 6kl of water based on the domestic tariff shall, on application, be credited to the electricity account.

Sanitation

The indigents electricity account shall, on application, be credited with the basic tariff in respect of sewer charges based on the domestic tariff. That if the above mentioned concessions have the effect of the month being in credit, the account rendered shall be zero and not stand to the credit of the consumer.

*Conditions Apply

IZIBONELELO EZINGAVAMILE

AMAKHAYA APHETHWE YIZINGANE

Esimweni samakhaya asesele nezingane, kuyosebenza lemibandela elandelayo:

Ikhaya lelo liyothathwa, njengekhaya elinhlwempu emva kokubonisana neKhansela lesiGceme, kodwa imali engenayo phakathi kwekhaya mayingabi ngaphezu kuka R2036.00 I-akhawunti iyoqhubeka nokuba segameni lefa likamufi.

AMAFULETHI

Kumuntu ohlala efulethini futhi one-akhawunti nomKhandlu nosethathwa njengomuntu onhlwempu, kuyosebenza lemibandela elandelayo:

Amanzi

Inani lemali elilingana nemali yamanzi awu 6 kl iyobuyiselwa kwi-akhawunti yagesi emva kokuba umuntu esefake isicelo.

Inhlanzeko

i-akhawunti yagesi yomuntu onhlwempu, emva kokuba esefake isicelo, iyofakwa imali yesolishi yasekhaya. Uma zonke lezi zaphulelo ezingasenhla ziba ngaphezu kwesikweletu somuntu saleyo nyanga, umuntu lowo angeke akhokhiswe lutho kuleyo nyanga, futhi kuyobe kungasho ukuthi umKhandlu usuyamkweleta.

*Imibandela okusetshenzwelwa phezukwayo

APPENDIX E: SPECIAL GROUPS

Our senior citizens, children and people with disabilities, the municipality through the office of the City Mayor has employed the Manager dealing with special programmes and projects, officers that the responsible for HIV and AIDS, Gender Youth, Children, Senior Citizens and People with Disabilities, there are also programmes that are conducted by this unit to address issues raised by the target groups when the City Mayor, Speaker and Councillors consult with these groups concerned. Some of the programs that we run as the municipality are:

- Youth Council has agreed on a number of youth projects and various developmental activities
- Care-givers are used to attend those families with members of family in distress and requiring special attention.
- Various projects for the elderly.
- Between the Department of Health and our Health section, various programs, through the section head are part-funded by both institutions.
- Through the Children Act No. 38 of 2005, programs that are driven by the President office of the RSA's office, under the Ministry for Women, Children and Youth, Person with Disabilities including Ederly, the municipality participates in those interactions and a policy will be mooted in due course which will be in line with the act mentioned above.
