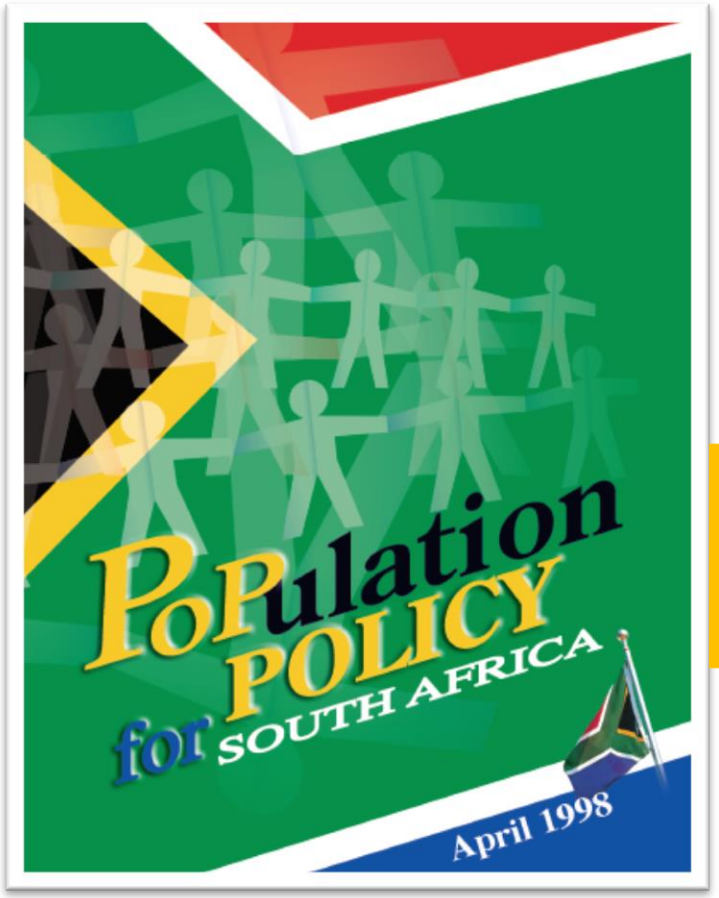
INCOPORATING DEMOGRAPHIC INFORMATION INTO IDP's
MSUNDUZI LM DRAFT IDP 2016/17

Presented by: Ms Jabu Mnisi

Date: 13 MAY 2016

POPULATION POLICY PROMOTION UNIT

IMPORTANCE OF INCOPORATING DEMOGRAPHIC INFORMATION INTO IDP's



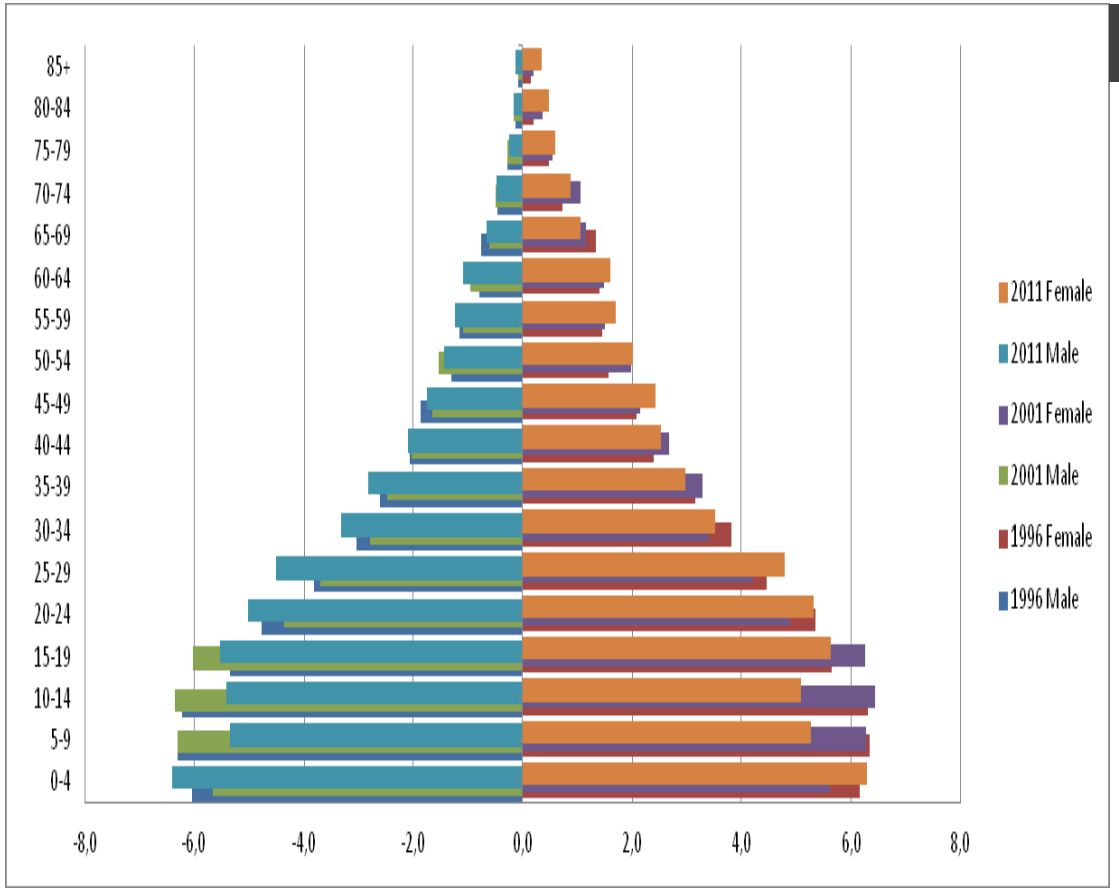
Because of the multi-faceted nature of population issues and the factors that impact on them, the implementation of this policy and the achievement of its goal and objectives will be responsibility of the entire Government at all levels and in all sectors, private sector, civil society, and indeed all South Africans"
Population Policy of South Africans,1998,p 39

- Population should be a key factor in the formulation of development plans and strategies

The role of Population Unit is to provide technical support to municipalities in incorporating demographic information into IDP's –to promote people centered development.

Planning and its implications for population

- Planning for human development requires consideration of all aspects of population
- Planning process entails the essential stages of formulation, implementation, modification of policies, strategies, programmes and projects
- Each stage and dimension of planning process calls for the use of population issues and factors.
- Development /Programme managers ought to use demographic information to guide development
- Population information is useful for making feasibility or preliminary assessment of the situation at any level
- Integration of population in development planning involves consideration of population demographic characteristics in national, regional and local



Distribution of population by age and sex,_____ District - 1996, 2001 and 2011

DRAFT IDP 2016/17 INPUTS ON DEMOGRAPHIC INFORMATION INCOPORATION

VARIABLES	Explain the analysis of the variables, provide page numbers where the variables are incorporated, the sections/chapters	How does municipality and sector plans respond in terms of the programms and budget allocation to address identified population issues
Does the population analysis describe population size, composition, distribution?	population size, composition, distribution - Population size information incorporated in page 96 and with utilization of population pyramid in SDF, it is recommended that the pyramid be provided in the IDP document and SDF equally, this will also assist to provide adequate analysis of the pyramid and to align programme for the population within Msunduzi, to disaggregate data by gender, age cohorts, children, youth, elderly - Composition and distribution s incorporated Population pyramid Msunduzi LM page 36 SDF • The pyramid suggests that the LM has youthful population. It therefore become imperative that programmes for this population group be incorporated in the implementation plan, skills development, education, health, recreation • population aging, elderly cannot be overlooked in the hence the programmes, budget and sector alignment is imperative in this IDP • the 0-4 population is also another population group that the IDP should take into greater consideration, their basic needs requires that the IDP align programmes such as Early Childhood Development programmes, Health,	Sector alignment
Does the population analysis describe population change (fertility, migration and mortality)?	Migration information slightly included in the IDP: in page 96 Fertility Mortality	sector plans should be incorporated in respect of these variables:

Cont…

VARIABLE	Explain the analysis of the variables, provide page numbers where the variables are incorporated, the sections/chapters	How does municipality and sector plans respond in terms of the programms and budget allocation to address identified population issues
How does Population growth influence municipal planning? **Describe population growth per population group**	- How it affects the planning: The increase in demand for services at the receiving LM	
Does the IDP reflects total number of households	Page 96 Explain the number of households including the child headed and female headed households • The total of female-headed households in the LM= 45,2% census 2011 • The IDP indicate in page 99 that there are more child headed households in the LM	
Describe the geotype (dwelling type) and its implication on population/development and service delivery	The geo-type of the municipality demonstrates that local municipalities is more urbanized followed by tribal or rural setting. It can therefore not be overlooked in the IDP the plan to improve the rural setting and while maintaining the urban settlement needs	

VARIABLE	Explain the analysis of the variables, provide page numbers where the variables are incorporated, the sections/chapters	How does municipality and sector plans respond in terms of the programms and budget allocation to address identified population issues
Does the IDP describe Education level by population group, sex, age?	This information is partly incorporated Kindly incorporate it in your IDP situational analysis section	
Does the IDP describe Employment status by sex, sector,	This information is partly incorporated Kindly incorporate it in your IDP situational analysis	
Does the IDP reflects analysis on Health status	This information is partly incorporated Kindly incorporate it in your IDP situational analysis	
Does the IDP reflects analysis on safety, security, and justice issues?	This information is incorporated together with implementation plan in page 307	
Does the population analysis reflect population concerns of the Municipality?	To some extent, population concerns are included and comprehensive analysis this include: ▪ Social ills: teenage pregnancy, crime, substance abuse	

VARIABLE	Explain the analysis of the variables, provide page numbers where the variables are incorporated, the sections/chapters	How does municipality and sector plans respond in terms of the programms and budget allocation to address identified population issues
Does the IDP reflect programes on disabilities, women and youth?	Disability statistics not included and the analysis, however commended for the alignment in implementation plan programmes supporting initiatives for women aged, youth are commended in page 160 - PROGRAMMES FOR WOMEN, the focused programme is 16 days of activism, this is once off event and encouraged to have an ongoing programmes focusing on women. The IDP in page 96 indicates that the LM has more female headed households and therefore programmes for women should be taken greater consideration - Youth = programmes in the implementation plan are commended - Aged= programmes in the implementation plan are commended - No plan for children ?	
Does IDP reflect Gender equity promoted for access to economic opportunity?	Yes, partly this information is included	
Does the municipality mainstream HIV/AIDS into programmes and plans.	Yes, partly this information is included	

RECOMMENDATIONS

- The LM is commended for the effort made to incorporate Demographic information into IDP
- it is important to note that, It is equally important that demographic information be provided to both SDF and IDP document
- To consider the incorporation of the demographic information into implementation plan for interventions and budget alignment
- Commended for the population pyramid with projections and analysis in the SDF
