

DRAFT 2017 - 2022 INTEGRATED DEVELOPMENT PLAN

DEPUTY MAYOR
CLLR T ZUMA

MAYOR CLLR T NJILO

SPEAKER
CLLR JJ NGUBO

VISION

"A safe, vibrant city in which to live, learn, raise a family, work, play and do business"

MISSION

"To ensure that the Municipality functions effectively and in a sustainable manner in order to deliver services of excellence to the community"

FOREWORD BY HIS WORSHIP THE MAYOR, CLLR THEMBA NJILO

For the past four financial years the Msunduzi IDP has been ranked amongst the best in the province of KwaZulu-Natal this illustrates the hard work that is put in by both officials and councilors. Although the year 2015/16 saw the municipality receiving a qualified audit from the Auditor General the new leadership will ensure that management works tirelessly to address all the findings of the Auditor general. The 2017/18 to 2021/22 IDP marks the start of the fourth Generation IDP. This IDP is underpinned by the pillars agreed to nationally and provincially in respect of the following:

MAYOR CLLR THEMBA NJILO

- **CLLR THEMBA NJILO** Basic Service Delivery
 - Local Economic Development
- Municipal Transformation and Institutional Development
- Good Governance
- Financial Viability and Management
- Cross Cutting Interventions

The city development strategy was developed to provide for longer term planning within the city and all its strategies, programmes and projects found expression in the fourth generation IDP. The City development strategy identifies eight (8) city wide key areas which are as follows;

- 1. Building a capable and developmental Municipality
- 2. Back to basic: cleaning, repairing, enforcing and responding
- 3. Improved Infrastructure Efficiency-Planning, budgeting, spending, implementing, maintaining
- 4. Financial Sustainability
- Growing the Regional Economy
- 6. Serving as a provincial capital
- 7. Creating a learning city and city of learning
- 8. Spatial Effectiveness & Justice increasing densities and improving mobility

The 2016 August three elections resulted in the Msunduzi Municipality increasing the number of wards from 37 to 39 wards. The municipality adopted the area of Ncwadi into its durisdiction. This addition is on the south western tip of the Municipality and being a new addition the Municipality hosted an IDP mayoral imbizo on the 12th of November 2016. During the imbizo municipal leadership and officials got to hear and see first hand the situation on the ground. Four more IDP mayoral Izimbizo were conducted during the month of November 2016. At this platform the municipality presented progress with regards to various municipal projects and also presented future projects to be implemented. The community also came out in their numbers to show support and also voice their concerns where they felt there was room for improvement. Community need surveys were also conducted at these izimbizo. The results of these surveys play a critical role when reviewing the IDP and considering the allocation of funds over the Medium Term Revenue and Expenditure Framework (MTREF).

The municipality continues to strengthen its management and governance structures in order to ensure a satisfied and dedicated staff. Municipal Performance awards were held during the month of December 2016 where all staff was present and the high performers were rewarded in order to instill a culture of high performance. The municipality remains committed to aligning its plans to those of National and Provincial government, and approved policy of Back to Basics has been incorporated in this 2017-2022 IDP.

I take keen interest on matters raised by the Honorable MEC for COGTA in respect of the previously submitted IDP. The municipality has finalized and incorporated most of the issues raised. I will also ensure that the Municipality improves on all the matters raised by the Auditor General. The municipality will also solidify its stance of directing government programs and projects in alignment with Municipal plans and living up to the status of being the capital city of the province.

CITY MANAGER
(ACTING)
MR SIZWE HADEBE

FOREWORD BY THE MUNICIPAL MANAGER: 2017/18 TO 2021/22 DRAFT IDP

The Municipality has laid a solid foundation with development of key strategic documents as mentioned by the Mayor. This indeed indicates the strides that have been made by Council's previous leadership and administration in terms of building a capable and capacitated Municipality. The municipality needs to revive the CDS in order to make it a living document. The vision of the Municipality needs to be communicated widely to external stakeholders, the 2030 vision is well articulated in this document and all Municipal Business units have prepared operational plans to realise the vision. The integral link between the CDS and the IDP will be ensuring that the long term plans that are contained in the CDS are translated into the 2017/18 to 2021/22 IDP.

The IDP/ Budget Process Plan that was approved by the Council in August 2016 stipulated dates and key activities that the municipality will undertake. These activities include, amongst others, public participation in the planning process of the Municipality. The public participation process, as mandated by Chapter 4 of the Municipal Systems Act, is an integral part of the IDP review. In this regard, IDP/ Budget izimbizo were held in the five (5) Area Based Management areas of the Municipality, namely the Vulindlela, Edendale, Imbali, Central and Northern areas. As part of this process, community-need surveys were conducted in all these areas. In addition, as part of the stakeholder participation process, stakeholder engagement sessions were held with targeted groups such as businesses, NGOs, CBOs, traditional leadership, ward committee members and government departments. The 2017/2022 IDP has therefore been produced taking into account all input that has been received as a result of the public participation process.

As explained by His worship the Mayor, the City Development Strategy has been developed; which guides the strategies, programmes and projects that are found in the fourth generation 2017-2022 DP. With the above in mind, the Municipality aligns to national and provincial policies. Chapter 2 of this document demonstrates how the Municipality aligns to the various policy initiatives. The IDP follows very closely the prescribed COGTA template and the chapters are set as required by the COGTA IDP guidelines. The Municipality has also ensured that the Back to Basics policy is incorporated into the IDP and also, forms a part of the monthly report by the relevant managers and the leadership.

Having followed a very rigorous programme of consultation, both internally and externally, the 2017/2022 IDP is one which the community, politicians and staff of the Municipality can take ownership of and work together in ensuring that the vision, objectives, strategies and plans are implemented to the best of our ability as we move forward to ensure that indeed the Msunduzi Municipality is the City of Choice – Second to None!

SECTION A-CHAPTER 1: EXECUTIVE SUMMARY

1.1 INTRODUCTION

The Msunduzi Municipality is the second largest in KwaZulu/Natal, and is proudly the Capital of the Province. The confirmation of the capital status of Msunduzi has entrenched its role and position as the administrative and political hub of KwaZulu/Natal. The Municipality is moving in the direction of achieving Metropolitan status, and, as such, new and more strategic approaches to reviewing the Integrated Development Plan (IDP) have been adopted.

The Municipality is located along the N3 corridor which links Durban to Gauteng. The Municipality covers an area of approximately 630 km2 and consists of 39 wards. It is predominantly urban to peri-urban in nature, with areas of rural residential.

This IDP marks the fourth generation IDP which covers the period 2017/2018 to 2021/2022, it incorporates key amendments including the review of the Municipal Vision, Strategic Priority Areas, Goals, Value Statements, and includes longer-term targets for 2030. The reviewed IDP also includes the revised organogram, which is aligned to vision 2030.

1.2 THE MUNICIPALITY AT A GLANCE

The following table summarises key municipal statistics, and is explained briefly below:

Table 1: Municipal Summary of Key Statistics

TOTAL POPULATION	618 536
NUMBER OF HOUSEHOLDS	163 993
AVERAGE HOUSHOLD SIZE	3,6
POPULATION GROWTH RATE (2001 - 2011)	1,12% p.a

Stats SA Census 2011

1.2.1 SPATIAL PLANNING

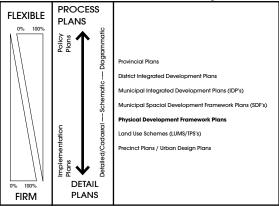

The Msunduzi Municipality has embraced the concept of a Hierarchy of Plans, which is illustrated below. A consolidated Spatial Development Framework (SDF) has been developed in 2015 and adopted by Council. A series of Area Based Management Plans (ABM) were adopted in 2010 for the following areas:

- Vulindlela;
- Greater Edendale and Imbali;
- The Northern Areas; and
- CBD, Ashburton, and the Eastern Areas.

Detailed planning has been undertaken around the CBD and Ashburton during 2014. This process is aimed at consolidating wall to wall schemes.

FIGURE ES.1: Msunduzi Hierarchy of Plans

2015 Msunduzi Spatial Development Framework

As per the SPLUMA, the Municipality has moved towards creating a wall-to-wall scheme by identifying four projects that have been initiated:

- 1. The extension of the PMB TPS to include the Greater Edendale area (as well as a revision of the Plessislaer TPS);
- 2. The extension of the PMB TPS to include the Sobantu area;
- 3. The drafting of a Local Area Plan for the South Eastern District (SED); and
- 4. The drafting of a Local Area Plan for the Central Area and CBD Extension Node, including an Inner City Regeneration Strategy.

Spatial Structuring elements of the Municipality, as contained in the SDF, include:

- Nodes (Concentration of activity);
- Corridors (Main roads/Arterials);
- Settlement Patterns (Formal/Informal/Traditional);
- Restrictive Conditions (Environmental/Topographical/Geo-technical);
- Environment/Open Spaces (Active/Passive);
- Urban Edge; and
- Mixed-Use Developments Aesthetic Environment (Visual Form/Heritage Special Features)

Msunduzi Municipality embarked on a long-term Spatial Development Strategy, which will inform the refinement and review of the Integrated Development Plan and the Spatial Development Framework, thereby assisting the Municipality in achieving its Constitutional mandate and other legislative obligations. Key outcomes of the strategy include:

- A description of the desired 2030 outcomes in terms of vision, goals, and objectives;
- Agreement on the set of indicators that will be applied to measure the progress being made to achieve the desired outcomes;
- Agreement on the targets and the City growth path in respect of each of the indicators;
- Agreement on the strategic interventions required to achieve the set targets;
- A description of the catalytic projects in support of the interventions, where possible; and
- Agreement on the monitoring, evaluation, reporting, and review framework of the plan.

1.2.2 THE ENVIRONMENT

Pietermaritzburg is situated in the basin of the uMsunduzi River and its tributaries. An escarpment rises approximately 400m above the city to the West and North West. Altitude within the Municipality ranges from 495 to 1795 metres above sea level, and the Municipality generally slopes from west to east. The mountains around the city bowl create a distinction between the urban and rural parts of the Municipality. While this has provided opportunities to manage the urban/rural interface, it has limited the city's expansion potential, resulting in the formation of a number of small urban hubs outside the city.

Msunduzi has an extremely rich cultural, architectural, historical, and archaeological resource base, that collectively makes up the heritage resources of the area. A Cultural Heritage Specialist Study identified and mapped a total of 646 heritage resource points, and 32 heritage resource zones, within the Msunduzi Municipal area. These consisted of architectural resources, archaeological resources, as well as historical and cultural resources.

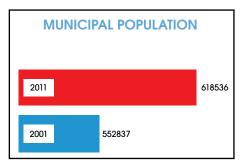

Maintaining a 'green' built environment is important for both the image of the city and the social and environmental health of residents. There is a need to focus on planting programmes in the CBD to replace storm-damaged and old/ dangerous trees with indigenous alternatives that are hardy and drought tolerant.

There is a need to focus strategies on climate change, paying particular attention to mitigation factors as well as looking at adaptation strategies. This will reduce communities' susceptibility to climate change.

1.2.3 POPULATION

The recent Census (2011) indicates that the population for the uMsunduzi municipality has risen from a total of 552 837 people in 2001, to 618 536 people in 2011, which represents an average annual growth rate of 1.12% per annum. The Census also indicates that the number of households has risen from 130 292 in 2001, to 163 993 in 2011, although the average household size has decreased from 4.0 people per household in 2001 to 3.6 in 2011. Wards with the highest populations include wards 13, 16, 17, 18, 28, 30, and 34, each with more than 20,000 people per ward.

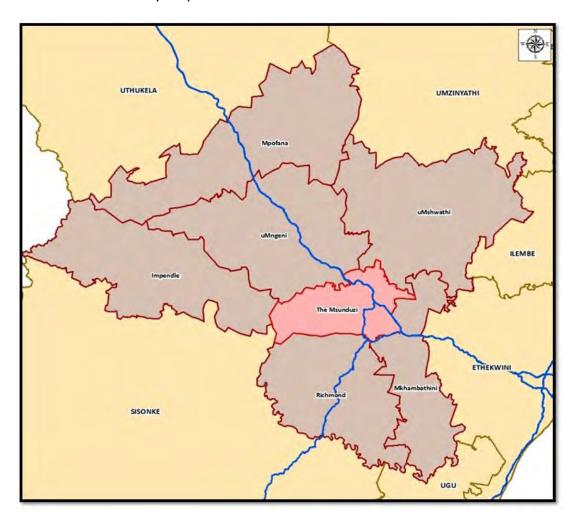

Figure ES2: Municipal Population

Stats SA Census 2011

MAP E.S.1: Locality Map

The Census figures also indicate that there are more females (54.55%) than males (45.45%) in the Municipality, a trend that has strengthened since 2001. The number of women-headed households has also increased since 2001, from 44.5% to 45.2% of all households in 2011.

The Census (2011) also indicates that the majority (68.4%) of the population fall within the economically active age cohorts (15 to 64 years), with 26.6% being under 15 years of age, and 5% being 65 years and older. A further positive trend is that the dependency ratio of people within the 15 to 64 age cohort has decreased from 51.5% to 46.2%, although this figure still remains high.

In terms of education levels, Census (2011) indicates that the percentage of adults over 20 years with no schooling has decreased from 10.9% in 2001, to 5.5% in 2011. The percentage of adults with a matric qualification has also increased from 24.5% in 2001 to 33.7% in 2011. Residents with qualifications higher than a matric have also increased, from 9.2% in 2001 to 13.1% in 2011.

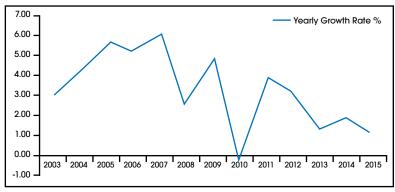

In 2010, the uMgungundlovu District Municipality had the highest prevalence of HIV/Aids in the province, as well as in the country, according to the annual Department of Health anti-natal survey undertaken at state hospitals. This is of concern, and strategies must be developed to address this.

1.2.4 THE ECONOMY

The global economic recession has resulted in a general broad base slowdown in economic activity in the municipal economy, which is similar to the national scenario. However, the city's economy continues to experience positive economic growth, albeit slower than in previous years. The recorded GDP growth rate for 2015 was 1.03% compared to 2.10% in 2014 and 3.95% in 2011 (KZN Treasury GDP Model), as indicated in the graph below.

Figure ES3: GDP

Global insight 2015

In terms of employment and job creation, the labour market in the municipal economy seems still to be fairly robust despite the depressed economic conditions and outlook. Over the period 2000/2001 to 2014/2015, the number of formally employed people increased marginally from around 132 000 to 150 000. Significantly, the levels of unemployment (official definition) have decreased from the 2000/2001 period (around 30%) to around 25% in 2014/15 (latest Global Insight data -Rex 920).

The Municipality possesses a number of economic advantages, including:

- Locational Advantages: the centrality of the Municipality and the fact that the Municipality is bisected by the N3 corridor, which is the primary logistical corridor linking Gauteng with Durban Harbour;
- Natural/ Geographic Advantages: Highly fertile land;
- Human Capital Advantages: Good schools and tertiary institutions; and
- Institutional Advantages: Msunduzi enjoys 'Capital City' status.

1.2.5 INFRASTRUCTURE

Census (2011) indicates that houses receiving piped water inside their dwelling have increased from 38.3% of households in 2001, to 47.9% of households in 2011. The Census further indicates that only 3.9% of households have no access to piped (tap) water, and only a further 3.9% of households are between 200 – 1 000 m from piped (tap) water.

Households with flush toilets connected to sewerage, however, have declined from 52.3% in 2001 to 51.6% (84 675 households) in 2011. Census (2011) further indicates that only 2% (or 3 316) households do not have access to any form of sanitation, and that 34.1% of households have pit latrines (both ventilated and unventilated). Peri-urban and rural communities have the lowest levels of flush toilets and the highest levels of pit latrines. The review of the WSDP (Water Services Development Plan) is essential to address this problem.

Households with electricity for lighting have also increased from 85.8% in 2001 to 91.9% in 2011, which is well above the provincial average of 77.9% of households.

In terms of Census (2011) information, weekly refuse removal has declined from 59.5% in 2001 to 53.2% in 2011, but this could be associated with a growth in the number of households.

The estimated housing backlog for the Municipality, as estimated by the Department of Human Settlement in the Housing Plan, is 6 858 houses.

In terms of indigent support, the following table summarises support residents can qualify for:

Table 2: Indigent Support in the Msunduzi Municipality

CATEGORY	DESCRIPTION
Property Rates	Indigents qualify, like all domestic consumers, for a reduction in the market value of the property as approved from time to time by Council, and as reflected in the applicable tariff register. A rebate of 100% is granted on all residential property from a value of R15 001.00 to R100 000.00. If a property is worth more than R100 000.00 and residents approach Council for relief, a means test is applied.
Electricity	Indigents qualify for 70 kWh free electricity, as determined from time to time by Council and as reflected in the applicable Tariff Register.
Electricity MCB	Indigents qualify for free amperage as determined by Council from time to time and as reflected in the applicable Tariff Register, with a 20 Amp circuit breaker.
Water	Indigents qualify for 7kl of water per month, an amount determined from time to time by Council and as reflected in the applicable Tariff Register.
Refuse	Indigents qualify for free refuse removal as determined by Council from time to time, and as reflected in the applicable Tariff Register.
Sewerage	Indigent households qualify for 4.2 kl of free sewerage discharge as determined by Council from time to time and as reflected in the applicable Tariff Register.

1.4 THE IDP REVIEW PROCESS FOR THE DEVELOPMENT OF THE 2017/22 IDP

1.4.1 MEC ASSESSMENT OUTCOMES

The Msunduzi 2016/17 IDP was assessed by the MEC's panel in 2016. The results of such an assessment placed Msunduzi Municipality amongst the 10 best performing municipalities in the province within the period of assessment.

Table 3: MEC Assessment of the 2016/17 Msunduzi IDP

CATEGORY	MEC COMMENTS	PROGRESS TO DATE
Municipal Trans- formation and Institutional devel- opment	The Municipality must reflect on the implementation of the ICT policy Framework	This has been included in the Draft 2017/18 to 2021/22 IDP
Local Economic Development	Include key interventions areas, indicators , targets and catalytic projects that are linked to the PGDP and DGDP	This has been included in the Draft 2017/18 to 2021/22 IDP
	Reflect on institutional arrangements that are in place in terms of LED	This has been included in the Draft 2017/18 to 2021/22 IDP
	Address LED Capacity gaps in response to Vision 2030	This is currently being addressed by with the Sustainable business unit
	M&E mechanism for the implementation of the LED	This has been addressed through the SDBIP and shall be reflected in the Draft 2017/18 to 2021/22 IDP
Basic Service De- livery	Indicate status of the Water and sanitation maintenance plan.	This has been included in the Draft 2017/18 to 2021/22 IDP
	References to the relevant Mapping so that the reader is aware of these maps	This has been included in the Draft 2017/18 to 2021/22 IDP
	Include the Eskom constraints map	This has been included in the Draft 2017/18 to 2021/22 IDP
Financial Viability and Management	Limited information on the debtors whether they are increasing or not	This has been included in the Draft 2017/18 to 2021/22 IDP
	The level of skills transfer from service providers to staff not clear	
Good Governance and Public Partici-	Report on the membership of the various Bid Committees	This has been included in the Draft 2017/18 to 2021/22 IDP
pation	Comprehensive list of the adopted bylaws in the Next IDP	This has been included in the Draft 2017/18 to 2021/22 IDP

1.4.2 THE PROCESS PLAN

The Msunduzi Municipality prepared and adopted a Process Plan in terms of Section 28 (1) of the Municipal Systems Act (2000) which aligns the IDP, Performance Management System (PMS), and the budget preparation process. The process plan ensures alignment between the preparation processes for the budget, the IDP, and the Performance Management System (PMS). One of the main achievements of this reviewed IDP document is the greater alignment between the budget, the IDP, and the PMS.

1.4.3 PUBLIC PARTICIPATION

Various forms of public engagements have been held in this financial year to ensure public involvement in the development of the IDP. This process has further been bolstered by the District Municipality as well as the NGOs and private sector, notably the built environment support group that facilitated area based plans around the different wards. In terms of the Municipal Systems Act the plan is further advertised for public comment before the final submission in June this year.

1.4.4 SERVICE PROVIDER CONSULTATION

The Municipality has engagements with Sector Departments during the IDP Review, these meetings are planned to continue until the completion of the fourth generation IDP in June just before the submission of the IDP to the MEC for COGTA. Three IDP Representatives Forum have been held by the Msunduzi Local Municipality.

1.5 THE IDP STRATEGIC APPROACH

This review of the IDP sees a fundamental shift from the previous information-laden and cumbersomely formatted IDPs, to a more user-friendly and strategic document. The approach utilised is similar to that which has been used in developing the KwaZulu-Natal PGDS and PGDP, which is very strategic in nature. Detailed information is, however, available to users of this IDP, and key documents have been included as a series of accompanying Annexures.

The IDP strategies have been aligned to the following National, Provincial, and District Level initiatives:

- (i) SUSTAINABLE DEVELOPMENT GOALS
- (ii) NATIONAL DEVELOPMENT PLAN (VISION 2030)
- (iii) GOVERNMENT OUTCOMES
- (iv) NATIONAL PRIORITIES (STATE OF THE NATION ADDRESS 2017)
- (v) BACK TO BASICS
- (vi) PROVINCIAL PRIORITIES (STATE OF THE PROVINCE ADDRESS 2017)
- (vii) PROVINCIAL GROWTH AND DEVELOPMENT STRATEGY
- (viii) PROVINCIAL GROWTH AND DEVELOPMENT PLAN
- (ix) DISTRICT GROWTH AND DEVELOPMENT PLAN

1.5.1 IDP KEY ISSUES

The following highlights the main KPAs:

- Basic Service Delivery
- Local Economic Development (Social Development Are To Be Included Here As A Sub-Heading As Per Cogta Guidelines)
- Municipal Transformation And Institutional Development
- Good Governance
- Financial Viability And Management
- Cross Cutting Interventions (Including Spatial And Environment As Per Cogta Guidelines)

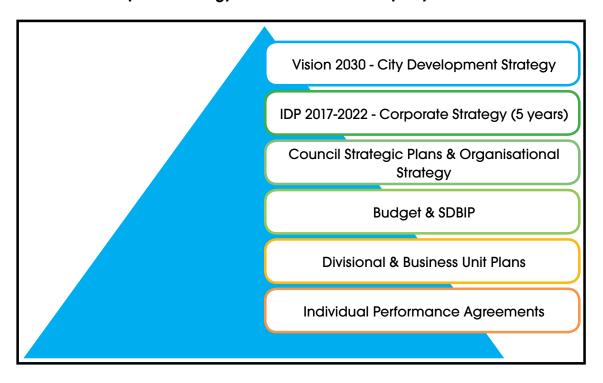

1.6 DEVELOPING A STRATEGY TOWARDS DEVELOPMENT

1.6.1 INTRODUCTION

The following diagram provides a summary of how the different plans in the Municipality align and inform each other. The over-arching and direction-giving document that informs all operations and expenditure by the Municipality is the City Development Strategy Vision 2030. This is briefly summarised below.

FIGURE ES.5: Corporate Strategy for the Msunduzi Municipality

1.6.2 VISION 2030: CITY DEVELOPMENT STRATEGY

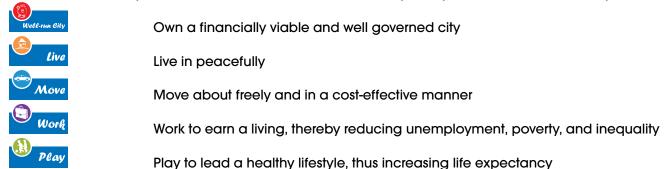

VISION

"A safe, vibrant city in which to live, learn, raise a family, work, play and do business".

MISSION

"To ensure that the Municipality functions effectively and in a sustainable manner in order to deliver services of excellence to the community".

The Vision of the City of Choice, Second to None, is to develop a city where the entire citizenry can:

The Msunduzi Municipality shall deliver on six strategic city-wide outcomes to achieve this vision as follows:

To ensure that the Municipality functions effectively and in a sustainable manner in order to deliver services of excellence to the community

- A well-serviced city;
- An accessible, connected city;
- A clean, green city;
- A friendly, safe city; and
- An economically prosperous city.
- A financially viable and well-governed city.

In order to realise the Vision, the Municipality has prioritised thirteen objectives, clustered under each of these six broadly defined outcomes.

Table 4: Summary of Strategic Priority Areas

STRATEGIC PRIORITY	1: WELL SERVICED CITY	
GOAL	VALUE STATEMENT	TARGET
By 2030, Msunduzi is a city serviced with quality water and sanitation reticulation, uninterrupted, adequate energy supply, and regular waste removal - for ALL neighbourhoods, communities, and centres of business.	1.1 City-wide infrastructure and service delivery provides a reliable, high quality supply of water, sanitation, energy, and waste services - to all.	1.1.1 100% of all households have a municipal water connection to the yard level. 1.1.2 70% of all households have water-borne sanitation. 1.1.3 30% of all households have the basic minimum of Ventilated Improved Pit-latrines VIPs. 1.1.4 To Reduce Non-Revenue Water and Real Water Losses to 20% and 15% respectively. 1.1.5 To reduce the amount of water service interruptions from 1684 per annum (2011/2012) by 80% to 336 bursts per annum and respond to 100% of service interruptions within 8 hours. 1.1.6 To reduce sanitation service interruptions from 2499(2011-2012) per annum by 80% to 500 per annum and respond to 100% of sanitation blockages within 8 hours.
	1.2 City-wide energy infrastructure and service delivery provides a reliable, high quality supply of energy. Energy supply meets the anticipated increased demand for electricity specifically, including peak periods.	 1.2. Disruption to energy supply is minimised to 6 hours in 100% of incidents. 1.2.2 Electricity supply keeps pace with expected growth of 4% per annum. 1.2.3 100% of households have basic electricity supply.
		1.3.1 100% of municipal households are fitted with solar water heating geysers.
	1.4 Use of renewable sources of energy is widespread. 1.5 Energy production, capacity, storage, management, and distribution rapidly adapts to changing patterns of demand.	1.4.1 100% of street lights and 100% of traffic signals in the CBD are powered by renewable energy. 1.5.1 Demand management provides a 10% reduction in peak demand.
	1.6 City-wide infrastructure and service delivery provides reduced electricity losses.	1.6 Reduces electricity losses to below 5% of bulk supply purchases.
	1.7 Municipal-wide waste collection and disposal services to domestic households are available to all Msunduzi residents.	1.7.1 100% of households are rendered a waste collection and disposal service once a week.

STRATEGIC PRIORITY	1: WELL SERVICED CITY	
GOAL	VALUE STATEMENT	TARGET
By 2030, Msunduzi is a city serviced with quality water and sanitation reticulation, uninterrupted,	1.8 Appropriate waste collection and disposal services are provided to support business and industry. Commercial activity derives production inputs from recovered waste material.	1.8.1 100% of businesses are rendered a waste collection and disposal service at least twice a week.
adequate energy supply, and regular waste removal - for ALL neighbourhoods,	1.9 Implementation of Advanced Waste Management Systems that reflect community values around waste minimisation.	1.9.1 50% recovery rate of recyclable materials through source separation at households and public sector offices, and treatment of organic waste.
communities, and centres of business.	1.10 Implementation of annual infrastructure upgrade of the waste disposal site.	1.10.1 Construct waste containment berms, access roads, rehabilitation of perimeter roads, fencing of perimeter of site, construct wet-weather facility, install stone drainage layers on site, clay-cap side slopes of berms.
	1.11 Recovery, re-use and recycling of waste is maximised. The volume of waste disposed to landfill is minimised. Life spans of landfill sites are extended.	1.11.1 25% of household and business waste is sorted on-site.
STRATEGIC PRIORITY	2: AN ACCESSIBLE AND CONNECTED	CITY
GOAL	VALUE STATEMENT	TARGET
By 2030, Msunduzi is a city with sufficient and well-maintained road, rail, and other physical infrastructure serving all residents, whether they use public or private transport modes. It has layers of diverse transport networks interconnecting at centres and internal urban hubs. Human settlement initiatives reduce housing backlogs and eliminate spatial separation by racial categories. Telecommunications and information technology is universally accessible and reliable. Social infrastructure, focussed on educational, health and recreational facilities meets all communities' needs.	2.1 A diversity of private (cars, bikes, walking) and public (trains, buses, taxis) transport options, using a range of adequate physical infrastructure (roads, rail, and bikeways/walkways) is readily available to all residents.	2.1.1 Road and rail infrastructure backlogs are reduced such that 90% of communities have access to road and rail services. 2.1.2 100% compliant with Roads infrastructure management plan. 2.1.3 90% of Msunduzi residents can get to work within 45 minutes. 2.1.4 Reliable Public transport services are available 24 hours per day, with accessibility every 15 minutes to key activity nodes. 2.1.5 90% of travel in morning peak periods comprise walking, cycling or energy efficient public transport.

STRATEGIC PRIORITY 2: AN ACCESSIBLE AND CONNECTED CITY **TARGET**

GOAL By 2030, Msunduzi is a city with sufficient and well-maintained road, rail, and other physical infrastructure serving all residents, whether they use public or private transport modes. It has lavers of diverse transport networks interconnecting at centres and internal urban hubs. **Human settlement** initiatives reduce housing backlogs and eliminate spatial separation by racial categories. **Telecommunications** and information technology is and reliable. Social infrastructure. focussed on educational, health and recreational

facilities meets all

communities' needs.

VALUE STATEMENT

2.2 Housing backlogs are significantly reduced, with human settlement patterns reflecting inclusive demographics.

2.3 People connect virtually through high-speed information and communication technology. universally accessible Reliable telecommunications networks provide access to learning and information opportunities in homes, schools, and workplaces. Business and industry embrace high-speed broadband networks to become more productive and innovative. Energy efficiency is promoted by telecommuting.

2.4 Social infrastructure supports healthy lifestyles, learning opportunities, and community unity and social cohesion. Health infrastructure is readily available and meets community needs. Major recreational infrastructure (e.g. sports stadia, cultural facilities, etc.) contribute to the city's economy by allowing for world-class events and tourism. Social infrastructure is delivered with regard to minimising impacts on the environment.

2.2.1 100% eradication of informal settlements. 2.2.2 Rural Residential housing infrastructure backlogs are reduced such that less than 10% of households remain without access to formal

housing.

usage by 20%.

2.2.3 Zero tolerance for exclusions based on racial, ethnic, religious or other demographic characteristics, is reflected in 100% of new settlement patterns.

2.2.4 20% of each new mixed-use development consists of rental stock.

2.2.5 30% densification of urban space.

2.2.6 Council Rental Stock maintained on a regular and consistent basis to eliminate unsafe structures and to prevent deterioration of Council's assets.

2.2.7 Old Rental Stock to be reduced by transferring certain units to qualifying tenants.

2.2.8 Allocations of new houses in subsidised housing projects to be 100% compliant with DOHS policies by installation of Housing Needs Register and capture of names.

2.3.1 90% of households have access to telecommunications and high-speed broadband more cheaply and cost effectively.

2.3.2 100% of indigent households have free access to telecommunications and high-speed broadband.

2.3.3 100% of businesses, government departments, and schools have easy access to business-grade and bi-directional high-speed broadband. 2.3.4 Telecommuting reduces conventional energy

2.4.1 90% of communities have adequate social infrastructure within a 30 minute walk or ride. 2.4.2 100% of business centres are supported with appropriate community recreational and meeting facilities including health and educational facilities. 2.4.3 100% of social infrastructure delivery complies with national standards regarding minimal environmental impact.

our increasing population.

STRATEGIC PRIORITY 3: A CLEAN, GREEN CITY **VALUE STATEMENT GOAL TARGET** By 2030, Msunduzi is 3.1 Msunduzi has widespread use 3.1.1 30% of Msunduzi's electricity demand is met a city protecting our for renewable energy supplies, by renewable sources. natural environment, including but not limited to: solar, 3.1.2 20% of liquid energy is derived from bio-fuel. our native plants wind, and hydro power. The city 3.1.3 50% of new commercial or industrial development incorporates some form of renewable and animal habitats, continually increases investment limiting pollution, in delivering more sustainable energy technology usage in its design and greening the city, energy technologies. Businesses construction. and using our use energy efficiently prioritising 3.1.4 80% of new human settlement development low carbon emission sources. natural resources, incorporates some form of renewable energy Alternative energy sources are technology usage in its design and construction. such as water, mainstreamed in new human 3.1.5 100% of building plans approved have due wisely. The clean, green city harnesses settlement development for consideration for energy efficiency. all communities and energy our renewable efficiency required in building energy supply, public open space plans. 3.2 Communities benefit from a 3.2.1 100% of residents are within a 15 minute creation project, and urban renewal linked public open space network, walking distance to facilities within the city's public, and greening providing for a range of sporting, open, and green space network. cultural, and recreational uses. programme to these ends. 3.3 Urban renewal and greening 3.3.1 100% residential, commercial, and industrial is recognised by communities precincts incorporate green spaces. Msunduzi conserves and the business fraternity as 3.3.2 100% of roads in former black townships and its natural assets contributing to environmental and major arterial roads in rural areas are tarred. while still meeting the ecological sustainability, as well 3.3.3 100% compliance with trading bylaws within demand for more as supporting future residential, the CBD. housing, more roads commercial, and industrial 3.3.4 100% compliance with environmental bylaws and more services within the city environs. development. to accommodate

5.2.4 Reduce the percentage of economically

inactive youth to 5%.

STRATEGIC PRIORITY	4: A FRIENDLY, SAFE CITY	
GOAL	VALUE STATEMENT	TARGET
By 2030, Msunduzi is a city with strong, welcoming, caring, and diverse communities, living in a variety of friendly, safe neighbourhoods.	4.1 The separate development of the past will be forgotten, as the city proactively promotes and practically engineers social cohesion across all its objectives, geographic spread, racial groupings, class identities, religious formations, and political affiliations.	 4.1.1 Civic engagement increases so that 100% of residents, regardless of racial, class, religious, or political categories, can enjoy an active role in decisions that affect their city. 4.1.2 To ensure the effective management of land uses within the Msunduzi Municipality.
	4.2 People will enjoy working together and helping each other in local neighbourhoods and in the broader community. Msunduzi's friendly outdoor life is enlivened by an interesting range of local and regional celebrations.	
	4.3 Civil society organisations and community participation are critical elements of Msunduzi's safety and security strategies. Community policing forums are active in community safety centres established across the city.	 4.3.1 80% of community police forums are accessible and accommodated in safety centres within a 30 minute walk or ride for all residents. 4.3.2 The entire Msunduzi Municipal area is monitored through CCTV camera system. 4.3.3 100% of the city-wide area is monitored by law enforcement officials (traffic wardens, traffic officers, security officers, city police, peace officers, and inspectors).
STRATEGIC PRIORITY	5: AN ECONOMICALLY PROSPEROUS	
GOAL	VALUE STATEMENT	TARGET
By 2030, Msunduzi is a city with a flourishing business environment, with people exercising their	5.1 The city absorbs young people into a job creation social compact between the council, private businesses, and the non-profit sector – with the support of institutions of learning.	5.1.1 Unemployment in the city is reduced to 15%.
entrepreneurship across the full spectrum of commercial, public, scientific, educational, and charitable enterprises.	5.2 By 2030, Msunduzi will have a strong, diversified, and resilient economy, using its competitive advantages to deliver prosperity, high employment, and quality jobs for all the city's residents.	5.2.1 The Municipality has competitive business incentive packages to attract new businesses and drive expansion. 5.2.2 The Municipality attracts annual investment in excess of R 1 billion per annum, reducing unemployment by 5% per annum. 5.2.3 Municipality has 100% of skills required for the local economy.

STRATEGIC PRIORITY	5: A FINANCIALLY VIABLE AND WELL-	GOVERNED CITY

	Filling of strategic critical vacant posts.	A Financially Viable and Well-Governed City
 Local Economic Development 	Economic growth leading to the creation of decent jobs.	5. An Economically Prosperous City

1.6.3 SPATIAL AND GEOGRAPHIC CONSIDERATIONS

The Msunduzi Municipality is developing a suite of plans to address Spatial Planning. A SDF was prepared in 2015 and a number of Area Based Management (ABM) areas identified. The Municipality embarked upon the preparation of two ABM plans during the 2013/14 financial year. The Municipality will do the remainder in future. The Municipality has adopted a Long Term Plan, which will provide the municipality with a long term spatial vision and framework. Progress is also being made with the roll-out of wall-to-wall schemes in terms of the Spatial Planning and Land Use Management Act (SPLUMA)

1.6.4 SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN (SDBIP)

The SDBIP has been operational for several years. Previously through its implementation, the Auditor General noted the following concerns:

- The alignment between budget, the IDP, and the SDBIP has been problematic;
- Key performance indicators are not Specific, Measurable, Attainable, Realistic, and Time-based (SMART);
- The reported actual performance does not always match the targets set; and
- Inadequate evidence submitted by officials to justify reported performance.

Taking cognisance of the above, the Office of the Municipal Manager has embarked upon a project to ensure that the content of the SDBIP is 'SMART', and that better alignment exists between the IDP, Budget, and SDBIP. Major strides have been made towards improvement in this regard in 2014. With the approval of the Performance Management System (PMS) and the Individual Performance Management System (IPMS) policies, Council has embarked upon the process of cascading performance agreements from the Municipal Manager to the Process Manager level. With the signing of the performance agreement, it becomes mandatory to keep a Portfolio of Evidence, so as to enhance performance reporting at all levels.

1.6.5 MONITORING OF THE IDP THROUGH THE PERFORMANCE MANAGEMENT SYSTEM (PMS)

The Msunduzi Municipality has an approved Organizational Performance Management System (OPMS) Framework and Individual Performance Management System (IPMS) policy, which serve as the guideline documents for the implementation of the Performance Management System (PMS) within the Municipality. The implementation of performance management is guided by various legislative prescripts and requirements. The OPMS Framework is inclusive of the following interrelated processes:

- (i) Planning;
- (ii) Implementation;
- (iii) Monitoring;
- (iv) Evaluation.

The Msunduzi Municipality's PMS is the primary mechanism to monitor, review, and improve the implementation of its IDP and to gauge the progress made in achieving the objectives set out in the IDP. In addition, the Municipality's PMS facilitates increased accountability, learning, improvement, as well as providing early warning signals to facilitate decision-making.

The PMS monitors actual performance against set targets and contractual obligations. Effective service delivery relies upon the IDP, efficient utilization of all resources and the PMS being closely integrated across all functions at an organizational and individual level. The most valuable reason for measuring performance is that what gets measured gets done.

Once performance planning and the IDP have been completed and departmental SDBIP's are in place, they need to be implemented by executing the work in accordance with these plans. As the work is executed, it needs to be continuously monitored and periodically measured and reported on. Reporting requires that the Municipality takes the priorities of the organization, its performance objectives, indicators, targets, measurements, and analysis, and present this information in a simple and accessible format, relevant and useful to the specific target group, whilst meeting the legal prescripts for reporting.

29

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

1.7 IMPLEMENTATION OF THE IDP

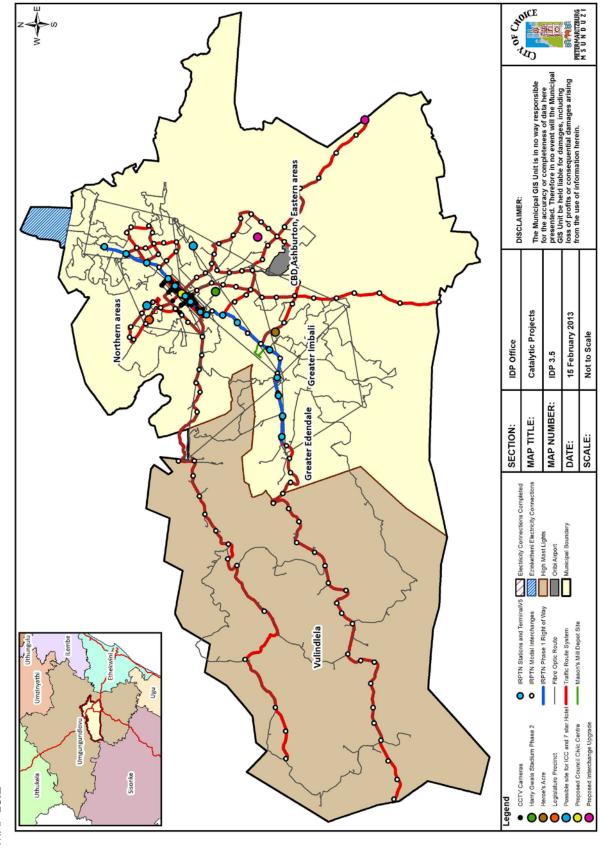

1.7.1 CATALYTIC PROJECTS

A catalyst is described as something that 'precipitates an event' or something that causes change. The Municipality has identified a number of projects that seek to stimulate change and development in the municipal area. The following catalytic projects are aimed at revitalising the economy and the growth trajectory of the Msunduzi Municipality. It must, however, be noted that some of these projects are being implemented by delivery agents other than the Municipality. In this regards, the Municipality will be playing a facilitation and enabling role.

Table 6: Msunduzi Catalytic Projects

PROJECT	DESCRIPTION	EST. BUDGET
Legislative Precinct	This is a medium to long-term initiative which will see the development	R2 Billion
Development	of a new legislative precinct that will better cater for the needs of the	
	legislature and facilitate good governance.	
Pietermaritzburg	This is a short-term project that will see the extension of the existing	R0.5 Billion
Airport Upgrade	runway, together with the terminal buildings. This will allow for larger	
	aeroplanes to make use of the airport, thereby attracting additional	
	operators and increasing the amount of feet through the airport.	
Harry Gwala	This is a medium to long-term project which will see the development	R0.5 Billion
Stadium Upgrade	of further stands at the stadium. Associated with this project, in the	
Phase 2	short to medium term, is the further development and upgrading of the	
	Alexander Park Sports Precinct with additional parking.	
International	This is a medium to long-term project that will see the development of	Private
Convention Centre	an international calibre conference centre- which will allow the city to	Investment
and 5 star Hotel	host international-standard conferences. In the short to medium-term, a	
	5 star hotel associated with this will be developed.	
Council Civic Centre	This is a medium-term project and will see the further development of	R1.2 Billion
	the Council Civic Centre to cater for additional needs and demands.	
Integrated Rapid	This project is a short to medium-term project which will see the roll-out	R3.2 Billion
Public Transport	of reliable and efficient public transport between key points in the city,	
System	thereby reducing resident's commuting times.	
Fibre Optic Cable	This is a short to medium-term project that will see the development of	R0.5 Billion
Network	a leading-edge technology fibre optic telecommunications network	
	leading to increased connectivity and usage, decreased costs, and	
	stimulating growth and development.	
Electrical	This is a short to medium-term project that will see the rehabilitation and	R0.9 Billion
Infrastructure	upgrading of the Municipality's electrical infrastructure.	
Upgrade		
City- wide CCTV	Camera surveillance of areas within the Msunduzi Municipality so as to	R0.5 Billion
System	encourage a crime-free environment.	
Hero's Acre	This project was mentioned by the KZN Premier in the 2013 State of the	R1 Billion
	Province address, and will be a museum commemorating the Heroes	
	of the Struggle. It will include a wall commemorating the "Seven Days	
	War" on the site where the remains of Moses Mabhida and Jonny	
	Makhathini are buried. The proposed development will cover a	
	developed area of at least 102,000 m ² .	
Freeway Node	This is a medium-term project that involves the upgrade of key freeway	R1 Bill
Development	interchanges within the Municipality so as to ensure more efficient	
	movement of traffic, as well as unlocking strategically located adjacent	
	land for the development of commercial, residential, and associated	
	activities.	
Non-Revenue Water	This is a medium to long-term project that will simultaneously increase	R0.5 Bill
Reduction Project	revenue and reduce water losses. The reduction of water losses will	
	ultimately reduce the demand on our source (dams), which will have a	
	catalytic benefit to the catchment.

1.8 KEY MUNICIPAL REPORTS

1.8.1 LONG-TERM FINANCIAL PLAN

The following diagram summarises the Long-Term Financial Plan for the Municipality. As can be seen, the Msunduzi Municipality is in the period of financial stabilisation and moving towards recovery.

FIGURE ES.6: Summary of the Long-term Financial Plan

1.8.2 ANNUAL REPORT

Every municipality and municipal entity must prepare an annual report for each financial year, in accordance with the Municipal Finance Management Act (MFMA). The purpose of the annual report is:

- To provide a record of the activities of the municipality or entity;
- To provide a report on performance in service delivery and budget implementation; and
- To promote accountability to the local community.

In the past, annual reports have often been used solely to promote the positive image of municipalities, with little focus on comparing actual with promised performance. The MFMA now requires the Municipality to report on all aspects of performance, providing a true, honest, and accurate account of the goals set by Council and the success or otherwise in achieving these goals. The annual report is a key performance report to the community and other stakeholders, and, once approved by the Council, must be placed on the municipal website, with copies sent to various authorities and made available to the wider community. The Msunduzi Municipality has prepared an Annual Report which complies with the MFMA requirements.

1.8.3 AUDITOR GENERAL'S REPORT

The Auditor-General performed an audit and issued a report on the following:

- fair presentation and absence of material misstatements in the financial statements (i.e. all transactions or event have been dealt with in accordance with accounting and financial reporting disciplines);
- reliable, usefulness and credible performance information for purposes of reporting on predetermined performance objectives; and
- compliance with key legislation governing financial and performance matters

The Auditor-General has expressed an qualified opinion on the Annual Financial Statement for year ending 30 June 2016 and Performance Information with no findings ("clean audit").

The previous audit opinion in 2013/14 financial year was an unqualified opinion and raised additional matters on:-

- material misstatements on non-current assets, current assets, liabilities and disclosure items identified by auditors which were subsequently corrected by the municipality;
- expenditure management in that reasonable steps were not taken to prevent unauthorized, irregular and fruitless and wasteful expenditure, as required by \$62 of the MFMA;
- Procurement management in that sufficient appropriate evidence could not be obtained that goods and services of a transaction value of R200 000 were procured by means of inviting competitive bids, as required by the SMC Regulation 19(a); and
- Revenue management in that an effective system of internal control for debtors and service charges revenue,
 with respect to unread meters, was not in place, as required by \$64(2)(f) of the MFMA..

The municipality worked tirelessly on the above matters which were the basis of the additional matters. Action plan that was prepared and monitored on monthly basis by the structures of Council to deal with the four additional matters paid the dividends. It must however, be mentioned that there are still weaknesses as highlighted in the management report issued by Auditor-General which are being worked on tirelessly in order to maintain an unqualified audit opinion with no findings ("clean audit").

GENERAL RESPONSE

The Auditor-General has drawn the attention of the reader to following emphasis of matters relating to the Material Losses and Impairment as disclosed on the Consolidated Annual Financial Statements:-

- Debtors impairment of R973,29 million;
- Material under-spending of R108,26 million; and
- Material water distribution losses of R117,86 million and Electricity distribution losses of R179,28 million.

Further strategies are being developed and implemented to deal with the matters raised above in order to improve the system of internal control. Management Action plan dealing with other important matters raised was developed and monitored on a monthly basis.

Outcome	Qualified	Unqualified	Unqualified	Clean Audit

SECTION B-CHAPTER 2: PLANNING AND DEVELOPMENT PRINCIPLES & GOVERNMENT POLICIES AND IMPERATIVES

2.1 INTRODUCTION

This section identifies key Planning and Development Principles that guide the IDP and planning decision-making in the Municipality. Also included in this section is a summary of the applicable government priorities and policies guiding organs of state and the Msunduzi Municipality.

2.2 PLANNING AND DEVELOPMENT PRINCIPLES FOR THE MSUNDUZI IDP

The following principles underpin the Msunduzi IDP:

- Compact urban form is desirable (DFA Principle);
- The discouragement of urban sprawl by encouraging settlement at existing and proposed nodes and settlement corridors, whilst also promoting densification. Future settlement and economic development opportunities should be channelled into activity corridors and nodes that are adjacent to or that link the main growth centre (DFA principle);
- The direction of new development towards logical infill areas (DFA Principle);
- Development/investment should be focussed on localities of economic growth and/or economic potential (NSDP);
- Planning and subsequent development must strive to provide the highest level of accessibility to resources, services, and opportunities (KZN PGDS);
- Basic services (water, sanitation, access, and energy) must be provided to all households (NSDP);
- Balance between urban and rural land development in support of each other (DFA Principle);
- Prime and unique agricultural land, the environment, and other protected lands must be protected and land must be safely utilised (SPLUMA);
- If there is a need for low- income housing, it must be provided in close proximity to areas of opportunity (Breaking New Ground- Department of Human Settlement);
- The principle of self-sufficiency must be promoted. Development must be located in a way that reduces the need to travel, especially by car, and enables people, as far as possible, to meet their needs locally. Furthermore, this principle is underpinned by an assessment of each area's unique competencies towards its own self- reliance and need to consider the environment, human skills, infrastructure, and capital available to a specific area, and how it could contribute to increase its self-sufficiency (KZN PGDS).

2.3 POLICY FRAMEWORK

2.3.1 THE MUNICIPAL SYSTEMS ACT (32 of 2000)

The Municipal Systems Act (MSA) is the key piece of legislation guiding the preparation of IDPs. Section 26 of the act compels all municipalities to prepare IDPs as their primary and overriding management tool. Section 26 also lists key components that an IDP must reflect, which are summarised as follows:

- The Council's Vision for the long-term development of the Municipality;
- An assessment of the existing level of development within the Municipality, including the identification of communities without access to basic municipal services;
- Council's development priorities and objectives, inclusive of its local economic development aims ,as well as the internal transformation needs:
- Council's development strategies, which must be aligned with any national or provincial plans and planning requirements binding on the Municipality in terms of legislation;
- A municipal Spatial Development Framework (SDF), which must include the provision of basic guidelines for the Land Use Management System (LUMS) of the Municipality; and
- Key Performance Indicators and targets determined through an organisational performance system, based on the priorities identified in the IDP.

This IDP Review document has been prepared in accordance with the requirements of the MSA as well as with the Municipal Planning and Performance Management Regulations (R796 of 2001).

2.3.2 THE SUSTAINABLE DEVELOPMENT GOALS

At the United Nations Sustainable Development Summit on 25th September 2015, world leaders adopted the 2030 Agenda for Sustainable Development, which includes a set of 17 Sustainable Development Goals (SDGs) to end poverty, fight inequality and injustice, and tackle climate change by 2030. The Sustainable Development Goals therefore, build on the Millennium Development Goals (MDGs); eight anti-poverty targets that the world committed to achieving by 2015.

The MDGs, adopted in 2000, aimed at an array of issues that included slashing poverty, hunger, disease, gender inequality, and access to water and sanitation. Enormous progress has been made on the MDGs, showing the value of a unifying agenda underpinned by goals and targets. Despite this success, the indignity of poverty has not been ended for all.

The new SDGs, and the broader sustainability agenda, go much further than the MDGs, addressing the root causes of poverty and the universal need for development that works for all people. The Sustainable Development Goals are summarised as follows:

- Goal I. End poverty in all its forms everywhere.
- Goal 2. End hunger, achieve food security and improved nutrition and promote sustainable agriculture.
- Goal 3. Ensure healthy lives and promote well-being for all at all ages.
- Goal 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.
- Goal 5 Achieve gender equality and empower all women and girls.
- Goal 6. Ensure availability and sustainable management of water and sanitation for all.
- Goal 7. Ensure access to affordable, reliable, sustainable and modern energy for all.
- Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.
- Goal 9. Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.
- Goal 10. Reduce inequality within and among countries.
- Goal 11. Make cities and human settlements inclusive, safe, resilient and sustainable.
- Goal 12. Ensure sustainable consumption and production patterns.
- Goal 13. Take urgent action to combat climate change and its impacts.
- Goal 14. Conserve and sustainably use the oceans, seas and marine resources for sustainable development.
- Goal 15. Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.
- Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.
- Goal 17. Strengthen the means of implementation and revitalize the global partnership for sustainable development.

The Sustainable Development Goals will therefore complete the aims of the Millennium Development Goals, and ensure that no one is left behind.

2.3.3 THE NATIONAL DEVELOPMENT PLAN (VISION 2030)

The National Development Plan (NDP) was prepared by the National Planning Commission (NPC), a structure that was appointed by President Jacob Zuma in May 2010. The NDP aims to eliminate poverty and reduce inequality by 2030. It indicates that South Africa can realise these goals by drawing on the energies of its people, growing an inclusive economy, building capabilities, enhancing the capacity of the state, and promoting leadership and partnerships throughout society. In the NPC's Diagnostic Report (2011), the NPC identified 9 primary challenges facing the country (which are also prevalent in the Msunduzi Municipality), namely:

- Too few people work;
- The quality of school education for black people is poor;
- Infrastructure is poorly located, inadequate, and under-maintained;
- Spatial divides hobble inclusive development;
- The economy is unsustainably resource intensive;
- The public health system cannot meet demand or sustain quality;
- Public services are uneven and often of poor quality;
- Corruption levels are high; and
- South Africa remains a divided society.

In addressing these concerns, the NDP sets out six interlinked priorities, namely:

- Uniting all South Africans around a common programme to achieve prosperity and equity;
- Promoting active citizenry to strengthen development, democracy, and accountability;
- Bringing about faster economic growth, higher investment, and greater labour absorption;
- Focussing on key capabilities of people and the state;
- Building a capable and developmental state; and
- Encouraging strong leadership throughout society to work together to solve problems.

The NDP is a plan for all South Africans, which provides a framework to guide key choices and actions of both civil society and the state. Amongst other things, the NDP depends on municipal IDPs to unpack and operationalize these priorities, something which this IDP strives to do through its objectives and strategies. The figure below summarises the approach to change outlined in the NDP.

FIGURE 1: Approach to Change outlined in the National Development Plan

National Development Plan: Vision 2030

Within the IDP, cognisance has been taken of the key action areas identified in the plan, with particular focus on the areas on the following page:

50

Table 9: National Development Plan Objectives and Actions with relevance to Msunduzi

OBJECTIVE	ACTIONS
Economy and	Reducing the costs of living for poor households and costs of doing business through micro
Employment	economic reforms;
	 Develop proposals for an acceptable minimum standard of living and proposals on how to achieve this over time.
	 Remove the most pressing constraints on growth, investment, and job creation, including energy generation and distribution, urban planning, etc.
	 Broaden the extended public works programme to cover over 2 million full-time equivalent jobs by 2020.
Economic Infrastructure	 Ring- fence the electricity distribution businesses of the 12 largest municipalities (which account for 80% of supply), resolve maintenance and refurbishment backlogs, and develop a financing plan, alongside investment in human capital.
	 Revise national electrification plan and ensure 90% grid access by 2030 (with balance met through off-grid technologies).
	 A comprehensive management strategy, including an investment programme for water resource development, bulk water supply, and waste water management for major centres by 2012, with reviews every five years.
	 Create regional water and wastewater utilities, and expand mandates of existing water boards (between 2012 and 2017).
	 Consolidate and selectively expand transport and logistical infrastructure, with one key focus area being improved public transport infrastructure and systems including the renewal of the commuter rail fleet, supported by enhanced links with road-based services.
	 Establish a national, regional and municipal fibre optic network to provide the backbone for
	broadband access; driven by private investment, complemented by public funds required to meet social objectives.
Environmental Sustainability	 Put in place a regulatory framework for land use, to ensure the conservation and restoration of protected areas.
and Resilience	 Carbon price, building standards, vehicle emission standards, and municipal regulations to achieve scale in stimulating renewable energy, waste recycling, and in retrofitting buildings. Carbon-pricing mechanisms, supported by a wider suite of mitigation policy instruments to
	 drive energy efficiency. All new buildings to meet the energy-efficiency criteria set out in South African National
	Standard 204.Chanel public investment into research, new agricultural technologies for commercial
	farming, as well as for the development of adaption strategies and support services for small-scale and rural farmers.
Inclusive Rural Economy	 Rural economies will be activated through improved infrastructure and service delivery, a review of land tenure, service to small and micro farmers, a review of the mining industry
	commitments to social investment, and tourism investments.
	Create tenure security for communal farmers, especially women, investigate different forms of financing and vesting private property rights in land reform beneficiaries that does not have beneficiaries with a high debt burden.
South Africa in	 hamper beneficiaries with a high debt burden. Implement a focussed regional integration strategy with emphasis on road, rail, and port
the region and world	infrastructure in the region.
Transforming	Reform of the current planning system for improved coordination.
Human Settlements	 Develop a strategy for densification of cities and resource allocation to promote better located housing and settlement.
	 Substantial investment to ensure safe, reliable, and affordable public transport. Introduce spatial development framework and norms, including improving balance
	 between location of jobs and people. Provide incentives for citizen activity for local planning and development of spatial
	 compacts. Introduce mechanisms that would make land markets work more effective for the poor and support rural and urban livelihoods.

OBJECTIVE	ACTIONS
Improving Education, Training and Innovation	 Strengthen coordination between departments, as well as the private and non-profit sectors. Focus should be on routine day-to-day coordination between units of departments that do similar work. The interests of all stakeholders should be aligned in support the common goal of achieving good educational outcomes that are responsive to community needs and economic development.
Healthcare for all	 Promote health diets and physical activity. Prevent and control epidemic burdens through deterring treating HIV/Aids, new epidemics and alcohol abuse; improve the allocation of resources and the availability of health personnel in the public sector; and improve the quality of care, operational efficiency, health worker morale and leadership and innovation.
Social Protection	 Together with social partners, determine a social floor that can progressively be realised through rising employment, higher earnings and social grants and other aspects of the social wage. Pilot mechanisms and incentives to assist the unemployed to access the labour market. Expand existing public employment initiatives to create opportunities for the unemployed.
Building Safer Communities	 Safety audits in all communities focussing on crime and safety conditions of the most vulnerable in the community. Increase community participation in crime prevention and safety initiatives. Mobilise youth for inner city safety to secure safe places and spaces for young people.
Building a Capable and Developmental State	 Use differentiation to ensure a better fit between the capacity and responsibilities of provinces and municipalities. Take a more proactive approach to resolving coordination problems and a more long-term approach to building capacity. Develop regional utilities to deliver some local government services on an agency basis, where municipalities or districts lack capacity. Adopt a less hierarchical approach to coordination so that routine issues can be dealt with on a day- to- day basis between mid-level officials. Use the cluster system to focus on strategic cross- cutting issues and the Presidency to bring different parties together when coordination breaks down.
Fighting Corruption	 The capacity of corruption-fighting agencies should be enhanced and public education should be part of the mandate of the anti-corruption agency. An accountability framework should be developed linking the liability of individual public servants to their responsibilities in proportion to their seniority. Restraint-of-trade agreements for senior civil servants and politicians at all levels of government. All corrupt officials should be made individually liable for all losses incurred as a result of their corrupt actions.
Nation Building and Social Cohesion	 Sustained campaigns against racism, sexism, homophobia and xenophobia. Improving public services and spaces as well as building integrated housing and sports facilities in communities to ensure sharing of common spaces across race and class. Incentivising the production and distribution of all art forms that facilitate healing, nation building and dialogue. Promote citizen participation in forums such as Integrated Development Plans, Ward Committees, School Governing Boards and Community Policing Forums. Work towards a social compact for growth, employment and equity.

Table 9 indicates the NDP objectives with relevance to the Msunduzi Municipality. The strategic framework of the IDP addresses these objectives.

2.3.4 THE NATIONAL INFRASTRUCTURE PLAN

The Presidential Infrastructure Coordination Commission (PICC) was established to:

- Coordinate, integrate, and accelerate implementation;
- Develop a single common National Infrastructure Plan that will be monitored and centrally driven;
- Identify who is responsible and hold them to account;
- Develop a 20 year planning framework beyond one administration to avoid a stop-start pattern to infrastructure roll-out.

Under this guidance, the PICC has identified Strategic Integrated Projects (SIPs). The SIPs cover a range of economic and social infrastructure, and all nine provinces are covered, with emphasis on poorer provinces. Many of the SIPs talk indirectly to the Msunduzi Municipality, but the following three have direct bearing on the Municipality, hence the IDP has been aligned to them:

- SIP2 refers to the Durban-Free State-Gauteng logistical and industrial corridor, which seeks to strengthen the logistical and transport corridor between SA's main industrial hubs; improve access to Durban's export and import facilities, raise efficiency along the corridor, and integrate the Free State Industrial Strategy activities into the corridor and integrate the currently disconnected industrial and logistical activities as well as marginalised rural production centres surrounding the corridor that are currently isolated from the main logistical system. This corridor runs through the Msunduzi Municipality, and has also been identified as an important corridor in the PGDS.
- **SIP7** refers to the coordinated planning and implementation of public transport, human settlement, economic and social infrastructure, and location decisions into sustainable urban settlements connected by densified transport corridors. Msunduzi is one of the 12 major cities selected by the PICC.
- **SIP15** refers to expanding access to communication technology, and one of its goals is broadband coverage for all households by 2020.

Strategies and Projects in the IDP address these Strategic Integrated Projects (SIPs). Catalytic projects for the Municipality have been identified that talk to these SIPs.

2.3.5 GOVERNMENT OUTCOMES 1 - 14

The Government's outcome-based approach arose out of a realisation by government that change was not happening as rapidly and effectively as required. It noted that progress was being made in many areas, and that greater access to services was being provided to many communities. However, government was not achieving the outcomes to ensure a "better life for all" and many communities were rightly impatient with the quality, relevance, and adequacy of government service delivery.

Out of this backdrop the outcomes approach was developed ensuring that government is focussed on achieving the expected real improvements in the lives of South Africans. The approach clarifies what is expected to be achieved, how it will be done, and where it will take place. It insists that the different spheres of government improve the lives of citizens rather than just carrying out their functions. The twelve outcomes are summarised below:

- 1. Improved quality of basic education;
- 2. A long and healthy life for all South Africans;
- 3. All people in South Africa are and feel safe;
- 4. Decent employment through inclusive economic growth;
- 5. A skilled and capable workforce to support an inclusive growth path;
- 6. An efficient, competitive, and responsive economic infrastructure network;
- 7. Vibrant, equitable, and sustainable rural communities, with food security for all;
- 8. Sustainable human settlements and improved quality of household life;
- 9. A responsive, accountable, effective, and efficient local government system;
- 10. Environmental assets and natural resources that are well protected and continually enhanced;
- 11. Creation of a better South Africa, and contributing to a better and safer Africa and World; and
- 12. An efficient, effective, and development oriented public service and an empowered, fair, and inclusive citizenship

- 13. A comprehensive, responsive and sustainable social protection system.
- 14. A diverse, socially cohesive society with a common national identity

These outcomes provide strategic focus and do not cover the whole of government's work and activities. The IDP document addresses each of these outcomes and municipal strategies have been designed accordingly.

2.3.6 NATIONAL PRIORITIES (STATE OF THE NATIONS ADDRESS 2017)

The President of the Republic delivered his latest State of the Nation Address 2017 of the current administration on the 9th of February 2017. The State of the Nation Address marked the 23rd year of the country's freedom, which further entrenching the precepts of the National Development Plan namely a free from poverty, inequality and unemployment and prosperous South Africa.

The president highlighted the challenge of the uncertain global economy, but furthermore acknowledging that the country has entered a period of recovery, and hence an economic growth rate of 1,3 percent is anticipated for the year 2017 exceeding the projected 0,5 percent during the year 2016. However the President eluded to the challenge that despite improvement, the economy is still not growing fast enough to create required employment. As a response to the above challenge the President elaborated the focus on the Nine Point Plan in order to reignite growth to provide a conducive environment for an inclusive economy.

These focus areas include industrialisation, mining and beneficiation, Agriculture and agro Processing, energy, SMME's, managing work conflict, attracting investments, and growing the Tourism Industry.

The President has declared the year 2017 as year of OR Tambo, and hence has edged government focus on maths and science, as key to unlocking economic potential and fast track economic growth.

2.3.7 THE BACK TO BASICS APPROACH

The Msunduzi municipality is not one of the 21 Municipalities identified as giving below the minimum standard of service however the municipality is reporting on a monthly basis's on Back to Basics. The municipality has been reporting since the inception of the programmes and it has programmes and projects aligned to the five pillars of Back to Basics. The five pillars as stated on the back to basics policy;

No.	Back to basics pillar	Municipal Response
1	Putting people first and engaging with communities	Monthly monitoring and hosting of ward committee meeting and community meetings
2	Delivering Basic Services	The implementation of the operational and maintenance plans of the different service department roads, electricity, water and sanitation and community services
3	Good Governance	Council structures are in place and monthly meetings to play the oversight role.
4	Sound Financial Management	Weekly expenditure control meeting held the accounting officer. Long terms financial plan in place and being implemented
5.	Building Capabilities	The municipality has a Workplace skills plan in place and it is implemented accordingly. The municipality is also part of SA cities network which is a platform for engaging and knowledge sharing.

The municipality has further integrated these into the municipal strategic frame, municipal Scorecard and into the SDBIP. The workplans of the relevant senior managers will reflect indicators and targets that respond to the Back to basic approach.

2.3.8 THE SPATIAL PLANNING AND LAND USE MANAGEMENT ACT

The Spatial Planning and Land Use Management Act, 2013 was assented to by the President of the Republic of South Africa on 5 August 2013. It came into operation on the 1st of July 2015.

SPLUMA is a framework act for all spatial planning and land use management legislation in South Africa. It seeks to promote consistency and uniformity in procedures and decision-making in this field. The other objects include addressing historical spatial imbalances and the integration of the principles of sustainable development into land use and planning regulatory tools and legislative instruments.

SPLUMA has become the official overarching legislation for development planning in the country and has repealed the following legislations previously used for various development planning purposes:

- Removal of Restrictions Act, 1967 (Act No. 84 of 1967)
- Physical Planning Act, 1967 (Act No. 88 of 1967)
- Less Formal Township Establishment Act, 1991 (Act No. 133 of 1991)
- Physical Planning Act, 1991 (Act No. 125 of 1991)
- Development Facilitation Act, 1995 (Act No. 67 of 1995)

Some of the key aspects that SPLUMA deals with are:

- Development Principles and Norms and Standards
- Intergovernmental Support
- Spatial development Frameworks
- Land Use Management
- Land Development Management

Section 35 (2) Of SPLUMA states; "A municipality must, in order to determine land use development applications within its municipal area, establish a Municipal Planning Tribunal. A Municipal Planning Tribunal (MPT) is the decision making body for Land Development. In terms of the Draft Regulations in terms of SPLUMA, All category 1 applications must be referred to the Tribunal:

- (a) The establishment of a township or the extension of the boundaries of a township;
- (b) The amendment of an existing scheme or land use scheme by the rezoning of land;
- (c) The removal, amendment or suspension of a restrictive or obsolete condition, servitude or reservation registered against the title of the land;
- (d) The amendment or cancellation in whole or in part of a general plan of a township;
- (e) The subdivision and consolidation of any land other than a subdivision and consolidation which is provided for as a Category 2 application;
- (f) Permanent closure of any public place;
- (g) Any consent or approval required in terms of a condition of title, a condition of establishment of a township or condition of an existing scheme or land use scheme.

In compliance with the Spatial Land Use Management Act the Msunduzi Municipality has appointed an Authorized Officer, which assess and approves category 2 applications that include Special Consents and Home Activity applications. Below ia a list of members that serve on the Msunduzi Planning Tribunal which meets twice a month to consider applications across the city.

Members

- 1. R. Ngcobo (Chairperson- DMM; Economic Development)
- 2. M. Hlubi (Independent Attorney)
- 3. L. Gaxela (Independent Town Planner)
- 4. F. Naude (Independent Land Surveyor
- 5. M. Povall (Independent Town Planner)
- 6. S. Zulu (Manager: Land Survey)
- 7. R. Bartholomew (Manager: Conservation and Environment)

- 8. M. Khumalo (Town Planner)
- 9. S. Mkhize (Manager: Building Survey)

Mesdames

- 10. N. Mkhize (Attorney)
- 11. L. Mngenela (Manager: Transportation Planning)
- 12. N. Hlophe (Development Management)

2.3.9 PROVINCIAL PRIORITIES (STATE OF THE PROVINCE ADDRESS 2017)

The State of the Province Address (SOPA) was delivered by the honourable Premier, Willes Mchunu on the 1st of March 2017. In keeping with the state of the Nation the Premier reminded us that OR Tambo would have turned 100 years this year. As a municipality we will be hosting a series of event in line with the vision of OR Tambo as instructed by the Premier. These events will speak to unity across colour lines, economic divisions and across political differences. The Mayor has also heeded to the call to form international relation with strategic partners and has hosted a number of international delegations in the city. The Honourable Premier touched on the economic climate and the fact that it has contracted across different sectors and the economic growth rate is projected at 1.8 % for the province which is slightly higher than 1.6 % for the country. He also reported on a high unemployment rate at 23.7% this again is evident in the city and the youth are the ones who are affected greatly. The Premier made it clear that the drought was still troubling the province and urged all stakeholders to play their part. A concern was raised with regards to the low levels of water preservation that was being undertaken by our communities the municipality has undertaken numerous awareness campaigns to address this.

The Honourable Premier highlighted the adoption if the amended PGDS during November 2016 as a step in the right direction and a platform to indicating that the province is indeed in line and committed to the National Development Plan. The province is now working tirelessly to ensure implementation of the PGDS through the PGDP and the working groups. The local government election were held successfully as and the premier highlighted the high level statistics of the councillors that were elected during the 2016 elections he expressed joy in the fact that a high number of councillors were returning and that there are much younger councillors in the Province. The premier highlighted the international events that take place within the province, most of these take place in Durban however they have positive spin offs for the city as the city was a study area for the ISOCARP congress and hosted an international delegation.

In terms of social cohesion the city has a number of programmes aimed at ensuring that communities are tolerate with each other. There is the ex-offender programme which aims to integrate ex-offenders back into society and there is also a programme to deal with street children and providing them with the necessary assistance for rehabilitation. The Schools development programme is one that can be seen as being proactive and attending to the vulnerable children before they get to the streets. The following are focus areas for provincial spending, and those with an impact on the Msunduzi Municipality have been highlighted:

- Radical Economic Transformation: The Municipality has launched the Growth Coalition with key private sector
 partners that operation in the city during the month of March 2017. The Municipality is also at advanced
 stages of implementing the issues of seta asides after much research and investigations.
- On unlocking the potential of SMME's, cooperatives, township and rural enterprises. The municipality works
 with the NYDA in providing the necessary skills to youth owned Business. The Municipality also has an office
 which specifically deals with township development in the form of GEVDI.
- On resolving the energy Challenge the municipality has spent more the R100 million on upgrading its electricity infrastructure.
- Managing work place conflict, the municipality continues experience challenges in this regards. However there are monthly departmental meetings with unions to resolve issues and also there are monthly Labour forums.
- Primary health care; the municipality ensure that clinic's and health care facilities are prioritised in terms
 of basic service provision. There are various platforms where health staff cane report problems including
 through the operation sukma sakhe platform.
- Cross cutting related to ICT, Transport infrastructure, Science and Technology and water.

2.3.10 THE PROVINCIAL GROWTH AND DEVELOPMENT STRATEGY (PGDS)

The Provincial Growth and Development Strategy was developed in 2011 to facilitate sustainable economic growth, reduce growing inequality, and promote environmental sustainability, and emanates from vision for KwaZulu/Natal which is summarised below:

By 2030, the PROVINCE OF KWAZULU/NATAL should have maximized its position as a GATEWAY to South and Southern Africa, as well as its human and natural resources, so creating a safe, healthy, and sustainable living environment. Abject poverty, inequality, unemployment, and current disease burden should be history. Basic services must have reached all its people, and domestic and foreign investors are attracted by world class infrastructure and a skilled labour force. The people shall have options on where and how they will live, work, and play. The principles of putting people first and leadership, partnership, and prosperity in action have become a normal way of life. The following principles were identified by the PGDS to address this, namely:

- Grow the economy to achieve shared growth;
- Harness the province's assets and endowments;
- Develop the province's greatest asset, its human capital;
- Harmonise environmental integrity, human and social development with economic development;
- Government must be developmental, competent, caring, and facilitating;
- Private Sector must grow a shared economy, providing employment;
- Organised labour must protect workers from exploitation, while promoting labour productivity; and
- Civil Society must be responsible in shaping its own destiny.

The seven strategic goals for the province are as follows:

FIGURE 3: Seven Strategic Goals of the PGDS

To achieve these 7 strategic goals, 30 objectives, supported by 124 implementable interventions, have been developed which have been aligned to the IDP strategies and objectives. To deliver on this, the PGDS requires all spheres of government to deliver on the following:

- The implementation of the catalytic projects and interventions, effective participation in the institutional implementation framework,
- The incorporation of the strategic goals and objectives in their priorities and programmes,
- The reporting of progress, and
- The provision and allocation of the required support and resources.

Table 10: NDP -PGDS alignment

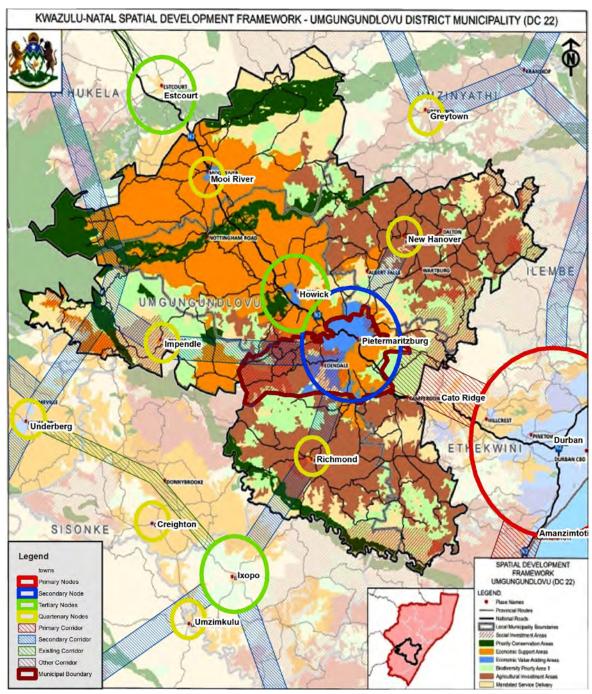

NDP (VISION 2030)	PGDS STRATEGIC GOALS
Create Jobs	Job Creation
Expand infrastructure	Strategic Infrastructure
Use resources properly (Low-Carbon Energy)	Respond to Climate change
Inclusive planning	Spatial Equity
Quality education	Human Resource Development
Build a capable state	
Quality health care	Human and Community
Unite the nation	Development
Fight corruption	Governance and Policy

The Msunduzi Municipality's IDP analysis phase has been grouped around these seven strategic goals. The specific strategies and projects identified by the Municipality in the IDP align to these seven goals.

The following map shows the PGDS translated spatially for the Msunduzi Municipality. As can be seen, the western portions of the Municipality have been identified as social investment areas, the middle and northern section have been identified as value-adding areas, whilst the eastern and southern portions have been identified as economic support areas. The eastern flank of the Municipality has been identified as a bio- diversity priority 1 area.

MAP 1: The PGDS translated to the Msunduzi Municipality

Umgungundlovu Spatial Development Framework

2.3.11 THE PROVINCIAL GROWTH AND DEVELOPMENT PLAN

The 2011 KwaZulu-Natal Provincial Growth and Development Strategy (PGDS) is the primary strategy that drives growth and development in the Province to 2030. This Strategy has been cascaded into the Provincial Growth and Development Plan (PGDP) which drives the implementation of this Strategy. The aim of the PGDP is to translate the strategy into a detailed implementation plan, inclusive of a detailed activity level framework with baselines, targets and assigned responsibilities, thus enabling the execution of the proposed 124 Interventions, 30 strategic objectives and 7 strategic goals.

Furthermore the PGDP sets out specific milestones which have to be achieved in specific priority sectors such as, but not restricted to Education, Health, and Agriculture. This is done in a collaborative approach with all the relevant stakeholders to ensure ownership of targets that are set for four specific time horizons, namely 2011-15, 2016-20, 2021-25 and 2026-30.

The PGDP is reviewed annually, in conjunction with the KwaZulu-Natal Planning Commission which facilitates the preparation of half-yearly progress reports, submitted to Provincial Cabinet, and circulated to stakeholders via the institutionalised implementation structure.

This fourth generation IDP covers the period of 2017/18 to 2021/22 which closely aligns with the second time horizon of the PGDP. The Msunduzi municipality is aligned to the goals and activities of the PGDP as it has set out to implement the City Development Strategies(CDS) which are laid out in detail on pg 21; Below at a high level we demonstrates how the Municipality is aligned to the PGDS and PGDP;

PGDS Goal	Msunduzi CDS strategy to action the Goal
Goal 1 (Job creation)	 Growing the regional economy: The provincial legislator and executive and their needs must be integrated, also partnering with the private sector investing in economic opportunities that create employment growth.
Goal 2 (Human Resource development)	 Building a capable and developmental municipality: Increasing institutional capacity and promote transformation hence building a capable and developmental municipality (Pg 30, IDP) Creating a learning city and a city of learning: The city must promote education and use its tertiary institutions to help it become a learning institution. There is a need to design strategic plans that inform development around the university precinct of Scottsville. Thus enabling a conducive environment to study and reside, also harmonizing the mixture of existing and future anticipated land uses.
Goal 3 Human and Community Development	 Back to Basics: This strategy requires a cross-organisational approach such as reorganising the way service delivery happens and introducing innovations which are key elements of this priority area. (Pg 107-116, IDP)
Goal 4 Strategic Infrastructure	 Improving infrastructure efficiency: There is a need for a realistic review of infrastructure within the city. To address this key issue the Municipality has identified key catalytic projects to improve infrastructure which include the Free Node Development and electrical infrastructure upgrade.
Goal 5 (Environmental Sustainability)	 Spatial effectiveness: Msunduzi needs to plan for growth within the city which includes looking at how an increased population will be accommodated and serviced. Densities and public transport corridors must be incrementally increased with continuous improvements in non-motorised and other mobility option as well as equitable access to social facilities.
Goals 6 (Governance and policy development)	 Building a capable and developmental municipality: Increasing institutional capacity and promote transformation hence building a capable and developmental municipality (Pg 30, IDP) Serving as a provincial capital: The Municipality is ideally located as a capital city of KwaZulu-Natal with access to a variety of government head offices and high level human resources. It is important to expand on these opportunities and also gain access to skills necessary to reinforce its status.
Goal 7 (Spatial Equity)	 Spatial effectiveness: Msunduzi needs to plan for growth within the city which includes looking at how an increased population will be accommodated and serviced. Densities and public transport corridors must be incrementally increased with continuous improvements in non-motorised and other mobility option as well as equitable access to social facilities.

2.3.12 UMGUNGUNDLOVU DISTRICT DEVELOPMENT PLAN

The District Growth and Development Plan have been formulated within the context of the KwaZulu Natal Provincial Growth and Development Plan. The District Growth and Development Plan gives intent to the strategic goals of the Provincial Growth and Development Plan and provide a long term development strategy for the District.

The underlying principles of the District Growth and Development Plan include

- A productive District; which enhance business competitiveness, promote investment, improve business environment and initiate local economic development
- An inclusive District: which describes actions focused on social issues and integration of communities, poverty reduction and equitable service delivery.
- A sustainable District: that systematic relationship between ecological, social, economic and institutional issues

The District Growth and Development Plan is set out within a strategic framework which provides focus for maximum impact in the District. Furthermore its purpose is to focus and coordinate the activities of all stakeholders in order to attain the vision as articulated in the National Development Plan, the Provincial Growth and Development Plan at a local level to the District and Msunduzi Municipality. At a District Level the District Growth and Development Plan aims to enhance a vibrant economic region, integrated, quality service delivery, improved quality of life and equity.

To achieve this District Development Plan comprises of strategic goals namely:

- Goal 1: Economic Growth and Development
- Goal 2: Human Resource Development
- Goal 3: Human and Community Development
- Goal 4: Strategic Infrastructure
- Goal 5: Environmental Sustainability
- Goal 6: Governance and Policy
- Goal 7: Spatial Equity

The Msunduzi Municipality is aligned to the framework and strategic goals of the Umngungundlovu District Development, more so through striving towards its adopted vision which are "A safe, vibrant city, in which to live, learn, raise a family, work and do business. Furthermore the Municipality has adopted a City Development Strategy (2015) which forms part of the Integrated Development Plan (2017/18 - 2021/22). The strategy articulated key intervention areas such as Building a capable and developmental Municipality, Back to Basics, improving the provincial capital status and growing a regional economy.

2.3.13 THE MEDIUM TERM STRATEGIC FRAMEWORK (MTSF)

This Medium Term Strategic Framework (MTSF) is Government's strategic plan for the 2014-2019 electoral term. It reflects the commitments made in the election manifesto of the governing party, including the commitment to implement the NDP. The MTSF sets out the actions Government will take and targets to be achieved. It also provides a framework for the other plans of national, provincial and local government.

The MTSF highlights Government's support for a competitive economy, creation of decent work opportunities and encouragement of investment. This is the first MTSF to follow the adoption of the NDP in September 2012.

The aim of the MTSF is to ensure policy coherence, alignment and coordination across government plans as well as alignment with budgeting processes. Performance agreements between the President and each Minister will reflect the relevant actions, indicators and targets set out in this MTSF.

The MTSF elaborates the use of key development instruments such as the New Growth Path, which sets the trajectory of economic development, the National Infrastructure Plan, which guides the rollout of infrastructure to improve people's lives and enable economic growth, and the Industrial Policy Action Plan, which focuses on promoting investment and competitiveness in leading sectors and industries.

SECTION C-CHAPTER 3: SITUATIONAL ANALYSIS

3.1 INTRODUCTION

This section of the IDP summarises key development informants that shape the Msunduzi Municipality and its people, and that inform the development of the municipal Vision and Strategies.

C1-SPATIAL, ENVIRONMENTAL AND DISASTER MANAGEMENT PGDS GOAL: SPATIAL EQUITY

3.2 SPATIAL PLANNING

3.2.1 INTRODUCTION

Section 26(e) of the Municipal Systems Act (32 of 2000) requires all municipalities to prepare Spatial Development Frameworks (SDF) to guide and inform development planning and public and private sector investment. SDFs enable Council, communities, industries, service providers, and government agencies to plan, budget, and develop with confidence and certainty. A copy of the full SDF is included as an Annexure to this document.

The SDF is neither a comprehensive plan, nor a development master plan. It is a flexible framework that serves as the basis on which detailed area and even site specific master plans may be prepared. It is conceptual in nature and seeks to contextualise the national and provincial development imperatives, while also presenting a spatial overtone of the development strategies outlined in the IDP. Any changes to the framework will need to be reflected in future revisions, which should occur on a regular basis in order to achieve the Municipality's Vision.

The primary aim of the Msunduzi SDF is to:-

- Serve as a strategic, indicative, and flexible forward planning tool, to guide public and private sector decisions on land development and investment;
- Present a set of policies and principles, and an approach to the management of spatial development within the municipal area, to guide decision-makers in dealing with land development applications;
- Provide a clear and logical framework for spatial development, by providing an indication of where the Municipality would support certain forms of development;
- Provide a clear spatial logic that facilitates private sector decisions on investment in the built environment;
- Promote social, economic and environmental sustainability of the area; and
- Provide a framework for dealing with key issues, such as natural resource management, land reform, subdivision of rural land, and the conservation of prime and unique agricultural land, etc.

3.2.2 CURRENT SPATIAL CONTEXT

The Status Quo Report revealed key findings about the Msunduzi Municipality, necessary in terms of knowing the point of departure from which we are planning.

The geographic location of Msunduzi municipality allows it the opportunity of becoming well connected in the global economy due to the access it has to the N3 highway leading to major harbours and airports. The surrounding municipalities and towns access various connectivity and growth opportunities through Msunduzi, across various sectors such as Tourism and Agriculture. As such it is essential for physical connectivity to be further improved to stimulate these economic linkages.

Non-physical connectivity has become just as important as physical connectivity in the 21st century as the internet is now seen not just as a business tool but also as a means of accessing a world of education and opportunity. A broadband demand survey in the province revealed the need for high speed internet in educational institutions, hospitals and clinics as well as in the local government sector. The SDF takes it one step further and proposes that at it should reach all transport stations and, over time, the individual household level.

History has significantly shaped the city, evidenced by the apartheid city model which is still manifest even 23 years after achieving democracy, which is an unacceptable situation. Linked to this is the clear disparity of wealth, employment opportunities, plot sizes, levels of neighbourhood planning and access to basic services (especially sanitation) which needs to be corrected in the West, East, South-West of the CBD main (Edendale, Vulindlela, Imbali, Northdale, Shenstone and Ambleton etc).

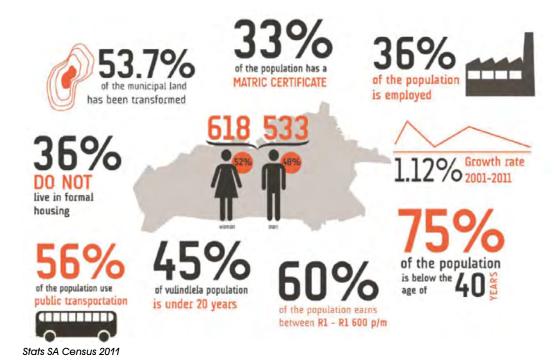

These areas reflect both a high concentration of informal settlements and traditional settlements. While there are some areas in the municipality were recreational spaces, public services and amenities have been provided, the quality, maintenance and accessibility to the communities they are intended to serve in these areas is questionable and it thus a major target of the implementation plan arising out of the SDF. Because development has been so visibly concentrated in the previously white areas (e.g. (Northern region, CBD, Ashburton & Eastern region)), the Greater Edendale/ Imbali area has recently been earmarked for an Urban Network Strategy project.

The trend for the Vulindlela area however indicates that it is becoming more of a forgotten space in terms of development from both a public and private investment point of view. The SDF therefore proposes step-wise ways of integrating Vulindlela with municipal spatial and socio-economic structure such as increasing accessibility through enhanced transport corridors, new sustainable urban centres in key areas and generally improved service provision.

The natural environment of Msunduzi is becoming better-understood with, for example, the completion of the Environmental Management Framework in 2010, but it is significantly under-protected when it comes to formally retaining key biodiversity features. The SDF attempts to map all of the pertinent environmental features as the 'ecological infrastructure' of the Municipality, which is essentially to be treated as a distinct line in the sand – being either uninhabitable (e.g. if in a flood zone) or subject to further study.

The dominant presence of educational institutions within the municipality is noteworthy. Much like social facilities, the status quo analysis has revealed that services are not evenly distributed/ supplied across the municipality. Once again the more formal and urban areas of the municipality are better serviced and generally more connected than the more informal, rural and peri-urban areas.

The diversity of the landscape and housing typologies lends itself to more tailored, sustainable service provision in future. New technological improvements to water, electricity, waste management and sanitation provision are on the horizon and pose significant opportunities for future uptake due to their ever-approaching price parity and convenience factors. These opportunities are explored per Area Based Management (ABM) area due to the general homogeneity of these areas.

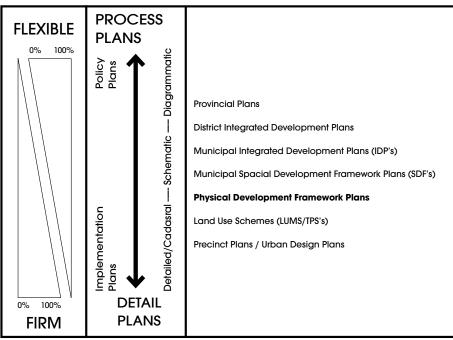

The key demographic findings which have informed the spatial strategies are as seen in Figure 4:

3.2.3 THE HIERARCHY OF PLANS

The Msunduzi Municipality has embraced the concept of a Hierarchy of Plans as illustrated in Figure 5.

Figure 5: Msunduzi Hierarchy of Plans

In 2010, Council adopted the preparation of a series of Area Based Management Plans (ABM) for Vulindlela, Greater Edendale and Imbali, the Northern Areas, and the CBD, Ashburton, and the Eastern Areas.

Spatial Development Framework 2015

3.2.2.1 VULINDLELA

Vulindlela is situated to the west of Pietermaritzburg, northwest of the Greater Edendale area. The majority of the land belongs to the Ingonyama Trust (Traditional Authority areas). The area is predominantly rural and underdeveloped. The Vulindlela area covers a vast area (approximately 28 000 ha in extent). The study area is made up of 10 wards. The leadership in these areas consists of ward councillors, as well as Amakhosi for Mafunze TA, Inadi TA, Mpumuza TA, Nxamalala TA, and Ximba TA.

3.2.2.2 GREATER EDENDALE AND IMBALI

Topography and river corridors play a major part in structuring growth and development within the ABM. The area has major valleys and steep topography, particularly those areas closer to the Vulendela ABM. These serve as structuring elements and constrain development in certain parts.

The majority of the population in the Greater Edendale and Imbali areas are located to the east and south east of Edendale Road. Older areas on either side of Edendale Road comprise a mix of both formal and informal settlement patterns, mostly located on older cadastral layouts. Settlements to the south and east are a mixture of traditional and formal settlements. The residential areas in the central and eastern portions of the site are dominated by more recent formal settlement patterns. Undeveloped land, with great potential for development, lies to the east of the ABM and adjacent to the Ashburton ABM.

3.2.2.3 THE NORTHERN AREAS

The Northern ABM consists of portions of the CBD, Clarendon, Montrose, Chase Valley, Woodlands, Northdale, Raisethorpe, and Bishopstowe. The N3 corridor traverses the ABM, but it is largely a movement corridor between the dominant urban cores of Johannesburg and Durban. Due to the limited access nature of this road, opportunity points exist at key intersections or off-ramps along its route.

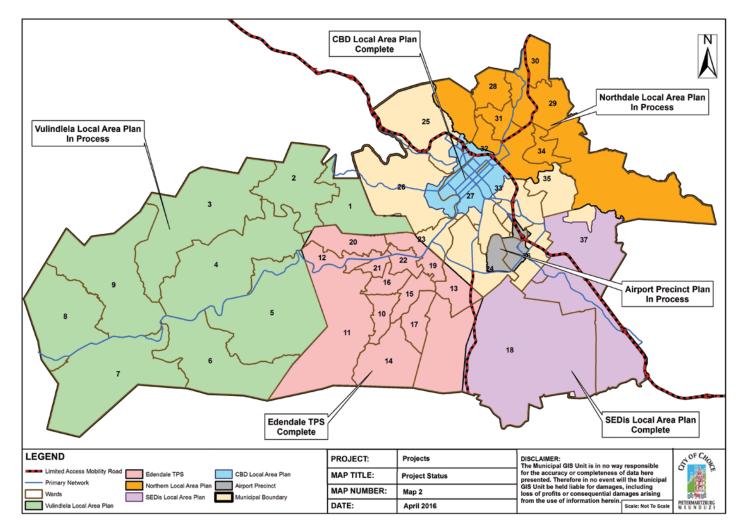

3.2.2.4 CBD, ASHBURTON, AND THE EASTERN AREAS

The CBD also functions as the primary market place for the Municipality, a place of concentration of power (financial, economic, and political), an investment location, a rates revenue generator, and provides an opportunity for social interaction and integration. It also serves as the gateway city to the surrounding tourist destinations, it in itself being a tourist destination. The confirmation of the Capital City Status, and subsequent relocation of the various Provincial Departments, has contributed to the growth and stability of the area. Its declaration as the Provincial Legislative Capital has had a strong influence on the "City of Choice's" unprecedented economic and development growth.

This ABM is the major employer of the city's working population, with the majority of people being employed in government departments, mainly in the central areas, while others are employed in the city's industries in Mkhondeni, Pelham, Willowton, and on the periphery of Northdale, spilling over to Mountain Rise. The city's major education institutions are also within this ABM, and include the University of KwaZulu-Natal and Durban University of Technology in Scottsville, and UNISA and FET College/s in the central area.

Map 2: Area-based Management Plans and Ward Boundaries

3.2.2.5 DETAILED PLANNING INITIATIVES

As part of ensuring that development is suitable crafted to fit challenges being experienced around the City, the City has embarked on the preparation of detailed plans for designated spatial areas. Currently, local area plans have been developed for the Central Area and CBD Extension Node (CACEN) and the South Eastern District (SEDis). It is envisaged that these detailed plans will guide public and private development through the identification of priority areas and interventions; make decisions regarding investment in services infrastructure and associated phasing; and give clarity and direction to developers and land owners in the area with respect to the type and intensity of development.

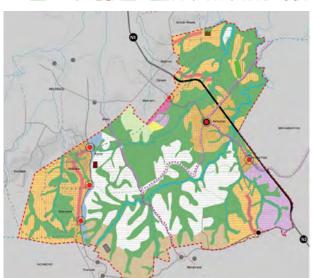

1. Central Area and CBD Extension Node: The Central Area and CBD Extension Node is an Inner City Development and Regeneration Strategy which reinforces and consolidates its character and role as the economic and administrative hub of both the City and Region, including its function as an urban centre ie. a place of exchange (a market place); a place of concentration of power (financial, economic and political); an investment location; a rates revenue generator; and a place for housing, social interaction and integration.

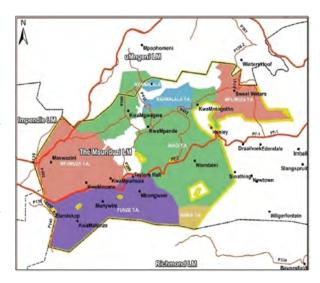

Spatial Development Framework 2015

2. South Eastern District: The Msunduzi SDF identifies the SEDis area as a significant location in terms of the residential, industrial and mixed use growth and expansion of Msunduzi. It also identifies the importance of conserving critical environmental resources in the area. The area also has significant potential to contribute to the urban growth, restructuring, resilience and sustainability of Msunduzi through the strengthening of radial and concentric linkages, the utilisation of more innovative development approaches, the integration of land use and transport, climate change resilience, food security as well as catchment management to protect downstream environmental assets.

Spatial Development Framework 2015

3. Vulindlela Local Area Plan: The municipality is currently receiving support from the Department of Rural Development and Land Reform to develop a Local Area Plan for Vulindlela The character of Vulindlela is complex. It consists of rural, peri-urban and fairly dense typologies as described hereunder. Vulindlela is considerably less developed and less economically active than the other management areas in Msunduzi. The land use of the area comprises a pattern of scattered settlement, grazing land, cultivated lands (both large individually managed and farmed areas and smaller irrigated community gardens), pockets of indigenous forest and some major timber plantations. Due to increasing population pressure areas some previous areas of grazing and arable land have been converted into residential land.

Spatial Development Framework 2015

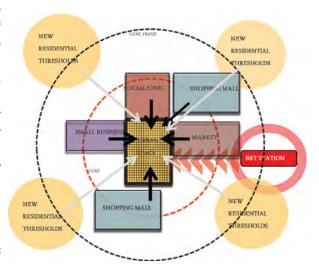

4. Airport Precinct and Management Plan: As part of enhancing the role of Pietermaritzburg within the context of the N3 logistics corridor, (i.e. SIP2 project), the preparation of the Airport Precinct and Management Plan has been commissioned in May 2015. The Airport Precinct is identified as a key nodal area on the N3 corridor. Also taking into consideration the Durban-Gauteng Development Corridor (i.e. SIP2) and its importance to freight and passenger movement. The Airport Precinct is considered as a key focal point required to successfully support the functioning of the N3 Development Corridor.

Spatial Development Framework 2015

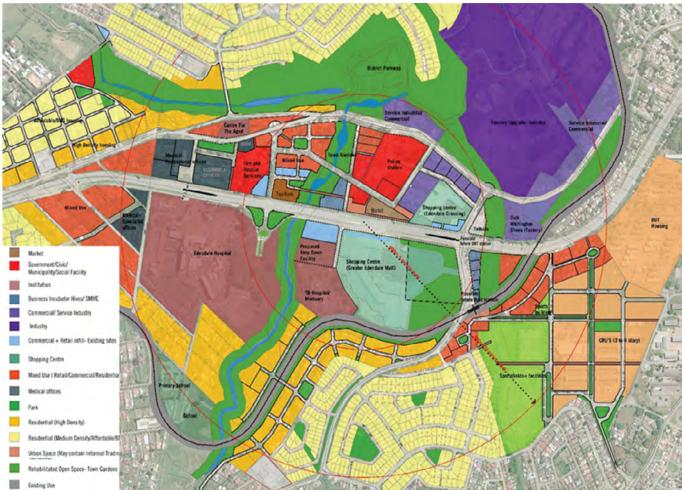

5. Edendale Town Centre: The Neighbourhood Development Partnership (NDP) has identified the Greater Edendale area for a Township Regeneration strategy with the aim of ensuring that the development of an Urban Hub within the Greater Edendale area will assist with the transformation and regeneration of the area and that the spin-offs of this would contribute to the improvement of the surrounding areas. The merits of identifying Edendale are evident based on the area's historical and current development challenges. Much of the apartheid spatial context and patterns still exist today with the marginalised community in Edendale and Vulindela far from economic, social and recreational opportunities.

Spatial Development Framework 2015

The primary objective of this study is to develop a precinct plan for the Urban Hub in which discreet projects are identified and project plans are prepared to unlock funding for detailed design and implementation in the next phase. The Strategic Review revealed that the Greater Edendale area has great potential to overcome the deficiencies inherited from Apartheid and become a thriving area. One of the driving forces behind this optimistic stand-point was the IRPTN project, which is expected to be implemented in the next few years. It is expected that the project will drastically transform the Municipality bringing a range of transportation, land use and increased densification opportunities and becoming a major structuring element in the Greater Edendale area.

Spatial Development Framework 2015

The Strategic Review also reflected that the majority of the initiatives taking place in the municipality are concentrated within the Imbali precinct. The report highlighted that the bulk of future growth and investment would most likely occur within this Precinct both in the short and medium term. It was established that the area proposed for the development of an Urban Hub must encompass the Hospital, Shopping Malls and Future Educational precinct in Edendale. The review also established that it is essential to ensure that development of the Hub is in a manner that allows for greater synergy between the existing and proposed land uses. Considering the above, it is motivated that the most likely location of the Hub would be within the Imbali Precinct.

After a vigorous criteria evaluation of three proposed Hub locations, the Imbali area was chosen for the establishment of an Urban Hub. This area is in the vicinity of the existing shopping centers within Edendale and was chosen due to it being highly accessible and currently serves as a landmark and destination oriented zone. The recent acquisition of land by the municipality has elevated this area over the other locations as a potential zone for future investment and development. There are opportunities for expansion through future bridge and pedestrian connections e.g., to the Hospital and surrounding areas. The majority of the uses that make up the frame of a town Centre have already been established or are in the process of being developed. The character of the Urban Hub within the Greater Edendale/ Imbali area must be centered on the notion of defining an 'African Urbanism', where the planning of the Hub facilitates the development of a space that is true to the identity of the user's context in which it is set. As such planning merely facilitates the development of an environment that will allow this natural growth to take place. However there are fundamental drivers that are considered important in establishing the character of the proposed Hub. It is important that the hub is not seen as a traditional CBD but built around the concept of an Informal economy that will set the platform for other land uses that will grow organically and are responsive to different circumstances. In so doing the design intends to acknowledge the following principles:

- The hubs dependence on public transportation,
- That the majority of users are pedestrians,
- The way in which economic activity needs to engage with the public realm
- The dual identity of the Centre as both a place of economic activity but also a place of social gathering.

In designing the Hub, the BRT becomes the catalyst in the area bringing in additional foot traffic in the area at regular intervals. The aim is to direct this movement into a common area namely an 'Urban Space' which becomes the Centre where all uses and people start to gravitate towards. The urban space becomes the area that promotes new land uses but more importantly integrates existing land uses.

The implementation of the Hub is geared toward realisation of one of the following strategies within a short, medium and long term projection;

- Strategy 1: Planning approval and Implementation Set up;
- Strategy 2: Establishing the HUB- Support and grow the informal economy and government precinct (Phase 1): R 97,798,800 (estimated figure);
- Strategy 3: Promote the building of a diversified service industrial/ manufacturing sector;
- Strategy 4: Develop mixed-use retail/ office and residential opportunity;
- Strategy 5: Enhance the quality of life of the Hub by rehabilitating existing open spaces;
- Strategy 6: Address infrastructure capacity;

It is suggested that Phase 1 of the Urban Hub be established first. The selection of this area as the lead project/ phase is a deliberate decision in anticipation that the successful development of this area will trigger investment and development of the rest of the Hub area. The Market and SMME incubator sites show the importance of the informal economy and the efforts being put in place to grow this economy within the Hub. The Government building relates to the already existing police station and will stand a symbol of the role the Public sector. The Urban Square emphasises the notion of the Hub being a place of public gathering, were people interact. The landscaped streets

Spatial Development Framework 2015

will help the Hub become a place of celebrated spaces with quality streets. The realization of this project makes it imperative that the acquisition of these parcels of land is secured as soon as possible in order to allow for the development of this phase to commence.

It is without doubt that the proposed design of the Greater Edendale/ Imbali Urban Hub is consistent with the prime objective of the NDPG of stimulating and accelerating investment in poor, underserved areas. There is already significant private investment in the area and thus public investment will merely serve as a catalyst to draw more investment and employment opportunities for the people within the Greater Edendale/ Vulindlela Areas.

3.2.2.6 THE SPATIAL DEVELOPMENT FRAMEWORK

In terms of Chapter Five of the Municipal Systems Act (No. 32 of 2000), in 2014 the Msunduzi Municipality embarked on the review of its 2009 Spatial Development Framework (SDF). Based on a thorough understanding of the study area following the status quo phase, the comprehensive SDF map 2014/2015 was compiled in a systematic manner. The SDF is based on seven key developmental pillars identified as forming a backbone of sustainability for the future city. The seven pillars upon which the Msunduzi SDF is built are as follows:-

- Global Connectivity: Improved local, regional and national physical connectivity of the municipality via road, rail, NMT and air transport, as well as bridging the digital divide with a strategy for enhanced ICT connectivity;
- 2. Productive Systems: Developing a strategy for land release along the N3 corridor, reviving the CBD and other secondary and tertiary centres of economic activity, introducing new economic centres in previously neglected areas (particularly those previously considered 'rural'), and making the most of productive agricultural land.

- Ecological Infrastructure: Enhancing the open space network in the city for improved natural service provision
 and ecological functionality, through the protection of formal and informal nature reserves, open spaces,
 enhancing linkages across catchments and increasing setback lines in key areas such as those adjacent to
 watercourses.
- 4. Sustainable Transport: Spatially identifies and promotes an equitable movement structure across the city, through an enhanced public transport backbone (e.g. the IRPTN and possible future NMT routes) and by reviewing the functionality of the rail network.
- 5. Quality Urbanism: Creating functional, well-serviced neighbourhoods, building a polycentric city structure with secondary major centres (such as in Edendale), identifying areas for future smaller sustainable urban centres, promoting densification and public place making in the aforementioned areas and along public transport trunk routes.
- 6. Social inclusivity: Identifying areas for new housing opportunities, areas where informal housing needs to be addressed and/or upgraded on-site, and areas requiring the equitable distribution of public amenities.
- 7. Sustainable Services: Enhancing existing infrastructure based on findings per ABM, identifying areas for future infrastructure installations and mechanisms for achieving infrastructure-related efficiency through economies of scale (at densified urban centres and along key transport routes, using resource-efficient technologies where appropriate).

The above interventions were conceptualised based on the following key philosophies:

- Transformation;
- Equity/ Equality;
- Restructuring;
- Recycling / Upcycling;
- Reinventing; and
- Public Place Making.

Further to this, the SDF is based on a growth model developed as part of this study, which identified future population as well as economic space required for the future. This enables the SDF to have a sound basis informed by sustainable anticipated growth.

The economic and population growth models identified a need to ensure a minimum 2500ha of industrial land, 600ha of commercial land and 9550ha of residential land, These land allocations were adequately tied into the forecasted 2050 plan.

3.2.2.6.1 SDF IMPLEMENTATION

The implementation plan of the SDF has resulted in 50 projects being proposed with the following catalytic programmes being introduced as 'top prize' programmes for change:

Inception of Rapid Delivery Agency

These seven programmes are linked directly to the seven developmental pillars forming the basis of the SDF. Their effects, when implemented are cross-cutting and would result in an integrated and sustainable space economy in the municipality.

3.2.2.6.2 PROJECT IDENTIFICATION AND CAPITAL INVESTMENT

Following the priority areas of the SDF Implementation, various projects are currently on-going to facilitate development in the municipality. Some of these include the Land Audit and Land Acquisition Programme which are aimed as stock-taking of municipal land viable for different development potentials as well as the deliberate acquisition of land in locations where capital investment can occur. The Greater Edendale area is currently the prime focus of land acquisition to facilitate mixed-use development as part of changing the apartheid landscape. The Integrated Rapid Public Transport Network (IRPTN) is also a flagship project which seeks to achieve the strategic vision of being "a well accessible and connected city". The IRPTN will see the roll out of a reliable and efficient public transport system. However one of the elements that is essential to ensuring that the system is viable is adequate residential densities along the route.

The SDF implementation contains approximately 50 projects outlined in terms of their objectives, timeframes, budgets, implementing departments, the plans were mapped on a discreet project-by-project basis (where possible), serving as a capital investment framework, and checked in terms of their alignment with key planning tools (i.e. IDP).

A phasing plan was built in accordance with the various projects - as they relate to certain land use categories. This resulted in a land use guideline which can be cross-referenced against the distinct SDF map legend items as well as the more generic/broad land use categories.

The process of monitoring and evaluation reveals the importance of departmental alignment and long term financial planning and forecasting to achieve desired outcomes in the most efficient manner for the city. In this regard, some of the strategic proposals that the city has to consider strongly is the establishment of:

- A Rapid Delivery Unit to assist with key aspects such as appropriate funding mechanisms, streamlined project management and overall efficacy;
- An internal Municipal Development Alignment Forum for officials to discuss issues of alignment and conflict.

The Msunduzi Municipality has the tools in hand to begin seeing the vision of the SDF through for a sustainable, thriving city. This roadmap which has been created, points to the vision of the "City of Choice and being Second to None".

MSUNDUZI SPATIAL DEVELOPMENT

FOR 2017/2022 FINANCIAL YEARS

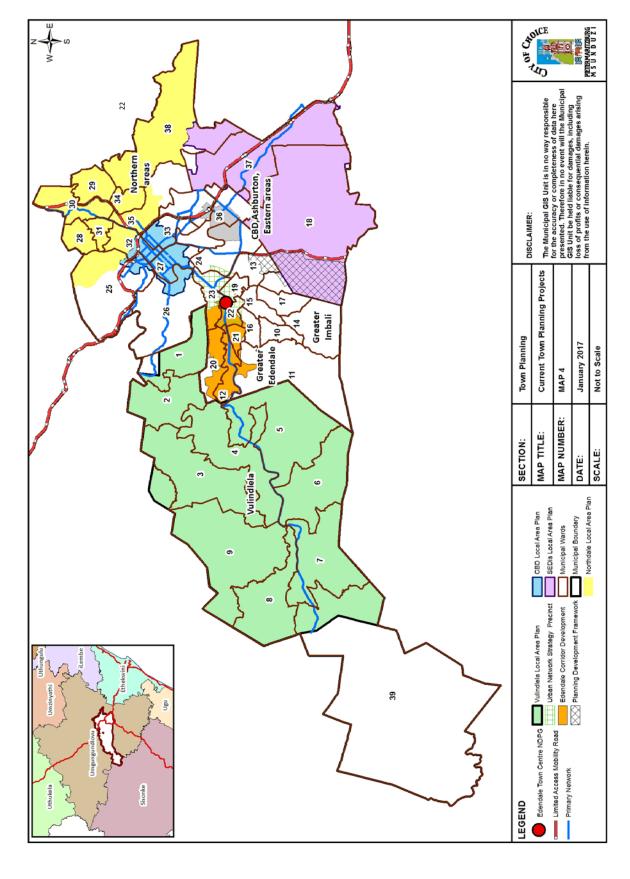

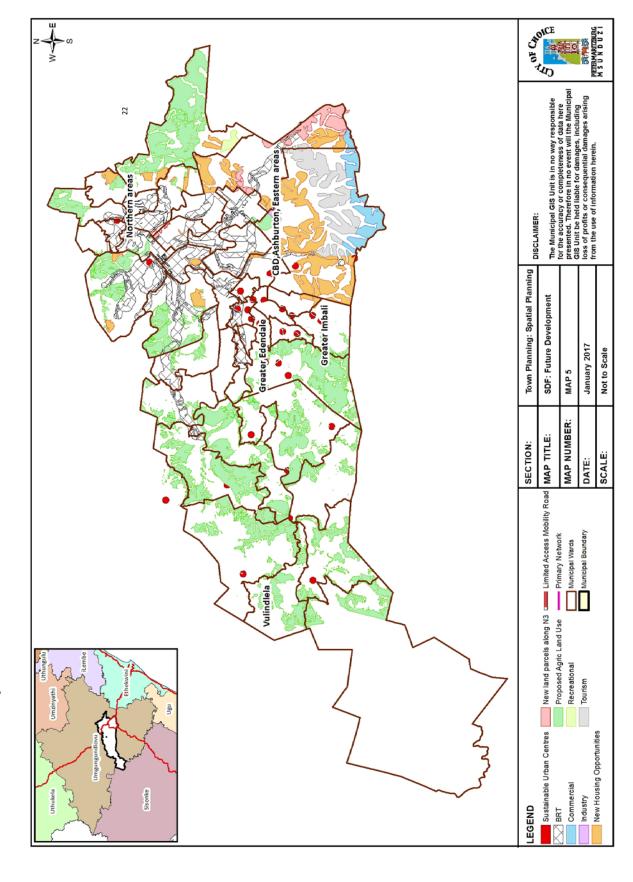

MAP 3: Spatial Development Framework

MAP 4: Current Town Planning Projects

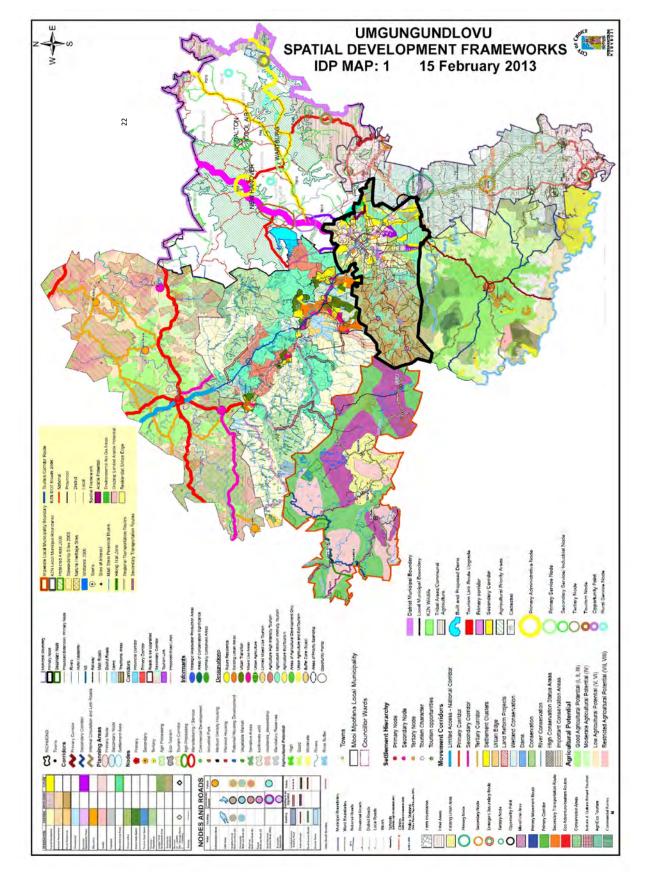

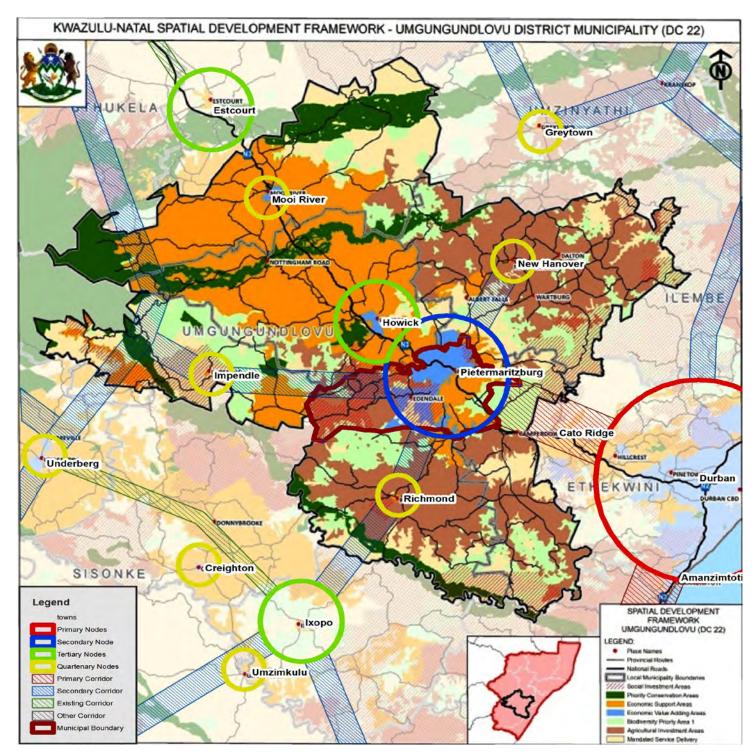

MAP 7: KZN Spatial Development Framework UMDM

3.2.2.6.3 Regional Context

Through the SDF and ABM plan preparation process, attention has been paid to the alignment of the Msunduzi SDF to that of the surrounding local municipalities, as well as to the SDF of the uMgungundlovu DM. The two maps above summarise the Msunduzi Municipality's SDF in terms of the surrounding SDFs in the uMgungundlovu District Municipality, as well as the Msunduzi Municipality in terms of the Provincial Growth and Development Strategy. The following is noted:

- The PGDS identifies the Msunduzi Municipality as a secondary node in the province, secondary to the eThekwini node.
- The PGDS identifies the N3 corridor as a Primary Corridor, with the roads linking the Municipality to the New Hanover, Richmond, and Impendle nodes as secondary corridors.
- The uMgungundlovu SDF identifies the Msunduzi Municipality as the Primary Node.

3.2.2.6.4 Nodes and Corridors

The Msunduzi SDF is based on a concept of a hierarchy of nodes, connected by a system of corridors. This is summarised in the tables below:

(i) NODES

Table 11: Development Nodes within the Msunduzi Municipality

MSUNDUZI NODES	
Description	 Guiding concepts for the identification and functioning of nodes: Optimise the use of existing bulk infrastructure and social facilities; Discourage Urban Sprawl; Ensure compact and efficient urban areas; Protect agricultural land with high production potential; Provide guidance to both public and private sector investors; Promote economic, social, and environmental sustainability; and Accommodate reasonable future demand for development. The SDF distinguishes various nodes in terms of whether they are: Existing and to be maintained at that level; Existing at a lower level, and to be extended and consolidated into a higher level node; New nodes to be introduced and phased in over time and as thresholds occur, but shown at the level which is ultimately intended.
Name	Description
The CBD Node	This is the heart of the City, and consists of the core and the frame surrounding it. The core contains the full range of uses associated with a CBD, while the frame accommodates transitionary uses at a lesser density. The so-called CBD extension node, which includes the recently developed Motor World, the Bird Sanctuary Site, the Midlands Mall, and the RAS is incorporated into the CBD Node.
Regional Multi- Use Nodes	This level of node includes a retail component between 75 000 m2 and 120 000 m2, and serves a regional function. In addition to retail, it can include a wide range of compatible uses. There is one existing Regional Multi-Use Node (Liberty Mall and the surrounding area). There is a new proposed Multi-Use Node that will be introduced at Shenstone, in the Edendale area.
Community Multi- Use Nodes	These serve a community function, and would have a retail component ranging from 25 000 m2 - 40 000 m2. These nodes also accommodate a wide range of compatible uses, and the SDF distinguishes between existing community nodes to be maintained at existing levels, those with the potential for expansion, and future nodes. Essentially, a new Multi-Use Community Node will be developed on the Edendale Road.

Name	Description
Neighbourhood Multi-Use Nodes	These operate at a neighbourhood level, and have retail components of between 5 000 m2 and 12 000 m2. These types of nodes occur in two forms, viz as mono use nodes that are pure retailing, and those that are multi-use. Again, the SDF identifies existing nodes that are to be maintained or expanded, and future nodes.
Focussed Multi-use Nodes	This node includes light industrial, warehousing, "big-box" retailing, and other uses not normally found in the other nodes, and is located at Camps Drift.
Administrative Node	This node is on the edge of the CBD Node and includes Greys Hospital, Carter High School, and the Town Hill Hospital Grounds, to which the Provincial Parliament is likely to relocate.
Rural Service Centres	Rural Service Centres (RSC's) are identified focal points from which a conglomeration of services would occur to serve the generally poor rural communities. These are main distribution centres, or higher order points (nodes) where services are concentrated. The RSC's are based on the Rural Service System model which seeks to spatially distribute economic activities (including effective service delivery) at an identified concentration point (node) along movement networks. The concentration of economic activities is based on mutual benefit i.e. shared infrastructure, shared market, and one activity producing an input for another activity. The range of services at a concentration point is determined by the threshold which it serves, and, therefore, the larger the threshold, the greater the range of activities. Most of these nodal points are located in the Vulindela area.
Large Scale Mixed- Use Nodes (Corridor Opportunity Areas)	Large scale mixed-use nodes are identified along the N3. These offer opportunities for integrated and coordinated mixed use developments, which include activities such as industry, offices, and commercial land uses. In terms of Provincial policy, development is to be encouraged along the Provincial Priority Corridor (N3) at appropriate locations. In the case of Msunduzi, this would be around the intersections where development potential still exists, i.e. the Lynfield Park/Lion Park and Richmond/Umlaas Road intersections. Local Area Development Plans would be required.

(ii) CORRIDORS

Table 12: Development Corridors within the Msunduzi Municipality

MSUNDUZI CORRIDORS		
Description	The main objectives of development corridors are to achieve integration, improve access, and provide investment opportunities whilst correcting imbalances created by the Apartheid planning system. It is suggested that through the use of development corridors, previously segregated areas can be connected, and opportunities created for economic development in previously disadvantaged communities, as well as the identification of alternative development axes.	
Name	Description	
Provincial Priority Corridor/Limited Access Mobility Road	This is the N3 which has been identified as a priority development corridor by the Provincial Cabinet. Its prime function is to serve as a long-distance movement corridor, and although the agglomeration benefits of the corridor should be optimised, this should not interfere with its primary function. Consequently, development will be located at or near some intersections.	
Activity Spines	Generally referred to as development corridors, these occur along major arterials leading into or from the CBD Node. A mix of complementary land uses including retail, office, entertainment, and residential; about half a street block in width fronting onto the arterials are to be encouraged, but only in specific areas.	

Name	Description
Arterial Roads and	These existing, improved, and proposed roads are aimed at improving accessibility,
Bypasses	alleviating congestion in and around the core, and opening up areas previously
	excluded from the local economy. In the case of future roads, the alignment shown is
	merely diagrammatic. The proposed road "matrix" comprises both major and minor
	arterial connections. A number of such roads is proposed in the Edendale, Imbali,
	Ashburton areas in order to improve connectivity to all parts of the city, especially new
	employment areas.

3.2.2.7 Broad land uses

A broad land use analysis was prepared as part of the SDF (2009) preparation process. This will be updated as more up to date information comes through from the review process. It must be noted that the percentages used to indicate land use trends, and to inform overall spatial planning at an SDF level, are an approximation. A more detailed land use audit is required at the Scheme level, which will follow the preparation of the SDF.

Table 13: Land Uses per Area Based Management Area

GENERAL LAND USE PERCENTAGES	The Grasslands takes about 31.7 of the land in the Municipality, followed by land used for settlement purposes at 29.1%, which includes formal settlements (14.8%), traditional settlements (14.1%), and informal settlements (0.5%). It is important to distinguish between the different types of settlements, as these would give an idea of the level of services available, and those that are required.
ABM	DESCRIPTION
CBD, ASHBURTON AND EASTERN AREAS ABM	Whilst the dominating land use is thornveld and grasslands, this area is predominantly used for residential purposes. The area is also home to some of the major employers in the city, namely government sector in the central area, and industries in Mkhondeni, Willowton, and Pelham. This area is therefore the largest rates contributor of the city. It is important to mention that this area plays a significant role in terms of transport infrastructure available in the city. This area accommodates the larger part of the N3, a primary movement corridor (also part of the Provincial Development Corridors) dissecting the city and the Edendale – Northdale development corridor; it is also home to the city's only airport and railway station. A concentration of education facilities is found in this area, the largest of them being the University of KwaZulu-Natal. The north-eastern part (Bellvue/New England) and south-eastern part (Ukulinga/Ashburton) has pockets of cultivated land.
NORTHERN	This area is mostly used for residential purposes, and the natures of the settlements are both
AREAS ABM	formal and informal, especially in the areas of Claridge and Copesville. Forestry/Plantations are the dominant land uses, especially to the west of the area with natural bush in between. The majority of commercial activities in the city are within this area, with pockets of industrial uses in places. There are also pockets of Active/Passive Open Spaces (the largest being Queen Elizabeth Park), and Cultivated Land (Copesville/Claridge). It is important to note that the largest health institutions in the city namely Grey's Hospital and Townhill Mental Institution, are within this area. The area is also part of the Edendale – Northdale development corridor and the N3.
GREATER	A large part of this area is used for residential purposes, even though it is largely under-
	serviced. The natures of the settlements are formal, informal, and traditional, even though
ABM	there is no tribal authority in this area. Even though there are industrial activities in the area, the majority of people are unemployed and are relatively poor. This area has been identified as one city's areas of priority spending, with initiatives already underway to support this, namely the Greater Edendale Development Initiative (GEDI) and the Edendale – Northdale Development Corridor. This area was also home to the Ndumiso Teacher's College, now home to Durban University of Technology (Imbali Campus) and Umgungundlovu FET, the Edendale Hospital, and the railway depot.

ABM	DESCRIPTION
VULINDLELA	This area is under traditional authorities, and is predominantly rural with largely traditional
ABM	settlements. There are, however, pockets of informal settlements. This area is the largest of the
	ABMs, and houses the majority of the city's population, yet it is highly underdeveloped and
	under-serviced. The majority of people are unemployed and dependant on government
	grants, while some live off the land through subsistence farming. There are also pockets of
	Active/Passive Open Spaces, Forestry/Plantation, Grasslands, and Natural Bush. The education
	facilities are scattered around area, and the lack of health facilities is clear.

3.2.2.8 Land use controls

The Municipality is working towards the roll-out of a wall-to-wall scheme for the entire municipal area. The Municipality currently has schemes covering the following areas:

Table 14: Existing Scheme Coverage

SCHEME NAME	COVERAGE (ha)
Pietermaritzburg	15,196.35
Ashburton	3,108.88
Plessislaer	214.44

As per the PDA, the Municipality has moved towards creating a wall-to-wall scheme by identifying four projects that have been recently initiated:

- 1. The extension of the PMB TPS to include the Greater Edendale area (as well as a revision of the Plessislaer TPS);
- 2. The extension of the PMB TPS to include the Sobantu area;
- 3. The drafting of a Local Area Plan for the South Eastern District (SED); and
- 4. The drafting of a Local Area Plan for the Central Area and CBD Extension Node, including an Inner City Regeneration Strategy.

There have not been, and are currently, no plans to regulate land use within the Vulindlela area, which falls under a tribal authority.

3.2.4 COMMUNITY BASED PLANS

Community Based Planning (CBP) is a methodology of increasing community participation in different wards. It is a workshop conducted in a ward, that results in the production of a ward plan, which will eventually feed to the IDP and SDF. Each plan consists of prioritized ward needs, and a group of approximately 100 people, representing different interest groups and sectors in the ward, meet for three days to develop these bottom-up plans.

The Municipality's ABM Unit is spearheading the programme. All wards where CBPs are underway correspond with those targeted by COGTA due to the presence of Community Development Workers. COGTA is part-funding the initiative with the Msunduzi Municipality. It must be noted that the Msunduzi Municipality does not have funds to roll-out CBP to other wards.

Table 15: SWOT

KEY ISSUES RELATING TO SPATIAL PLANNING:

- The need to develop the full suite of plans for the Municipality. Msunduzi has prepared an SDF, and is now embarking upon the preparation of Area Based Plans for the South Eastern Districts (SED) and Central Business District (CBD) areas, which are two of the pressure spots in the Municipality. There is a need to prepare similar plans for all ABMs in the Municipality.
- Meeting land use needs and identification of economic development potentials through the development of new residential areas, the development of new economic opportunity areas and nodal points, and restructuring of the CBD.
- New and infill development to be focussed so as to create a coherent system, mainly in the south-east quadrant of the Municipality;
- Integration of low income residential areas into the city with a focus on Shenstone and Ashburton;
- Encouraging new economic opportunities in identified growth areas and adjacent to major roads;
- Better integration within the city through the creation of east-west and north-south road linkages between major parts of the city;
- Urban densification in the periphery of the city, and adjacent to major nodes;
- A need to restructure the city through:
 - Creating a polycentric city, with new nodes and new economic opportunity areas;
 - Mixed- use activity spines between focus points;
 - Redressing imbalances with improved infrastructure and new economic opportunities; and
 - The development of a road system matrix.
- Creating a quality urban environment through reinforcing the public transport system, and creating a mix of housing types in different areas.
- Improving the sustainability of the city through the protection of environmentally sensitive areas, protecting
 areas of high agricultural potential, in situ upgrading of informal settlements, and upgrading residential
 areas with appropriate infrastructure.

STRENGTHS

- An SDF and the preparation of 4 ABM plans, and the development of a further 2 currently underway.
- City Development strategy in place and supported
- Some SDF Prgrammes and Projects are already underway

OPPORTUNITIES

- Working with the new IRPTN to link the city for efficiency.
- Community based plans.
- Urban renewal programme already in place.

WEAKNESSES

- Not all Key spatial plans have been developed.
- limited but growing sector department buy-in for implementation

THREATS

- The poor are located some distance from their places of employment or from job opportunities.
- Enforcement needs to ensure implementation of the SDF and scheme.

3.3 THE ENVIRONMENT

3.3.1 ENVIRONMENTAL MANAGEMENT FRAMEWORK

The Msunduzi Municipality, in partnership with the National Department of Environmental Affairs (DEA) and the KwaZulu-Natal Department of Agriculture, Environmental Affairs and Rural Development (DAEA&RD) developed, and in July 2010 approved, the environmental policy and strategic level plans listed below:

- An Environmental Status Quo Analysis (State of Environment) consisting of:
 - Flood Line Assessment
 - Geotechnical Assessment
 - Surface Water Resources
 - Wetland Mapping
 - Agricultural Resources
 - Biodiversity Assessment
 - Air Quality Assessment
 - Service Capacity Assessment
 - Socio-economic Analysis and Planning Policy Review
 - Cultural Heritage Assessment
 - Institutional Framework Assessment
- A Strategic Environmental Assessment (SEA)
- An Environmental Management Framework (EMF)
- A Strategic Environmental Management Plan (SEMP)
- An Environmental Services Plan (ESP)

The Msunduzi SEA takes the form of a sustainability framework which provides a set of criteria against which the Municipality can assess any policy, program, or plan, and is aimed at informing development planning and promoting and supporting sustainable development.

The EMF provides the following tools:

- Areas deemed suitable or unsuitable for development;
- Key environmental information to assist decision making on development applications;
- Environmentally sensitive areas requiring protection to ensure ecosystem service delivery; and
- Environmental goals and mechanisms to achieve the above

The SEMP provides an operational framework for the Msunduzi Integrated Environmental Management Policy by identifying specific Action Plans which will be operationalised through the IDP. The SEMP also provides a monitoring and evaluation strategy that will enable Msunduzi to measure progress towards meeting the environmental objectives identified in the SEA.

The Draft ESP identifies areas to be set aside for the maintenance of ecosystem goods and services, so as to maximise the ecological viability of ecosystems within Msunduzi and ensure the persistence of biodiversity. Methodology to evaluate Social Criteria are included.

The following table summarises the key environmental policies and plans that the Municipality has developed, or is currently in the process of developing:

Table 16: Msunduzi Environmental Management Unit: Policies and Plans

3.3.2 THE NATURAL ENVIRONMENT

"The Msunduzi Municipality, together with a broad range of stake holders, recently signed a Memorandum of Understanding (MOU) to implement the restoration and management of natural resources (Ecological Infrastructure) within the Greater uMngeni River Catchment. The overall objective of the project, known as the Umgeni Ecological Infrastructure Partnership (UEIP), is to improve the quality and quantity of water generated by the Msunduzi and Umgeni rivers through rehabilitation of wetlands, floodplains and streams and to improve land-use practices. Each of the three Water Services Authorities, uMgungundlovu District Municipality, eThekwini Metropolitan Municipality and the Msunduzi Local Municipality, in accordance with the MOU has identified pilot projects within their areas of jurisdiction. The Msunduzi Municipality has identified the rehabilitation and restoration of the Baynespruit - which is approximately nine kilometres in length with its headwaters in the residential area of Northdale and joining the Msunduzi River east of the residential suburb of Sobantu. This relatively small tributary does unfortunately contribute significantly to the poor quality of water within the catchment because of very high pollution loads including industrial effluent, solid waste as well as sewerage contamination due to damaged and poorly utilised sewerage and storm water infrastructure – as its key pilot project. This Project builds on the Msunduzi Municipality's existing Environmental Management Framework (EMF), Environmental Management Framework - Status Quo Report, Strategic Environmental Management Plan (SEMP) and Final Draft Strategic Environmental Assessment (SEA). The SEMP identifies various Action Plans to address the state of the rivers reporting as well as rehabilitation thereof to which this project will address by developing proposals, plans and mitigation strategies."

3.3.2.1 Topography, geology and soil capabilities

Pietermaritzburg is situated in the basin of the uMsunduzi River and its tributaries. An escarpment rises approximately 400m above the city to the West and North-West. Altitude within the Municipality ranges from 495 to 1795 metres above sea level, and the Municipality generally slopes from west to east. The mountains around the city bowl create a distinction between the urban and rural parts of the Municipality. While this has provided opportunities to manage the urban/rural interface, it has limited the city's expansion potential, resulting in the formation of a number of small urban hubs outside the city.

The predominant lithologies present in the Msunduzi municipal area are comprised of sedimentary rocks of the Ecca Group and Dwyka Formation, which form part of the lower Karoo Supergroup. The aforementioned sediments are extensively intruded by Jurassic post-Karoo dolerite sheets, dykes, and sills that intermittently outcrop across the entire municipal area. Each major lithological sequence exhibits a distinct set of geotechnical conditions. When combined with general slope characteristics of the area, these conditions can be expected to vary greatly within a region of similar underlying geology. The diversity of the geotechnical conditions in the Msunduzi Municipality brought about by the geology and geomorphology, combined with the hilly areas surrounding the Pietermaritzburg Central Business District (CBD), result in a very complex interplay between slope gradient and potentially unstable transported sediments and soils.

Soils within the Municipality vary greatly with the topography, and rainfall patterns and geology have resulted in the high agricultural potential of the area. Large portions of highly productive agricultural land have, however, been developed for other uses, such as housing. The remaining areas of highly productive agricultural land occur mainly on communally-owned land in the Vulindlela area, and poor agricultural practices in this area are affecting the productivity of the land. Map 27 shows the distribution of the bioresource groups (BRG's), as identified by the Department of Agriculture. The BRG's provide further detail of the spatial distribution of both soil types and land capability.

Moist Highland Sourveld, indicated as a dusty pink in map 27, occurs only in a small portion of the Municipality, along the western border near Elandskop. Soils in this portion of the Municipality are relatively deep, highly leached, and strongly acidic. Fertility is low, but physical properties are favourable, which result in a short growing season. Soils and aspect in this area both have a marked effect on the species composition and the productivity of the grassland. Much of the Vulindlela area of the Municipality is characterised as Moist Midlands Mistbelt. The potential of the soils of this BRG are high, in spite of the fact that they are leached and the inherent nutrient status is very low, with problems of phosphorus fixation and aluminium toxicity. The high potential of the arable areas of this BRG has meant that little value has been placed on the veld, and veld management practices have been poor, including excessive burning, particularly during the season of active grass growth, followed by continuous selective overgrazing. These practices have largely destroyed the palatable grass species, and resulted in grassland of low pastoral value. Moist Coast Hinterland Ngongoni Veld, indicated in dark red, occurs in the northern parts of the Municipality, including Sweetwaters, Raisethorpe, Copesville, and Bishopstowe. Soils of the area are acidic and leached, and injudicious burning, coupled with selective overgrazing, have resulted in a very poor quality veld cover. The Dry Coast Hinterland Ngongoni Veld bioresource group occurs in over 20 % of the Municipality, and reaches from north to south down the middle of the Municipality. This bioresource group has limited potential due to low rainfall. A past history of early burning, and in fact burning at any time of the year, coupled with selective overgrazing as the grass emerges, has resulted in a particularly poor quality veld cover. The Coast Hinterland Thornveld covers mainly the area in which the city occurs. The bioresource group is known for its floristic richness, but drastic deterioration in the quality of the veld has resulted from the common practice of burning throughout the year to promote a flush of fresh growth followed by selective overgrazing. Where both soil and water are suitable, the potential exists for the production of sugar cane, maize, and vegetables within this area. The Valley Bushveld bioresource group occurs in a small area in the far eastern parts of the Municipality. The low and erratic rainfall of this BRG generally precludes any type of farming other than livestock production that is based on the veld, except for select areas of arable land adjacent to a reliable source of water from a river. As sweetveld, grazing can support beef animals throughout the year. Goats can effectively utilise the available grazing in summer, but need to graze during much of the winter, when trees lose their leaves. Wildlife should play an important role in the economy of the Valley Bushveld.

3.3.2.2 River and wetlands

Msunduzi Municipality is almost entirely one catchment area. This has benefits in terms of catchment management, but also means that any impact within the catchment will affect the entire Municipality. The majority of the water produced in the Msunduzi catchment goes towards servicing/supplementing Durban's water requirements, while Msunduzi sources the majority of its water from the Umgeni catchment. The uMsunduzi River (and its various tributaries) is an important feature of the municipal landscape, and significant proportions of the Msunduzi Municipality have catchments that are currently in either a fair, poor, or seriously modified ecological state. Catchments within the Municipality that are transformed have reached their full supply capacity. Water quality varies between catchments, but the impact of the city is evident in the decrease in water quality that occurs as it passes through the urbanised portions of the Municipality. Rivers within Msunduzi are the source of a number of goods and services, and these include:

- Water supply for industry, domestic use, agriculture, and livestock watering;
- Dilution and removal of pollutants from agricultural, domestic, and industrial sources;
- Reducing sediment inputs to coastal zone;
- Decomposing organic matter;
- Storing and regenerating essential elements;
- Provision of building materials in the form of clay bricks;
- Grazing fodder during dry seasons;
- Recreational and subsistence fishing;
- Providing aesthetic pleasures;
- Storm water management and control;
- Sites for recreational swimming;
- Recreational sport, such as canoeing, and income generated in the area from events e.g. Dusi Canoe Marathon:
- Open spaces within the city, such as Alexandra Park;
- Environment for contemplation and spiritual renewal; and
- River-based educational activities.

The extent of wetlands has declined significantly, particularly in developed areas. Wetlands have been transformed, and most of the remaining wetland areas are in a degraded state due to inappropriate land use and inadequate catchment management. There is a lack of ground level information regarding the functionality of most of the wetland habitats within Msunduzi, and as part of the Status Quo Phase of the EMF, a wetland specialist study was undertaken that mapped a total of 1049 wetlands, covering an area of approximately 1001 Ha. Most wetlands within the Municipality are small, with an average wetland size of approximately 1 Ha. While the condition of wetlands was not specifically evaluated as part of the wetland specialist study, observations made during ground verification suggest that most of the wetlands that remain are in a degraded state. The network of wetland habitats do, however, form part of the system that generates the goods and services as listed above. Wetlands also provide unique goods and services such as storm water attenuation.

Water quality monitoring in streams and rivers within the municipal area is largely undertaken by Umgeni Water. Monitoring results confirm poor to very poor levels of water quality, with this important resource classified as unsuitable of human consumption without treatment, and largely unsuitable for recreational use. Residents who depend upon or make use of water harvested from these highly polluted riparian areas for drinking, cooking, and irrigation purposes may be exposed to severe health risks. Pollution and degradation of water courses also has a significant negative impact on indigenous biodiversity, including aquatic organisms, riverine vegetation, animals, birds, and insects.

Poor or unavailable solid waste removal services within certain areas also results in significant levels of pollution, as residents often treat riparian areas as convenient for the disposal of refuse.

Rapidly expanding development, and an increase in densities, is resulting in increased storm water run-off. This, coupled with the destruction, degradation, and reduction of wetlands and inappropriate use of flood plains, has significantly increased the risk of flooding, damage to infrastructure, and potential loss of life. Preliminary results on the potential effect of Climate Change predict that annual rainfall within this region is likely to remain fairly constant, with fewer storm events of a significantly higher intensity and severity. Higher flood peaks (flash floods) can therefore be anticipated, increasing the risk for communities living in flood prone areas such as Sobantu, Imbali, Allandale, Rosedale, Oakpark, Townbush Valley, and Prestbury. Measures to protect and rehabilitate wetlands, streams, and flood plains, as well as measures to manage and reduce storm water run-off, are necessary to limit potential impacts.

Water quality monitoring in streams and rivers flowing through the municipal area is carried out by Umgeni Water, but also by the Municipal Environmental Health Section. Almost without exception, this monitoring indicates poor levels of water quality, with important resources being classified as being unsuitable for human consumption without treatment, and, to a large extent, unsuitable for recreational use. Many residents depend directly on water harvested from these highly polluted streams and rivers for drinking, cooking, and irrigation, which have direct, and on occasion, severe health implications. Pollution and degradation of water courses also has a significant negative impact on indigenous biodiversity, including aquatic organisms, riverine vegetation, animals, birds, and insects.

3.3.2.3 Climate and air quality

The climate and local weather in Msunduzi are strongly influenced by topography; the higher lying areas in the north and west of the Municipality are cooler and receive more rainfall. Average annual temperature varies between 16.3oC and 17.9oC. Msunduzi falls within a summer rainfall area, characterized by dry winters and wet summers, with thunderstorms being very common in summer. Average rainfall within the Municipality varies between 748mm and 1017mm per annum.

Msunduzi is located in a hollow formed by the valleys of the uMsunduzi River and its tributaries. On clear winter nights, katabatic flow occurs, resulting in the movement of air from upslope areas down to the city bowl, much like water. This fills the valley floor with cold, dense air, creating an inversion that does not allow pollutants to escape. This air movement also brings pollutants from the entire Municipality into the valley, where it remains trapped by the inversion layer. The majority of industrial development within Msunduzi has been established within this inversion layer, as this land is both flat and in close proximity to both road and rail transport routes. As a result, the city suffers short-term peaks in pollution, despite relatively few heavy industries. Reported trends in air quality are as follows:

86

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

- There has been a decreasing trend in smoke generation over the last 30 years.
- Sporadic ambient monitoring of sulphur dioxide concentrations indicates decreases at two of the six sites
 while all the other monitoring sites show an increase.
- An Increase of pollution within the Northdale-Willowton basin (Baynespruit Valley) has been noted.
- High ambient benzene concentrations that exceed health standards were recorded. Benzene emissions are
 usually associated with vehicular emissions.
- The presence of sulphurous compounds (sulphur dioxide and/or hydrogen sulphide) has been suggested
 as the cause of most of the public's odour complaints.

Within Msunduzi, there are four main sources of air pollution:

- An increase in vehicle volumes and traffic congestions in peak hours, particularly in the CBD and many of the arterial routes;
- A large majority of industries operating old and dated technologies that have higher emissions than modern alternatives;
- Formal and informal settlements that use coal and firewood for heating and cooking; and
- Burning of sugar cane and brush wood.

3.3.2.4 Biodiversity

The topography, geology, and other land characteristics in Msunduzi give rise to diverse habitats and species richness. High levels of transformation have, however, resulted in a significant loss of natural habitat and hence a range of species. A biodiversity specialist study (conducted as part of the Status Quo Phase of the EMF) identified 20186 ha (or 31.7% of the municipal area) as having conservation importance. However, only 853.5 ha (or 1.35% of the Municipality) is formally protected.

A total of 56 animal species, 20 plant species, and 8 vegetation types are regarded as being of particular biodiversity significance within Msunduzi. A high number of rare or threatened species are present, with at least 50 endemic species occurring. For example, at least 28 species of frogs have previously been recorded within the municipal region, although it is not certain that all of these still exist here. Most are red data species.

Natural ecosystems deliver a range of free goods and services which have a direct and significant impact on the quality of life of residents, and on the development of a sustainable city. These goods and services include: recreation, genetic resources, raw materials, food production, refugia, biological control, pollination, waste treatment, nutrient cycling, soil formation, erosion control, water supply, water regulation, disturbance regulation, climate regulation, and cultural opportunities. Indiscriminate and/or poorly planned and sited development, illegal dumping, unsustainable utilisation of natural resources, and the uncontrolled encroachment of alien invasive plant and animal species all have a significant negative effect on the ability of natural systems to deliver these goods and services.

The Draft Ecosystem Services Plan identified a land footprint of 22 000 hectares, portion of which is currently undergoing refinement and ground truthing. Five key areas are currently being assessed, as below, with the sixth area (Greater Edendale) to come on stream with the appointment of a Consultant. This appointment process is underway.

Key Area	Status	Time Frame
Key area 1: Bisley Valley Nature Reserve and	Underway.	To be completed by 30 October 2016
the Upper and Lower Mpushini Valley – Total		
extent of area is 5 900ha		
Key area 2: Ferncliffe Nature Reserve,	Completed	
Clarendon and Worlds' View – Total extent		
of area is 2 600ha.		
Key area 3: Albany Park, Sweetwaters – Total	Completed	
extent of area is 450ha		

Key Area	Status	Time Frame
Key area 4: Hesketh Conservation Area and Sobantu – Total extent of area is 1 480ha Status: property and biodiversity data collected	Completed by 2030	
Key area 5: Bishopestowe – Total extent of area is 1 853ha	Project boundaries determined	To be completed by 2030
Key area 6: Greater Edendale area - 10 000ha	Underway.	To be completed July 2016
Key area 7: Umlaas road/Thornville area – total extent of area is 4 100ha	Project boundaries determined	To be completed by 2018

This is an on-going, large and detailed process with the six areas identified above being Phase 1. A public consultation process early in 2015 will follow the completion of Phase 1 during which Phase 2 will commence.

3.3.3 THE URBAN ENVIRONMENT

(i) CULTURAL HERITAGE

Msunduzi has an extremely rich cultural, architectural, historical, and archaeological resource base that collectively makes up the heritage resources of the area. A Cultural Heritage Specialist Study identified and mapped a total of 646 heritage resource points, and 32 heritage resource zones, within the Msunduzi Municipal area. These consisted of architectural resources, archaeological resources, as well as historical and cultural resources.

Results of the mapping revealed that the majority of heritage resources located within the Msunduzi Municipal area consist of architectural resources, in the form of built structures (mostly buildings). These are concentrated within the Pietermaritzburg CBD and its surrounding suburbs, as well as in the Georgetown area of Edendale. A significant number of historical and cultural resources are also present within the Msunduzi Municipality. These consist of places of worship such as churches, mosques and temples, cemeteries, as well as open spaces, areas of political significance, and areas of past economic significance, to mention but a few. A general decline in the condition and quality of the area's identified heritage resources is noted.

As part of the Heritage Resource Study, a number of archaeological sites were also identified in the Msunduzi Municipality. However, as no systematic archaeological survey of the municipal area has been undertaken to date, the extent of the Municipality's archaeological resource base is largely unknown.

A significant lack of formally recognised historical and cultural sites of traditional African, Coloured, and Indian cultures within the Msunduzi Municipal area is notable, and is a serious gap in the available data.

(ii) URBAN GREENING AND TREES

Maintaining a 'green' built environment is important for both the image of the city, and the social and environmental health of residents. There is a need to focus on planting programmes in the CBD to replace storm-damaged and old/dangerous trees with indigenous alternatives that are hardy and drought tolerant.

(iii) SOLID WASTE POLLUTION

Widespread illegal dumping of domestic and industrial waste, as well as indiscriminate littering, is widespread in the city. Not only does this have a negative impact on the natural environment (including streams, open spaces, vacant lots, buildings, roads, and streets), but it also has a negative social impact, as well as direct health implications on residents. The costs of clearing illegally dumped waste is significantly higher than managing this waste at source, and in approved landfill and garden refuse sites.

3.3.4 COMMUNITY INVOLVEMENT

The Msunduzi Municipality has created opportunities for civil society to participate in its affairs through the IDP process and the LA21 Forum. There are a number of civil society groups and NGO's that are actively involved with issues of water, biodiversity conservation, air quality, and climate change. The DWA Catchment Management Forum also promotes society's participation in environmental decision making. Civil society plays an active role in biodiversity conservation through at least nine conservancies and trusts. There is, however, no mechanism or structure to promote collective participation in biodiversity governance in the Municipality. Business and industry, through the Pietermaritzburg Chamber of Commerce, has created the Air Quality and Environment Forum, to promote participation in air quality and environmental governance. There are various projects and activities that promote sustainable land management and agriculture in Msunduzi.

ENVIRONMENTAL HEALTH

In terms of Environmental Health and Social Services in the Municipality, Environmental Health (defined as Municipal Health Services by the National Health Act, 2003 (Act No. 61 of 2003)) entails the following:

- Water quality monitoring
- Food control
- Waste management
- Health surveillance of premises
- Surveillance and prevention of communicable diseases, excluding immunisations
- Vector control
- Environmental pollution control
- Disposal of the dead; and
- Chemical safety;

It excludes port health, malaria control, and control of hazardous substances. The Municipality fulfils these functions in terms of the Act.

3.3.5 CLIMATE CHANGE

3.3.5.1 Introduction

The Msunduzi IEMP and the Msunduzi SEMP informs part of the climate change policy as they were developed to assist / guide the municipality towards achieving sustainable development. Both documents include numerous key aspects, action plans, strategies and approaches which have been identified for long term implementation, to promote and encourage sustainability and ensure the conservation / preservation of natural resources. The Climate Change Policy is aimed at ensuring Municipal Business Units are compelled to take environmental impacts of their activities / plans into consideration and ensure that there are suitable strategies in places which enable cooperative and coordinated environmental management throughout Municipal structures and activities.

The Climate change policy builds on the Msunduzi Municipality's existing Environmental Management Framework (EMF), Environmental Management Framework – Status Quo Report, Strategic Environmental Management Plan7 (SEMP) and Final Draft Strategic Environmental Assessment (SEA); however, the primary aim is to provide a well-defined direction for responding to climate change risks and challenges. The main goal of this policy is to ensure that Msunduzi's Carbon footprint is reduced and the city is able to adapt to climate change related impacts and ensure there are options available when decisions need to be made regarding adaptation and mitigation. The relevance, effectiveness and implementation of this policy will be managed through on-going monitoring, evaluation and review to ensure it reflects the most recent developments in climate change science and technology, and delivers on the Municipality's statutory responsibilities.

The Climate Change Policy seeks to unpack core issues and identifies adaptation and mitigation measures (which are discussed in greater detail in the Climate Change Adaption And Mitigation Strategy) in greater detail, to be implemented (i.e. each adaptation and mitigation option would be case / site specific) which would contribute to the reduction of climate change related impacts on each of the sectors mentioned above.

89

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

3.3.5.2 Adaptation

Climate Change adaptation involves managing the unavoidable and developing strategies, which are practical and implementable, in order to reduce the impacts of extreme weather events. Even if emissions are stabilized relatively soon, climate change and its effects will last many years, and adaptation will be necessary (Farber, 2007). Climate change adaptation is especially important in developing countries since those countries are predicted to bear the brunt of the effects of climate change (Daniel, 2008). The types of adaptation measures adopted will depend on the impact of climate change on particular regions and economic sectors, on predicting and quantifying the type and scope of potential impacts, and on increasing the capacity to adapt to these.

South Africa's primary approach to adapting to the impact of climate change is to strengthen the nation's resilience. This involves enhancing the integrity of ecosystems, improving natural and potable water quality, improving health care, reducing greenhouse gas emissions, improving waste management, strengthening infrastructure, preserving agriculture & food security, creating climate change awareness and improving governance. This strategy requires ensuring that national, provincial and local government embrace climate change adaptation by identifying and putting into effect appropriate strategies. Adaptation strategies include adequate support for the vulnerable; equitable disbursement of financial assistance; significant investment in new adaptive technologies and techniques in the water, biodiversity, waste, agricultural, energy, health, and infrastructure sectors; early warning systems for adverse weather & pest and disease occurrence; disaster relief preparedness; and significant investment in conserving, rehabilitating and restoring natural ecosystems to improve resilience.

The Msunduzi Climate Change Adaptation & Mitigation Strategy (currently being drafted) includes adaptation measures in the form of action plans relating to 9 different goals. These goals each identify with a key theme, namely: Biodiversity, water, health, energy, waste management, infrastructure, agriculture & food security, climate change awareness & research and governance. This will ensure that Msunduzi improves its resilience against the effects of climate change. The adaptation strategies focus on ensuring that Msunduzi and its communities are able to identify and implement strategies and plans which are implementable and realistic when faced with threats associated with direct and indirect impacts of a changing climate.

3.3.5.3 Mitigation

Climate Change mitigation focuses on reducing the amount of GHG's that are emitted into the atmosphere. This action will help to avoid future impacts of climate change beyond that which is already projected, and involves implementing strategies, which would reduce and limit the current GHG percentages. An example of such strategies would be the monitoring of harmful gases emitted throughout the city, with investigations being conducted with regards to the strategies which can be implemented in order to reduce these emissions.

The mitigation strategies contained in the Climate Change Adaptation & Mitigation Strategy are aimed at reducing the severity of, or avoiding irreversible climate change impacts altogether, by ensuring that certain strategies are implemented and / or are evaluated. Examples of such strategies are greening programmes and renewable energy use.

3.3.6 Environmental management Staff complement

The organisational structure for the Environmental Management Unit has 13 posts as follows:

Manager Environment: 1 post
Scientist Open Space Planning: 1 post
Scientist Planning and Policy: 3 posts
Technician Training and Education: 1 post
Scientist Impact Assessment: 5 posts
Scientist Climate Change: 1 post
Administration Officer/GIS: 1 post

90

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Although the 2013 structure has not been implemented there is a legislative requirement for the Municipality to address and manage environmental compliance and planning issues and as such the following staff are currently employed:

Manager Environment: 1 permanent staff member acting in that position pending placement

Scientists: 4 scientists on short term Contracts (not permanently employed)

Scientist: 1 scientist on Work Back Bursary

Administration Officer: 1 Contact employee (Short term Contract, nor permanently employed)

Environmental Intern: 1 Intern for 2016

Table 17: SWOT

KEY ISSUES RELATING TO THE NATURAL ENVIRONMENT INCLUDE:

- Clearing of alien-invasive plants as they impact on biodiversity, agricultural land productivity, and water
 quality and supply. It is also a legal requirement, as the Municipality is a land owner, and is thus required to
 eradicate all Category 1 invasive species.
- Loss and degradation of key wetlands due to urban sprawl, overgrazing, poor sewerage and waste water management.
- Litter and illegal dumping in and around urban areas.
- Pollution of natural water courses.
- Flood risk heightened due to climate change impacts and degradation of natural environment.
- Seasonally high air pollution levels caused by inversion layer, as well as through industry and agriculture emissions.
- Pollution caused by vehicular emissions at peak periods resulting in high levels of carcinogens.
- Compliance with international and national carbon reduction targets.
- The need to mainstream climate change into municipal functions, and for the Municipality to proactively adapt to the changes brought about by climate change.
- A need for urban greening and indigenous planting programmes in the CBD, and in new commercial, industrial, and residential developments.
- The need to rehabilitate degraded land caused by inappropriate land uses.
- Loss of strategically located agricultural land to urban sprawl.
- The need to identify communities that are at risk of environmental impacts.
- High levels of noise, impacting on the social environment.
- Limited institutional capacity within the Municipality to deliver on the legal mandate and priority action
 plans emanating from the Strategic Environmental Management Plan.
- A need for greater public participation in environmental matters through the reinstatement of the LA21
 Forum.
- A need for greater public access to environmental policies and plans through media like the internet.
- A need for training of Councillors, officials, and the public on principles of sustainable development.

STRENGTHS

- Functional GIS spatial analysis system
- Qualified staff registered with professional bodies
- Good co-operative governance with other spheres of government

OPPORTUNITIES

- The SEMP has a number of actions plan already outlined for implementation
- Environmental Education and Training
- Rehabilitation of ecological infrastructure

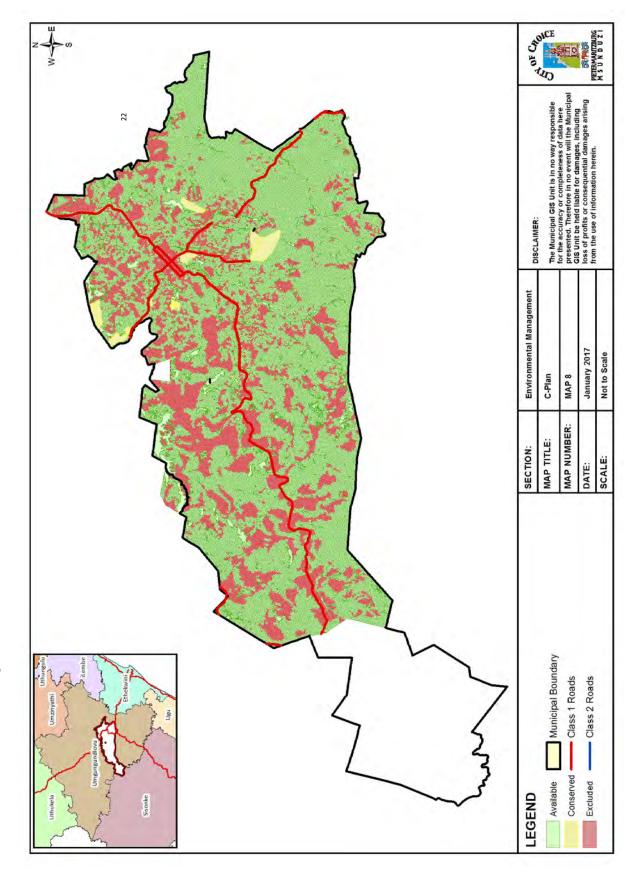

WEAKNESSES

- Lack of vehicles
- Lack of human resources Environmental Management Unit currently consists of 1 permanent and 6 contract staff

THREATS

- Development in sensitive areas such as riparian areas
- Lack of budget

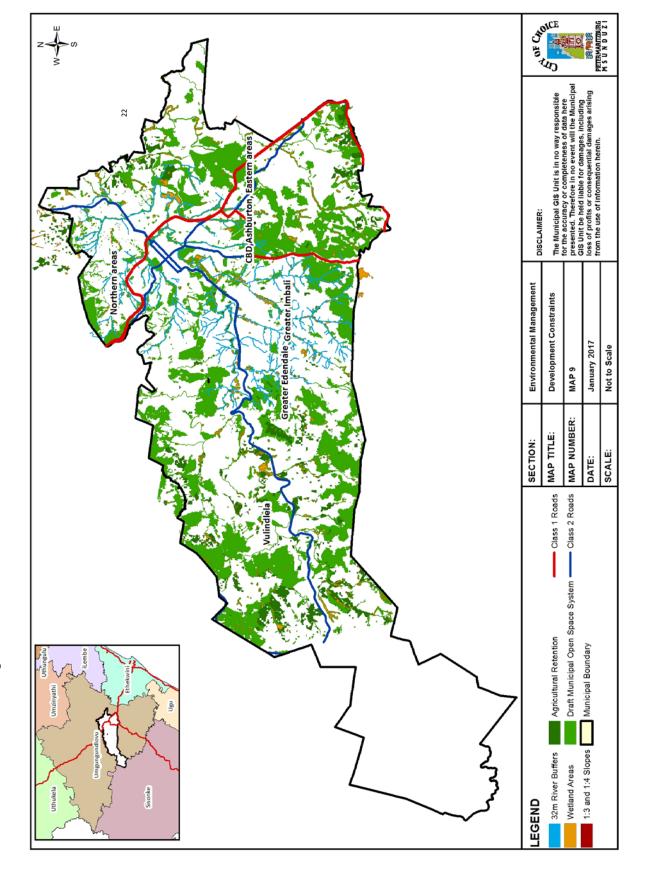

MAP 8: Evenviromental Management: C-Plan

MAP 9: Evenviromental Management: Development Constraints

20 YEARS ON AMERICAN

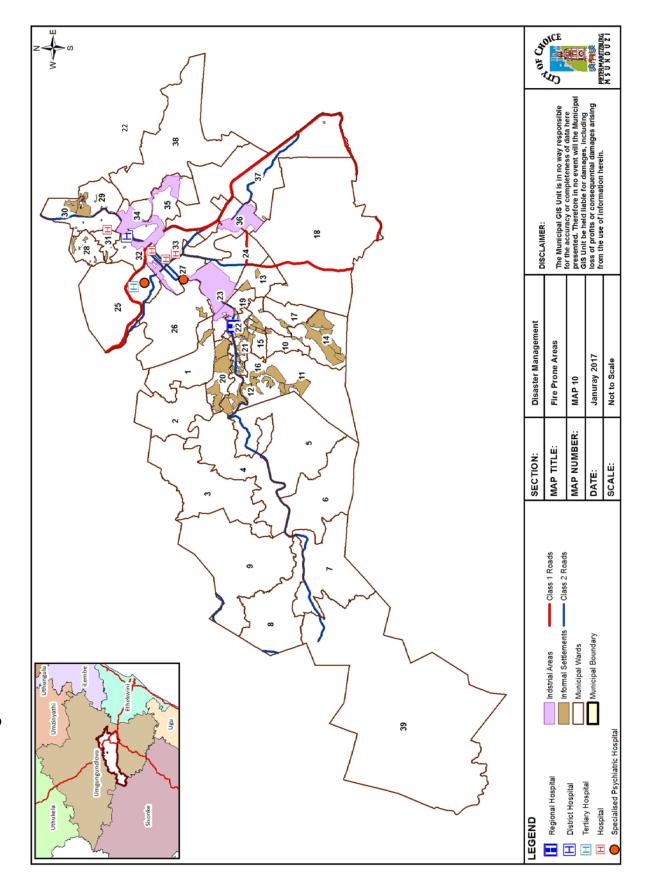

INTEGRATED DEVELOPMENT PLAN

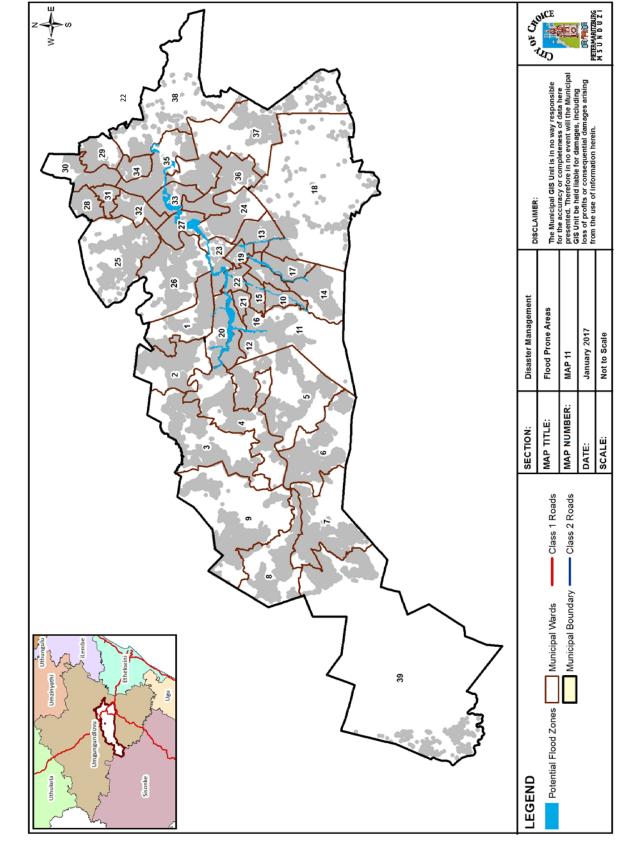

FOR 2017/2022 FINANCIAL YEARS

MAP 10: Disaster Management: Fire Proof Areas

3.4 DISASTER MANAGEMENT

3.4.1 INTRODUCTION

The Disaster Management Act (57 of 2002) clearly outlines initiatives that must be undertaken to make sure that organs of state comply with the Act and policy framework on disaster management. The Msunduzi Municipality is prone to different types of disasters, both natural and human made. It is therefore important to understand that natural disasters cannot be prevented, but that the least the Municipality can do is to develop strategies to mitigate the effectiveness of such natural disasters. In addition, it is important to note that human disasters can be prevented by making sure that continuous sharing of information takes place with the community at all times.

The uMgungundlovu District Municipality has prepared a draft Disaster Management Plan, which the Msunduzi Municipality has been part of. The Municipality has developed an in-house review of the Consolidated Disaster Management Framework and Disaster Management Plan.

3.4.2 MUNICIPAL INSTITUTIONAL CAPACITY

(i) DISASTER MANAGEMENT

Disaster Management, as a discipline, is changing from being reactive to being proactive. To achieve this, it is necessary to determine the risks that communities are faced with, so as to provide a safe environment, and to provide relief assistance for the affected. During the 2016/17 financial year, risk analysis workshops were conducted and the raw data processed. The Disaster Management plan was approved during March 2015 by the full council.

Relief supplies and assistance were given to those affected by storms, fires, and other disasters. Relief is in the form of temporary accommodation, food rations, and waterproofing, and its noted that the number of incidents has decreased over the last two years.

 During the annual financial year 2015/2016, 200 incidents responded to affected 12506 community members, cost emergency relief R1467592.00 Community and school Awareness campaigns conducted reached 6000 community members in Msunduzi area.

KEY ISSUES RELATING TO DISASTER MANAGEMENT INCLUDE

- The need to improve the emergency services communications centre;
- The need to improve the reporting of all emergencies (ie. fire, traffic, security, disaster);
- Despatch of emergency resources to emergency incidents must be in compliance with national standards relating to emergency response;
- There is a need for disaster response plans for prioritised high risks; and
- The need for the development of a training school for, amongst other things, rescue training.

(ii) FIRE SERVICES

The purpose of this unit is as follows:

- Fight or extinguish fires, and rescue of life or property from a fire or other danger;
- Prevent the outbreak and spread of fire, and the protection of life or property from fire or other threat; and
- Basic fire and life safety training.

During the 2013/2014 financial year, a total of 1603 fires were attended to. During the 2014/2015 financial year, 1628 fires were attended to. Average response times in urban areas have increased from 10 minutes to during 2013/2014 to 14 minutes in 2014/2015 financial year. In rural areas, the average response time for both financial years was 25 minutes.

96

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

KEY ISSUES RELATING TO FIRE FIGHTING:

- The need for two fire stations, one each in Northdale and Vulindlela, to comply with response times in terms of SANS 10090: 2003:
- The replacement of critical fire fighting vehicles and related equipment;
- Increased staffing, to SANS 10090: 2003 standards;
- All-weather parking facilities for fire fighting vehicles; and
- Public education on basic fire prevention and life safety, with particular focus on residents of informal settlements.

(iii) TRAFFIC SERVICES

The Department helps ensure a safe environment, and improves quality of life through effective traffic policing combined with efficient use of security officers. Traffic services include:

- Control and regulate all forms of traffic, promote education and training in road and traffic safety;
- Attend scenes of motor vehicle collisions and assist with traffic control, removal of injured persons, and removal of vehicles so that traffic may flow freely again; and
- Eliminate points of congestion, obstruction, hindrance, interference, or danger to vehicles and pedestrians.

Other areas of service provision currently requiring attention include by-law enforcement and crime prevention.

The Municipality is currently undertaking a study to ascertain the number of traffic personnel require to fulfil their legal mandate.

There were 682 accidents during the 2012/13 financial year, which increased to 739 during the 2013/14 financial year.

KEY ISSUES RELATING TO TRAFFIC SERVICES INCLUDE:

Shortage of employed personnel; Reliability of the traffic services fleet; and Human resource issues relating to change management, training, staff morale, and disciple.

(iv) SECURITY SERVICES

The Security Services Section's responsibilities include:

- Protection of municipal assets;
- Access control to municipal buildings;
- Protection of municipal forests and nature reserves;
- Serving of municipal notices (ie. Illegal occupations, illegal dumping);
- Escorting municipal officials on disconnections (ie. water and electricity); and
- Enforcing by-laws with regard to illegal trading.

The Municipality is also part of the Safe City Pietermaritzburg initiative. Key objectives of this initiative are to provide camera surveillance of certain areas within the Msunduzi Municipality, so as to encourage a crime-free environment for the benefit of Msunduzi communities, and to attract investors and promote development, tourism, and job creation. Partners in the initiative include:

Table 18: Safe City Pietermaritzburg Roleplayers

ROLE PLAYER	RESPONSIBILITY
The Msunduzi	The Municipality has provided Operational and Capital Budget since 2002; and
Municipality	The Municipality provides response teams for traffic and by-law infringements.
The SA Police Services	 Provides significant Business Skills input at no cost to initiative;
	 Provides funding for the Royal Agricultural Show public engagements as well as equipment needs; and
	 Provides funding for SMS Safe City Project (DIAL 083676 SAFE).
The National	Provides 24/7 presence in control room;
Prosecuting Authority	 Provide rapid response to crime incidents detected on screen;
	 Provide guidance to operators in respect of Criminal Procedures Act requirements; and
	Provide daily crime stats for operational purposes.
Business Fighting Crime	Provide dedicated court for all CCTV related cases;
	Provide specialised prosecutor for CCTV cases; and
	Provide monthly feedback and overview of previous month's criminal cases.

KEY ISSUES RELATING TO SECURITY SERVICES INCLUDE:

- Human Resource issues relating to current levels of skills and training needs.
- Staff suitability for accreditation as Peace Officers;
- Reliability of the municipal fleet;
- Key challenges relating to Safe City include:
 - Obtain capital funding to extend the existing system into new areas of the Municipality, and to assist the Msunduzi Municipality in the enforcement of Traffic and other general laws;
 - Maintain automatic number plate recognition operations in conjunction with the Traffic Department, despite a severe manpower shortage in the Department;
 - Increase the number of by-law arrests for infringements detected by camera, which requires a dedicated Municipal Security Response team;
 - Keeping camera down-time below 1%, despite financial constraints;
 - Maintain close cooperation with all Safe City Partners;
 - Maintain a high level of control room vigilance;
 - Investigate possibilities to increase Safe City's income revenue; and
 - Upgrade existing cameras and Control Room technology in order to maintain and grow the required performance levels.

3.4.3 RISK ASSESSMENT

The following classification of hazards has been developed for the Municipality. These will be finalized in the Disaster Management Plan.

Table 19: Disaster Risk Priority

Disaster risk priority	Risk type
1	Fires (shack)
2	Fires (veld)
3	Flooding
4	Severe weather conditions
5	Hazardous materials (storage, transportation, and usage)
6	Lightning incidents
7	Special events (as an on-going processes)
8	Mission Critical Systems Failure (MCSF)
9	Transportation accidents
10	Building collapse

98

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

3.4.4 RISK REDUCTION AND PREVENTION

Prevention and mitigation strategies identified in the District Disaster Management Plan include:

- The development of an early warning system for natural disasters such as floods, hailstorms, and droughts;
- Prevent forest fires by having fire breaks;
- LED Programmes;
- Upgrade and maintenance of infrastructure;
- Develop protocols for specific risks;
- Road and sidewalk maintenance;
- Upgrade and maintenance of landfill sites;
- Public awareness campaigns;
- Replacement of old vehicles and machinery;
- Establish rehabilitation centres:
- Develop poverty alleviation strategies;
- Develop job creation programmes (ie. Cleaning campaigns); and
- Implementation of regular patrols.

Several of these issues are addressed through the IDP's strategic framework.

Table 20: SWOT

KEY ISSUES RELATING TO THE DISASTER MANAGEMENT INCLUDE:

- The need for the development of an emergency services communications centre;
- The need for one emergency number for reporting on all emergencies (ie. fire, traffic, security, disaster);
- Despatch of emergency resources to emergency incidents must be in compliance with national standards relating to emergency response;
- There is a need for disaster response plans for prioritised high risks; and
- The need for the development of a training school for, amongst other things, rescue training.

STRENGTHS

The in-house review of the Consolidated Disaster Management Framework and Disaster Management Plan.

WEAKNESSES

- Ageing infrastructure and equipment to deliver on the legal mandate.
- Obtain capital funding to extend the existing system into new areas.

OPPORTUNITIES

- The development of an in-house Disaster Management Plan.
- The establishment of two new fire stations to bring response times down and extend services to previously un-serviced areas.

THREATS

- Human Resource issues relating to current levels of skills and training needs.
- · Staff suitability for accreditation as Peace Officers.

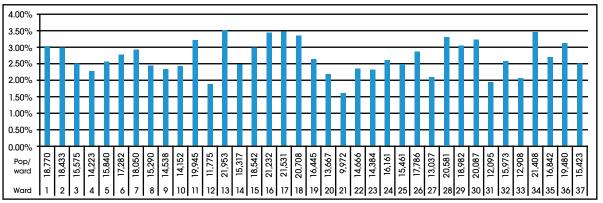

C2-DEMOGRAPHIC CHARACTERISTICS

3.5 POPULATION

The recent Census (2011) indicates that the population for the uMsunduzi Municipality has risen from a total of 552 837 people in 2001, to 618 536 people in 2011, which represents an average annual growth rate of 1.12 percent per annum. The Census also indicates that the number of households has risen from 130 292 in 2001, to 163 993 in 2011, although the average household size has decreased from 4.0 people per household in 2001, to 3.6 in 2011.

The table below indicates the population per ward in the Municipality. The wards with the highest populations include wards 13, 16, 17, 18, 28, 30, and 34, each with more than 20,000 people per ward.

Figure 5a: Population per municipal ward as a percentage of the total population (StatsSA, 2011)

Stats SA Census 2011

The Census figures also indicate that there are more females (54.55%) than males (45.45%) in the Municipality, a trend that has strengthened since 2001. The number of women-headed households has also increased since 2001 from 44.5% to 45.2% of all households in 2011.

Census (2011) also indicates that the majority (68.4%) of the population fall within the economically active age cohorts (15 to 64 years), with 26.6% being under 15 years of age, and 5% being 65 years and older. A further positive trend is that the dependency ratio of people within the 15 to 64 age cohort has decreased from 51.5% to 46.2%, although this figure still remains high.

In terms of education levels, Census (2011) indicates that the percentage of adults over 20 years with no schooling has decreased from 10.9% in 2001, to 5.5% in 2011. The percentage of adults with a matric qualification has also increased from 24.5% in 2001 to 33.7% in 2011. Residents with qualifications higher than a matric have also improved, from 9.2% in 2001 to 13.1% in 2011. What is worrying though, is the number of children of school-going age that are not attending classes. This figure is 62 737 children (2011), which is marginally down on the figure of 66 789 children in 2001. Aside from eThekwini, which has 383 346 children in this category, this is the highest figure of any Municipality in the province.

In terms of child-headed households, the table below summarises the prevalence over the previous three Censuses, as compared to the uMgungundlovu District Municipality average. As can be seen, the highest prevalence of child headed households occurred in 1996, when 0,9% of households in the Municipality were child-headed. The 2001 figures indicate a decline in child-headed households to 0,3%, although the number has steadily climbed until the 0,6% in 2011.

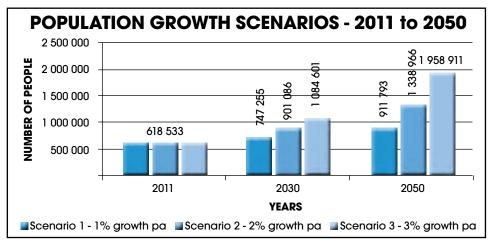

In terms of the anticipated growth scenario the population and economic growth rates will be in excess of that achieved over the past 10 years. The population growth rate is anticipated to be 2%, whereas the economy will grow at a rate of 5%. This scenario assumes that the HIV/AIDS pandemic has been curbed and that the negative impact thereof on population growth has been reduced. It is also assumed that, because of higher economic growth rates, the area has become a target for migrants from neighbouring rural local municipalities and Districts

such as Harry Gwala and Umzinyathi. Migrants from the Eastern Cape should not be excluded from this scenario. The economy of Msunduzi is set to grow at 4% per annum, a rate still substantially lower than that proposed in the National Development Plan for 2030 (i.e. at 5.4%). However, even this 4% per annum growth rate still assumes continued capital development, expansion of production activity and the strengthening of all economic sectors.

The diagram below reflects on the total municipal population in 2011, 2030 and 2050 in terms of three scenarios. Starting off from the 2011 base of a population of 618 533 people (StatsSA, 2011) the medium growth scenario would see the population grow by nearly more that 60% to 1.1 million people in 2030 and double to 1.34 million people in 2050. Should the 3% growth rate of the high growth scenario be applied, it is estimated that the population in the municipality will potentially triple by 2050 to just less than 2 million people. Even in the case of the low growth scenario the population of the municipality will grow with 50% by the year 2050.

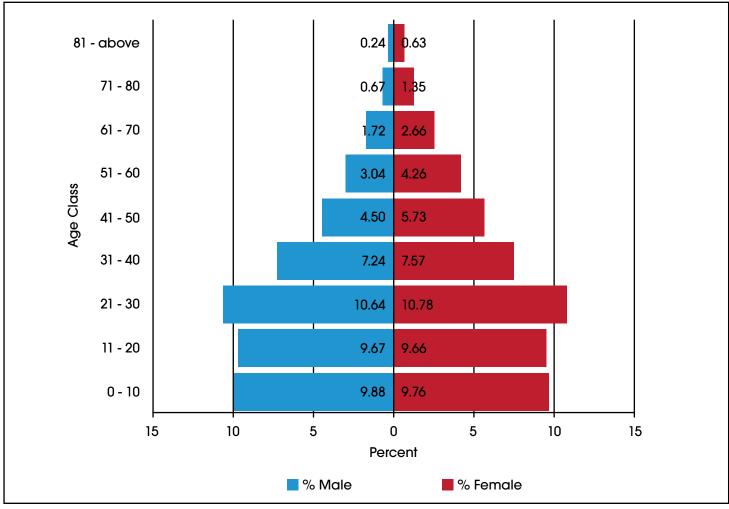

Figure 5b population growth scenarios

Spatial Development Framework 2015

Figure 5c

2011 Msunduzi Population Pyramid (Stratplan, 2014)

As depicted on the pyramid above the Municipality has a high number of young people. About 50% of the population is between the ages of 11 and 40 year old. This is one of the reasons why the City Development Strategy aims to create a city of learning. The Municipality has numerous programmes to assist the youth and works closes with the department of education which ploughs Hugh amounts of money into the city's education sector. The Municipality has invested immensely in youth development with programmes to up skill the youth so they can assist with the development of challenges. The Municipality has a programme to train 180 youth in plumbing and thereafter they can assist with the water leaks around the Municipality. The Municipality also gives points to local businesses when procuring for services this again aims to ensure that business around the city benefits and employs local people.

Table 21: Prevalence of Child Headed Households

	No. of Households headed by Children (0-17 years)			% of Households headed by Children (0-17 years)		
	1996	2001	2011	1996	2001	2011
uMgungundlovu	2 215	1 398	1 755	1,2	0,6	0,6
uMsunduzi	1 067	674	920	0,9	0,3	0,6

Department of Health, 2011 Annual Report

In 2010, the uMgungundlovu DM had the highest prevalence of HIV/Aids in the province, as well as in the country, according to the annual Department of Health ante-natal survey undertaken at state hospitals. These figures are summarised below, and indicate an upward trend in infections. The Municipality is attempting to establish ward-level Aids Committees and involving Ward Councillors in this regards.

FIGURE 6: HIV/Aids Prevalence Rates in the Msunduzi Municipality (DOH, 2011)

Department of Health, 2011 Annual Report

Msunduzi developed an HIV/Aids Strategic Plan (2012 – 2016) which is included as an Annexure to the IDP. This plan includes the establishment of a local Aids Council.

The successful implementation of the HIV/Aids Strategic Plan (2012 - 2016) will depend on a number of imperatives, which include the provision of leadership at all levels; greater involvement of communities and their structures; behavioural and attitude change among the community members; greater involvement of people living with HIV and AIDS; the sustainability and adequate resourcing of initiatives that are aimed at reduction of the spread and impact of HIV, AIDS, STIs, and TB.

There are a number of existing and potential long-terms risks associated with the current prevalence rate, that if not sufficiently addressed, will cause existing impacts to become more firmly established, whilst new ones will take root in communities. Both existing and potential impacts have the potential to reverse many of the developmental gains made in the district since 1994. The economic costs of HIV and AIDS, the stigma surrounding the disease that leads to discrimination and withdrawal, and the inability to access social services, combine to expand socioeconomic inequalities in society. HIV and AIDS is not only killing people, it further divides communities and society in general, and the pandemic has caused a great deal of suffering in communities. The most visible impact of this has been an increase in the number of people who are getting sick, and those who are dying due to sicknesses related to the pandemic. According to USAID (2003) in a study conducted in Sub-Saharan Africa, the HIV and AIDS pandemic affects the performance of health systems through:

- More demand for hospital beds
- More demand for treatment
- Longer hospital stays
- Increased need for community services
- Increased costs of services
- Medical personnel being infected and affected

Similarly, in the education sector, sickness and death of teachers, and learners who have been orphaned or have a parent that is sick, contribute to poorer results. The private sector is also affected through higher costs associated with absenteeism of sick workers, training of new staff to replace workers who have died, and the loss of productivity.

In order to determine Mortality and Morbidity rates for the Municipality, the Department of Health's Annual Report (2011-2012) has been utilised, which unfortunately aggregates the information to a District level. This aside, the top four causes of years of life lost in the uMgungundlovu DM are TB (22.4%), Lower Respiratory Infection (LRI) (10.1%), Diarrhoeal Disease (9.2%), and HIV/Aids (8.6%). In terms of maternal mortality rates, the District average is 193.5 maternal deaths per 1 000 births, which is classified as "much poorer than expected".

103

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Table 22: SWOT

KEY ISSUES RELATING TO POPULATION

- A growing population with a growing number of households, but with a decreasing average household size.
- A population that is predominantly within the economically active age groups, and one where people
 within the working age groups are less dependent on those who are employed.
- A population that is improving in levels of skills development and literacy shown by the improving levels of schooling and post schooling qualifications.
- A population with the highest level of HIV/Aids infection in the province.
- A population with a relatively high level of child headed households.

STRENGTHS

- A stabilising population growth rate.
- Decreasing number of child-headed households
- The majority of the population in the economically active age cohorts

OPPORTUNITIES

- The majority of the population in the economically active age cohorts
- · Good levels of education amongst adults
- Improving levels of literacy and tertiary training.

WEAKNESSES

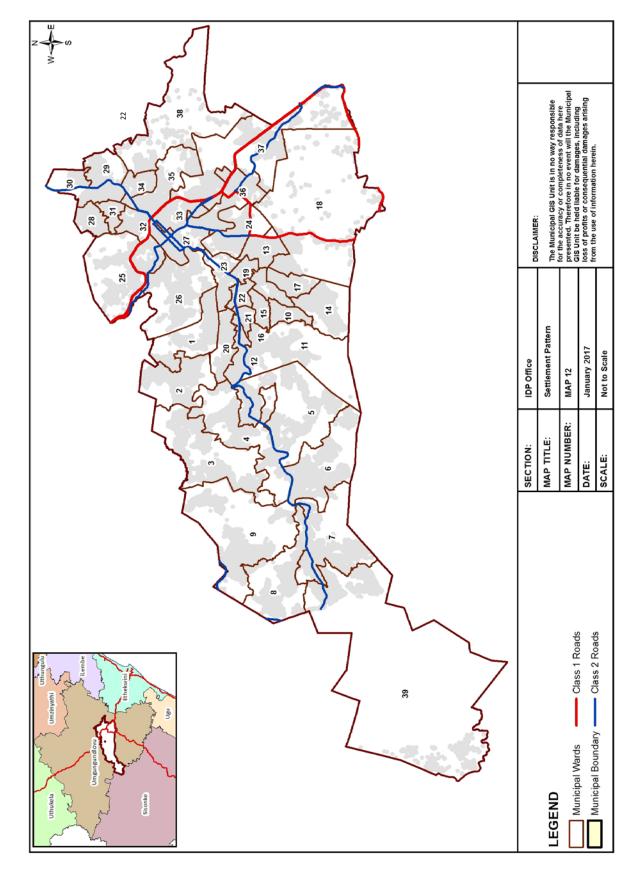

- High number of economically vulnerable households
- Places of residence some distance from work opportunities.
- High levels of unemployment.

THREATS

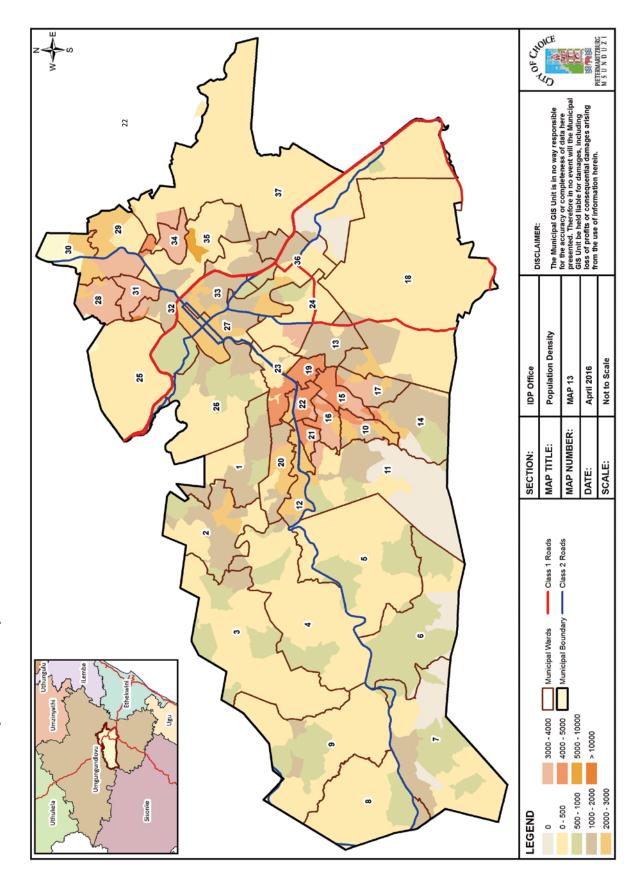

- High but stabilizing levels of HIV/AIDS
- Increasing in migration

MAP 12: IDP Office: Settlement Pattern

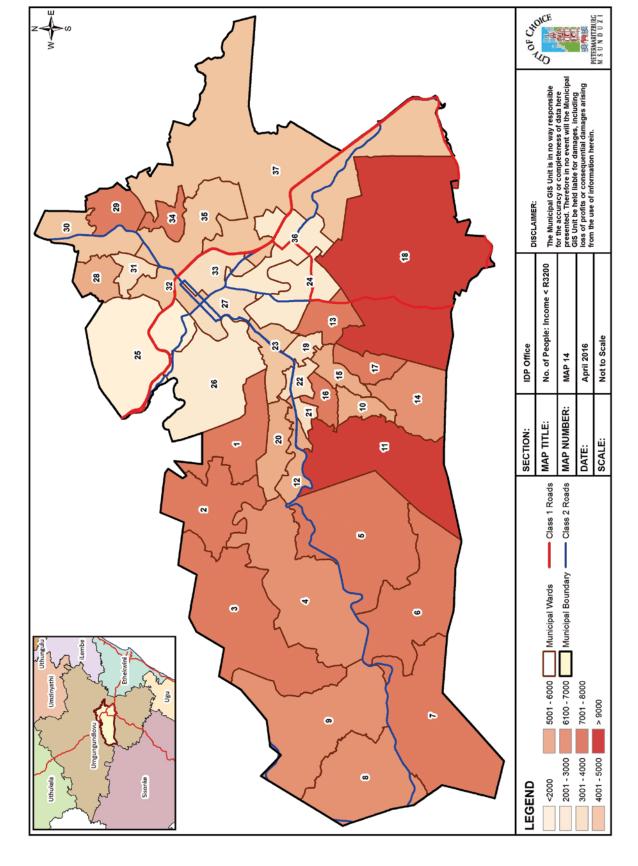

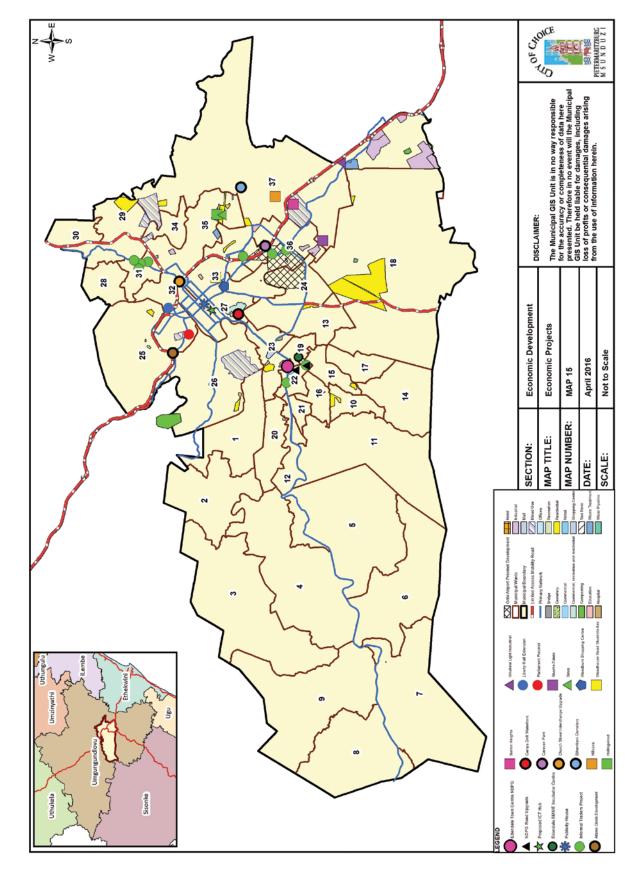

20 YEARS OA PARTIES OF THE PARTIES O

C 3-PGDS GOAL: MUNICIPAL TRANSFORMATION AND ORGANISATIONAL DEVELOPMENT

3.6 MUNICIPAL TRANSFORMATION

Serious financial challenges within the Msunduzi Municipality necessitated an intervention in terms of section 139 of the MFMA. The financial crises came to be because of poor controls, rampant corruption amongst senior staff, and failure to prepare the mid-year Adjustments Budget and the 2010/11 Budget by deadline. By mid-March 2010, when the Provincial Intervention Team (PIT) was appointed, the budget deficit for budget 2009/10 was estimated at R162 million.

The administration period saw the suspension, and in some instances the resignation, of section 57 managers, as well as the Municipal Manager and the CFO. The Provincial Intervention Team drafted four Turn Around Strategies, consisting of a Financial Strategy, an Infrastructure Development Strategy, a Community Services Strategy, and a Good Governance Strategy. These strategies were developed to stabilise the affairs of the Msunduzi Municipality. The 2011/12 financial year saw the lifting of the intervention and the appointment of the Municipal Manager, the Chief Financial Officer, and the Deputy Municipal Manager: Infrastructure Services. The posts of Deputy Municipal Manager, Development Services, and Community Services have been advertised.

A Policy Development Specialist was seconded to the Municipality form COGTA to assist with the development and review of 26 Organisational Development Policies. The Policies are currently being workshopped at the portfolio committee, as part of the consultative process preceding approval. During the latter part of 2011/2012, an OD specialist was further seconded to the Municipality from COGTA, to review the current organisational structure and align capacity to improve service delivery. The 3 tier structure was developed, and has been tabled for Council approval. Consultation with the Business Units occurred in June of 2012, extending the review and beyond level 3.

3.7 ORGANISATIONAL DEVELOPMENT

(i) INSTITUTIONAL ARRANGEMENTS

Approval of key operational matters within the Municipality follows the following approval process, namely Strategic Management Committee (SMC), Portfolio Committees, EXCO, and Council.

(ii) POWERS AND FUNCTIONS

The powers and functions of the Msunduzi Municipality are summarised as follows:

Table 23: Powers and Functions of the Msunduzi Municipality

Government:

LEGISLATIVE MANDATE	DESCRIPTION
Constitution of SA:	Local Government, especially sections 151, 152 and 153. Also Schedule 4, Part B and
Chapter 7:	Schedule 5 Part B.
	152. The objectives set out in the Constitution for local governments are to:
	 Provide democratic and accountable government;
	 Ensure the provision of sustainable services to local communities;
	Promote social and economic development;
	Provide a safe and healthy environment;
	Encourage involvement of community organisations in local governance.
	Schedule 4B identifies the following functions for the Municipality:
	Air pollution
	Building regulations
	Child care facilities
	Electricity reticulation
	Firefighting services
	Local tourism
	Municipal airports
	Municipal planning
	Municipal public transport
	Municipal public works (internal)
	Stormwater management
	Trading regulations
	Water and sanitation services
	Schedule 5B identifies the following functions for the Municipality:
	Billboards and display advertisements
	Cemeteries, funeral parlours, crematoria
	• Cleansing
	Control of public nuisances
	Licensing of dogs
	Licensing & control of food undertakings
	Local amenities
	Local sports facilities
	• Markets
	Municipal parks and recreation
	Municipal roads
	Noise pollution
	Public places
	Refuse removal; solid waste disposal
	Street trading
	Street lighting
	Traffic and parking
	Municipal Pound
	The Msunduzi local government is responsible for the complete authority over
	functions listed in the table above. Delegation of this authority is in respect of
	Municipal Pound, Airport, and Tourism.
Municipal Structures Act:	The Msunduzi Municipality is a Category B Municipality in terms of Section 7, with a
	collective executive system and a ward participatory system Section 9(b).
he White Paper on	The White Paper on Developmental Local Government lists three key outcomes:
Developmental Local	 Provision of basic household infrastructure and services;
Covernment	Creation of liveable integrated cities towns and rural groups

Creation of liveable, integrated cities, towns, and rural areas;

Promotion of local economic development.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

There are two wings to Msunduzi local government's responsibilities. The first is concerned with large-scale functions, such as the planning and promotion of integrated development planning, land, and economic and environmental development. The second is concerned with the provision of specific services, such as housing, water, and electricity.

Planning and Promotion of Integrated Development

Planning and promotion of the Integrated Development Plan (IDP)

The IDP is a single strategic plan that guides all decisions and programmes related to managing and developing the Municipality. This includes municipal as well as private sector and provincial programmes and plans.

Planning and promotion of land development

The Municipal Systems Act requires that each municipal IDP includes guidelines for land management and development. This means the Municipality must provide a system for making decisions regarding land development, development applications, land use, and land use change.

Planning and promotion of economic development

The Msunduzi local government is responsible for providing an environment that encourages economic growth by focusing on basic community needs, as well as promoting social and economic development. In other words, its role is to provide an enabling environment, rather than being responsible for economic growth and job creation.

Planning and promotion of environmental development

This function includes the regulation of air and noise pollution, as well as services such as storm water management, water and sanitation, and recreational facilities. The Msunduzi Municipality is required by the National Environmental Management Act to incorporate environmental strategies handed down by the province, and to produce an integrated waste management plan.

Service delivery

Housing Services

The Municipality does take on aspects of this function, which includes finding land and beneficiaries for low-cost housing, developing housing projects, infrastructure, and renting and owning houses.

Water Services

The Msunduzi Municipality is responsible for water supply from bulk supplier to the Local Community, inclusive of the management and maintenance of water and wastewater reticulation systems. Attention has been given to providing free basic water and sanitation services to the poor.

Electricity Distribution Services

This relates to the provison of electricity services to certain areas of the municipality. ESKOM is responsible for the coverage of limited areas.

Roads and Transport Services

The Msunduzi Local Municipality is responsible for providing and maintaining local streets, as stated in Schedule 5B of the Constitution. The provincial government also funds municipalities to carry out provincial road repairs. Although a transport plan is a key part of the IDP for the Municipality, creating an adequate plan may be difficult due to a lack of resources.

Solid Waste Services

The Municipality is responsible for cleansing, refuse removal, dumps, and solid waste disposal. Although not specified, this function does involve minimising waste and recycling.

Community Development Services

The community services provided by Msunduzi local Municipality include community halls, sport and recreational facilities, public toilets, libraries, the Art Gallery, public swimming pools, cemeteries, and crematoria.

Emergency Services

Fire-fighting remains a function of the Municipality, and the local governments is required to prepare disaster recovery plans.

Public Safety Services

The functions of municipal Public Safety Services are road traffic policing, policing of municipal by-laws, and the prevention of crime.

Public Works

Though municipal public works is listed as a function, it can be seen more as an internal support service, geared towards construction and maintenance of public infrastructure and facilities.

(iii) ORGANISATIONAL STRUCTURE/ ORGANOGRAM

There are five Business Units in the Municipality, which mirror the committee portfolios and report to the Municipal Manager. These Business Units, each headed by a Deputy Municipal Manager, ensure that services are delivered to the people of the Msunduzi Municipality, and are structured as follows:

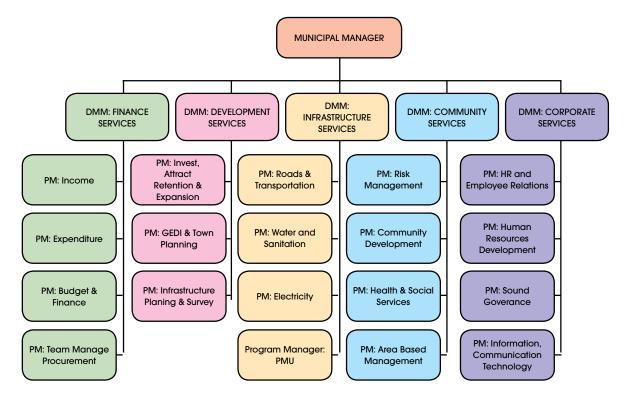

- Infrastructure Services;
- Community Services;
- Economic Development;
- Financial Services; and
- Corporate Services

The Municipal Manager and his team of executive managers hold weekly meetings to discuss key strategic service deliverables, and to offer guidance on achieving IDP goals. The administrative component is aligned with the five National Key Performance Areas: Financial Viability and Management, Local Economic Development, Basic Service Delivery and Infrastructure Development, Good Governance and Public Participation, Institutional Development and Transformation, and Environmental Planning and Social Services.

(iv) MUNICIPAL INSTITUTIONAL CAPACITY AND STATUS OF CRITICAL POSTS

(a) MUNICIPAL MANAGER AND SECTION 56 POSTS

The municipal manager and five section 56 posts are now filled. There was one vacancy, deputy municipal manager: infrastructure services, due to the resignation of the Incumbent. The process manager electricity was acting in this position and has been appointed.

- Municipal Manager Vacant
- Chief Financial Officer Filled
- Deputy Municipal Manager Infrastructure Filled
- Deputy Municipal Manager: Community Services- Filled
- Deputy Municipal Manager: Economic Development Filled
- Deputy Municipal Manager: Corporate Services –Filled

(b) FILLING OF VACANT POSTS

The unacceptably high vacancy rate in the organisation is a matter of grave concern. For instance, a vacancy rate of 48% or 2318 vacant posts were reported in February 2016. Delays with the filling of the vacancies have impacted negatively on service delivery, and the filling of critical posts is now a priority within the organisation. 30 vacancies were advertised in the month of March 2017. The selection and recruitment of staff is guided by an existing employment process and will be further directed with the approval of a drafted Selection and Recruitment Policy.

Table 24: Vacant Post Advertised

BUSINESS UNIT	POSTS ADVERTISED
Infrastructure Services	11
Community Services	14
Corporate Services	8
Finance	12
Corporate Business Unit	5
Development Services	18
Total Posts Advertised	68

The filling of critical vacancies is to be addressed alongside the implementation of workable staff-retention strategies. The management of staff vacancies within the municipality must be proactive in identifying possible incentives for retaining scarce skills and ensuring that roles and responsibilities are clearly defined within job descriptions.

The municipal Strategic Management Committee (SMC) annually considers priority vacant posts for filling. This is aligned with the budgeting process so that funds are committed for the new officials.

(v) HUMAN RESOURCE DEVELOPMENT

(a) EMPLOYMENT EQUITY

In the past, the staff components of the Municipality did not fully reflect the demographics of the municipal area, and the approved Equity Plan had to be activated to address the imbalances created by Apartheid employment policies. To date, the Municipality has complied with the required provisions of the Employment Equity Act.

Table 25: Employment Equity within the Msunduzi Municipality

(a) WORKFORCE CAPACITY DEVELOPMENT

Section 68 (1) of the Municipal Service Act (2000) required municipalities to develop their human resource capacity to a level that enables them to perform their functions and exercise their powers in an economical, effective, efficient, and accountable way.

The Municipality, through the Human Resources Development Unit under the Corporate Services Department, is the custodian or champion for skills development on behalf of the Municipality. Various training interventions are conducted through different levels in the organisation. There are training programmes that are intended to equip the employee in order to improve the quality and standard of service delivery. The Workplace Skills Plan is developed along the LGSETA guideline. The Municipality collects in full almost all of what is due to it in training rebates, on an annual basis. Whilst the Human Resources Development Unit is tasked to improve the competency of our employees, the unit is also responsible for working in partnership with various departments, training providers, and communities to improve the level of skills, knowledge, and behaviour of our employees and citizens, enabling them to be active participants in the economic development and growth of the city.

Table 26: Total Number of Employees who Received Training

OCCUPATIONAL		FEM	ALE			MA	LE			TO	AL		TOTAL	% OF TOTAL
CATEGORY	A	C		W	A	C		W	A	C		W	IOIAL	EMPLOYEES
11 - LEGISLATORS									0	0	0	0	0	0.00%
12 - MANAGERS	6		2	1	6	1	4	3	12	1	6	4	23	209.09%

8 - ELEMENTARY WORKERS	31				154		2		185	0	2	0	187	23.94%
TOTALS	231	11	54	5	369	11	52	4	600	22	106	9	737	28.81%

The Municipality has several well-developed capacity development programmes and systems in place, namely:

- Annual Workplace Skills Plan
- Learnership and Apprentices Schemes
- Study Assistance
- Internship
- Adult Basic Education Programmes
- Management Training Programmes
- Councillor Training Programmes
- · Community Training

The annual workplace skills plan was adopted on the 30th of June 2015 and the latest review was in 2015.

(b) HUMAN RESOURCE STRATEGY

The human resource strategy was initiated in 2013 with assistance from COGTA. The strategy has now been finalised and is currently being implemented.

(c) RETENTION AND ATTRACTION STRATEGY

The Municipality has developed and adopted a policy on Staff Retention and Attraction, to address the scarce skills phenomenon. It is the belief of the Municipality that through recruitment, the application of the staff Retention and Attraction Policy will contribute towards assisting the Municipality to meet its objectives as expounded in the IDP.

Besides remuneration linked to a market rate of a particular post, the Municipality also has scarce skills development strategies. Employees and non-employees are contracted to learnerships for scarce skills training, and bursaries are granted in key disciplines (such as architecture, town planning, quantity surveying, engineering, land surveying, professional valuers, etc.). Coaching and mentoring, job satisfaction surveys, and career path planning, are all part of the Policy.

(vi) WORKPLACE SKILLS PLAN (WSP)

The WSP is an annual plan developed by the Msunduzi Municipality that describes the training and development strategy of the prganization, and assists the organisation to meet its overall objectives and targets. The WSP of the Municipality must relate to the key municipal Integrated Development Plan objectives, and to the priority training areas identified in the sector skills plan.

The process of compiling the Work Place Skills Plan started in March 2016, when all Strategic Business Unit Managers were approached and are requested to complete Personal Development Plans (PDP's) for their subordinates. The training needs that are identified in these PDP's are used to compile the Work Place Skills Plan for 2016/2017.

Organisations that have more than 50 employees must consult on the process of developing the Workplace Skills Plan in a Training and Development Committee. Where a workplace is unionised, trade union and management structures must be represented on this Committee, as their signature is required to verify that consultation on the development of the workplace skills plan has taken place. It is essential to obtain buy-in in the process, initially at Council Level, and then throughout the Organisation. The Human Resources Development Sub-Committee, which is a sub-committee of the Local Labour Forum, plays a crucial role in this respect. The Skills Development Unit will present the Skills Plan 2016/2017 and the Annual Training Report 2015/2016 to the Municipal Manager, The Chairperson of the Corporate Services Portfolio Committee, and Union Leadership for signing before 30 June 2016, as the reports must reach the Local Government SETA by the 30th of June, 2016.

(vii) PROCESS FOR PREPARING THE WSP:

The plan to address skills needs is developed from information gathered and input received from departments and committees (Training and EE Committees), taking into account the LGSETA requirements. The Skills Development Facilitator:

- Studies and adheres to the LGSETA requirements and guidelines on the format and content of the WSP and the process for approval and submission;
- Develops draft criteria for the approval of the WSP, in consultation with municipal management (e.g. alignment with EE, consultation, and approval processes);
- Collates the input (prioritised training needs as identified by the audit conducted in the different departments into the Municipality's WSP and completes the documentation for the WSP as required by the LGSETA;
- Submits the draft WSP to management and stakeholders for comment and recommendations, revises the draft WSP on the basis of the comments and recommendations received:
- Prepares the final WSP and submits to Council for approval, and to all stakeholders for their signatures; and
- Submits the completed WSP to the provincial LGSETA by 30 June.

Table 27: SWOT

STRENGTHS

KEY ISSUES RELATING TO MUNICIPAL TRANSFORMATION AND ORGANISATIONAL DEVELOPMENT:

- The development of a cohesive organisational structure;
- Changing the organization's culture to a performance driven culture;
- Attracting and retaining critical and technical skills;
- A serious infrastructure backlog (information, communication technology infrastructure, and information systems applications);
- · Uncoordinated and disintegrated systems development;
- · Outdated processes and systems; and
- The development of a more customer focused organisation (Incorporation of Batho Pele principles).

Reviewing of the organogram. The development of a more customer focused organisation (Incorporation of Batho Pele principles). OPPORTUNITIES The development of a cohesive organisational structure. Changing organisational culture to be Outdated processes and systems. THREATS Low morale in staff. Shortages of key skills. Fraud and corruption.

WEAKNESSES

SAP System to integrate processes

performance driven.

Uncoordinated and disintegrated systems development.

3.9 WATER

3.9.1 Levels of service

Census (2011) indicates that houses receiving piped water inside their dwelling have increased from 38.3% of households in 2001, to 47.9% of households in 2011. The Census further indicates that only 3.9% of households have no access to piped (tap) water, and only a further 3.9% of households are between 200 – 1 000m from piped (tap) water.

3.9.2 Water Services Development Plan

The City is required by law to develop a Water Services Development Plan as part of the water sector chapter of the Integrated Development Plan. The current Water Services Development Plan needs to be updated and developed further in the light of new data (Census 2012 information) and the City's new strategic priorities. The Infrastructure Services unit will be managing the process.

In terms of the Water Services Act, Act 108 of 1997, clause 12 (1), every water services authority must prepare and submit both a draft water services development plan and a summary of that plan.

The Act requires that the Water Services Authority must take "reasonable steps" to bring the draft water services development plan to the notice of consumers and invite public comment. The Msunduzi Municipality has recently appointed a consultant team to undertake the revision of the WSDP. It is anticipated that this plan will be ready by December 2015. Thereafter, a copy of the draft water services development plan (WSDP) is to be sent to the Minister of Water Affairs and the KZN Provincial Minister.

A similar approach is currently adopted for the revision of both the Bulk Water and Sanitation Master plans. We anticipate both these master plans to revised and concluded by July 2016.

3.9.3 Water Services Authority

The MEC for Local Government, Traditional Affairs, and Housing designated the Msunduzi Municipality a Water Service Water Authority through a Government Gazette dated 13 June 2003. This notice authorized the Msunduzi Municipality to perform the functions and exercise the powers referred to in Section 84(1) (b) of the Municipal Structures Act (117 of 1998), which provides for the provision of potable water supply and sanitation systems. In terms of Section 11 of the Water Services Act (108 of 1997), every Water Services Authority has a duty to ensure adequate and sustainable access to water and sanitation for all consumers within the area of jurisdiction.

The Msunduzi Municipality has signed and entered into a Bulk Services Agreement with Umgeni Water, which came into effect from December 2012. This is a 10 year agreement that regulates the supply and sale of bulk water from Umgeni Water to Msunduzi Municipality. The following is a brief summary of the relevant obligations, as contained in the agreement:

Msunduzi to provide Umgeni Water with projected water demand based on expected growth over the contract period;

- Umgeni Water is responsible for meeting the hourly, daily, and monthly peak flow demands;
- Meter at Strategic points in order to regulate and measure the sale of bulk water;
- Pay bulk water supply service charges as follows:-
 - Volume based charges in respect of water consumed;
 - Installation charges of new customer connections;
 - Capital contribution charges where a new water supply requires capital expenditure; and
 - Monitor and measure the performance of Umgeni Water against the said agreement.
- Ensure that the quality of water meets all the requirements of SANS 241.

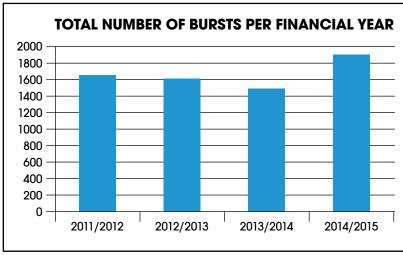

(i) OPERATIONAL MANAGEMENT

The Department of Water Affairs initiated a drinking and waste water quality regulation programme during 2005, with the specific objective of ensuring the improvement of tap water (potable) and waste water quality, by means of compliance monitoring. The Msunduzi Municipality was awarded Blue Drop Status for 2015. This indicates that according to the South African National Standards, the drinking water quality has a 97% microbiological compliance, and a minimum of 85% chemical compliance. The municipality has a water and sanitation operational plan that guides daily operations.

Generally, asbestos cement (AC) pipelines account for over 66% of the 920 km of the municipal water reticulation network. These pipes have a lifespan of 30 years, and many of these pipes have reached the end of their lifespan, something that is evident in the number of water service interruptions that are occurring. The number of bursts has been increasing, with a current average of 5 bursts per day, which highlights the precarious nature of the existing infrastructure. This is depicted in the graph below.

FIGURE 9: Burst Main Trends per financial year

Msunduzi 2014/2015 Annual Report

As per the in 2013, President's State of the Nation address, municipalities are obliged to halve water losses by 2014. This directive was prepared by the Department of Water Affairs, which has subsequently prepared the National Water Conservation/Water Demand Management Strategy/Initiative. This initiative targets continuous and sustained water supply, reduction in water losses, enhancement of Revenue collection, and ultimately reduction in non-revenue water through water conservation strategies via a 5 year plan with MIG funding of R 214,464,626.00, as approved in July 2011.

As part of the Non-Revenue Water Master Plan, a total of 16 core Non-Revenue water initiatives were identified and programmed, for which realistic goals and targets were set. The 16 core interventions were made up of 8 real loss and 8 billing control interventions, which are summarised below:

Table 29: Core Non- revenue Water Reduction Strategies

Pressure reduction (rezoning) Pressure reduction (implementation) PRV (pressure reducing valves) optimization Leak detection Leak repair Reservoir inspection and repair Existing pipe replacement Creation of district metered areas

BILLING IMPROVEMENTS

- Top consumer investigation
- Meter reading accuracy
- · Non-domestic meter replacement
- Domestic meter replacement
- Custody transfer points
- Damaged/inaccessible meters
- Standpipe/low cost housing metering
- · New connection growth

3.10 SANITATION

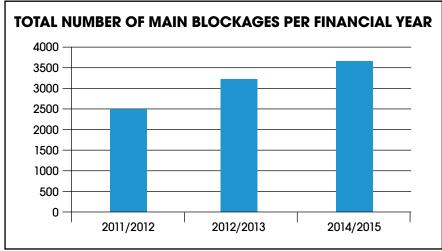

3.10.1 Levels of service

Households with flush toilets connected to sewerage, however, have declined from 52.3% in 2001 to 51.6% (84 675 households) in 2011. Census (2011) further indicates that only 2% or 3 316 households do not have access to any form of sanitation, and that 34.1% of households have pit latrines, both ventilated and unventilated. Peri-urban and rural communities have the lowest levels of flush toilets, with the highest levels of pit latrines. The review of the WSDP is essential to address this problem.

3.10.2 Operational management

The municipal sewer system is also aging, and broken pipes and dislodged joins frequently cause sewer blockages, which then impact on river systems and therefore the general health of the population. The graph below summarises the mainline blockages over the past six financial years, and shows increasing frequency of these occurrences.

FIGURE 10: Total Number of Mainline Blockages per Financial Year

Msunduzi 2014/2015 Annual Report

By analysing and trending our current financial year statistics, and in comparing with previous financial years, the relative trend line clearly indicates the increasing frequency of these occurrences. It should be noted that these are only the main reactive faults - the general extent of all fault types have increased.

As outlined above, the volatile nature of our water and sewer infrastructure has increased the operating cost with regard to maintenance and overtime. This is further compounded by increases in labour, fuel, and materials.

3.11 ELECTRICITY

3.11.1 Levels of service

Households with electricity for lighting have also improved from 85.8% in 2001 to 91.9% in 2011, which is well above the provincial average of 77.9% of households. 463 households indicated that they did not have access to electricity for lighting.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Households without electricity services may be due to:

- Households that have not applied for electricity, either because they cannot afford the service or they were
 missed out when marketing was done in the area.
- Households may be on infill sites, where households have only recently been developed. Eskom and Council will provide services in these areas if it is practical to do so and funding is available.
- The development may not have been planned in accordance with town planning norms and according to current Council policy, no electricity will be provided if it obviates future service delivery.

Due to financial constraints and ageing infrastructure, the Municipality has brought on board the Independent Development Trust (IDT) to do a condition assessment and source funding to rectify problems, which is being undertaken in this financial year.

The Municipality is also piloting solar powered street lighting and traffic lights in the CBD

3.11.2 Licence agreement

Eskom is licenced to supply electricity in the Greater Edendale and Vulindlela areas, while the Municipality provides electricity in other areas.

The Municipality is required to comply with NRS 047 and 048, which deal with the provision of electrical distribution in residential areas in terms of its licence agreement.

3.11.3 Operational management

The electrical department is stabilising with regard to outages. There is, however, a lot of work that requires more attention relating to infrastructure and its upgrades, and plans are in place in this regard, including a 132 KV Upgrade Plan, a Street Lighting Plan, and a Substation Maintenance Plan. The Municipality's current maintenance programme focusses on the replacement of defective street lights and the refurbishment of mini-substations and pole transformers.

The Municipality is currently implementing the Hilton/Sweetwaters 33 KV line upgrade project, which will stabilise power in these areas. The Municipality is also currently busy with the provision of high mast lighting in Greater Edendale and Vulindlela.

The electrical assets in the Municipality are aging, and there are more than 10 transformers that are more than 38 years old, which need replacement and refurbishment. The Municipality has embarked on a 10 year transformer replacement programme. Vandalism, tampering, and theft of electricity assets are on the increase. More protection and fraud prevention strategies are needed to safe-guard electrical assets.

There is also a critical shortage of skilled management and technical expertise in the department.

3.12 SOLID WASTE

There are two components to solid waste in the Municipality, namely Solid Waste Removal and Solid Waste Disposal.

3.12.1 Solid waste removal

In terms of the Census (2011) information, weekly refuse removal has declined from 59.5% in 2011 to 53.2% in 2011, but this could be associated with a growth in the number of households. Of the approximately 94 000 households in the 'borough' of Pietermaritzburg, approximately 84 000 are receiving weekly refuse removal.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

The Solid Waste Removal section in the Municipality is responsible for the following areas:

- Waste Collection;
- Management of Garden Sites (Prestbury, Link Road, Grange, Richie Road, Sobantu, South Road, Woodlands, and Eastwood);
- Street Sweeping;
- Maintenance of Public Convenience (toilets); and
- Eradication of Illegal Dumping.

3.12.2 Solid waste disposal

The New England Road Landfill Site is a licensed facility that is managed by the Municipality, and is the largest disposal facility in the KZN Midlands. The Site spans an area of 44 hectares, of which 29 hectares is currently being filled. The Site is managed in terms of its permit requirements, and in terms of relevant environmental legislation. The Landfill is classified as a general, large, leachate bearing site, and does not accept any hazardous waste. The Site is equipped with two weighbridges and a billing system, and users of the site are billed for the disposal of waste as per Council's tariff of charges. Waste disposed of is captured on the waste information system per category and type of waste. It is a regional facility that accepts waste from some of the local municipalities under the jurisdiction of the uMgungundlovu District. Quarterly monitoring for gas emissions, groundwater and surface water contamination, and leachate disposal is conducted to ensure that the surrounding environment, water courses, and groundwater are not being contaminated.

The site currently has a lifespan of seven years, and feasibility studies into implementing advanced waste management systems aimed at reducing waste to landfill are being considered to extend the lifespan. Some of these initiatives involve recycling at source, implementation of a waste recycling collection system, the construction of a Materials Recovery Facility, and the construction an organic waste composting facility to treat organic waste.

3.13 TELECOMMUNICATIONS

3.13.1 Backlogs

Census (2011) indicates that the number of households with landline telephones has dropped from 45 471 in 2001 to 35 779 in 2011. Households with cell phones, on the other hand, have almost trebled from 43 593 in 2001 to 146 407 in 2011. 62 701 households also indicated that they now have access to the internet (Census, 2011).

The telecommunication industry has changed significantly over the past 20 years with the emergence of cellular networks and the semi-privatisation of Telkom, and it is noted that the Municipality is now well coved by both cellular networks and landlines. Telkom responds to landline applications and provides users with lines and the necessary hardware. Cellular networks, on the other hand, frequently assess demand on cellular networks and masts and install the necessary hardware based on demand. A problem with the current service delivery model is that telecommunications operators are profit-driven businesses and have the following tendencies:

- Technology and network rollout is prioritised for high income areas;
- Project investment needs a short-term return to shareholders; and
- Servicing under-developed areas has low priority, and is a branding exercise at best.

Due to the high scrap metal prices for copper, residents and businesses in the Municipality experience intermittent levels of services as a result of the theft of cables. This is of concern as it directly impacts on the functionality of businesses.

3.13.2 Legislative framework

The installation of Cellular Telecommunications Infrastructure is regulated by the Electronic Communications Act No 36 of 2005, the Constitution Act 108 of 1996, the National Environmental Management Act No 197 of 1998, National Building Regulations, the KwaZulu-Natal Planning and Development Act 6 of 2008, and any other relevant legislation, bylaws, and Council Policy.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

3.13.3 Msunduzi Policy

The Msunduzi Municipality has prepared a policy for the development of Cellular Telecommunications infrastructure. The aim of this policy is to establish a uniform and comprehensive set of standards and assessment criteria to assist in the control, development, and installation of cellular telecommunications infrastructure in the area of jurisdiction of the Msunduzi Municipality. This policy is intended to protect the social and physical environment from potential negative impacts, while at the same time not restricting the development of essential cellular telecommunications infrastructure.

This policy is intended for the use by Council, members of the public, and cellular telecommunications infrastructure providers seeking approval for the erection or modification of cellular telecommunication infrastructure. At present, this policy focuses on the Cellular Telecommunication industry, but it is intended to revise the policy to include all parties, i.e. commercial, public and state, current and future, in accordance with the Telecommunications Act of 1996.

3.13.4 Future projects

The Municipality focusses attention on the access to the internet through its 2030 Vision and develops targets in this regards. The Municipality has also identified increased broadband accessibility as one of its catalytic projects. Increased access to ICT services can uplift communities through:

- Educational benefits of the Internet for schools and libraries;
- Access to bigger markets for entrepreneurs and job seekers;
- Emergency communications at lower cost;
- Easier access to government's e-services; and
- Generally cheaper cost of communications.

3.14 TRANSPORTATION

The 2001 Census indicated that the daily modal split in the Msunduzi Municipality was 62% by public transport and 38% by private vehicles. In analysing this information at a ward level, it was found that public transport is dominant in the western and southern regions of the Municipality, with higher levels of private vehicle usage in the central and north- eastern regions. Cordon counts by the uMgungundlovu District Municipality (UDM) 2007 indicate that the percentage of public transport person trips by minibus taxi had increased from 85% in 2005 to 88% in 2007, with trips per bus reducing from 15% to 12%. It must also be noted that there are no rail services that form part of the daily commuter public transport system.

The high dependency on public transport and the high level of pedestrian activity places a focus on the need for high standard public transport services throughout the Municipality, with attention on non-motorised transport (NMT) integrated with the public transport system.

The Roads and Transportation Sub-unit is responsible for the planning, design, construction, and maintenance of roads, public transport facilities, bridges, footbridges, and storm water and drainage systems. It operates in consultation with the Department of Transport, and the uMgungundlovu DM, who are authorities with similar responsibilities for different levels of facilities. The sub-unit is reasonably staffed, although it lacks qualified and experienced Engineers and Technologists.

3.14.1 Roads

The backlog of roads that need upgrading, road safety measures (traffic lights, calming measure, signage enhancement, etc), road infrastructure rehabilitation, and maintenance continues to be a major challenge for the Municipality in the current financial year. There are still huge backlogs for construction of new roads and upgrading of gravel roads in the Greater Edendale, Vulindlela, and the North Eastern parts of Msunduzi (i.e. Thembalihle, Tamboville, Copesville, etc). These areas continue to grow, since there are new low-cost housing programme being provided with sub-standard road services (i.e. gravel and hyson cell concrete roads).

In the 2009/10 financial year the construction of the N3/Chota Motala Road Interchange commenced, which was finalised in the 2012/13 financial year. This project seeks to ease the traffic congestion experienced by southbound peak-hour traffic from the Northern Areas into and out of the CBD.

Inadequate funding for bulk services is increasingly becoming a retarding factor for development. The user-pays principle is applied for new developments to fast-track provision of bulk services. Due to internal budgetary constraints, the Municipality continues to use externally sourced funds (i.e. COGTA, DoT, MIG, etc.) for funding its programmes and projects. Priority is currently given to the problematic Electricity and Water infrastructure due to losses and outages experienced by these services. However, asset renewal (i.e. road rehabilitation, major defects patching, surface overlays, etc) remains unattended to, due to financial constraints. Potholes have increased in number on the city's roads over the last few years because of fatigue to road infrastructure.

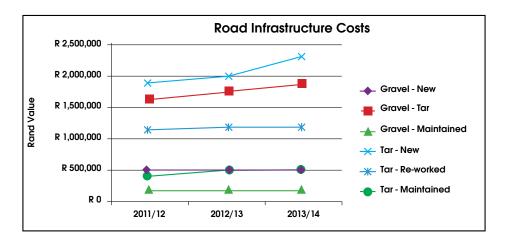

Table 30: Gravel Roads Infrastructure (kilometres)

	TOTAL GRAVEL	NEW GRAVEL	GRAVEL ROADS UPGRADED	GRAVEL ROADS
	ROADS	ROADS	TO TAR	UPGRADED/ MAINTAINED
2012/2013	890,4	0	29,0	124
2013/2014	865,7	0	24,7	89
2014/2015	850,2	0	15,5	42

Table 31: Tar Road Infrastructure (kilometres)

	TOTAL TAR ROADS	NEW TAR ROADS	EXISTING TAR ROADS RE- TARRED	EXISTING TAR ROADS RE- SHEETED	TAR ROADS MAINTAINED
2012/2013	1330,8	29	1,4	0	55
2013/2014	1355,5	24,7	6,12	0	5,6
2014/2015	1840.5	15.5	4.88	0	8

FIGURE 11: Road Infrastructure Costs

MIG is funding 60% of the road upgrading projects in Vulindlela and Edendale. The Municipality funds around 80% of all major road extensions and expansions, with the remaining 20% coming from grant funding from the Provincial and National Departments of Transport. The backlog for the upgrading of gravel roads is so huge that substantial amounts of additional funding is required.

3.14.2 Rail

The main line from Gauteng to Durban runs through the Municipality. A further important rail link runs west from the city to the Eastern Cape.

Although still in the conceptual stage, a high speed rail line linking Gauteng and Durban will bisect the Municipality. No concrete proposals exist as to its alignment.

3.14.3 Airports

The primary airport in the city is the Pietermaritzburg Airport, the management of which is outsourced to Indiza Airport Management Company. The airport has been upgraded, a project that was finalized during the 2014/2015 Financial Year.

3.14.4 Integrated Rapid Public Transport System

The Msunduzi Municipality was selected as one of the cities to receive national support and funding for the restructuring of their public transport system in terms of an Integrated Rapid Public Transport Network (IRPTN). The Msunduzi IRTN planning and preliminary design commenced in August 2011, and is almost complete due to the grant received from the National Department of Transport.

An IRPTN is about the integration of various forms of public transport to realise a more efficient and reliable transport network. In general terms, it is an integrated system of high demand public transport corridors, referred to as trunk routes, fed by a comprehensive system of feeder routes. As a system, this provides effective coverage and frequent service for all users of the network. The objectives and goals of the Msunduzi IRTPN are as follows:

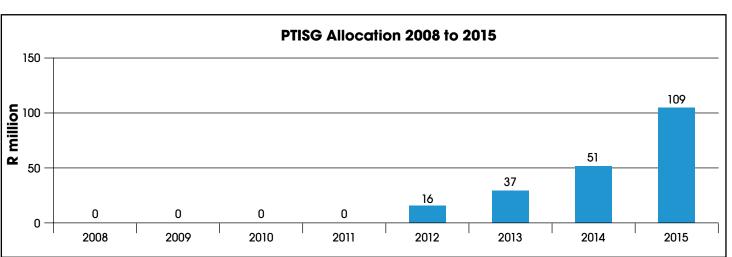

- Create a Transformed City with a high level of mobility for accessibility to employment, education, hospitals, etc.
- Modernised/ Vibrant Transport System with a high quality priority network, a modern reliable fleet, architecturally pleasing infrastructure, and convenience, safety and efficiency.
- Increased Environmental Responsibility.
- Economic spin-offs such as job creation, investment, and business opportunities.
- Visual awareness of the City's commitment to the poor and marginalised.
- Increased in-house technical skills and capacity.
- State-of-the-art transport modelling tools.

The first phase of the network considers the following types of routes:

- Trunk the core route with the highest demand using a segregated right of way. One such route has been
 identified for the initial phase running from Edendale in the west through to Raisethorpe in the east, a distance
 of some 17km.
- Complementary other strategic bus routes branded as "Quality Bus" routes.
- Feeder these routes serve more isolated areas, and where the road network may comprise gravel roads.

These services link with trunk and complementary routes, and services would typically be provided by 14- seater minibuses.

Although the project has stalled negotiation with the taxi industry are ongoing and it is now progressing well with construction during to start during the 2015/16 financial year. A marketing campaign was run by the IRPTH office whereby the public was encouraged to come up with a name for the IRPTN bus service. Below is the future expenditure in terms of the operations of the IRPTEN office.

Name of Municipality: Msun	duzi Local	2016/17	2017/18	2018/19	Total
Municipality					
Area	Expenditure item	PTI Grant	PTI Grant	PTI Grant

3.14.5 Non-motorised transport

The Non-motorised Transport Plan for the Msunduzi Municipality (2009) identifies a number of pedestrian problems, as follows:

- A lack of sidewalks in residential areas;
- Intersections where informal trading is taking place;
- A lack of sidewalk maintenance;
- Speed of vehicles approaching pedestrian crossings; and
- Trading activities blocking sidewalks.

Problem areas have been identified as follows:

- On several busy roads in the city centre, including Victoria Road, Church Street, Boshoff Street, Pietermaritz Street, Hoosen Haffejee Street, Langalibalele Street and Jabu Ndlovu Street.
- Around Primary Schools in all areas.
- At the Greytown Road Interchange.
- On the route from the CBD to the Liberty Midlands Mall.
- At major hospitals (Edendale, Greys, and Northdale), as well as local clinics.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Problematic roads identified for cyclists include:

- Victoria Road:
- Alexandra Road;
- CB Downs Road and the link to Ashburton (R103);
- All major roads where the speed and volume of motorised traffic is high; and
- All roads in industrial areas, because of space sharing with trucks.

3.15 INDIGENT SUPPORT

Support to indigents in terms of municipal services is summarised as follows:

Table 32: Indigent Support

CATEGORY	DESCRIPTION
Property Rates	Indigents qualify, like all domestic consumers, for a reduction in the market value of the property as approved from time to time by Council, and as reflected in the applicable tariff register. A rebate of 100% is granted on all residential property from a value of R15 001.00 to R100 000.00. If a property is worth more than R100 000.00 and residents approach Council for relief, a means test is applied.
Electricity	Indigents qualify for 60 kWh free electricity, as determined from time to time by Council and as reflected in the applicable Tariff Register.
Electricity MCB	Indigents qualify for free amperage as determined by Council from time to time and as reflected in the applicable Tariff Register, with a 20 Amp circuit breaker.
Water	Indigents qualify for 7kl of water per month, an amount determined from time to time by Council and as reflected in the applicable Tariff Register.
Refuse	Indigents qualify for free refuse removal as determined by Council from time to time, and as reflected in the applicable Tariff Register.
Sewerage	Indigent households qualify for 4.2 kl of free sewerage discharge as determined by Council from time to time and as reflected in the applicable Tariff Register.

Table 33: SWOT

KEY ISSUES RELATING TO INFRASTRUCTURE DELIVERY

- Backlogs on repairs, maintenance, and refurbishment of infrastructure.
- High demand for engineering services in the informal and peri-urban areas and areas that did not previously form part of the borough of Pietermaritzburg.
- The need to protect revenue from theft and tampering by residential and business users.
- The need to reduce revenue losses caused by technical losses, illegal connections, tampering, unbilled metered consumers and unmetered authorised consumers.
- As the service provision footprints increase, there is a need for larger operations and maintenance budgets.
- The difficulty of attracting and retaining qualified and competent technical staff with the shortage of technical staff continuing to affect service delivery.
- The theft and vandalism of infrastructure.
- An ageing fleet of vehicles with frequent breakdowns resulting in stoppages in service delivery.

STRENGTHS

- Investment in stabilising water and electricity provision in the Municipality.
- Relatively high levels of service provision with relatively low backlogs against RDP standards.

OPPORTUNITIES

- The existence of a number of sector plans.
- An increased drive to recycle waste.
- The IRPTN roll-out in the Municipality.
- Expansions to the airport, resulting in larger planes being able to use runways.
- · Proximity to the N3 corridor.
- Potential high-speed rail link through the Municipality, linking Gauteng to Durban.

WEAKNESSES

- Staff and skills shortages in key positions.
- An ageing fleet of vehicles.
- Varying levels of service provision.

THREATS

- The need to reduce revenue losses due to technical losses, illegal connections, tampering, and unbilled usage.
- There is a need for larger operational and maintenance budgets to service the ever increasing service delivery footprint.
- Theft/ vandalism of infrastructure.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

3.16 HOUSING

3.16.1 Strategic issues for consideration (SDF)

The implications of the medium road scenario to be considered in future spatial development planning in the Msunduzi Municipality are:

The population of Msunduzi could potentially increase considerably over the next four years. This suggests, in simple terms, that the current space available for residential development in the Msunduzi Municipality must increase substantially and that higher density housing development must be a key strategy going forward.

The expansion of residential areas must therefore be planned for, and in each urban area the spatial implications of expansion and densification must be considered in terms of the adopted SDF (2015) it is anticipated that the majority of this expansion will take place in the N3 Corridor (the South Eastern District specifically), which is the area where the most substantial areas of land for development where future economic development will potentially be concentrated.

It is anticipated that by 2021 the population of Msunduzi Municipality will be approximately 680 389 calculated at a rate of 2 per cent per annum. In order to accommodate the population growth it is proposed that the human settlements be provided at a recommended 25 dwelling units per hectare along strategic corridors in the form of 2-3 storey walk ups building typologies in order to maximize available land.

Based on this the SDF (2015) proposes the establishment of new housing opportunities in new areas within the Municipality. The exploration of new housing opportunities is key to the development of the city as it will help accommodate the projected city population growth for the coming years.

The SDF (2015) proposes new housing in the following key areas: Ambleton, Foxhill, Ashburton, Hayfields and Willowton. The provision of housing in these areas will support the south-eastern expansion of the Greater Edendale area and enable future residents better access to employment in the industrial areas located within the Mkhondeni area and along the N3.

Planning for more appropriate integrated housing opportunities will successfully address the 2021 projected housing demand through the development of a range of housing typologies targeted at the full spectrum of income levels, lifestyles and stages of life.

Msunduzi UM SDF (2015)

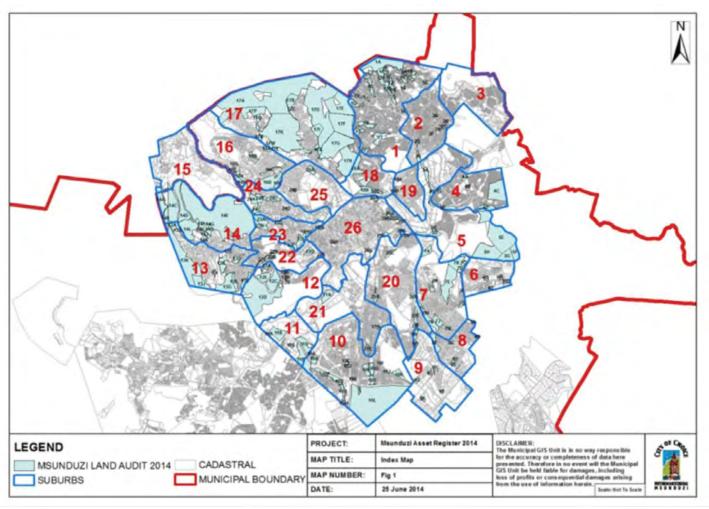

Identification and Location of Land Suitable for Human Settlements Development (Housing Sector Plan)

The identification, location and acquisition of land suitable for human settlements are the ultimate determinant of the pace at which housing delivery is secured.

Msunduzi Municipality has a dedicated Valuation Department which, among other functions, determines land values on land offered for human settlements. While the municipality actively and proactively looks for land suitable for human settlements developments, the scarcity of the land and rate at which it is offered are among the major impediments to human settlements development.

The Land Audit project of 2014 identified 256 hectares of land within the jurisdiction of the municipality that was deemed to be suitable for general development. This initiative together with the acquisition of land within the GEVDI ABM are key strategies that assist in unlocking potential land for human settlements all in aid of accommodating the projected population by the year 2021.

3.16.2 Estimated backlogs

The municipal has prepared the Municipal Housing sector plan and the slums clearance plan during the 2013/14 financial year, this plan is now being implemented.

3.16.3 Informal settlements

Msunduzi Municipality commissioned Kayamandi Development Services (Pty) Ltd during the 2013/2014 financial year to develop an Informal Settlement Upgrading Strategy under the National Upgrading Support Programme (NUSP), an initiative of the Department of Human Settlement, and the report was released in February 2014.

The NUSP report enumerated and documented all informal settlements within the jurisdiction of Msunduzi Local Municipality, profiled and classified them based on severity of informality and perceived urgency of intervention. In summary, the NUSP report broadly categorised informal settlements within the municipality as follows:

Informal settlement category	Description	Number of Settlements
Α	Full basic services in place, pending full	2
	upgrade	
B1	Only interim services are in place	41
B2	Only emergency services are in place	41
С	No services in place, candidate for immediate relocation	28
TOTAL		70

Table 34: Extent of Informal Settlements in the Municipality (Msunduzi Housing Plan, 2011)

PROPOSED HOUSING PROJECT	WARD
Snathing Phase 1	11
Edendale T2 unit 18 Extension	15
Edendale Unit EE Phase 3	17
Bhobhonono/Masomini	20
Smero	20
Woodlands	32
Willowfontein Terminus	14
Phupha Phase 1	14
Buntine Place	23
MArryvale	34
Nhlalakahle	31
Nkululeko	28
Masson	29
Yellowood Place	32
Baverstock Road	27
Oribi Village	24
Woodpecker Road Extension	28
Regina Road	1 and 28
Shortts Retreat	37
East Street Hostel	32

From the above summary, it is evident that more than 97% of all informal settlements in Msunduzi are in urgent need of upgrading intervention, and the NUSP Msunduzi Informal Settlements Upgrading Strategy details the requisite budgetary implications of the informal settlements upgrading exercise, broken down per category of informality, over a 5 year period (2014-2019) as follows:

Category	Upgrading Budget (2014 – 2019)
B2/C	40,829,623
B1	406,218,222
A(+B2)	130,492,058
Α	82,662,997
TOTAL	926,805,514

3.16.4 Existing housing projects

The distribution of projects within the Municipality indicates that:

- 60% of projects are located in Edendale/Imbali ABM
- 22.5% of projects are located in the Central Areas ABM
- 17.5% of projects are located in the Northern ABM

The majority of housing projects in Msunduzi are individual and project linked subsidy projects. Housing projects in urban areas are as follows:

- A total of 40 housing projects are being administered by the Municipality at present.
- A total of 30 056 housing subsidies for these projects have been applied for.
- To date 25 657 houses have been built and 4 399 houses still have to be built.

In terms of the type/category assigned to each project, the following project list is provided:

Table 35: Projects in the Msunduzi Municipality

PROJECT TYPE/CATEGORY	AMOUNT OF SUBSIDIES	HOUSES BUILT TO DATE
25 in-situ upgrade	19 212	13 122
4 Greenfield developments	1 994	302
1 institutional		6 beds (closed out)
6 slum clearance	7 178	5 067
1 special needs	Proposed 40 beds	
1 urban consolidation	1044	975
2 in-situ/green-fields	1 288	1 218
1 urban individual	432	432
Total	31 148	25 657

(Source: Msunduzi Housing Delivery Unit, 2010)

3.16.5 Planned housing projects

Future housing projects have been identified by the Housing Delivery Unit of the Municipality, and are in various stages of planning. The projects are spread throughout the municipal area and can be summarised as follows:

Table 36: Summary of Planned Projects

PLANNED PROJECTS	PLANNED NUMBER OF SITES
Edendale (southern areas)	8 419
Northern areas	4 100
Vulindlela	25 000
Sub-total	37 519
Rental housing	3 085 planned units

(Source: Msunduzi Housing delivery unit and Msunduzi Housing Association)

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Table 37: SWOT

KEY ISSUES RELATING TO HOUSING:

- Housing Delivery:
 - Accreditation level 1 for housing delivery from the Department of Human Settlement (DOHS);
 - Funding and assistance for upgrading of informal settlements from DOHS (National Upgrading Support Programme):
 - Prioritised for Social Housing and identified as one of 13 municipalities with Provisional Restructuring Zones:
 - Land invasion creates queue jumping;
 - Release of suitably located land for housing being delayed by the state. Many parcels have been identified but the state is delaying release
 - Land/legal problems are affecting transfers both of land for housing and completed houses; and
 - Suitable organisational structure and staffing in the Municipality not approved to deliver on housing fully.
- Rental Stock:
 - Ageing infrastructure (rental flats);
 - Insufficient funding for repairs and maintenance which relates to poor rental payments;
 - Possibility of transferring certain rental units under Enhanced Extended Discount Benefit Scheme (EEDBS) policy (National Department of Human Settlement Policy); and
 - Delays by DOHS in investigation of rental stock for the EEDBS transfers.

STRENGTHS

- Accreditation level 1 with the Department of Human Settlement (DOHS).
- Funding forthcoming from the DOHS.

OPPORTUNITIES

- Transfer of rental stock in terms of the Enhanced Extended Discount Benefit Scheme.
- Social Housing prioritised as one of 13 municipalities.
- Release of strategically located land for densification and residential infill.
- Funding assistance from DOHS for the upgrading of informal settlements.

WEAKNESSES

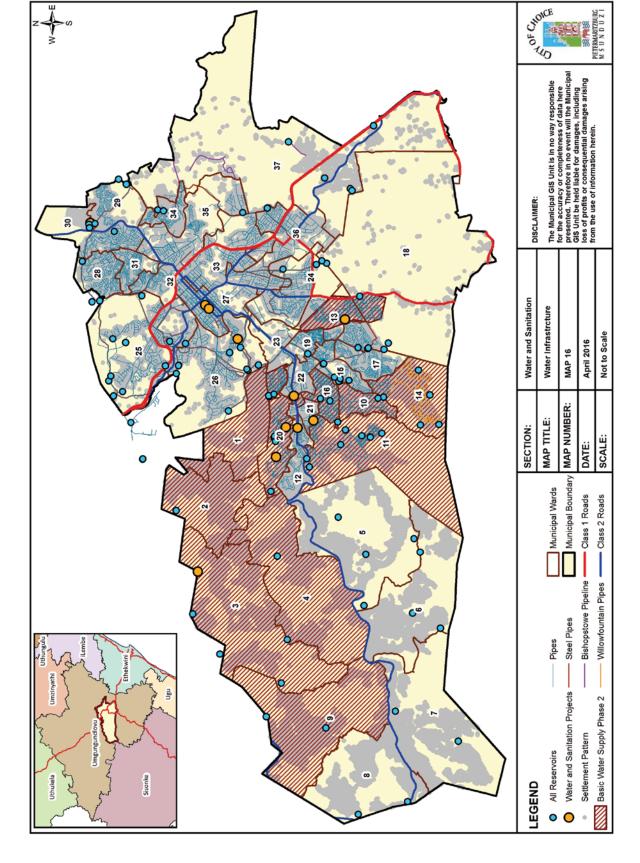

- Ageing rental stock.
- Insufficient funding for repairs and maintenance.

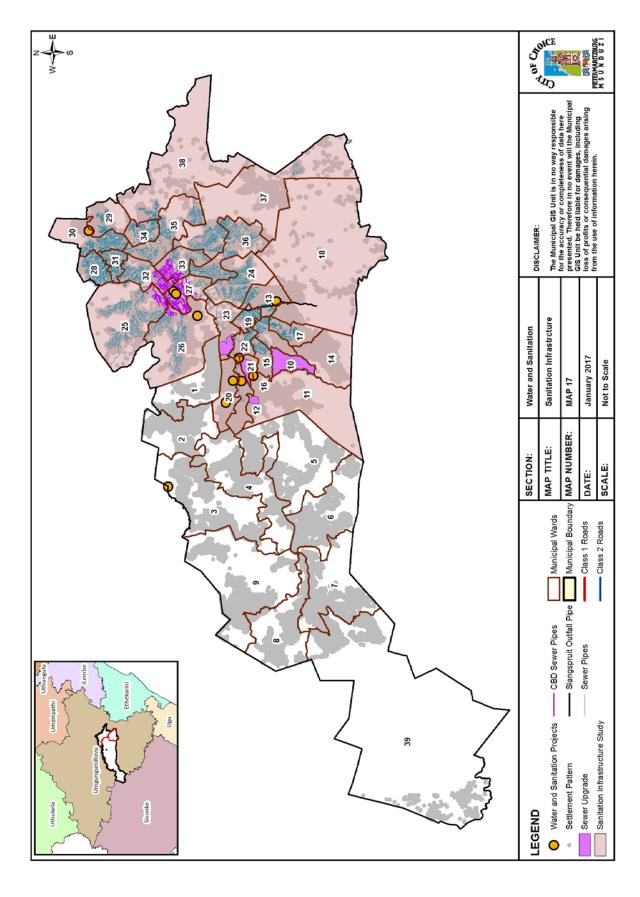

THREATS

- Illegal occupation of land.
- Land legal problems affecting the transfer of land and housing.

3.16.6 THE EDENDALE LAND INITIATIVE AND THE GREATER EDENDALE DEVELOPMENT INITIATIVE

3.16.6.1 Legal background

Proclamation LG No 73/1995 established the Pietermaritzburg/Msunduzi Transitional Local Council (now Msunduzi Municipality). This included the area comprising the Greater Edendale Complex. From the date of this proclamation, Edendale was administered by the Municipality. However, the underlying land was in State or Private (generally 'Black') ownership. In response to the above, the Minister, in terms of section 10 of the Local Government Transition Act 209/1993, promulgated Proclamation 84/1996, which required that the transfer of immovable assets to the Municipality be effected by agreement. A general Power of Attorney (No 540/1997), issued by the Minister of Land Affairs (now RDLR) on 22 September 1997, and which was assigned to the KZN Provincial Department of Housing (now known as the KZN Provincial Department of Human Settlements, or DOHS), also provided for the transfer of State land to the Municipality.

The Municipality was tasked with the matters set out in Part B of Schedule 4 and Part B of Schedule 5 of the Constitution of the Republic of South Africa 1996, including (but not limited to) Municipal planning and development. As a result, the Greater Edendale Development Initiative (hereinafter referred to as 'GEDI') was established to embark on the development of the area known as the Greater Edendale Complex, comprising all the properties that are the subject of the legal provisions as detailed in the above paragraphs.

A Joint Provincial/Municipal Working Committee was established in terms of a written agreement dated 20 March 1998, as amended by the amending agreement dated 15 August 2000, for the express purpose of resolving the land and legal issues (historical and current) in the Greater Edendale Complex in order to pave the way for the redevelopment of Edendale for the benefit of its inhabitants. The DOHS provided grant funding for this purpose.

As will be seen below, the above mentioned committee, now known as the Department of Human Settlements/ Msunduzi Municipality Land Legal Committee (hereinafter referred to as 'the LLC') was expanded, and currently serves as a joint governmental committee, having representation from KZN DOHS, RDLR, KZN Public Works, the Municipality, the National Housing Development Agency, appointed land and legal experts, and other professionals.

3.16.6.2 Memorandum of agreement

The Municipality, via GEDI, requested financial assistance to resolve land tenure issues, and assistance to gain control and ownership of the state land and private land, which land was substantially marginalised due to informal settlement thereon, and which had and was fast developing into untenable 'slums'. Further, the LLC established that, with reference to private land, a large proportion of the owners were long deceased, and their estate had not been wound up or, as was generally the case, had not even been reported to the Master of the High Court's office. This resulted in tenure insecurity, poor land administration, and the inability of Government in general, and the Municipality in particular, to provide basic services in the Greater Edendale Complex.

The Municipality and DOHS, on 1 March 2002, entered into a Memorandum of Agreement (hereinafter referred to as 'the DOHS MOA') for the acquisition of private land in Edendale, and the transfer of land under the control of the State and within the jurisdiction of the Municipality to the Municipality.

The DOHS MOA provided grant funding to the Municipality. The implementation of the DOHS MOA falls under the jurisdiction of the LLC. This grant funding has been fully committed.

The main functions of the LLC include, inter alia:

- Project Management and Administration;
- Setting up and maintaining a current GIS for GEDI;
- Setting up, appointment, management, and payment of Professional Valuers;
- Management and funding of the Sales Administration process associated with the acquisition of Private Land:
- Appointment, management, and payment of 'negotiators'; and
- Generally, all other costs directly related to the implementation of the DOHS MOA.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

The Department of Land Affairs (now Rural Development and Land Reform, or RDLR), through its Provincial Land Reform Office, is mandated by its legislative and policy framework to provide funding for land acquisition for designated groups for purposes of settlement and production. To this end, the Municipality entered into a further Memorandum of Agreement with the RDLR on 21 October 2008 (hereinafter referred to as 'the RDLR MOA'). In terms of the RDLR MOA, the RDLR has budgeted amounts of twenty million rand (R20m) for land acquisition and fifteen million rand (R15m) for the upgrading of tenure, resolution of tenure conflict and tenure insecurity, and conveyancing for the Greater Edendale Complex.

Further, and within the new strategic framework, RDLR identified the Greater Edendale Complex as a primary opportunity to give effect to the policies on tenure upgrade, land acquisition for sustainable human settlements, land acquisition for agriculture, and industrial and economic development. The Greater Edendale Complex, with its multiple land ownership and irregular settlement patterns, is materially hindering development, and accordingly the RDLR, via and in terms of the RDLR MOA, has become a major role-player in the redevelopment of Edendale.

3.16.6.3 Land title adjustment

The RDLR have appointed three Land Titles Adjustment Commissioners in terms of the Land Title Adjustment Act, Act 111 of 1993. The above is critical, and will enable the LLC to deal with deceased estates and related land issues as provided for in the Land Title Adjustment Act, Act 111 of 1993. The above initiative will benefit in excess of 20 000 (twenty thousand) people who are currently living without secure tenure. The Land Titles Adjustment Commissioners will play a role in that:

- They will make awards of property where there are competing interests that have arisen historically; and
- They will make awards where the properties affected have already been transformed and the award will be in monetary value.

3.16.6.4 Historical community involvement

It is important to note that it was in fact the Edendale Private Land Owners and Rate Payers Association (hereinafter referred to as 'ELRA') who, in the year 2000, approached the then Provincial Department of Housing to seek assistance in dealing with their land in Edendale, which had been materially marginalised by ever-increasing settlement from informal occupiers of their land. The history of this settlement is well-known, and is not repeated here; however, it is important to note that rates arrears have been, and remain, a major issue with respect to the above, and extensive interaction between ELRA, the Municipality, LLC, and local community structures have informed the processes embarked upon to date.

3.16.6.5 Planning and provision of housing

The LLC embarked upon a major planning initiative for the Greater Edendale Complex. Three (3) of the eighteen (18) 'functional' areas identified for development purposes in terms of the above integrated planning initiative by the LLC have been prioritized by the Municipality. This prioritization was based on the fact that these are the areas where the problems outlined above are concentrated. Of these priority areas, one of them is the area known as Dambuza.

Legislation provides that Municipalities must take all steps within the framework of national and provincial housing legislation and policy to ensure that inhabitants have access to adequate housing and services. Municipalities must set housing delivery goals, identify and designate land for development, and create and maintain a public environment conducive to housing development which is financially and socially viable. The Municipality, via GEDI, is accordingly actively and aggressively participating in the National Housing Programme, in accordance with the rules applicable by promoting housing development projects, acting as the developer in respect of the planning and execution of housing development, and administering the National Housing Programme in its area of jurisdiction; and accordingly, 12 housing projects were identified as part of the above initiative, from which five (5) priority housing projects were identified and resolved by the Municipality to be implemented forthwith.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

3.16.6.6 Expropriation

A large portion of the land that the Municipality will be acquiring is in the ownership of deceased estates. Given the background set out above, and in particular the urgency of the matters, the Municipality has resolved to proceed by way of expropriation, it being in the public's interest to do so. Section 190 of the Local Authorities Ordinance No 25/1974 provides for the expropriation of land by the Municipality if it is unable to purchase the land on reasonable terms through a negotiated process and it has obtained the express permission of the MEC to expropriate such land. The Expropriation Act, Act 63 of 1975, then governs the expropriation process to be followed. The first 63 properties identified for expropriation have followed the whole process and are in the final legal stages of expropriation before the Municipality takes possession of the properties.

It must be specifically noted that as these properties are in the hands of deceased estates, the Land Titles Adjustment Commissioners will play a meaningful role in order to ensure that the compensation payable is received speedily and expeditiously by the heirs of these estates, and where it is recognized that, in most of the deceased estate cases, these have not been reported at the Master of the High Court's Office in Pietermaritzburg.

3.16.6.7 Property identification

In terms of the DOHS MOA, and further endorsed by the RDLR MOA, the Municipality has established a subcommittee of the LLC, this being the Land Acquisition Committee (hereinafter referred to as the 'LAC'). The RDLR is represented on the LAC, which is chaired by the Municipality's Manager Real Estate and Valuations, and is mandated by the DOHS MOA, the RDLR MOA, and the Municipality, to identify, resolve, and to acquire properties required for the redevelopment of the Greater Edendale Complex. The LAC is responsible to ensure that all such properties resolved to be acquired shall be valued by two independent Professional Valuers. The Municipality then pays compensation on the basis of the higher of the two approved valuations, plus a 10% solatium. In order to maintain a fair market value for each property, an escalation factor has been included in the daily update of each property

3.16.6.8 Purchase and sale

The Private Land Acquisition Programme is, of course, driven initially by consultation with the Registered Land owner/s, whereupon the recommended negotiation price is determined by valuation and then forwarded to a Negotiator drawn from a panel of Negotiators appointed by the project, who are largely Attorneys drawn from the Edendale area.

Presently, a total of 255 properties are in various stages of being purchased for the first 5 Priority Housing projects, the majority of these having been valued twice, and are now in the negotiation stages of purchase or being set aside for expropriation, for various reasons.

3.16.6.9 Additional funding

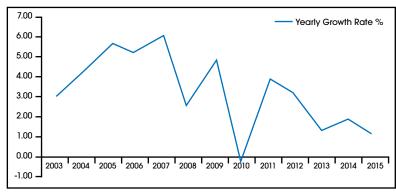

At present, the DOHS is offering to continue funding the Land Initiative for a further 3 years, and a Business Plan (of approximately R 71 million) has been submitted to them for consideration. This includes an amount of R 54 million for land purchase, and R 17 million for project administration, conveyancing, and the like.

C5-LOCAL ECONOMIC DEVELOPMENT

3.17 THE STATE OF THE ECONOMY

The municipality continues to be the main driving force behind the economy of the umgungundlovu District, contributing GDP-R of R39.7 billion to the district economy, which represents 69.5% of the district's economy, during 2015. Whilst the city's economic growth has been sluggish, the growth rate marginally exceeded that of the KZN province for 2015 – 1.03% compared to 0,98%. The national growth rate for the period was 1.28%. Figure 12 below indicates the GDP growth for the city from 2003 to 2015.

Figure 12: GDP from 2003 to 2015

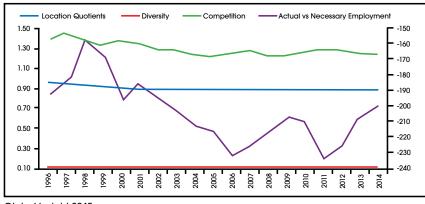

Global insight 2015

The economic outlook for 2016 and the next few years, however, remains bleak as the economy tries to withstand the effects of increasing prices, including electricity tariffs which have the potential to impact on business investment within the municipality, rising interest rates, a stagnating housing market and the eroding of disposable incomes levels. There has been a modest increase in per capita income, with GDP-R per capita in 2015 reaching R53 500 compared to R39 000 in 1996.

The figure below illustrates trends in the location quotient, diversity, competition, and actual versus necessary employment. Positive figures indicate low or decreasing risk, figures around zero show a neutral risk, and negative figures show high or increasing risk. As can be seen for the period 1996 to 2014, risk factors in the Msunduzi economy are associated with employment, whereas

FIGURE 13: Location Quotient, Diversity, Competition, and Actual vs Necessary Employment in the Msunduzi

Global insight 2015

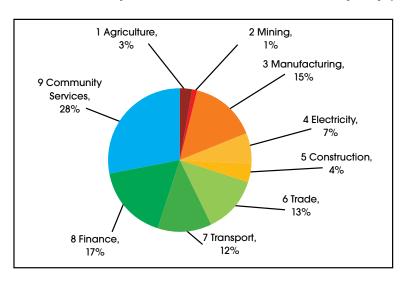

3.18 KEY ECONOMIC SECTORS

3.18.1 Introduction

The key economic drivers within the municipality in 2015 were Community Services (28%), Finance (17%), Manufacturing (15%) and Trade (13%).

FIGURE 14: GDP per sector for the Msunduzi Municipality (2015)

3.18.2 Community Services

Community services amounts for 28% of the Gross Domestic product of the Msunduzi Municipality it has remain consistent from 2011. The city is the capital of the KwaZulu Natal and therefore houses a number of provincial government departments. These are mainly located in the CBD and the Municipality has a plan to leverage on this as part of the city development strategy.

3.18.3 Finance

The financial sector of the Msunduzi economy is the second largest sector in terms of GDP and accounts for 17% down from 24% in 2011. The fact that it is second largest can be associated with a large number of commercial banks being located in the Municipality, as well as other financial institutions. The location of government departments within the Municipality, together with their financial transactions, reinforced this trend.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

3.18.4 Transport

Transportation accounts for 12% of the GDP of the Municipality slightly down 13% in 2011. The municipality is located along the busy N3 corridor, as well as at the confluence of number of major provincial and district roads. The establishment of a motor sales complex adjacent to the N3 and showground's further attempt to strengthen this sector.

3.18.5 Trade

Trade accounts for 13% of the municipal GDP up from 12% this an important element of the economy. Many higher order retail facilities are located in the Municipality and have a large catchment area servicing many at the outlying towns and communities both within and outside the Municipality.

3.18.6 Manufacturing

Although there has been a decline in the manufacturing output of the Municipality over the last decade manufacturing contributed 15% to the local GDP. This is an important sector and many opportunities exist for its further development and growth. The municipality has plans at advanced stages to release additional land for industrial growth. One such development is the Ibhubesi light industrial park which is a 60 ha site in Ashburton which is under construction and will have 70 sites of commercial and light industrial properties.

3.18.7 Agriculture

Agriculture provides 3% of the GDP of the municipality. Although subsistence agriculture plays an important role in the Municipality, commercial agriculture is not as prevalent as in surrounding municipality. Many surrounding municipalities within the umgungungndlovu Municipality supply produce directly to the markets in the Municipality.

3.18.8 Tourism

The economy of the municipality is dependent on a number of major sporting and cultural events, including the Comrades Marathon, Midmar Mile, Duzi Canoe Marathon and the Mountain Bike World Cup, to name but a few. These events lead to directed cash-injections into the economy and have positive impact on the local tourism establishments. The Municipality is also located midway between the burg and beach tourism destinations and is a convenient stop-over for many travellers.

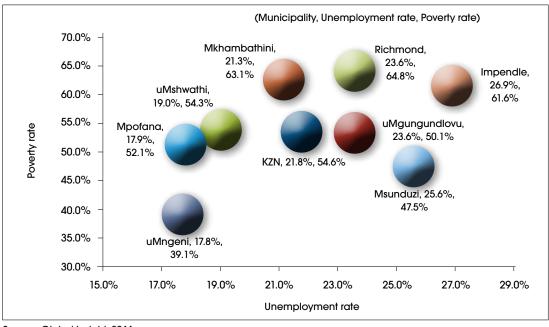

3.19 LEVELS OF EMPLOYMENT

3.19.1 Employment

In its Diagnostic Overview released in 2011, the National Planning Commission (NPC) found that education and employment were two major problems affecting the South African economy – specifically a poor quality of education and low employment levels. These two aforementioned variables are interrelated in that a poor quality of education can lead to inability to find relevant employment, resulting in structural unemployment; the most prevalent type of unemployment in South Africa. Inherently, unemployment leads to loss of income by households. As household income decreases and becomes unable to meet all the needs of the household, that household is categorized as living in poverty.

FIGURE 16: Municipality, unemployment rate, poverty rate

Source: Global Insight, 2014

It is imperative that the reader considers that the unemployment rates reported above are based on the narrow or strict definition of unemployment, and therefore do not account for discouraged work seekers.

3.19.2 UNEMPLOYMENT

Census (2011) indicates that levels of unemployment have declined from the high figures of 48.2% of the economically active population in 2001, to a figure of 33% in 2011.

3.20 FORMAL BUSINESSES IN THE MSUNDUZI MUNICIPALITY

The number of registered businesses is an indicator of economic activity in a district. There are 712 businesses registered in the Msunduzi Local Municipality, which is a sizeable number. Informal businesses are often unregistered, and therefore unlikely to be included in this number. Almost half the respondents in the sample were unable to provide statistics on the number of registered businesses. For Msunduzi, having access to this data reflects well on their LED Capacity.

A business register is a valuable database for organising LED processes where the public and private sector work in partnership to improve the local economy. COGTA (2012) recommended that Msunduzi Municipality use its register of businesses to profile its potential private sector partners, and better structure and select its LED interventions to suit the nature of local business.

Respondents who participated in the COGTA (2012) study identified the following key economic sectors in the local economy: Consumer Sales and other Services (54%), Manufacturing (16%), Retail (13%), Training (8%), Hospitality and Tourism (6%) and Professional Services (2%). The prevalence of consumer sales and services, as well as retail and financial services, shows the role of the city as a service centre. There is some diversity in the economy, with manufacturing and tourism (both productive sectors) featuring well. It is surprising that the local economy is not more dependent on government services, given that Pietermaritzburg is the provincial capital.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

As part of the COGTA study (2012), local business was asked on their views of doing business with the Municipality in the future. Views on the future of business were only marginally positive overall in Msunduzi, with 38% being positive and 8% very positive, while 38% were neutral about the future, and 15% had a very negative view of the future. Although the sample is too small to draw reliable conclusions, there is some evidence of a mixed and even negative view on the future of business.

Hindrances to future growth were reported most frequently as roads (at 31%), followed by service charges and electricity at 25% each, and by tax rates at 19%. It is not clear if tax rates were understood as municipal rates and taxes which are levied by the local Municipality, or income tax which is a national competence. The finding that roads, electricity, and service charges are a key hindrance to growth can assist the Municipality to focus its efforts in these areas, and improve delivery of these services and infrastructure for the requirements of local business.

3.21 SMALL, MEDIUM AND MICRO ENTERPRISES AND THE INFORMAL ECONOMY

(i) SMMEs IN THE MSUNDUZI MUNICIPALITY

It has been generally acknowledged that the rate of growth and survival of SMMEs and the number of SMMEs in an area are good indicators of growth. Many governments therefore make major efforts to assist new businesses to start up, and offer support to SMMEs to facilitate their growth.

The importance of creating an enabling infrastructure environment for Msunduzi business cannot be overstated. Electricity, telecommunications, water, and roads are the fundamentals of basic economic infrastructure. Existing local and regional economic incentives to invest or expand were regarded as poor by half of the businesses surveyed in the Msunduzi LED Strategy (2008). The provision of incentives is the most important measure municipalities could introduce to promote development. Strategic Priority 5 in the 2030 Municipal Vision talks to the creation of an Economically Prosperous City and deals with the development of this sector.

(ii) THE INFORMAL ECONOMY

Most informal businesses in Msunduzi are low-income generating operations that are typically survivalist. Retail trade (i.e. restaurant, bar, shebeen, tavern, accommodation, vehicle repair/cleaning, shoe repair, repair of personal and household goods, garage, spaza shops/tuck shops/hawker-type stands selling various goods etc.) and community services (i.e. health, communication (telephones), cell phones, catering, gardening, domestic/household services, funeral services, hair salon, social and personal services etc.) are the predominant sectors of informal sector activity.

The COGTA (2012) study indicated that the majority of the informal economy sector has been trading for more than 5 years (70%), while 30% had been operating 1 to 5 years. No respondents had been operating for less than 1 year. This could indicate that informal business is becoming a long-term economic reality. The small sample size prevents drawing clear conclusions.

The Msunduzi LED Strategy (2008) indicates that in 2004, retail trade accounted for 49.2% of overall informal activity in Msunduzi. This percentage increases to approximately two-thirds of informal activity, if community services are included in the calculation. Most of the informal businesses in Msunduzi are survivalist and provide support for an average of 5.68 individuals, who are almost always family members and not part- or full-time employees. Most of these businesses also earn less than R 1,000.00 per month (68%). A major cost for these businesses is the cost of transport, usually getting to and from the work site. The cost of transport can be anything from R250.00/month to R1,000.00/month. When this is related to the average earnings of R 1,000.00/month, the problem becomes obvious. The majority of traders are positive about the future, and almost all traders want to grow their respective businesses into larger formal businesses in the future - 36% of all respondents reported that they specifically want to be self-employed.

Table 38: Informal Activities in Msunduzi

Municipality	Manufacturing	Construction	Trade	Transport	Finance	Community	
manio.pamy	Manadamig	Constitution	made	manapon	rindiioo	Services	Informal
KN - DC22	3 778	4 780	18,311	3 389	2 061	4 926	37 244
Richmond	268	382	1,419	177	188	207	2 640
Pietermaritzburg (Msunduzi)	2,241	3 530	13,555	2,402	1,724	3,677	27,130
Impendle	0	56	176	37	17	34	320
Lions River (uMngeni)	241	504	1 638	351	18	474	3 225
Mooi River (Mpofana)	94	129	378	162	20	212	994
New Hanover (uMshwathi)	933	178	1 147	260	95	322	2 936

Source: UKZN (2006)

In understanding why informal traders are not entering the formal economy, the COGTA (2012) survey indicated that costs of becoming part of the formal economy were the major hindering factor (86%). A further 32% quoted not knowing how to become part of the formal economy, while 2% reported it was too complicated, and 2% reported other reasons. This indicates some reticence to join the formal economy, possibly due to administrative burden and associated compliance costs which form a barrier to transition. However, a significant factor is a lack of knowledge, which suggests the need for greater information and support services for informal business considering migrating to the formal economy in this municipal area. However, a larger sample would need to be canvassed before committing resources to such a specific programme.

There is a critical need to maximise the informal sector and integrate it into the mainstream economy in the Municipality. The sector needs an upward migration programme, as well as the promotion of linkages between informal and formal businesses. In seeking to achieve this, the Msunduzi Municipality, as per the KZN Informal Economy Policy (2011), assisted with the establishment of the "Msunduzi Informal Economy Chamber" on 8 November 2011. The purpose of the chamber is to link the Municipality to the traders. Key functions of the Chamber include:

- To represent informal economy actor issues at District and Local Level;
- To build and strengthen the capacity and leadership of informal economy actors;
- To build an information base on the numbers and situation of informal economy actors;
- To disseminate information on effective organizing strategies for promoting and protecting the rights of informal economy actors;
- To prioritize the upliftment of the poorest informal economy actors;
- To prioritize the interests of low-income informal economy actors by assisting with stopping exploitation and any such conduct by high-income vendors, intermediaries and wholesalers;
- To champion the interests of all informal economy actors by ensuring that government is advised in relation to
 policies that directly or indirectly affect informal economy actors;
- Chamber members should gain an understanding of common problems of informal economy actors, develop new ideas for strengthening their organizing and advocacy efforts, and through their elected representatives, join in local, district and provincial campaigns to promote policies and actions that can contribute to improving the lives and opportunities of informal traders;
- To work in partnership with the private and the public sector;
- All eleven official languages can be used at meetings; and
- No unsound language and/or behaviour will be tolerable at any meeting of the Chamber.

3.20.1 MAJOR DEVELOPMENTS

Msunduzi Country Lifestyle Estate

This development is a lifestyle estate for the over-50s with simplex accommodation and an administrative/leisure complex, which will be adjacent to the Maritzburg Golf Club off New England Road. This land was purchased, and the planning completed some 8-10 years ago, but the development was not implemented due to the global economic crisis. It has now been resurrected and repackaged as a 'lifestyle' development, but now requires an updated EIA, which has commenced, and Spluma application for rezoning. Total investment value will be approximately R150 million and it is expected that construction will commence this year. Resurrected Project – at EIA stage.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Lion Park Warehousing

Lion Park Warehousing is a light industrial development comprising warehousing and office sites (for the storage and distribution of goods by road) as well as sites for factory shops and showrooms. The development property is approximately 25.2 hectares in size with the development comprising of 35 subdivisions ranging from 1336m2 to 28615m2. The development is located in Ashburton near Lynnfield Park. Making slow progress – vast number of environmental conditions to comply with.

Rita Light Industrial Park, Lynnfield Park.

The development involves the establishment of a light industrial park near Lynnfield Park. The development property is approximately 19.4 hectares, of which 17.19 hectares will be developed and comprises 17 light industrial stands, one general business zone, and open spaces. The proposed onsite sewage package plant will be situated on the lowest lying portion of the property. The wetland covers an area of approximately 2 hectares and will remain undeveloped and a 20 meter buffer has been delineated to ensure that no development will take place within this zone. Approvals have been done, except for environmental conditions as under. The time frame for complying with all these is not certain and up to the Developer.

Athlone Circle

The proposed 13,444m2 developments situated adjacent to the N3 and Peter Brown Drive comprises the following:

- 3 commercial buildings of 3 stories
- 446 tenants and visitors parking bays
- 1 retail facility
- 9 residential rooftop loft apartments

Building plans were approved with conditions by the Environmental unit on 14th of October 2014. An Environmental Management Plan was approved 16th January 2015 but not complied with. A site visit conducted on the 14th of January 2016 where it was noted that issues relating to erosion control had been implemented. Still awaited is an Indigenous Landscape Plan including rooftop gardens to be submitted during the construction phase, and a storm water management plan. Earthworks have been done but no construction as yet.

Willowwood Park

Phase 2 of this development is underway. They are now looking at phase 3 of the development, which will be a retail development on the remainder of the property which reaches up to Ohrtmann Road. The accessibility issues are being addressed with SANRAL, PCB and the Roads Department. This development (Phase 2) is under construction.

Eden Gardens Private Hospital

Eden Gardens Private Hospital is being constructed off Archie Gumede Road. Estimated construction value is R340million and the plans were approved on 11 April 2015. The site works are complete and the site is ready to hand over to the building contractors. It is scheduled to be complete in early 2017.

Woodhouse Road Student Accommodation

The Estates Unit is preparing to advertise and dispose of this site, as well as the Scottsville Bowling Club site. The property is now zoned "General Residential" zone in terms of the Pietermaritzburg Town Planning Scheme. The use of the application site for "Residential Building" student accommodation is in accordance to the Pietermaritzburg Town Planning Scheme. The application for subdivision has also been approved and the survey will be done internally by Land Survey section. SMC resolved on 18 December 2015 that in respect of Woodhouse Road, Scottsville: Remainder of Portion 13 of Erf 17 of Pietermaritzburg, the Deputy Municipal Manager: Economic Development investigates the existing Council resolution and submit a further report on how this matter should be dealt with going forward.

Shopping Centre Taylors Halt

The lease for the land from the INgonyama Trust has been concluded, however it needs to be amended due to a slight change in site. Once that is done they will be handing the Spluma application in to the Municipality. The existence of this project has been pointed out to the drafters of the Vulindlela LAP and Town Planning. A town planner has been appointed by the developer and discussions are being held with Eskom. However this project is now running into a few problems. Further meetings are required with the Traditional Council to discuss various issues before the basic environmental assessment starts, including the relocation of people and alternative shopping centre proposals which they are apparently considering. These issues need resolution before the various studies which are required: traffic impact, environmental management plan etc commence. Moving slowly.

Camp's Drift Waterfront

Environmental Authorisation for this proposed development was granted by the Department of Economic Development, Tourism and Environmental Affairs on 04th February 2015. In terms of the Environmental Authorization a number of additional studies are required before construction can commence. These include: a Traffic Impact Study, green building design, amended environmental management plan, and a landscape plan. Final building plans must also be approved by the Municipality prior to construction commencing. A Water User Licence will be required. This has been communicated to the Developer for their attention. The developer is working on these outstanding requirements including building plans and the Water User Licence application. Extremely slow moving project.

The Environmental Management Unit has received no communication from the Applicant or their Environmental assessment Practitioner that outstanding requirements are being addressed. The Unit is attempting to obtain the necessary information from the Applicants Project Team.

Liberty Midlands Mall Phase 3

The 17,000m2 Phase 3 expansion of Liberty Mall has been stalled for almost a year due to the requirements of the National Department of Water and Sanitation (DWS) regarding their Water User License (WUL). A meeting took place between the Developers and DWS to clarify this issue at the end of January, which has now been resolved. Buildings plans have been approved on 4th March subject to conditions. Mpushini Business Park

This was a proposed mixed-use development, comprising a logistics park and office, on a 20.5 hectare site in Ashburton, and the investment value is R1.7 billion. The site was sold to another developer who is proposing to change the condition of the development rights granted for the property. This project is still at the planning stage and moving very slowly.

Hillcove Hills

This is currently the largest proposed residential/mixed-use development in the municipality, on a site 483 hectares in extent between Bellevue and Ashburton. The proposal is for 1369 residential units of various densities, 200,000m2 office and commercial space, 10 Community Facility erven, and public and private open space. The development will be done in a number of phases, with the second phase requiring a major upgrade of bulk services, which will be to the developer's cost. The development was delayed due to SANRAL shelving its plans to build the Bellevue Interchange which would have given direct access to the new township. Moving slowly through all the planning and legal processes.

Ibhubesi Light Industrial Development

This logistics park, light industrial park development is situated on a 60 hectare site in Ashburton. The construction is now well in progress and platforms have been cut. The entrance has been laid out. There are some 70 sites in total with sizes ranging from 2000m2 up to 5 hectares, with a mix of commercial and light industrial. So far two sites are in the process of being sold, with a lot of interest in the other sites. Transfer of sites and subsequent construction of buildings and operations is dependent on the completion of the Lynnfield Park Sewerage works upgrade, which is due to be complete at the end of February. They are also awaiting power supply from Eskom. However they estimate that the first building could be up within 6 months.

3.22 LEVELS OF POVERTY

The Human Development Index (HDI) is a statistic created from data on life expectancy, education, and percapita GDP, as an indicator of standard of living. This table indicates an increase in the percentage of people in poverty between 1996 and 2001, followed by a decrease of the percentage of people in poverty between 2001 and 2007.

Table 39: Social Development and People Living in Poverty

2014	Msunduzi
Human Development Index (HDI)	0.60
Gini coefficient	0.64
Share below the food poverty line	26.0%
Share below the lower poverty line	36.6%
Share below the upper poverty line	47.5%
Functional literacy: age 15+, completed grade 7 or higher	86.2%

(Source: Global Insight, 2014)

In a recent study by the African Food Security Urban Network (AFSUN) (2012) on gender and food insecurity in Southern African Cities, it was found that a high proportion of the total household expenditure in the Msunduzi Municipality (52%) goes on food. The study notes that this is widely recognised as an indicator of poverty and food insecurity. As a result, the immediate need to buy food outweighs other long-term needs, such as investment in education, business, and housing. This leaves little leeway in household budgets when they are subjected to income or price shocks. The study also indicated that female-headed households in the Municipality spend a higher share of their income on food than do nuclear households. The study also found that an average of 60% of Msunduzi households, and 64% of female-headed households, are severely food insecure. Only 7% of households in the Municipality are food secure, as compared to the 44% in Johannesburg, 15% in Cape Town, and 18% in Windhoek.

The Gini coefficient measures the levels of inequality in a society, with the figure of '0' reflecting absolute equality, and '1' representing absolute inequality. For the Msunduzi Municipality, a figure of 0.64 was measured in 2010, which is up from the 0,57 in 1996. This indicates that society in the Municipality is becoming more unequal in nature. It is, however, below the district figure of 0.65 and the provincial average of 0.66.

The Human Development Index (HDI) is a composite statistic of life expectancy, education, and income indices, and a score of '1' indicates a good HDI as opposed to the other extreme of '0'. The HDI for the Msunduzi Municipality improved from 0.60 in 1996 to 0.62 in 2004, showing that life is generally improving for residents of the Municipality.

Table 40: Building Control Information - report to statistics South Africa - no of units

In terms of Building Plan approval, for the period July 2012 to January 2013, 430 plans were approved as per the table below:

3.24 ECONOMIC ADVANTAGES OF THE MSUNDUZI MUNICIPALITY

The Department of Economic Development and Tourism undertook a study into the comparative advantages of the District Municipalities in KwaZulu-Natal (2012), which indicates that the uMgungundlovu District Municipality, inclusive of the Msunduzi Municipality, had the following comparative advantages:

Table 41: Municipal Economic Advantages

ADVANTAGE	CATEGORY	DESCRIPTION
LOCATIONAL ADVANTAGES	CENTRALITY	Msunduzi is at the cross-roads of major access routes linking Durban to Gauteng, Ixopo, Underberg with Greytown, Stanger, and as such there are multiple options for access into the Municipality and the uMgungundlovu DM.
	LOCATED ON THE GAUTENG CORRIDOR PRIMARY LOGISTICS CORRIDOR	The development of this corridor has recently received renewed prioritisation by being declared as one of the President's Strategic Integrated Plans. This will provide opportunities for Nodes along the corridor identified in the SDF and ABM Plans.
NATURAL/ GEOGRAPHIC ADVANTAGES	HIGHLY FERTILE LAND	There is a high abundance of fertile land in the DM and LM making it one of the most productive areas in the province.
INFRASTRUCTURAL ADVANTAGES	MAJOR DAMS	Although not in the Msunduzi Municipality, there are no fewer than four major dams in close proximity to the Municipality (Midmar, Nagle, Wagendrift and Albert Falls, and the Spring Grove dam which is currently under construction).
	EXCELLENT ROAD NETWORK RAIL LINKAGES	The Municipality is serviced by an excellent road network primarily centred on the N3 and the District (R) roads. The Municipality is located on the main Gauteng line, as well as the line to the Eastern Cape.
HUMAN CAPITAL ADVANTAGES	GOOD SCHOOLS AND TERTIARY INSTITUTIONS	The Pietermaritzburg and Midlands area is considered to possess the best schools in the province. These schools produce highly capable Matriculants with good leadership abilities. While the tertiary institutions are perhaps not as robustly developed as they are in eThekwini, the University of KwaZulu-Natal and the Cedara Agricultural College, along with various other private tertiary institutions, provide opportunities for well-trained Matriculants to become highly skilled members of the labour force. The existence of these educational institutions gives uMgungundlovu a significant comparative advantage in terms of being able to offer companies a skilled workforce.
INSTITUTIONAL ADVANTAGES	CAPITAL CITY STATUS OF PIETERMARITZBURG	The designation of Pietermaritzburg as the province's capital is a major advantage for the district. The district benefits directly from the location of government departments in Pietermaritzburg, while indirect benefits include, private sector clustering around government departments and substantial levels of business tourism. The capital City status of Pietermaritzburg also raises the profile of the entire district.

The study also categorised the Comparative Advantage Sectors as follows:

Table 42: Comparative Advantage Sectors

CLASSIFICATION	SECTOR	DESCRIPTION
EXISTING OR STABLE	PUBLIC ADMINISTRATION	Although general government would not normally be regarded as a comparative advantage sector, the public sector's role in the Municipality is not so much a welfare role as it is an institutional and business one. The designation of the Municipality as the provincial capital provides the Municipality with a comparative advantage for attracting public sector business and services, as well as associated private sector business.
UNSTABLE OR THREATENED	CLOTHING AND TEXTILES (FOOTWEAR PRODUCTION)	The employment benefits of this sector are clearly immense, and the sector has experienced relatively healthy growth over the past 10 years. Although the sector as a whole is not revealed to be a comparative advantage by the location quotient method, there may be a niche industry comparative advantage in the production of leather products and footwear. This is confirmed by the fact that the Municipality has the largest concentration of footwear companies in the province and also possesses some leather tanneries. While the sector as a whole is growing, there are significant threats to the future of the leather and footwear industry in the Municipality. In particular, cheap labour in Lesotho has recently drawn investors away from investing in the Municipality and district.
HIGH GROWTH POTENTIAL	POST AND TELECOMMUNICATIONS	This capital intensive industry has been growing at a very impressive rate for the past 10 years and probably reflects the fact that Pietermaritzburg serves as the telecommunications hub for a large hinterland.
	SALES AND REPAIR OF MOTOR VEHICLES AND FUEL	This industry is growing rapidly within the Municipality and reflects the importance of the Municipality being situated on a major transportation corridor. The comparative advantage of this sector is only likely to grow with the renewed strategic focus on the Durban – Gauteng corridor.

In terms of Economic Opportunities and Catalytic Projects, although admittedly not comprehensive, the DEDT (2012) identified the following projects within the Msunduzi Municipality, based on discussions with key stakeholders:

Table 43: Catalytic Projects identified by the Department of Economic Development and Tourism

STRATEGY	PROJECT	DESCRIPTION	STATUS
EXPLOIT	Dedicated, large	Designated stop for trucks using the N3 Durban-Gauteng	Envisioned
OPPORTUNITIES	scale truck stops	corridor	
ASSOCIATED	Development of	Currently uMgungundlovu products are packaged	Envisioned
WITH THE N3	logistical platforms	and loaded in Durban for trips to Johannesburg; this	
CORRIDOR		represents as waste of fuel and increased costs; a	
		logistical platform should be established north of PMB	
	High Speed train	High speed train, as part of the development of the	Planned
	between Durban	Durban-Free State- Johannesburg Corridor	
	and Johannesburg		
	Train coach	Encourage the manufacture of coaches and rail	Envisioned
	manufacturing at	components at Mason's Mill, and link this to Prasa's	
	Mason's Mill	refurbishment plan	
DEVELOPMENT	SEZ for leather	Vertical integration of companies in this sector to include	Envisioned
OF LEATHER AND	and footwear	entire production process: tanneries, trims, adhesives,	
SHOE INDUSTRY	companies	and retail	

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

STRATEGY	PROJECT	DESCRIPTION	STATUS
EXPLOIT CAPITAL CITY STATUS OF MSUNDUZI	CBD REVITALISATION	PMB CBD needs to reflect its importance as a provincial capital. Derelict buildings should be restored to their Victorian splendour and the city should be positioned as a preferred location for companies to operate.	Envisioned
	DEVELOPMENT OF A FIVE STAR HOTEL IN PMB	Currently there are a shortage of high-class hotels in the city; this limits business tourism growth	Envisioned
	FURTHER EXPANSION OF PMB AIRPORT	Revamp and expansion of existing airport to make it more accessible and attractive to use for both business and leisure	Planned
	ESTABLISH A MUSEUM AND HERITAGE CLUSTER	Consolidate a number of the disjointed collections into a modern and iconic world class museum	Envisioned
	DEVELOPMENT OF A LARGE- SCALE CONFERENCE CENTRE	Despite being an events capital; PMB offers very few conferencing options. The development of a conference centre at the Royal Show Grounds could offer greater opportunities for hosting more sporting events.	Envisioned
	DEVELOPMENT OF AN ECO- ESTATE IN PMB	PMB needs an up-market residential estate so as to attract top business people.	Envisioned
DEVELOPMENT	FILM SCHOOL	The development of a world class film school.	Envisioned
OF EDUCATION NICHE MARKETS	DEVELOPMENT OF A FLIGHT SCHOOL	The development of a flight school at Oribi Airport.	Envisioned
UTILISE ENGINEERING SKILLS	Encourage the location of an airline manufacturer in the Municipality	This would be beneficial to the downstream component manufacturers already located in the Municipality	Envisioned
	Establish an electronics hub	Cluster companies which supply electronic components for the motor industry	Envisioned
DEVELOP THE ICT SECTOR	Msunduzi ICT incubator	To provide an enabling environment for the emerging ICT small business to be sustainable and competitive in regional, provincial and nations markets	Exploratory

3.25 THE MSUNDUZI LED STRATEGY

LED processes in all municipalities should be guided by LED strategies, which are a legislative requirement of municipalities in terms of the Municipal Systems Act. The frequency of reviews and the mode of developing the strategy is a reflection of municipal capacity to manage development internally. As part of the review strategy the municipality is utilising analysis from the Area Based Plans together with a range of other information sources.

COGTA (2012) recommended that the Msunduzi Municipality undertake regular implementation review and adjust the strategy implementation plans accordingly, using in-house capacity. This requires building internal project management skills, where lacking.

The following support plans are in place:

- Clothing and textile plan
- Tourism master plan
- Business process outsourcing strategy
- Agri processing plan
- Forestry plan
- Informal economic strategy
- Regional economic strategy

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

The Neighbourhood Development Partnership Grant, (NDP) awarded an amount of R35 million as Capital Grant funding and R2.7 million for Technical Grant funding. NDP has reviewed its existing programme and concluded that, in the absence of an integrated and co-ordinated city wide urban regeneration strategy, the programme has had little impact hence the introduction of the Urban Network Strategy. The proposed new strategic direction for the NDPG is based on a spatial development approach that builds on an urban network model, which is "a transit-orientated precinct investment planning, development and management approach aimed at strategic spatial transformation".

The NDPG has now refocused the project from Township Regeneration to Urban Network Hubs and they have set aside R1.375 million the development of an Urban Network Strategy for Greater Edendale. The network hub includes Masons' Mill, Plessislaer (Ekhrosini), Edendale Hospital and the FJ Sithole Road Nodes.

 The Urban Network Strategy remains on course and is funded under the 2013/2014 DoRA allocation to the Municipality.

The Municipality has a Local development strategy in place and was adopted by council during the 2015/16 financial year. The LED strategy was prepared in house with various stakeholders being included in the development of the strategy and also stakeholders are consulted with on an on-going basis. The following structures are in place and functional;

- IDP representatives forum
- LED forum
- SMME forum
- Tourism working group
- Monthly business development workshops
- Weekly Meeting with the Pietermaritzburg Chamber of Commerce

As per figure 16.1 below the municipal Local Economic Development unit is well capacitated in order to assist business and form strategic partnerships. The Municipality has developed a number of plans to ensure that we respond to the key economic drivers identified in section 3.18. The Municipality developed a business retention and expansion strategy to ensure that the Municipality addresses the threats/challenges facing the Municipality. The complete document is attached as an annexure and proposes four(4) interventions as follows;

INTERVENTION 1: Youth Enterprise Development & Training

INTERVENTION 2: Increasing communication between the municipality & business

INTERVENTION 3: Implementation of sustainable development projects & assistance to distressed companies

INTERVENTION 4: Support & promotion of local production & manufacturing businesses

As per intervention 2 above key economic partners are identified and engaged on an ongoing basis. The activities under this intervention also propose new networks and partnership between various stakeholders.

Small businesses have a major role to play in the South African economy in terms of employment creation, income generation and output growth. They are often the vehicle by which the people with the lowest incomes gain access to economic opportunities and thereby redressing the economic challenges. Business support facilities that service SMME's have increased the sustainability of SMME's throughout the country. These facilities among others business information kiosks, services centres, clusters, one stop shops and incubators.

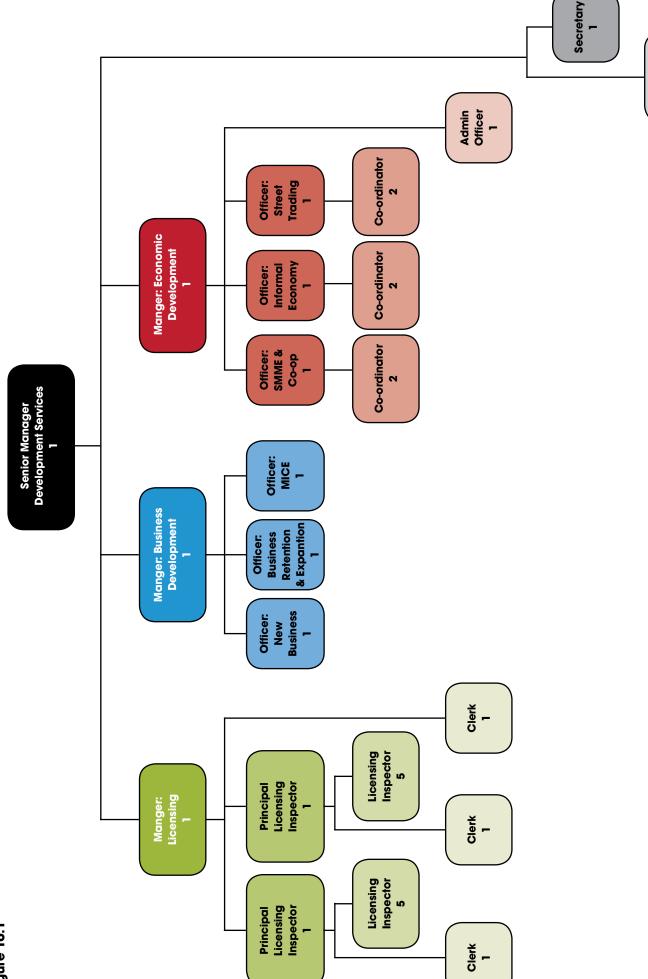

The Msunduzi SMME and Cooperative Strategy aims achieve the following key objectives:

- Provide a synoptic overview of the socio-economic environment
- Analyse key SMME sector challenges and opportunities
- Capture a shared SMME development vision for Msunduzi Municipality
- Identify key strategies and priority interventions
- Develop an SMME Development Implementation Plan

Receptionist

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Table 44: SWOT

KEY ISSUES RELATING TO THE ECONOMY

- A positive GDP and GVA for the municipal economy with an upward trend curve.
- Unemployment figures, although relatively high, are improving and showing a downward trend.
- The Municipality has a number of sectors that have a competitive and comparative advantage and require further support and assistance from the Municipality and other government sectors.
- LED Studies for the Municipality show that there are opportunities in agriculture, agri-process, wood and wood products, tourism, logistics, ICT, and manufacturing to varying degrees. This is summarized as follows:
 - Agriculture- adding value to local produce taken from the surrounding rural areas and municipalities.
 - Tourism-Increasing events and improving business tourism numbers.
 - Logistics- growing Msunduzi as a logistics centre for breaking bulk between inland and the coast as well as supply chain management services, especially the cold chain with links to Dube Trade Port.
 - · Manufacturing- linked to agriculture and tourism, for example agricultural chemicals, and to automotive components, as well as wood and wood products.

STRENGTHS

- Economic growth is positive.
- Unemployment is on the decline.
- The number of unemployed youth is on the decline.
- The economy has well- established secondary and tertiary sectors.
- The percentage of unemployed youth is on the
- The Municipality is the provincial capital.

OPPORTUNITIES

- Adding value to agricultural produce.
- Increasing events in the Municipality.
- The development of the logistical potential of the Municipality's location.
- Expanding manufacturing in the areas of agricultural chemicals, automotive components, and wood products.

WEAKNESSES

- Limited space available for industrial expansion.
- Labour residing long distances from places of employment.
- The need to review the LED strategy.

THREATS

- The impacts of the on-going Global financial
- Globalisation and competition with manufacturers with lower overhead costs.

3.26 SOCIAL INFRASTRUCTURE

3.26.1 Healthcare facilities

The table below summarises the healthcare facilities within the Municipality, and Map 15 indicates the facilities spatially, as well as their catchment areas.

Table 45: Health Facilities within the Msunduzi Municipality

	MOBILES	SATELLITES	CLINICS	COMMUNITY HEALTH CENTRES
MSUNDUZI	6	7	31	2

Healthcare facilities previously operated by the Msunduzi Municipality have been transferred to the provincial Department of Health.

3.26.2 **Schools**

The Pietermaritzburg area of the Municipality is a centre of educational excellence, in both provincial and national contexts. Pietermaritzburg is home to a number of institutions of higher education, including the University of KwaZulu-Natal, technicons, FET colleges, and technical colleges. It is also home to a host of both private and government-owned institutions of primary and secondary education.

Even within the rural and peri-urban areas, schools within the Msunduzi municipal area are situated within the national standards of a primary school within 2km and a secondary school within 5km of all residential areas. A continuous challenge is the standard of school buildings, and access to schools in various areas within Edendale and Vulindlela.

3.26.3 Libraries

The Bessie Head main library remains a flagship facility, having been upgraded with Carnegie Corporation of New York funding. This Library provides services to the entire country, as well as playing host to numerous overseas researchers and visitors. In addition, there are 8 branch libraries and two mobile libraries, providing services to the entire Municipality. The Bessie Head library is one of five Legal Deposit libraries in the country, and is also a major facility within the Province. The top four service delivery priorities are acquisition of book stock to improve services to the public; the provision of periodicals and newspapers to the community; to maintain and upgrade our buildings and facilities; and to maintain and upgrade our computer facilities.

Table 46: Library Usage

	LENDING	LENDING	LIBRARY		LIBRARY
JULY 2011- JUNE 2012	172 016	134 862	25 473	40 197	56 462

3.26.4 Theatres and Community Halls

There are 45 community halls, 14 local halls, and 1 theatre in the Msunduzi Municipality, which are hired and used by members of the community.

The major challenge experienced by Council with regard to these facilities relates to recuperating all operational costs relating to the service that is being charged for.

3.26.5 Parks and open spaces

The following table summarises the number of parks and open spaces in the Municipality. Maintenance of these facilities has been problematic, at times.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Table 47: Parks and Open Spaces

DESCRIPTION	NUMBER	AREA (m2)
PARKS	16	1,913,800
OPEN SPACES	133	4.002,000

3.26.6 Cemeteries and Crematoria

The Municipality has reviewed its strategies in the Cemetery and Crematoria Sector Plan. The Sector Plan proposes, among other things, alternative burial methods in response to the fact that the city is running out of burial areas, as is the case in other cities. Community involvement and participation is essential to ensure buy- in.

The Municipality operates three cemeteries, namely the Azalea, Snathing, and Mountain Rise Cemeteries. There are three crematoria at Mountain Rise, two of which are operational.

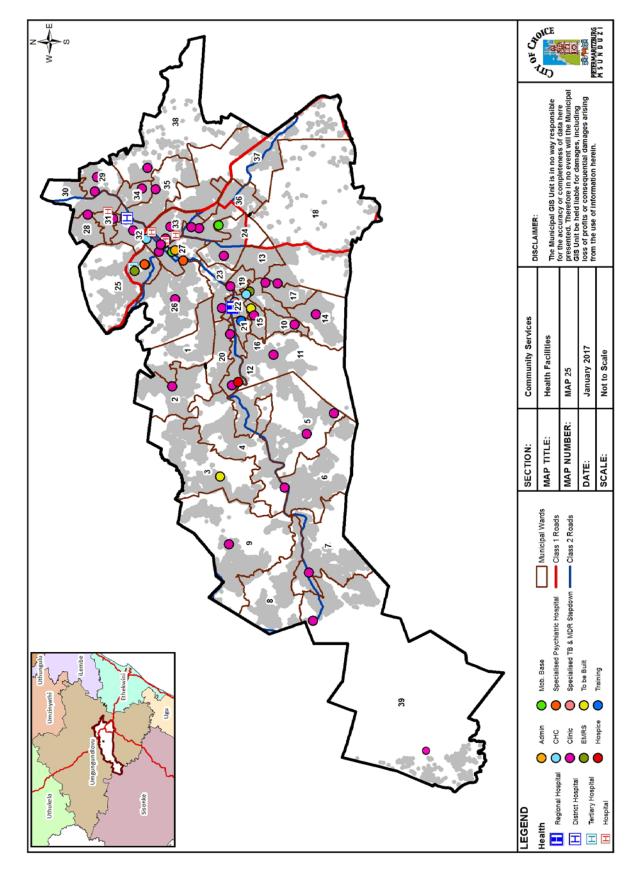

The identification of a new cemetery is vital, as the lack of burial space in the existing cemeteries will seriously impact on service delivery in the near future.

3.26.7 Community safety

In terms of National Crime Prevention Strategy, the Provincial Department of Community Safety and Liaison is the custodian of the Community Safety Plan, with plans being formulated in each of the District Municipalities. Local municipalities, like the Msunduzi Municipality, are then responsible for providing inputs into the District Municipality's plan. The Department of Community Safety and Liaison has deployed a staff member to the uMgungundlovu District Municipality to facilitate the preparation of the plan. Due to the fact that the DM does not have a champion to drive the process, the Msunduzi Municipality is liaising directly with the provincial official to facilitate data capture in terms of the guidelines.

3.26.8 SPECIAL GROUPS

The Msunduzi Municipality is engaged in a number of programmes with special groups (women, youth, the aged, and the disabled). These are summarised below:

Table 48: Programmes for the Youth, the Aged, Women, and the Disabled

CATEGORY	DESCRIPTION
YOUTH	 Sports programmes: Local games are organised for the youth to compete for representation in the District games, from which a team is selected to participate in the SALGA Games which are held annually. This programme has been running since 2002. The Junior City Council (JCC): This is a Youth Council for young people from the Msunduzi Municipality, which meets on a monthly basis. A number of programmes are associated with this, including: A back to school campaign involving visits to 5 schools - one in each zone where stakeholders are invited to address the youth according to social ills identified in schools; Child Protection Campaigns dealing with issues like child abductions; School exchange programmes between four urban and four rural schools; Taking a child to work, where learners are identified from schools and placed in different business units in the Municipality; The JCC Sports Festival involving soccer and netball events; and Leadership Training to capacitate members of JCC, together with 37 ward youth representatives. Vocational guidance: 1 week programme at central locations in each zone, exposing the youth to career opportunities. School Uniforms: The purchase of school uniforms for needy children in ten identified schools. Reed Dance: Provision of busses to assist girls attending the annual reed dance at KwaNongoma. Driver's licences: Assisting orphans and previously disadvantaged youth in acquiring driver's licences. Youth Centre and Career Guidance Councillor: This office is funded by the Municipality and is
AGED	 located opposite the City Hall. Golden Games Sports Programme: Wednesdays have been identified as Golden Wednesdays by the MEC for Sports and Recreation, in an attempt to promote active aging. 27 such clubs are supported by the Municipality, and the intention is to roll this out in all 37 wards.
DISABLED	 Brail reading training: This project has been started in Zone 1 as a pilot project, and it is the intention to roll this programme out in other wards. Awareness campaigns: Educating parents on integration of impaired people into society. Some 80 parents have been identified for a 1 week workshop to address this issue. Human Rights Month (March): This campaign involves the education of disabled people on their human rights, including education on grants access.
WOMEN	 A programme for 16 Days of Activism takes places annually where the Municipality partners with Cindi (NGO).

Table 49: SWOT

KEY CHALLENGES FACING SOCIAL INFRASTRUCTURE:

- Although the Msunduzi Municipality has a reputation for good educational institutions, the condition of some schools in the peri-urban and rural areas in the western parts of the Municipality are poor and require urgent attention.
- The Municipality has a large number of community halls that it rents out and maintains. Income received from these facilities must be in line with expenditure, so as to recuperate all operating costs related to the service that is being charged for.
- There is a need to identify a new cemetery due to a lack of burial space in existing cemeteries.
- Reliability issues relating to the crematoria need attention.
- Aging equipment and financial constraints relating to staff have had a negative impact on the maintenance and upkeep of parks and open spaces.
- Pavement ramps need to be installed, roads need user friendly to PWD, suitable traffic lights for people with sight impairment.
- Pavements are obstructed by informal traders,
- Law enforcement for obstruction of the disability parking bays
- Parking for disability in front of the city hall to be clearly marked and be left unoccupied at all times
- New taxi rank not accessible to PWD there is a need to install alterations
- Improve access to community halls
- Municipality to conduct access audit to all the municipal buildings and sporting facilities
- Training of ward committees on disability issues related to housing (housing portfolio) Housing policy on disability must be clear Municipality to address 2% employment required for PWD
- SANTACO to train their staff on disability (to deal with attitudes of drivers and their assistants
- Stand pipes not suitable for PWD, Water supply to be accessible to PWD
- Review toilet designs built for communities, accessible sanitation facilities to be provided to schools
- Toilets at the city hall should be opened for PWD

STRENGTHS

- A well-established education sector in the Municipality with both nationally acclaimed public and private schools, as well as tertiary institutions.
- A well-established public and private healthcare sector.
- Good libraries.

OPPORTUNITIES

- The upcoming bus transport system to be accessible to PWD at least a minimum of 5 buses
- The potential to further enhance research and development in the institutions in the Municipality

WEAKNESSES

- Poorly maintained public facilities, including cemeteries and open spaces.
- Reliability of crematoria.
- Ageing equipment.
- · Unreliable fleet.

THREATS

- Maintenance of schools.
- Rental for the use of facilities is insufficient to ensure their upkeep.

C6-MUNICIPAL FINANCIAL VIABILITY AND MANAGEMENT ANALYSIS

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

This section summarizes key elements from the municipal budget.

Capability to Execute Capital Projects

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Planning for procurement of capital projects is to be done timeously, at the start of the financial year; Gazetted amounts for grants exist, and planning needs to take place ahead of the start of the financial year; and Monitoring through the Strategic Management Committee is to ensure that the above takes place.

3.28 Cost of free basic services to the Msunduzi municipality

The municipality has an adopted indigent register and annually people are invited to register as per the adopted policy. The indigent policy is reviewed annually as required by the Legislation. Council receives Equitable Share to subsidise those who cannot afford to pay for the minimum needs. The objective in calculating the amount to be subsidised, must be to prevent an increasing balance on the account of an indigent as it will be difficult to recover the debt in a humanly way. Further to the free basic services, we are trying to remove the burden from the indigent customers by reducing their amperage on the electricity they use to 20AMPS. We have started a project to replace all indigent customer meters with smart prepaid meters.

Indigent policy refers to: people who are lacking the necessities of life such as sufficient water, basic sanitation, refuse removal, environmental health, basic energy, health care, housing, food and clothing. The municipal spend on electricity for 2014/2015 was R1 776 902, spend on water 2014/2015 R2 169 230, spend on sewerage for 2014/2015 R4 844 477, spend on refuse for 2014/2015 R1 857 346.

According to the Municipal Systems Act 2000, Section 74(3) and 75(2) stipulates, "A tariff policy may differentiate between different categories of users/debtors."

Criteria for Approval:

1. That the gross household income for qualification as a registered Indigent be determined each year by Council in terms of the tariff register.

Currently the threshold income is R3500.00

2. That the prescribed application forms be completed annually.

The following table summarises the Msunduzi Operating Budget

3.29 Revenue Enhancement and Protection Strategies

(i) MUNICIPAL PROPERTY RATES

The Municipality implemented the Local Government: Municipal Property Rates Act (MPRA) on 1 July 2008 following the original publication of the valuation roll in February 2008. Key activities since publication have been the processing of objections and queries to the roll, publishing of four supplementary rolls in the first financial year, with a target of three supplementary rolls per year thereafter.

(ii) COUNCIL DEBT REDUCTION

The objective of this programme is to reduce municipal debt by actively reviewing and implementing a council credit control and debt management policy. The implementation of this policy will include the following:

- The consolidation of all debts owing in respect of electricity, water, and rates onto one account;
- The consolidation of arrears amounts gives council more leverage to pursue recovery action against nonpaying consumers;
- The stratification of the total outstanding debtors into government, commercial, residential, and vacant land;

Each category has different collection strategies:

- All debts in excess of R20 000 are handed over to a newly appointed panel of attorneys for collection;
- Judgement will be taken on all ratepayers that owe more than R20 000 via the high court, in terms of the sale
 in execution process;
- Council properties are being investigated and rates outstanding allocated to respective departments;
- Active attention to government debt by arranging meetings with government officials regularly and disconnecting services for non-payment if necessary; and
- Unallocated debt write-offs.

3.30 Municipal consumer debt position

The objective of this programme is to reduce municipal debt by actively reviewing and implementing a council credit control and debt management policy. The implementation of this policy will include the following:

- The consolidation of all debts owing in respect of electricity, water, and rates onto one account;
- The consolidation of arrears amounts gives council more leverage to pursue recovery action against nonpaying consumers;
- The stratification of the total outstanding debtors into government, commercial, residential, and vacant land;

Council has appointed a panel of 7 attorneys & 2 debt collectors to collect outstanding arrears from debtors. The Municipal Manager has formed a Debt Recovery Task Team that meets every Tuesdays to discuss challenges with all relevant departments in terms of debt recovery. Our credit control policy is reviewed annually to close the loop holes and any gaps that were identified during the past financial year. We have also improved our indigent registration in order to better manage the accounts of low income earners such that the income threshold was increased to R3500.00 so that the majority of the poorest of the poor are catered for and those who cannot afford to settle their debts in excess of the free basic service, their meters are being changed to prepaid.

3.31 Revenue through grants and subsidies

The following table summarises the unspent conditional grants for the Msunduzi Municipality. It must be noted that some grants straddle multiple financial years, owing to the fact that municipal and provincial financial years differ.

Table 53: Unspent Conditional Grants

Preservation of municipal infrastructure assets (o & m)

3.32

At the meeting of the full council held on the 9th of December 2015, it was resolved that an Asset Steering Committee be implemented and be driven a strategic level as this is informed by the strategic importance of infrastructure in terms of service delivery. The Asset Steering Committee has been appointed to undertake the following duties;

To drive and implement sustainable asset management across council

To increase awareness of the importance of integrated service planning and asset management across the organisation

To ensure compliance with COGTA guidelines for infrastructure Assets Management in local Government

To work in unison with the development Services Department to create and implement integrated opportunities for asset management and service planning The asset register has been updated with all movable and immovable assets, including investment property, and is in compliance with all applicable standards of GRAP. The verification, conditional assessment, and revaluation of infrastructure assets have been done and updated in the asset register in compliance with Grap 17. No impairment reports have been made to date. Movable assets are verified on an annual basis. The asset register is updated, on a monthly basis, with asset acquisitions (movable and immovable), disposals, and movements.

FOR 2017/2022 FINANCIAL YEARS

The following table summarises the municipal credit rating of the Municipality from 2008 to 2012.

Municipal credit rating

3.34

Table 57: Municipal Credit Rating Status for 2008 to 2012

2009 2008	Al- Al-	∢ ✓
2010	A3	BBB
2011	A3	BBB
2012	A3	BBB
	Short-term	Long-term

In terms of these gradings, the following is noted:

- An A3 grade is a "satisfactory" grade, which indicates that there is satisfactory liquidity and other protection factors qualify issues as to investment grade. However, risk factors are larger and subject to greater variation.
- A BBB rating relates to the claims paying ability rating scale. A 'BBB' rating indicates adequate claims paying ability. Protection factors are adequate, although there is considerable variability in risk over time due to economic and/or underwriting conditions.

EMPLOYEE- RELATED COSTS TO TOTAL EXPENDITURE (INCLUDING COUNCILLOR ALLOWANCES)

The following table summarises the employee-related costs for the Municipality in terms of actual and budgeted expenditure.

Table 58: Employee (including Councillor allowances) per financial year 2012 – 2016

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

The Treasury norm for employee costs is 30%, and the Msunduzi Municipality is well within this normative figure.

3.36 SUPPLY CHAIN MANAGEMENT (SCM)

The Msunduzi Supply Chain Management (SCM) Unit is a support function for all business units within the Council, to ensure provision of efficient, transparent, fair, equitable, and cost effective procurement services, assisting them to implement their service delivery priorities. In terms of the Municipal Finance Management Act's SCM regulations, the SCM unit is established to implement the SCM policy adopted by Council. It operates under the direct supervision of the Chief Financial Officer (CFO) or an official to whom this duty has been delegated, in terms of Section 82 of the Act. Core functions include demand management, acquisition management, logistics management, disposal management, SCM risk management, and performance management.

The SCM Policy was adopted by Council on 29 September 2011, in terms of the SCM Regulations 3 (1)(a), and was implemented immediately thereafter. Further review of the SCM policy was done in December 2011, to further align the policy to the Preferential Procurement Regulations (2011) issued in terms of Section 5 of the Preferential Procurement Policy Framework Act (5 of 2000). The SCM policy was again reviewed in September 2012.

An SCM Implementation Plan is developed and implemented annually, with quarterly reports on implementation being submitted to Council.

The Municipality has the following committees established and functional, with appointments being valid for one financial year:

- Bid Specification Committee (BSC)- every Thursday at 09h00;
- Bid Evaluation Committee (BEC)- every Tuesday at 14h00; and
- Bid Adjudication Committee (BAC)- every Thursday at 14h00.

3.37 LONG-TERM FINANCIAL PLAN (LTFP)

(i) INTRODUCTION

Given the purpose of the Municipality, and the service delivery mandates and objectives as summarised in Section 2, the Municipality developed a LTFP to give effect to the above imperatives and challenges, but in a sustainable manner and without reverting/deteriorating into a state of financial constraint again.

The LTFP will be reviewed on an annual basis, and ideally all future budgets and financial planning processes must be aligned to the LTFP. In doing so, the LTFP should also be updated with at least the following information:-

- Any direct change in financial status or internal factors, other than previously predicted, which may influence
 the financial status and viability of the Municipality;
- Any changes in the economic and socio-economic environment, other than previously predicted, which may influence the financial status of the Municipality;
- Any changes in the revenue base or composition which may have an impact on the financial viability of the Municipality;
- Any changes in the National or Municipal priorities as previously identified; and
- Any factors which may have an impact on the ability to implement previously identified projects.

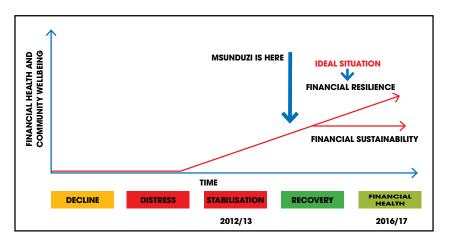

The Msunduzi LTFP takes cognisance of the following additional factors:

- A collaborative and visionary process. The LTFP does not just forecast the status quo into the future, but
 considers different possible scenarios and involves all stakeholders, elected officials, line departments,
 and the public to help identify financial issues, develop consensus strategies, and ensure a successful
 implementation.
- A combination of technical analysis and strategizing. Long-term forecasts and analysis are used to identify long-term imbalances, and financial strategies are developed to counteract these imbalances or inequities.

- An anchor of financial sustainability and policy development. The plan develops big-picture and longterm thinking among elected and appointed Officials, and also aims to ensure alignment and credibility of the IDP
- Long-term in nature. The plan should cover between five and ten years, but some components take a longer
 view. For example, the plan may include a 20-year forecast of infrastructure needs. In this regard, the key is
 to match this time horizon with the financial strategies of the Municipality.
- Aligned to the Financial Recovery Plan. The LTFP is not intended to replace the FRP, but to rather supplement
 the FRP and the MTREF Budget of the Municipality.

FIGURE 17: Long-Term Financial Plan

Given the above, Msunduzi, therefore has moved from a point of financial constraint and has to ensure that it attains financial wealth, thereby improving Improving service delivery in the Community it serves

This can only be done in the medium- to long-term, and the measure of success for Msunduzi in terms of the LTFP would be for Msunduzi to ensure that the Council's long-term financial performance and position is sustainable. This will be achieved when planned long-term service delivery and infrastructure levels and standards are met:

- Without unplanned or sporadic increases in rates and tariffs; and /or
- There is no disruption or cuts to services or service delivery due to lack of infrastructure management and old or ageing infrastructure.
- From a policy perspective, the LTFP is aimed at ensuring that the Municipality has sufficient and cost-effective
 funding, in order to achieve its long-term objectives through the implementation of the medium-term
 operating and capital budgets. The purpose of this LTFP is therefore to:-
- Ensure that all long-term financial planning is based on a structured and consistent methodology in order to
 ensure the long-term financial sustainability of Msunduzi;
- Identify assets (including human resources) investment requirements and associated funding sources to ensure the future sustainability of Msunduzi;
- Identify revenue enhancement and cost-saving strategies in order to improve service delivery at affordable rates and tariffs; and
- Identify new revenue sources as funding for future years.

(ii) OBJECTIVES AND PRIORITIES OF THE MUNICIPALITY

The key strategic outcomes of Msunduzi that have been articulated in this IDP, considered and encapsulated in the LTFP include:

- Plan 1: Build a strong institutional and financial base and sustainability;
- Plan 2: Improve quality living environments through basic access to water, sanitation, electricity, waste management, roads, and disaster management;
- Plan 3: Provide safe, healthy, and secure environment (environmental health and public safety);
- Plan 4: Create an environment for economic growth and development, to enhance the Municipal contribution to job creation and sustainable livelihoods through a Local Economic Development Plan;

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

- Plan 5: Build a cohesive system of governance that translates deepening democracy into a meaningful sense of public participation; and
- Plan 6: Ensure integrated, sustainable spatial planning and development.

The above outcomes are guided by the following principles that also underpin the LTFP to ensure alignment and consistency in all planning processes:

- Ubuntu: Humanity, I am what I am because of who we are
- Hard working: Passionate and committed to one's work
- Competence: Having requisite skills, knowledge, behaviour, and appropriate attitude in executing one's work effectively and efficiently
- Integrity: To maintain and demonstrate good governance honesty

(iii) CURRENT CHALLENGES WITHIN THE MUNICIPALITY

Given the above service delivery and policy imperatives, it would be remiss not to mention the current challenges within Msunduzi, as the LTFP will also be guided by these. However, the LTFP attempts to address these challenges in a holistic and integrated manner, to ensure that service delivery is improved but more importantly, sustained over time.

- Infrastructure and Asset Management: Infrastructure Services are provided through Sub-Units for Building
 and Facilities Management; Electricity; Fleet; Landfill; Project Management Unit; Roads and Transportation;
 and Water and Sanitation; but there are huge backlogs and capacity constraints.
- Information Communication and Technology: The Information Communication and Technology (ICT) Department is responsible for, inter alia, the services of Information Communications and Technology for the entire Municipality. This includes Desktop Support, Hardware Support, Computers and Equipment Purchase, and Maintenance and Management of all Systems in the Municipality. These functions/services will need to be reviewed in light of the strategic direction of the Municipality, as the current arrangements within ICT will not enable optimal service delivery in the future, especially considering that there are 36 legacy systems operating in the Municipality that will need to be updated and integrated into an Enterprise Resource Planning (ERP) System, relevant to the needs of Msunduzi.
- **Economic Development:** The Economic Development Department is seen as the key driver for the development and refinement of the Local Economic Development, land surveys, planning, and environmental management in the Municipality, but planning in the Municipality needs to be further aligned to the National, Provincial and Local imperatives.
- Powers and Functions: It should be noted that a number of services are being rendered at significant
 deficits, and this is due to inappropriate costing of services, inefficiencies in operations, tariff structures,
 poor management of Staff, etc. The operating model has not been reviewed since the establishment of the
 Municipality, and will require review to ensure provision of core municipal services and funded mandates.
- **Distribution Losses:** According to the Audited 2010/11 Annual Financial Statements, the Municipality recorded significant electricity and water distribution losses, amounting to R82 million and R75 million in the financial years 2009/10 and 2010/11 respectively.
- **Financial Challenges:** Msunduzi has financial challenges that arise from its institutional arrangements, operations, and administration. Of significance are its declining collection ratios, reducing cash balances, and increase in gross debtors.
- Backlogs in Service Delivery and Infrastructure: As per the status quo above.

TOTAL EXPENDITURE OTHER ITEMS		592,392	674,424	717,135	677,447	677,447	677,447	814,340	861,409	913,296

In summary, the Municipality has determined that the total backlog for access to new infrastructure amounts to approximately R5.9 billion. The Municipality highlighted that approximately R436 million is required to address the backlog in an incremental manner, whilst the annual funding required to address existing refurbishments amounts to R1 billion. In total, approximately R1.5 billion will be required annually to address these challenges.

Again, the Municipality should undertake a detailed exercise to confirm the service delivery backlogs, and future IDP's and Budgets should cater for these on a prioritised basis. It should be noted that these backlogs are unlikely to be resolved in the short-term given Msunduzi's financial and institutional challenges, and this should at least be communicated to Communities or alternate funding sources should be investigated.

In going forward, the Municipality must therefore ensure that all future IDP's include a realistic financial plan (this LTFP updated on an annual basis after approval), covering a longer term period, to indicate how and when backlogs and other projects will be financed, whilst working towards achieving financial sustainability.

This LTFP attempts to make provision for funds to be available to address some of the backlog in the medium- to long-term.

(iv) KEY DRIVERS FOR THE LTFP

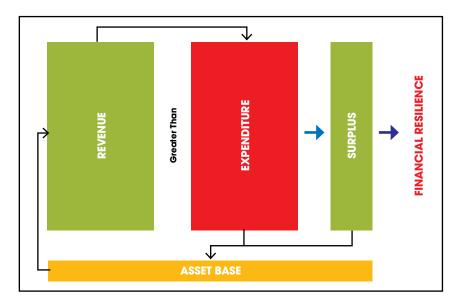

An analysis of the Municipality's balance sheet reveals a significant number of infrastructure assets, such as roads, stormwater drainage, water and sewer networks, electricity networks, buildings, etc to the value of R6.4 billion, as at 30 June 2011.

Due to the nature of these assets and the utilisation thereof, they require regular maintenance before eventually being renewed or replaced, and it is therefore important that Msunduzi implements appropriate strategies so that the cost of the asset maintenance and renewal programmes is fairly and equitably funded between current and future users. This process, known as intergenerational equity, must ensure that each generation 'pays their way' and meets the cost of the services and community assets they consume.

To ensure that Council's long-term strategies are effective, it is important to be able to measure performance against such strategies, and in the interests of intergenerational equity it is also important that current users pay for services consumed in such a manner that at least a surplus is generated to fund replacement or renewal (in the future) of currently-used assets. In addition, a surplus is critical to fund expansion of service delivery through access to new infrastructure.

The Municipality's long-term financial sustainability is, in effect, dependent upon ensuring that, on average, its expenses are less than its associated revenues, and that adequate funds are directed at maintaining, growing, and enhancing the asset base of the Municipality, in particular the revenue generating assets of the Municipality. Interdependencies are illustrated below:

FIGURE 18: Interdependencies

Therefore, and to give effect to the LTFP, the following key ratios have been specifically selected to drive the future strategies, policies, operations, and planning of the Municipality.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

The Long-term Financial Plan is drafted with the following framework and outcomes in mind:

- Remain consistent with the Municipality's current IDP and Priorities;
- To increase current service levels and standards;
- To increase Municipal credit rating without compromising its sustainability, or the viability of its asset base;
- To provide for an asset replacement program over a ten year period to maintain the Municipality's infrastructure at acceptable service standards, with no large backlog of services;
- To create a surplus in the medium-term (2012/13 MTREF Budget), restructure existing loans, and in the long-term (2015/16 MTREF Budget) externally borrow monies to fund new and upgrade assets, rather than purely grant funding, noting that the Municipality will need to have sufficient cash to make payments when due;
- To increase revenue collection and revenue base;
- To optimise internal operations with a view to focus on increasing and sustaining its asset base and service delivery Departments;
- The Plan is a moving document and will be reviewed on an annual basis and updated on an on-going three-to-five year basis, and the Plan will be updated to incorporate any future Council decisions on policy, priorities, new initiatives, or strategic direction; and
- Ensure that all surplus and reserves are cash-backed.

(v) FINANCIAL STRATEGIES OVER THE LONG-TERM

The Municipality has various strategies at its disposal to effect the changes needed for viability and sustainability, but not all could be considered due to its limited cashflow and institutional capacity.

Further, and due to the long-term nature of some of the strategies identified, the focus in the short-term adopted the Pareto Principle (20% of activities that will contribute 80% to the successful implementation of the Plan), ensuring that the strategies adopted will have the greatest impact and can be done within the financial and human resources capacity and capability at Msunduzi.

It should be noted that any other strategies not immediately addressed in this Plan should still be addressed in the long-term, and should not be ignored to enable a holistic, integrated, and multi-pronged change to the financial and service delivery success of Msunduzi.

The strategies had to therefore ensure that the objective of a financial and service delivery turnaround can be achieved in the shortest possible timeframe, and that they at least addressed the following: -

- Reduction in expenditure on non-essentials and non-core activities, and optimising current spending within the Municipality and ensuring growth, job creation, and value for money;
- Increasing revenue through improved collections and billing efficiencies;
- Enhancing and sustaining the asset and revenue generating base of Msunduzi through proper asset management; and
- Ensuring proper administrative and governance arrangements in place to manage and address the key financial and service delivery challenges of the Municipality.

Given the above, and noting that several strategies have been developed and implemented during the intervention process but the impact of these have not fully materialised, the questions that needs to be asked are whether stabilisation or recovery has been reached at Msunduzi, and what impact this Plan will have on the Municipality, to place it on a revised or new trajectory.

Indeed, and relative to where the Municipality was twelve months ago, it can be concluded that a degree of stabilisation has been reached, but the nature of stabilisation and institutionalisation that has taken place is not anywhere near where it can be described as being sustainable or good enough to be at a point of irreversibility, noting that it would take at least approximately three to five years for the Municipality to fully implement and benefit from this LTFP.

This Plan is therefore critical to achieve the objective of viability and sustainability, as originally envisaged. Further, and as informed by the initial assessments, the following overarching strategies to address the challenges faced by the Municipality are therefore contained in the Plan:-

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

The combined impacts of these strategies are intended to address core and underlying problems, which precipitated the decline in the first instance.

Successful implementation will also require greater political oversight, and efficient and effective governance arrangements, to drive and sustain the implementation of the service delivery mandate and Community expectations of the Municipality. These strategies are also intended to respond to both basic and complex challenges facing the Municipality.

It is also emphasised that the initial decision of the Demarcation Board, pronouncing that Msunduzi become a Metropolitan Municipality, must also be managed going forward.

It is important to drive this process to conclusion and to ensure that all the conditions necessary for this status to be realised are indeed achieved.

Achieving Metropolitan Status will also unlock additional revenue streams for the Municipality, such as sharing in the distribution of the national fuel levy, and will further assist the Municipality on its path to recovery and sustainability.

The adoption by Council of the guiding principles and strategies set out in the LTFP, and its successful implementation, will ultimately be a major step towards achieving the above goal, and driving the Municipality towards is potential Metropolitan Status.

(vi) KEY CHALLENGES TO THE LTFP

The LTFP proposes significant changes, particularly with regard to service delivery functions, financial administration, budgeting, financial discipline, and governance. There will be a need for a regular review of the risks identified to ensure that as additional risks arise, timely mitigation strategies can be adopted and instituted. The following table summarises risks identified in the LTFP:

Table 60: Key Challenges to the LTFP

RISK	DESCRIPTION
Non- implementation of Plans	There are numerous plans and strategies developed over the years, which have not been implemented, and a key risk is that implementation of strategies may still not take place. In order to mitigate this risk, the alignment and implementation of this LTFP should be regularly reported to Council.
Finalisation of Structure and Appointment of Key Personnel	Msunduzi should ensure that the "operating model" of the Municipality is finalised as soon as possible, and that the new structure reflects the future business of the Municipality, and that key appointments are filled as soon as possible to ensure ownership and accountability of the LTFP at least at Leadership Level.
Poor Accounting and Record Keeping	A key risk is that the outcomes of this LTFP may not be measured accurately, because of poor accounting processes and the delay in the timeous updating of accounting records. Processes to update the accounting records regularly, and to ensure that they remain up-to-date, are required in order to mitigate this risk, and the implementation of a new/updated Financial System may also go a long way to mitigate this.
Change Management	From a change management perspective, urgent action is required to address some of the poor practices that may have occurred for many years, and there is a need to strictly enforce new policies and procedures.
Community and Stakeholders	There is a risk that there may be Community and Ratepayer resistance to certain aspects of the LTFP, such as budget cuts and the need to increase tariffs. This risk can be managed by effective, improved communication by Councillors, Officials of the Municipality, and the Community. The Municipality must communicate effectively with the Community on all aspects of the Plan, and provide regular feedback on progress, including the submission of this Plan to the Provincial Legislature.

(vii) MONITORING AND EVALUATION

Finally, Msunduzi's financial sustainability and resilience has been planned through modelling over ten years, the focus being on its financial performance, financial position, and statement of cashflows, as attached herewith.

The LTFP is based on a number of parameters and assumptions, related to Msunduzi's current position and challenges, and which have been developed to reflect a stabilised and sustainable financial position over the planned period, and also taking into account Msunduzi's drive for Metropolitan status.

This has been done to ensure that there is adequate resources and capacity to fund Operating and Capital Expenditure. The plan also seeks to address short-term challenges and to achieve long-term financial sustainability, while maintaining user charges/tariffs within acceptable levels so as not to undermine the local economy.

This LTFP will therefore have little or no value if it is not implemented and institutionalised holistically, as the various components are integrated and cannot be implemented in isolation, even though certain aspects may only be implemented in the medium- to long-term.

Table 61: SWOT

KEY ISSUES RELATING TO FINANCIAL VIABILITY AND MANAGEMENT:

- The gradual increase of debtor's outstanding debt remains a potential risks to the Municipality's working capital, hence the possibility of service delivery delays.
- The prevalent indigent status has a negative impact on municipal revenue base.
- Lack of forward planning, particularly on capital budget expenditure, negatively impacts on the reduction of the service delivery backlogs.

STRENGTHS

- After a period of financial strain, decline, and distress, the Municipality is now entering a period of stabilisation and recovery.
- The implementation of the Long-term Financial Plan for the Municipality.

OPPORTUNITIES

 The Municipality has been assessed by Treasury and now has a 1:3 ratio, indicating that the Municipality is building up reserves and becoming more financially sound.

WEAKNESSES

- A limited rates base and high levels of demand for services.
- A growing number of debtors.
- Under-spending against operations and maintenance budgets.

THREATS

- The gradual increase of outstanding debt remains a potential risk to the Municipality's working capital, hence the possibility of service delivery delays.
- The growing number of indigent households, and the financial strain this places on the municipal budget.
- The lack of forward planning in terms of procurement for services in relation to the capital budget.
- Under-expenditure against some conditional grants.

C7-GOOD GOVERNANCE AND PUBLIC PARTICIPATION

3.38 ROLL-OUT OF NATIONAL AND PROVINCIAL PROGRAMMES

(i) OPERATION SUKUMA SAKHE

The origin of Masisukuma Sakhe, which is the motto on the crest of the Provincial Government of KwaZulu-Natal, is taken from the book of Nehemiah, chapter 2, and verse 18, where Nehemiah yearns to rebuild a city that has been destroyed. Operation Sukuma Sakhe is then a call for the people of KwaZulu-Natal to be determined to overcome the issues that have destroyed communities (such as poverty, unemployment, crime, substance abuse, HIV & AIDS and TB).

Serious attempts were made to ensure that all developmental needs, as expressed by members of the public, including ward committees, CBOs and NGOs, as well as business and other stakeholders, were captured and analysed accordingly. Currently, the Sukuma Sakhe campaign is intended to create a platform for members of communities to convey their needs in the presence of almost all line function departments. The idea here is to list all individual needs, where possible with reference to specific departments, in order to address their needs as a collective. It was also expected that some of the community needs would have been collected through the CBP process, and that once all those wards that were piloted were completed, that they would feed in their needs through the IDP review process, and that all the needs expressed by various stakeholders would be captured and made available.

In the Msunduzi Municipality, War Rooms have been established in each of the 37 wards and are aligned to the ward councillor's office. The Chairperson of each of these War Rooms is an ordinary member of the ward. For the initiative to succeed, there is a need for good public participation. The project has been very successful, with only one ward being problematic. All government departments are represented in the monthly meetings. If it is found that a War Room cannot cope with the demands from the community, "MBO" is invoked and government descends on the area to address needs - this has already taken place in a number of wards in the municipality.

Monthly Sukuma Sakhe task team meetings take place in the Municipality, and all relevant staff at level 4 participate to address key issues identified by ward level War Rooms. A further structure that exists is the uMgungundlovu District Task Team, which consists of Government Departments and the local municipal task team chairpersons.

Sukuma Sakhe is an important initiative, and offers an ideal opportunity for ward-level communities to identify projects that can be fed into the IDP. The synergies that have been created in the Msunduzi Municipality in terms of linkages to the Area Based Management structures are also important, and have led to the success of the initiative.

(ii) BATHO PELE

The term Batho Pele means 'People First', and in this context, it means putting other people first before considering your own needs. The Batho Pele principles are summarised as follows:

Table 62: Batho Pele Principles

PRINCIPLE	DESCRIPTION
CONSULTATION	Citizens should be consulted about the level and quality of the public services they receive
	and, wherever possible, should be given a choice about the services that are offered
SERVICE	Citizens should be told what level and quality of public services they will receive, so that they
STANDARDS	are aware of what to expect.
ACCESS	All citizens should have equal access to the services to which they are entitled.
COURTESY	Citizens should be treated with courtesy and consideration.
INFORMATION	Citizens should be given full, accurate information about the public services they are entitled
	to receive.

PRINCIPLE	DESCRIPTION				
OPENESS AND	Citizens should be told how national and provincial departments are run, how much they				
TRANSPARENCY	cost, and who is in charge.				
REDRESS	If the promised standard of service is not delivered, citizens should be offered an apology, a full explanation, and a speedy and effective remedy; and when the complaints are made, citizens should receive a sympathetic, positive response.				
VALUE FOR	Public services should be provided economically and efficiently, in order to give citizens the				
MONEY	best possible value for money.				
ENCOURAGING	Innovation can be new ways of providing better service, cutting costs, improving conditions,				
INNOVATION	streamlining, and generally making changes which tie in with the spirit of Batho Pele. It is				
AND REWARDING	also about rewarding the staff who "go the extra mile" in making it all happen.				
EXCELLENCE					
CUSTOMER	Impact means looking at the benefits we have provided for our customers, both internal and				
IMPACT	external – its how the nine principles link together to show how we have improved our overall				
	service delivery and customer satisfaction. It is also about making sure that all our customers				
	are aware of and exercising their rights in terms of the Batho Pele principles.				
LEADERSHIP	Good leadership is one of the most critical ingredients for successful organisations.				
AND STRATEGIC	Organisations who do well in serving their customers can demonstrate that they have				
DIRECTION	leaders who lead by example, who set the vision, and ensure that the strategy for achieving				
	the vision is owned by all and properly deployed throughout the organisation. They take an				
	active role in the organisation's success				

The Batho Pele vision for the Msunduzi Municipality can be summarised as follows:

"To continually improve the lives of the people of Msunduzi within an evolving developmental context, by a transformed culture and ethos of public service, which is representative, coherent, efficient, effective, accountable, consultative, and responsive to the needs of all."

There are three broad phases to the roll-out of a Batho Pele system in an organisation, and the Msunduzi Municipality finds itself in the first phase of this process. These phases are summarised below.

Table 63: Batho Pele in the Msunduzi Municipality

PHASES	DESCRIPTION OF ACTIVITIES PER PHASE
1	The development of an awareness campaign around the key elements of Batho Pele, name tags for
	all staff members so that the public can identify the officials serving them, names and designation
	on office doors so that the public can easily find the relevant officials. The establishment of a Batho
	Pele forum, which was launched in February 2013 and in February 2015.
2	The workshopping of municipal employees to educate them on Batho Pele principles, as well as
	to educate them on the functioning of the Municipality so that they can answer queries from the
	community. Image and conduct of employees is also important. A municipal Service Charter is
	also developed in this phase, which ties to the IDP, SDBIP, and PMS system.
3	The evaluation of municipal entities in terms of the Batho Pele principles on a regular basis.
	Participating in the Premier's Department initiatives and evaluations.

3.39 INTERGOVERNMENTAL AND INTERNATIONAL RELATIONS STRUCTURES

(i) INTERGOVERNMENTAL STRUCTURES

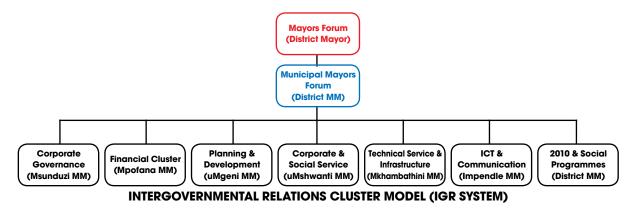

The following table summarises structures that the Msunduzi Municipality participates in:

Table 64: Intergovernmental Structures

STRUCTURE	DESCRIPTION
National	The Municipality remains a member of the South African Cities Network (SACN) and has recently participated in the "Rural Interdependencies Study" project with SACN.
Provincial	The Municipality has received support for the implementation of Organizational Performance Management from the Provincial Department of Cooperative Governance and Traditional Affairs. The Municipal Manager participates in the MUNIMEC and Technical MUNIMEC forums.
Municipal Entities	 The Municipality has one municipal entity called Safe City, which is dedicated to making the City of Pietermaritzburg a better place in which to live, work, and play. The project has a number of elements, including: The monitoring of crime through 70 CCTV cameras in the City; An SMS programme which encourages citizens to report suspicious behaviour and activities; c-SAFE, a panic alert system accessible from your cell phone.
District IGR	At a District level, the Municipality has participated in the District Municipal and Technical Forum which is chaired by the District Mayor, Councillor Yusuf Bhamjee. In addition, the Municipality has partnered with the District on issues related to waste management.

Many endeavours are made to make the Intergovernmental Relations a reality, and the following clusters are in existence at the district level:

FIGURE 19: District Level Intergovernmental Structures

The finalisation of this model seeks to streamline these structures in order to improve communication internally and externally, whilst bringing on board sector departments in a more practical and realistic manner. This is to ensure that departments and other key stakeholders do not merely pay lip service to the IDP process.

The Cluster Model has led to the establishment of shared services in the District, which also leads to better utilisation of resources. Shared services are now used in the fields of Internal Audit, Performance Management, Integrated Development Planning, and Information and Communications Technology. This approach means that the uMgungundlovu family of Municipalities in the District are all benefitting from the availability of scarce resources and expertise within the District.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

(ii) INTERNATIONAL STRUCTURES

It goes without saying that there is increased local and global competitiveness between cities, a phenomenon which has increased through the period of the global recession, which impacts directly on the Msunduzi Municipality's ability to attract investment. To address this, the Msunduzi Municipality has fostered 'twinning' initiatives with the cities of Hampton, Virginia Beach, and Atlanta in America; Zhengzhou and Guangzhou in China; Wuhan in Taiwan; and Lincoln in the United Kingdom.

Such initiatives have benefitted all cities involved, and lessons have been shared and learnt. The Msunduzi Municipality is also looking to foster similar relationships with cities across the African continent, thereby realising the objectives expounded by the African Union (AU), the New Partnership for African Development (NEPAD), as well as cross-border challenges facing the South African Development Community (SADC).

3.40 STRUCTURES CREATED WITHIN THE MSUNDUZI MUNICIPALITY

(i) COUNCIL

Councillors are elected by the local registered voters (ratepayers) to serve a predetermined term of office on the local council as representatives of their respective constituencies. The Msunduzi Council has a total of 73 seats, with 37 of these seats being allocated to ward councillors who are elected by the wards they represent, while 36 seats are allocated to political parties in proportion to the number of votes cast for them.

There are ten members on EXCO, and one of these is currently vacant. This will change after elections, the council will have 39 ward councillors with the total number increasing to 77.

(ii) COMMITTEES

The following table reflects the committees of Council and their respective purposes, as well as the frequency of meetings during a financial year.

Table 65: Municipal Committees and Frequency of Meetings in a Year

COMMITTEE NAME	FUNCTIONS	NUMBER OF MEETINGS
COUNCIL	Political oversight	1 meeting per month
EXCO	 Deals with matters delegated to it by Council and legislation. 	4 meetings per month
FINANCE COMMITTEE	Financial management oversight	2 meetings per month
ECONOMIC DEVELOPMENT COMMITTEE	 All matters requiring attention arising from the provisions of the relevant legislation. 	2 meetings per month

COMMITTEE NAME	FUNCTIONS	NUMBER OF MEETINGS
CORPORATE SERVICES COMMITTEE	 Council & Committee Support to Political Offices Legal Services and Legislative Compliance Corporate and Legal By Laws Delegation Management Policies, Processes and Procedures Human Resource Management Performance Management Labour Relations Recruitment and Selection Occupational Health Job Evaluation Training and Development Employee Relations Information Management Management Information Systems Information Centre Printing Information, Systems Technical Support 	2 meetings per month
COMMUNITY SERVICES COMMITTEE	 Regional Community Services Provision Airport Health Services and Clinics Libraries Cemeteries and Crematoria Environmental Health Community Services Provision Management Parks, Conservation, and Environment Sport and Recreation Market Forestry Municipal Public Works Tatham Art Gallery Public Safety and Disaster Management Traffic Services Licensing Public Safety and Security 	2 meetings per month
MUNICIPAL PUBLIC ACCOUNTS COMMITTEE		2 meetings per month

COMMITTEE NAME	FUNCTIONS	NUMBER OF MEETINGS
INFRASTRUCTURE SERVICES COMMITTEE	 Municipal Infrastructure Planning, Funding, Maintenance and Development Management Municipal Infrastructure Grants Municipal Infrastructure Planning Fleet Management Mechanical Workshops Asset Management and Maintenance Electricity Distribution Management Administration Housing and Human Settlement Development Management Housing Town Planning Valuations and Real Estate Maintenance Planning Networks Connections Water Distribution and Sanitation Management Administration Maintenance Planning Networks Connections Sanitation Water Management Waste Removal Refuse Collection Landfill Site Roads and Stormwater Administration Maintenance Planning 	2 meetings per month
AUDIT COMMITTEE	 An independent audit committee fulfils a vital role in governance. The audit committee plays an oversight role on systems of internal, risk management and governance. 	

(iii) IDP REPRESENTATIVE FORUM

The IDP Representative Forum consists of the following role-players with the listed functions:

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Table 66: IDP Representative Forum Role-Players and Functions

- **ROLE PLAYERS** EXCO members;
 - · Councillors:
 - Traditional leaders;
 - Ward Committee Chairpersons;
 - Senior Municipal Officials;
 - Stakeholder representatives of organised groups;
 - · Advocates of unorganised groups;
 - · Resource persons;
 - · Other community representatives;
 - National and Provincial Departments regional representatives;
 - NGO's: and
 - · Parastatal organisations.

FUNCTIONS

- Represent the interest of the Municipality's constituency in the IDP process;
- Provide an organisational mechanism for discussion, negotiation, and decision making between the stakeholders inclusive of municipal government;
- Ensure communication between all the stakeholder representatives, inclusive of municipal government; and
- Monitor the performance of the planning and implementation process.
- To institutionalise participation in integrated development planning
- Membership to ensure geographical and social representation
- · Members to have mandate to represent the interests of their constituents in the integrated development planning process
- Provide an organisational mechanism for discussion, negotiation, and decision-making between the stakeholders and municipal government
- Ensure communication between all stakeholders representatives and the Msunduzi Municipality
- Monitor performance of the planning process
- Represent interests and contribute knowledge and ideas in the planning process Participating in the IDP Rep Forum
- Inform interest groups, communities, and organisations on relevant planning activities and outcomes
- Analyse issues, determine priorities, negotiate, and reach consensus
- Participate in designing project proposals and/or assess them
- Discuss and comment on the draft Integrated Development Plan
- · Comment on and discuss alignment of annual business plans and budget with Integrated **Development Plan**
- Conducting meetings/workshops with groups, communities, or organisations

(iv) IDP STEERING COMMITTEE

The IDP Steering Committee consists of the following role-players, with the listed functions:

Table 67: IDP Steering Committee Role-Players and Functions

ROLE PLAYERS	The Mayor
	The Deputy Mayor
	The Executive Committee Members
	The IDP Champions (elected from the different party caucuses)
	City Manager (or alternate) (chair)
	Strategic Executive Managers (SEMs)
	Two representatives from IMATU and SAMWU
	Municipal Manager's Coordinating Committee (IDP Broad Planning Technical Committee)
FUNCTIONS	Provide terms of reference for all reviewing and planning activities
	Commission IDP planning studies, programs, and projects
	Process, summarize, and document outputs from subcommittees, teams etc.
	Recommend amendments to the contents of the IDP
	Prepare, facilitate, and document meetings and workshops
	Ensure alignment and participation in the determination and prioritization of plans and
	programs in the spirit of cooperative governance

(v) MUNICIPAL MANAGER'S COORDINATING COMMITTEE

The Municipal Manager's Coordinating Committee consists of the following members, with the following functions:

Table 68: Municipal Manager's Coordinating Committee Role-Players and Functions

ROLE PLAYERS	City Manager
	 Managers: Municipal Managers Office, Speaker, Mayor, Budget Office, SCM, PMS, Planning,
	PMU, and IDP.
	Admin Support
FUNCTIONS	Prepare the IDP review process plan
	Identify resources and people
	Coordinate and manage the components of the planning process, including:
	Stakeholders meetings
	Meeting deadlines
	Horizontal and vertical aligns
	Compliance with national and provincial requirements

(vi) WARD COMMITTEES

Section 74 of the Municipal Structures Act, and regulation 5 of the Government Gazette No. 27699 Ward Committee, state that Ward Committees may have powers and functions delegated to them (which are essentially advisory in nature) in terms of \$59 of the Municipal Systems Act. Among these powers and functions are:

- To serve as an official specialized participatory structure in the Msunduzi Municipality.
- To create formal, unbiased communication channels, as well as a co-operative partnership between the community and the Council.
- Advise and make recommendations to the Ward Councillor on matters of policy affecting the Ward.
- Assisting the Ward Councillors in identifying the challenges and needs of residents.
- Dissemination of information in the Ward concerning municipal affairs, such as the budget, integrated development planning, performance management systems, service delivery options, and municipal properties.
- Receive queries and complaints from residents concerning municipal service delivery, communication with Council, and provide feedback to the community on Council's response.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

- Ensure constructive and harmonious interaction between the Municipality and community through the use and co-ordination of ward residents meetings and other community development forums, and
- Interact with other organizations and forums on matters affecting the ward.

A ward committee may also make recommendations on any matter affecting its ward to the ward councillor, or through the ward councillor to the local council. The Msunduzi Municipality has 37 functional ward committees, which meet on a frequent basis. One meeting per month, per ward committee, is scheduled.

(vii) TRADITIONAL LEADERSHIP

Well before the promulgation of the KwaZulu-Natal Traditional Leadership and Governance Act (5 of 2005), the Municipality spearheaded participation and the role of amakhosi within the Msunduzi Municipality. The Municipal Structures Act states that "Traditional Authorities that traditionally observe a system of Customary Law in the area of the Municipality may participate in the proceedings of Council of that Municipality, and those Traditional Leaders must be allowed to attend and participate in any meeting of Council".

In order for legislative compliance, the Speaker has had meetings with the Amakhosi falling under the jurisdiction of the Msunduzi Municipality. The initiative was well received by Council, and the following issues were highlighted in order to build on this relationship:

- Amakhosi be invited to all meetings of the Municipality and participate in discussions. Amakhosi have been allocated to Council's standing committees in order to be actively involved in the discussions happening in those meetings. They will also be attending EXCO and Full Council meetings.
- The provision of an office for Amakhosi at the City Hall, with support staff.
- Providing financial support for programmes and projects.

3.41 STATUS OF MUNICIPAL POLICIES

The following table summarises the policies developed by the Msunduzi Municipality:

Table 69: Msunduzi Municipal Policies

MUNICIPAL POLICY	COMPLETED %	REVIEWED %	DATE ADOPTED BY COUNCIL
Employment Equity	100%		28/08/2013

3.42 INTERNAL AUDIT FUNCTION

(i) INTERNAL AUDIT UNIT

Internal Audit is an independent, objective, assurance and consulting activity designed to add value and improve the municipality's operations. The unit assists the municipality in accomplishing its objectives through a systematic, disciplined approach to evaluate and improving the effectiveness of risk management, system of internal control and governance processes. By its nature, Internal Audit Unit is a governance structure and not service delivery vehicle. Its role is critical in promoting and enhancing control environment through auditing and special reviews and recommending solutions to management.

To solidify the internal audit institutional framework, an internal audit methodology has been developed and approved by the Audit Committee which guides execution and management of the internal audit activity.

The unit has reviewed its Internal Audit charter in 2012/13 financial year. This was adopted by Council on 24 April 2013 and is in line with the King Three on Corporate Governance, Standards for Professional Practice of Internal Auditing South Africa and the best practice. The Audit Committee's charter was also revised to encapsulate all the requirements of legislation and best practice as per the King Three on Corporate Governance.

A positive change has been realised through internal audit effort by changing the approach of auditing. The three year rolling audit plan is focused on high risks within the municipality, compliance with prescripts, performance information and core mandate of the municipality.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Whilst the capacity to fulfil the mandate of the unit is strained due to the vacancy of key posts, with the new organogram it is expected that the process to fill key identified posts will resolve this issue. The unit is supported by the firm of Accountants and Auditors who are co-sourced partners and its funding has increased drastically in 2014/15 financial year in order to cater for these services.

(ii) AUDIT COMMITTEE

The Municipality has an established the Audit Committee, with five Council approved membership.

Its responsibilities arise from section 166 of the Municipal Finance Management Act, Act 56 of 2003 (MFMA). The audit committee acts as an advisory body independent of management and internal and external audit, reporting to the Council through Executive Committee on accountability, internal audit function, external audit, risk management, governance, performance management, financial management and reporting on municipal entities related matters. It provides assistance to the Council by:

- Providing an independent review of the Msunduzi Municipal's reporting functions to ensure the integrity of the financial reports.
- Ensuring all systems of internal control, governance and risk management functions are operating effectively
 and reliably.
- Providing strong and effective oversight of the Msunduzi Municipal's internal and external audit functions.

The Audit Committee Charter was reviewed and adopted on 24 April 2013.

(iii) RISK MANAGEMENT

Section 62(1)(c)(i) of the Municipal Finance Management Act, Act 53 of 2003 requires the Accounting Officer to establish and maintain effective, efficient & transparent systems of risk management. The Msunduzi Municipality risk management philosophy is informed by the constitutional imperatives. The preamble of our constitution and Chapter 2 of the Constitution deals extensively with the Bill of Rights. The Constitution describes one of the values of founding provisions as; Human dignity, the <u>achievement of quality and the advancement of human rights</u> and freedoms. Section 3 of the Constitution further states that all citizens are equally <u>entitled to the rights</u>, <u>privileges</u> and benefits of citizenship.

- The values that are enshrined in the Constitution and the Bill of Right are relevant to risk management.
- The Msunduzi Municipality is aware that no organization is functioning in a risk-free environment and as a public institution it is susceptible to risks associated with the fulfilling of our constitutional mandate.

The Msunduzi Municipality is committed to achieve its vision as set out aboe as well as its vision 2030 City Development Strategy and to contribute towards building a "better life for all" through the blue print National Development Plan. Msunduzi therefore consider risk management as an integral part of its strategy and operations and as a management tool to assist in achieving our service delivery objectives.

To effectively manage risks to the achievement of the municipality's objectives provides managers with a systematic way to make responsible, coherent and informed decisions and enables them to achieve improved outputs and outcomes. A structured approach to the management of risks also enhances and encourages the identification of greater opportunities for continuous improvement through innovation.

In most of the public sector organisations "risk management" is viewed as a stand-alone activity that requires special skills and resources and adds to an already cumbersome workload. Msunduzi prefer to talk about managing risks, rather than "risk management" and incorporates risk management principles into its everyday management processes.

Risk Management Practices requires the Accounting Officer to manage the strategic and operational risks of the municipality. The Msunduzi risk management system provides for mitigating strategies and control activities against the risks within the municipality from unacceptable likelihood and impact.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

The municipality's risk management system identifies strategic and operational risks and assigns responsibility to appropriate officials within the municipality. The Audit Committee's role in relation to risk is to provide an oversight role and advise Council.

The municipality has a Risk Management Committee in place that meets on quarterly basis and is made of the Deputy Municipal Managers. The Risk Management Committee has its terms of reference.

Risk register is updated on regular basis and as the municipality embarks on new initiatives and programmes any emerging risks that could have a negative impact on the municipality's ability to achieve its strategic objectives.

The Council is ultimately responsible for risk management supremacy with Exco and Audit Committee playing a very crucial oversight role as a function that is delegated to them and legislated. The status of strategic and operational risks are reported and monitored on regular basis by Internal Audit Unit and Risk Management Committee who give feed back to the Accounting Officer and Audit Committee.

The following are the top five significant risks that are facing the municipality. The municipality is fully aware of the possible root causes and has been able to put in place mitigating strategies within the SDBIP for 2015/16

Table 70: Risk and Mitigation Strategies

Political & administration instability collapsing control environment	Political fights, political interference in administration	MITIGATION STRATEGIES No mitigating measures as these risks can be mitigated with maturity thinking in understanding the existence of a	PROGRESS TO DATE	RESPONSIBILITY
Fatalities of municipal officials & office bearers & councillors	Turmoil within administration	municipality as per the constitution		
Fraud & Corruption	Office Bearers & Councillors fearing losing jobs & wanting to benefit before the end to their term			
Economic meltdown causing high employment rate, poverty & social unrest	Drought	Water conservation, rehabilitation & building of new boreholes	Plumbing programme is being implemented (water licks), Water)	SMC

RISK	ROOT CAUSE	MITIGATION STRATEGIES	PROGRESS TO DATE	RESPONSIBILITY
Frequent electricity outages resulting to litigation & business contraction impacting on economic growth within the municipality	 Conductors/ Cable faults on secondary network Primary infrastructure ageing Obsolete switchgears illegal connections old substation buildings theft of infrastructure 	Council approved a 132kv Network Rehabilitation Plan. Funding of R100m secured from DoE & Plan will be implemented. Council made a provision of R10m from its 2013/14 budget for refurbishment of network & replace obsolete 11kv equipment.	 Two Hilton 132kv lines completed. Refurbishment of 132/11kv Northdale Primary sub-station is in progress. Refurbishment of 132kv City completed & to commence with the sub-station. Refurbish network & replace obsolete 11kv equipment IS continuing. 	DMM: Infrastructure
Electricity Losses as a result of illegal connections	Low society moral fiber and crime rate (theft).	 Electrification of informal settlements areas e.g., SWAPO & eEzinketheni, Nhlalakahle / Balhambra Way. There is also continuous campaigns to uproot illegal connections. 	Non-Technical losses – projects in progress	DMM: Infrastructure
Huge debtor's book & low collection rate which impends solvency & liquidity of the municipal finances & going concern or sustainability of the municipal operations	 High rate of unemployment. Lack of vigorous strategy to collect & inaccurate data cleansing. 	 Data cleansing will be undertaken. The filling of critical posts in finance has been prioritized. Daily cash flow monitoring will reflect early warning signals. 	 Data Cleansing completed. The process of handover progressing. Some critical posts have been filled & remainder will be filled once migration has been completed The water debt write off in progress 	CFO

RISK	ROOT CAUSE	MITIGATION STRATEGIES	PROGRESS TO DATE	RESPONSIBILITY
Loss of water due to pipe bursts, leaking pipes & meters that cannot be read.	Poor maintenance & the decaying infrastructure.	 Water is currently in a 3 of a 6 year Non-Revenue water reduction program which started Feb 2011. The 16 core interventions were made up of 8 real losses and 8 billing control interventions. The other interventions include filling of all vacant positions in the water section. The 6 Year Non-Revenue Water Master Plan has been reviewed in order to cater for the different aspects of water losses with a more robust approach. Asset Management Plan which caters for asset replacement. 	PROGRESS TO DATE Water & Sanitation is currently in a 5 of a 6 year Non-Revenue water reduction program New strategy being developed to deal with obsolete asbestos pipes	RESPONSIBILITY DMM: Infrastructure
High backlogs of & ageing road infrastructure not receiving the relevant maintenance resulting to potholes.	Limited funding.	 Maintenance Programmes, to review maintenance budget formulation & approach National Treasury for more MIG Funding. The implementation of Integrated Rapid Public Transport Network (IRPTN) will also cater for upgrade of roads. 	Application for MIG funding is continuously being made & request for increase to the maintenance plan budget has been made.	DMM: Infrastructure

RISK	ROOT CAUSE	MITIGATION STRATEGIES	PROGRESS TO DATE	RESPONSIBILITY
Land Invasion	Lack of management of municipal land	The strategy that was developed was responding to areas that were invaded (AMBLETON PHASE 3 AND FARM SHENSTON) but not a Strategy to prevent land invasion. There is no evidence of a Strategy developed to prevent land invasion. Currently land invasion is dealt with through enforcement of by-laws when land has been invaded. At this point more reliance is placed on removal of the invaders by security personnel when it occurs.	A strategy to prevent land invasion has not yet been developed, only mechanisms to react on occurrence of an invasion are developed for each occurrence e.g. Ambleton, Nkawana etc	DMM: Economic Development
 Lack of burial space causing outcry from the community of Msunduzi. Poor service (bodies half burned) for those who want to cremate resulting in inconvenience to the Msunduzi community & extra cost to them when cremation is taken to Durban. 	Lack of pro- active long-term planning in the past for the burial services.	 Land identified at Hollingwood for new cemeteries but the Sobantu community has demanded that the process of building housing & cemetery be done simultaneously. Engaged in a process of identifying new land for cemeteries to take the municipality to 2030. Commission of two new cremators inclusive of maintenance of the cremators concluded but only one is working & challenges are attended to on the other one. 		DMM: Community Services

(iv) ANTI-FRAUD & CORRUPTION

The municipality has a reviewed and amended policy on anti-fraud and corruption and was approved and adopted by full council on the 24th of April 2013. The municipality also launched as whistle blowing hot line during August 2014, the call centre is independently managed. The intention was to develop a philosophy; that the entire municipality will fight fraud and corruption as a team and the Policy is set at a high level to cover the worst-case scenario. The Policy seeks to exemplify the following:

- Provision of a focal point and allocation of responsibility, accountability and authority;
- Serves as a conceptual, analytical, planning and review tool;
- Provides a common understanding of what constitutes fraud and corruption that needs to be communicated throughout the Municipal Council;
- Raises vigilance, which means that staff, management and councilors need to be actively involved on an ongoing basis in preventing, detecting and investigating fraud and corruption;
- Uncover the facts which refer to the processes and skills required to manage allegations of fraud and corruption;
- Deterring fraud and corruption, which refers to the processes required in ensuring disciplinary, criminal
 action and civil recovery are instigated as appropriate, pursuing heavy penalties and advising staff of the
 outcome; and
- Presents the key elements required for effective prevention of fraud and corruption and represent the approach of Msunduzi Municipality to managing risk of fraud and corruption.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

The policy draws its legal mandate from Chapter 2 of the Constitution which deals extensively with the Bill of Rights. The following sections under the Bill of Right are relevant to the obligations of the Constitution versus management of risks including the risk of fraud and corruption. The Constitution describes one of the values of the founding provisions as; Human dignity, the improvement of the quality of life of all citizens and to free the potential of each person. Section 195 of the Constitution provides normative basic values and principles for public administration, including the following:

- A high standard of professional ethics must be promoted and maintained.
- Efficient, economic and effective use of resources must be promoted.
- People's needs must be responded to, and the public must be encouraged to participate in policy-making.
- Public administration must be accountable.

The anti-fraud and corruption policy is further supported by the Whistle Blowing Policy which was also adopted on the same date as the above policy. The Whistle Blowing Policy:

- is intended to encourage employees, councillors and members of public to feel confident in raising breaches, concerns or disclosing of information relating to fraud and corruption or irregular and or criminal activity in work place in a responsible manner without fear of victimisation;
- is to ensure the whistleblowers that they will be protected from possible reprisals or victimization if the disclosure was made in good faith;
- strive to create a culture which will facilitate the eradication of criminal and other irregular conduct within the municipality;
- provides venues and guidelines for employees, councillors and members of public to disclose information relating to fraud and corruption or irregular and or criminal activity in work place rather than overlooking a problem or blowing the whistle to inappropriate channels; and
- reaffirms the commitment of the Msunduzi Municipality to the Protected Disclosures Act, Act 26 of 2000 came into effect on 16 February 2001.

To give effect to the above policies the Full Council adopted an anti-fraud and corruption strategy which is supported by a matrix of activities and assigns responsibility.

The municipality has been dealing with matters relating to fraud and corruption within the municipality. There are criminal investigations that are going ahead and other matters are with the National Prosecuting Authority. There several cases of misconduct with have been finalised and some are on-going.

New allegations of fraud or corruption and other irregularities are currently under investigation and those that are finalised are being referred to either South African Police Services or Legal Unit for formulation of misconduct charges and setting up disciplinary enquiries tribunals. As alluded to under risk management mitigating strategy in respect of fraud and corruption, an intensive conflict of interest identification review has been finalised which will result in a number anti-fraud & corruption initiative.

3.43 MUNICIPAL SUPPLY CHAIN MANAGEMENT

The Msunduzi Municipality's Supply Chain Management unit is a support function for all business units within the council to ensure provision of efficient, transparent, fair, equitable, and cost effective procurement services, thereby assisting them to implement their service delivery priorities. In terms of the MFMA SCM regulations, the SCM unit is established to implement the SCM policy adopted by council. It operates under the direct supervision of the Chief Financial Officer, or an official to whom this duty has been delegated in terms of section 82 of the Act. Core functions include demand, acquisition, logistics, disposal, SCM risk, and performance management.

The supply chain management policy for the year 2014/15 was adopted by Council on 30 May 2014, in terms of SCM Regulation 3 (1) (a), and implemented immediately thereafter. The main change made to the policy was to bring it in line with the structure of the SCM regulations. The aim was to establish a credible base from which the business processes could be developed.

The Municipality has the following functional committees, all members of which are appointed for a period of one financial year: the Bid Specification Committee, Bid Evaluation Committee, and Bid Adjudication Committee. A provincial Teander Appeal Board has been established to address any matters of appeal. The latest policy is in line with this requirement.

3.44 PUBLIC PARTICIPATION, INCLUDING THE PUBLIC PARTICIPATION PLAN

The Msunduzi Municipality adopted a Communication Strategy during the course of the 2011/12 financial year. The policy characterises stakeholders as either internal (including public sector stakeholders and forums), or external (which includes business and labour stakeholders and civil society organizations).

Public participation is an on-going engagement process, and the following are forms of citizenry participation that are utilized by the Municipality to ensure the citizen and stakeholders voice are accommodated in the planning, execution, and review of the IDP, Budget, and PMS processes:

- Ward Committee Monthly Meetings
- Stakeholders Quarterly Meeting (Reporting on PMS, SDBIP, and IDP progress)
- Monthly Community Meetings by Councillors (due to financial constraints, these are now held once every two months, totalling 6 meetings per annum per ward)
- Project Based Meetings
- Sector Plan Based Engagements
- Executive Committee Public Gallery
- Full Council Meeting Public Gallery
- Integrated Development Planning Meetings
- Izimbizo: Public Meetings for Budget, IDP, etc
- Municipal Property Rates Act (MPRA)
- Service Standard or Charter
- Community Based Planning
- Complaints Register: Customer Care and Batho Pele Engagements
- SukumaSakhe Premier's Flagship Tool for Accelerated Service Delivery at a Ward Base Level
- Attendance at meetings and workshops at the invitation of interest groups
- Partnerships and MOUs: MIDI, etc

3.45 COMMUNICATION AND MARKETING PLANS

The Marketing and Communications Unit of the Msunduzi Municipality developed a Marketing Strategy, which aims at being competitive and creating a vibrant brand identity for the city. The marketing strategy incorporates the LED strategy, and aims to synergize Unit efforts to attract investment and marketing to Msunduzi Municipality from the local and global environments.

The objective of the marketing strategy is to formulate guidelines and implementation plans for retaining the existing industries, and the attraction of new and potential industries. In order to achieve this goal, the following have been taken into consideration:

Table 71: Marketing Plan Communication Media

MEDIA USED	DESCRIPTION
Municipal Website	 Use of the municipal website, with up to date information on all kinds of developments taking place. Providing clear details of investment opportunities that are available within the Municipality. Outlining the tourism attractions that are available in Msunduzi Municipality. The promotion of all prominent events in a calendar year.
Magazines and Other Publications SA Cities Network Website	 Advertising space in various popular magazines (business, sport, and lifestyle magazines), outlining the opportunities as well as attractions within the Municipality. Msunduzi Municipality is a member of the South African Cities Network, and therefore has the opportunity to promote itself on this platform, which is shared with cities such as Tswane, Durban, and Cape Town.
Events	By associating itself with major events taking place in the City, the Municipality receives a lot of mileage in brand exposure through websites, brochures, radio, and television.
Radio and Local Press	 Taking up advertising space in local media provides an opportunity for local investors to better understand what opportunities are available for further investment.

3.46 AUDITOR GENERAL'S REPORT AND FINDINGS

The Auditor General has expressed an unqualified opinion with emphasis on matters relating to:

- Irregular expenditure;
- Restatement of corresponding figures;
- Material losses/impairments;
- Material under-spending of budget; and
- Unaudited supplementary schedules.

Whilst there is no significant improvement on the above matters, there is an improvement in the liquidity ratio and financial sustainability, and the existence of an uncertainty that may cast significant doubt on the Municipality's ability to operate as a going concern.

The audit report indicates that there are still weaknesses in supply chain management, which results in irregular expenditure amounting to R27,483 million. Great strides have been made in this area by implementing controls and through the process of identifying contracts which have been awarded to suppliers in contravention of the Local Government: Municipal Supply Chain Management Regulations (SCM Regulations) in an area that is prone to fraud and corruption. Further efforts are being made to enforce strict control measures that will reduce malpractices. One of the strict control measures is that the Municipality is investigating investing into a process that will be used to identify conflict of interest and non-compliance with SCM regulations.

The significant increase in losses on electricity, which resulted in revenue losses, is noted. The Municipality is fighting the scourge of theft of electricity, and it is anticipated that as resources are increased and new strategies implemented, the Municipality will further reduce losses.

The losses on water are static. However, strategies to reduce these loses are nonetheless being implemented, and it is anticipated that results will be seen in the long-term.

Management of the debtor's book is receiving close attention, and stringent credit control measures will be implemented.

Another challenge is material under-spending on the capital budget, which impacts negatively on service delivery, and is evil and immoral, as it deprives poor communities of basic services. Extraordinary measures have to be implemented in this area to improve service delivery.

3.47 MID- TERM PERFORMANCE ASSESSMENT

As per Chapter 8 of the Municipal Finance Management Act (56 of 2009), the Accounting Officer of the Municipality is required to assess the half yearly performance of the Municipality by 25 January every year, and submit the findings to the Mayor, as well as National, and Provincial Treasuries. The following documents are utilised as tools to determine the actual performance, namely:

- The approved Budget for the ending financial year;
- The Service Delivery and Budget Implementation Plan, as aligned with the approved Budget;
- Actuals in the approved Budget and SDBIP;
- Cash and Cash Equivalents;
- The Debtors Analysis on Revenue Billed and Revenue Collected; and
- The General Expenditure Analysis on programmes planned and implemented.

In the 2013 fiscal year a series of recommendations were made to improve the performance of the Municipality and are summarised below:

- Council needs to review the Capital Budget with the Turn-Around Strategy to ensure that approved projects
 are implemented with speed, to ensure that all are complete or towards completion by the end of the
 financial year.
- This can be achieved through ensuring that the necessary capacity is available in the SCM section, and that
 the bid committee sits as planned.
- The Municipality, through its debt collection process, will have to ensure that strict collection processes are implemented.
- The Data Cleansing project is to be implemented as approved, which will also ensure that unrecoverable debt due to non-existence will be written off to reflect a realistic debtor's balance at the year-end, with the correct debtors impairment and provision.
- A revenue enhancement strategy will be implemented from 1 February 2013 to ensure stringent measures are in place for collection of municipal accounts.

Table 72: SWOT

KEY ISSUES RELATING TO GOOD GOVERNANCE AND PUBLIC PARTICIPATION:

- Further implementation of performance management in the organization;
- Ensuring on-going functional Ward Committees;
- · Improved discipline/management control;
- · Structured internal policy framework; and
- · Lack of follow up on performance indicators.

STRENGTHS

- Reviewing of the organogram.
- The development of a more customer focused organisation (Incorporation of Batho Pele principles).
- The establishment and functioning of a number of municipal committees.
- The establishment and functioning of ward committees.
- The development of ward plans.
- Relationships with traditional leaders.
- The development of a number of municipal policies.

OPPORTUNITIES

- The development of a cohesive organisational structure.
- Changing the organization's culture to a performance driven culture.
- Attracting and retaining critical and technical skills.
- The identification of risks and the development of mitigation strategies.
- The review of municipal policies.

WEAKNESSES

 Ineffective call centre resulting in disgruntled customers, which may tarnish the image of the Municipality.

- · Low staff morale.
- Shortages of key skills.
- Fraud and corruption.

THREATS

SECTION D CHAPTER 4: THE IDP STRATEGIC APPROACH

4.1 INTRODUCTION

The Vision, Objectives, Strategies, and Projects of the Msunduzi Municipality are underpinned by Strategic Planning and Policies at a National and Provincial level, which were summarised in Chapter 2 above. The objectives and components of these documents and policies have helped determine the direction in which the Municipality is moving, as reflected in this IDP.

4.2 MUNICIPAL NEEDS ANALYSIS

The following table provides a summary of the issues raised by community members during the IDP izmbizo held during the Month of December 2015. The identified needs have been limited to five per municipal area as per the COGTA Guidelines and also to make the IDP easy to administer. A comprehensive list is available from the IDP office on request and has been included as annexure to this document.

Table 73: Municipal Wards Needs 2016/2017

Ward	Area	Community Issues
1	Mpumuza	 Construction of RDP houses Sports facilities Job creation Establishment of orphanage homes Eradication of substance and drug abuse Maintenance of crèches Fair RDP houses allocation programme Construction of clinics Construction of library Construction of old age home Construction of shopping centre Installation of high mast lights Installation of water pipes Monitoring of existing projects Upgrading of access roads Construction and maintenance of community halls in Mbucwane, Phayiphini, Mpumuza and Zayeka One stop centre
2	Mpushini Madwaleni	 Upgrade of access roads Installation of street lights Tarring of roads Fencing of projects Maintenance of Mashaka, Nqabeni and Mpushini community halls

Ward	Area	Community Issues
3	Mgwagwa	 Upgrade of access roads Tarring of Mgwagwa road (P390) Bus shelters Construction of clinics Water Electricity Maintenance and upgrading of Nxamalala, Siwelile and Mgwagwa community halls
	Etsheni	 Upgrading of roads Water extension pipes New electricity connections Construction of multipurpose centre Construction of sports field Construction of crèches Construction of Baleni footbridge Upgrade of Mgwagwa sportsfield Water supply Street lights Construction of library Construction of playground Job creation Access to funding for small businesses Construction of RDP houses Electricity
4	Ndeleshane	 Construction of RDP houses Upgrading of roads Construction of bus shelters Construction of Vulindlela TVET College Chicken houses to be upgraded Construction of sports facilities Completion of sanitation project Installation of electricity in new housing development Installation of street lights
	Mzongwana	 Upgrading and maintenance of halls Installation of water extension pipes in the new homes Installation of new electricity connections Construction of KwaShange multipurpose centre Construction of sports field Construction of Mgodini footbridge Construction of Mgodini hall Construction of KwaShange crèche Renovation and fencing of sports field

Ward	Area	Community Issues
5		 Tarred roads Installation of electricity Installation of street lights Maintenance of sports field Lack of communication between municipality and community Job creation Roads upgrade Electricity Water Eradication of crime Upgrade of access roads Water and electricity at Vulindlela hall Upgrade and maintenance of community halls RDP houses Construction of hall (Mbizana area)

The above issues are summarized into the following key issues:

4.3 THE MAIN KPAS

- Basic Service Delivery
- Local Economic Development
- Municipal Transformation And Institutional Development
- Good Governance
- Financial Viability And Management
- Cross Cutting Interventions

4.4 MUNICIPAL KEY ISSUES

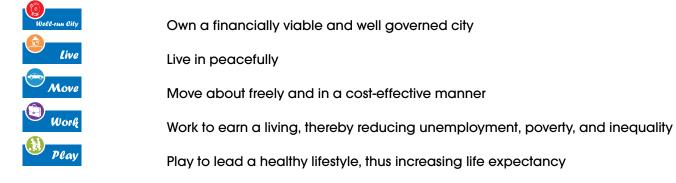

The following are the key issues for the Msunduzi Municipality:

Table 74: IDP Key Challenges and Corresponding Strategic Priorities

КРА	KEY CHALLENGES	CORRESPONDING STRATEGIC PRIORITY
Financial Viability And ManagementGood Governance	Revenue protection and enhancement.	6. A Financially Viable and Well-Governed City
Basic Service	Addressing service delivery challenges in terms of water, sanitation, and electricity.	A Well-Serviced City
Delivery	Integrated waste management and renewable energy.	 A Well-Serviced City A Clean, Green City
Cross Cutting Interventions	Seamless movement of people, goods, and services in and around the city.	2. An Accessible and Connected City
II II EI VEI III OI IS	City connectivity.	2. An Accessible and Connected City
	Institutional and individual performance management framework.	A Financially Viable and Well-Governed City
 Municipal Transformation 	Institutional skills development and professionalization of the organisation.	A Financially Viable and Well-Governed City
And Institutional Development	Improved capacity to spend on capital expenditure;	A Financially Viable and Well-Governed City
	Filling of strategic critical vacant posts.	A Financially Viable and Well-Governed City
 Local Economic Development 	Economic growth leading to the creation of decent jobs.	5. An Economically Prosperous City

4.5 MUNICIPAL VISION

The Vision of the City of Choice, Second to None is to develop a safe, vibrant city in which to live, learn, raise a family, work, play and do business.

The Msunduzi Municipality shall deliver on six strategic city-wide outcomes to achieve this vision, as follows:

- A well-serviced city;
- An accessible, connected city;
- A clean, green city;
- A friendly, safe city;
- An economically prosperous city; and
- A financially viable and well-governed city.

In order to realise the Vision, the Municipality has prioritised thirteen objectives clustered under each of these six broadly defined outcomes, as follows:

- The focal areas for the first, a well serviced city, shall be: water and sanitation service delivery, energy supply provision, and implementation of waste management for all citizens.
- The focal areas for the second, an accessible and connected city, shall be: roads construction and maintenance, transport management, human settlement development, telecommunications connectivity, and social infrastructure distribution.
- The focal areas for the third, a clean, green city, shall be: renewable energy supplies, public open space creation, and urban renewal and greening promotion.
- The focal areas for the fourth, a friendly, safe city, shall be: social cohesion, and safety and security.
- The focal area for the fifth, an economically prosperous city, shall be: job creation.
- The focal area for the sixth, a financially viable and well-governed city, shall be: financial viability and good governance.

All the six themes and related objectives above are inter-related, and cannot be achieved in isolation.

4.6 STRATEGIC PRIORITY AREAS- HIGH LEVEL

The following table summarises the six Strategic Priority Areas, their associated goals, value statements, and the targets identified. Following this, it is further unpacked, where it is linked to the five year organisational scorecard, as well as the one year scorecard, including quarterly targets.

Table 75: TIER ONE: ORGANISATION LEVEL (5 Year Scorecard) **5 YEAR SCORECARD**

INDEX		OUTCOME 9 OUTPUT PGDS	PGDS	STRATEGIC PRIORITY (MUNICIPAL GOALS)	IDP	STRATEGIC OBJECTIVE	STRATEGIES
∢	MUNICIPAL TRANSFORMATION AND ORGANISATIONAL	Implement a differential approach to Municipal Financing,	Human Resource Development	Financially viable and well governed City	A1	Increased institutional capacity and promote transformation	BUILD A CAPABLE AND DEVELOPMENTAL MUNICIPALITY Implement the workplace skills plan

4.9 CATALYTIC PROJECTS

A catalyst is described as something that 'precipitates an event' or something that causes change. Catalytic projects speed-up realisation of the municipal strategies leading to community needs being met, and facilitate speedier realisation of the Vision. The Municipality has identified a number of projects that seek to stimulate change and development in the Municipality.

FIGURE 20: Catalytic Projects

The following catalytic projects that are aimed at revitalising the economy and growth trajectory for the Msunduzi Municipality:

Table 77: Summary of Msunduzi Catalytic Projects

PROJECT	DESCRIPTION	EST. BUDGET
Legislative Precinct Development	This is a medium to long-term initiative which will see the development of a new legislative precinct that will better cater for the needs of the legislature and facilitate good governance.	R2 Billion
Pietermaritzburg Airport Upgrade	This is a short- term project that will see the extension of the existing runway, together with the terminal buildings. This will allow for larger aeroplanes to make use of the airport, thereby attracting additional operators and increasing the amount of feet through the airport.	R0.5 Billion
Harry Gwala Stadium Upgrade Phase 2	This is a medium to long-term project which will see the development of further stands at the stadium. Associated with this project, in the short to medium term, is the further development and upgrading of the Alexander Park Sports Precinct with additional parking.	R0.5 Billion
International Convention Centre and 5 star Hotel	This is a medium to long-term project that will see the development of an international calibre conference centre- which will allow the city to host international-standard conferences. In the short to medium-term, a 5 star hotel associated with this will be developed.	Private Investment
Council Civic Centre	This is a medium-term project and will see the further development of the Council Civic Centre to cater for additional needs and demands.	R1.2 Billion
Integrated Rapid Public Transport System	This project is a short to medium-term project which will see the roll-out of reliable and efficient public transport between key points in the city, thereby reducing resident's commuting times.	R3.2 Billion
Fibre Optic Cable Network	This is a short to medium-term project that will see the development of a leading-edge technology fibre optic telecommunications network leading to increased connectivity and usage, decreased costs, and stimulating growth and development.	R0.5 Billion
Electrical Infrastructure Upgrade	This is a short to medium-term project that will see the rehabilitation and upgrading of the Municipality's electrical infrastructure.	R0.9 Billion
City- wide CCTV System	Camera surveillance of areas within the Msunduzi Municipality so as to encourage a crime-free environment.	R0.5 Billion

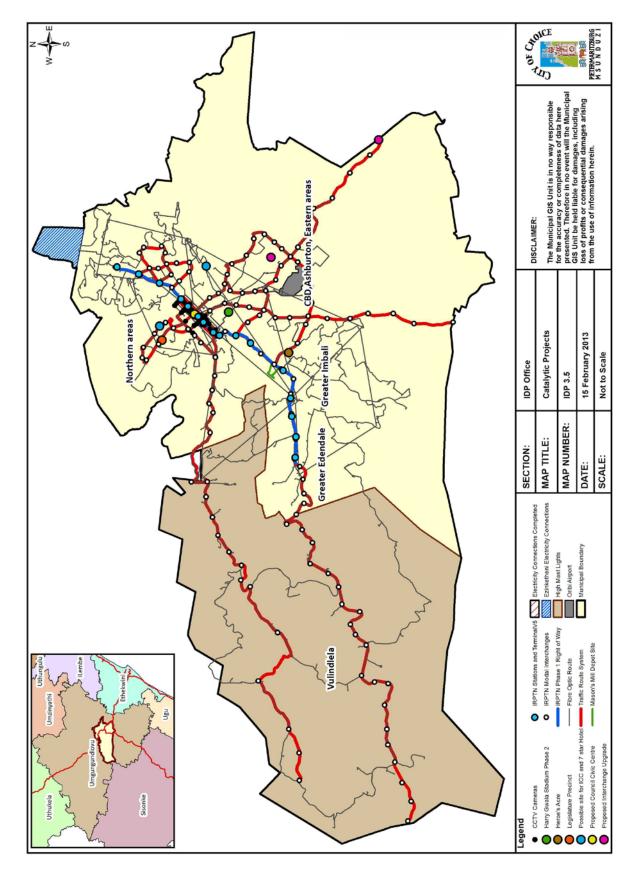

261

PROJECT	DESCRIPTION	EST. BUDGET
Hero's Acre	This project was mentioned by the KZN Premier in the 2013 State of the Province address, and will be a museum commemorating the Heroes of the Struggle. It will include a wall commemorating the "Seven Days War" on the site where the remains of Moses Mabhida and Jonny Makhathini are buried. The proposed development will cover a developed area of at least 102,000 m ² .	R1 Billion
Freeway Node Development	This is a medium-term project that involves the upgrade of key freeway interchanges within the Municipality so as to ensure more efficient movement of traffic, as well as unlocking strategically located adjacent land for the development of commercial, residential, and associated activities.	R1 Bill
Non- Revenue Water Reduction Project	This is a medium to long-term project that will simultaneously increase revenue and reduce water losses. The reduction of water losses will ultimately reduce the demand on our source (dams), which will have a catalytic benefit to the catchment.	RO.5 Bill

MAP 30: IDP Office: Catalytic Project

4.10 PROJECT PRIORITISATION MODEL

The prioritisation of investment projects is a key task for all municipalities as part of the IDP and Budget review process. It is clearly not possible to implement all projects simultaneously, and a rational, systematic approach to prioritisation helps to ensure that not only are the legal requirements met as early as possible, but also that the available resources (both human and finance) are used as effectively and efficiently as possible.

The following project prioritisation model has been developed to assist with decision-making in allocating resources.

Table 78: Project Prioritisation Model for the Msunduzi Municipality

CRITERIA	DESCRIPTION	SCORING
Vision 2030 Impact	Will the project realise the Vision Statements, Goals, Value	5 - Yes definitely
	Statements, and Targets contained in Vision 2030 for the	3 - Partially

Millennium	Does the project assist the Municipality and its communities	5 - Yes definitely
Development Goals	to realise the targets set out in the Millennium Development	3 - Partially
Linkage	Goals (MDGs)?	1 – Not at all

SECTION E CHAPTER 5: STRATEGIC MAPPING

E1 5.1 CONTEXT

During this financial year a number of spatial planning processes are underway to give direction to the municipal planning. This is because the Msunduzi Municipality has embraced the concept of a Hierarchy of Plans. A consolidated Spatial Development Framework (SDF) was adopted by Council in 2015, and a series of Area Based Management Plans (ABM) were adopted in 2010 for:

- Vulindlela;
- Greater Edendale and Imbali;
- The Northern Areas; and
- CBD, Ashburton, and the Eastern Areas.

Whilst these review processes are underway the following are the guiding principles starting to give shape to the municipality's investment areas.

Table 79: Spatial Guiding Principles

GUIDING PRINCIPLES	APPLICATION
Compaction	 New and Infill development focused to create coherent system, mainly in SE quadrant
Integration	 Shenstone and Ashburton as areas to integrate Low Income residential areas into city New economic opportunities in growth area and adjacent to major roads New E-W and N-S roads links to major parts of city
Urban Densification	In periphery of CBDAdjacent to major nodes
Restructuring of the City:	 Creating a Polycentric City with new nodes and new economic opportunity areas Limited mixed-use activity spines between focus points Redressing imbalances with improved infrastructure and new economic opportunities Creating a road system matrix
Meeting Land Use Needs	New Residential areas
and Identification of areas	New economic opportunity areas
of economic development	New nodal points
potentials	Restructure CBD
Sustainability	Protecting environmentally sensitive areas Cabarant and rainfarring infrastructures.
	Coherent and reinforcing infrastructureProtecting agriculture potential areas
	 Upgrade residential areas with appropriate infrastructure
	In situ upgrading of Informal settlements
Creating a quality urban	Create a polycentric city
environment	Create a mix of housing types in different areas
	Reinforce public transport system

Spatial Structuring elements of the Municipality include:

- Nodes (Concentration of activity);
- Corridors (Main roads/Arterials);
- Settlement Patterns (Formal/Informal/Traditional);
- Restrictive Conditions (Environmental/Topographical/Geotechnical);
- Environment/Open Spaces (Active/Passive);
- Urban Edge; and
- Mixed-Use Developments Aesthetic Environment (Visual Form/Heritage Special Features)

265

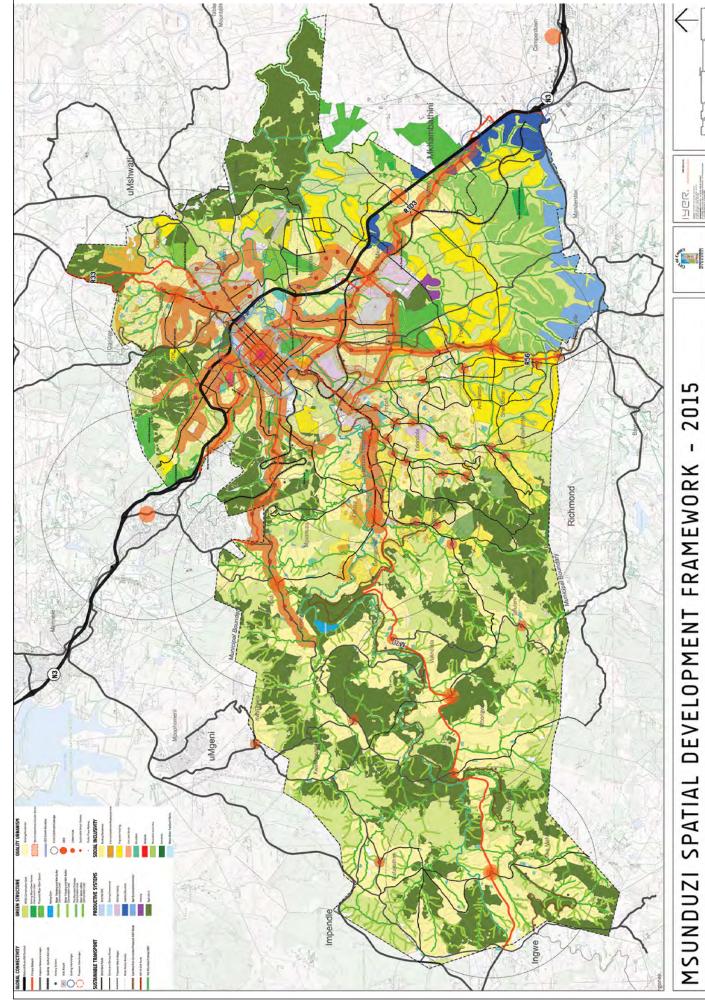

5.2 TOWARDS A LONG-TERM SPATIAL DEVELOPMENT FRAMEWORK

The Long-Term Spatial Development Strategy, adopted in 2015, will inform the refinement and review of the Integrated Development Plan and the Spatial Development Framework, thereby assisting the Municipality in achieving its Constitutional mandate and other legislative obligations. Key outcomes of the strategy include:

- A description of the desired 2030 outcomes in terms vision, goals, and objectives;
- Agreement on the set of indicators that will be applied to measure the progress being made to achieve the
 desired outcomes;
- Agreement on the targets and the City growth path in respect of each of the indicators;
- Agreement on the strategic interventions required to achieve the set targets;
- A description of the catalytic projects in support of the interventions, where possible; and
- Agree on the monitoring, evaluation, reporting, and review framework of the plan.

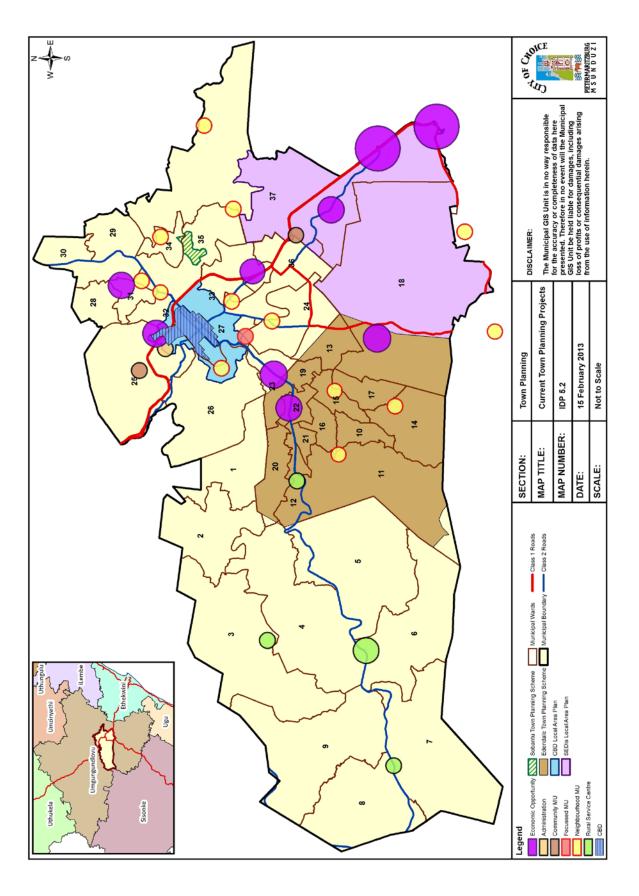

MAP 31: Spatial Development Framework

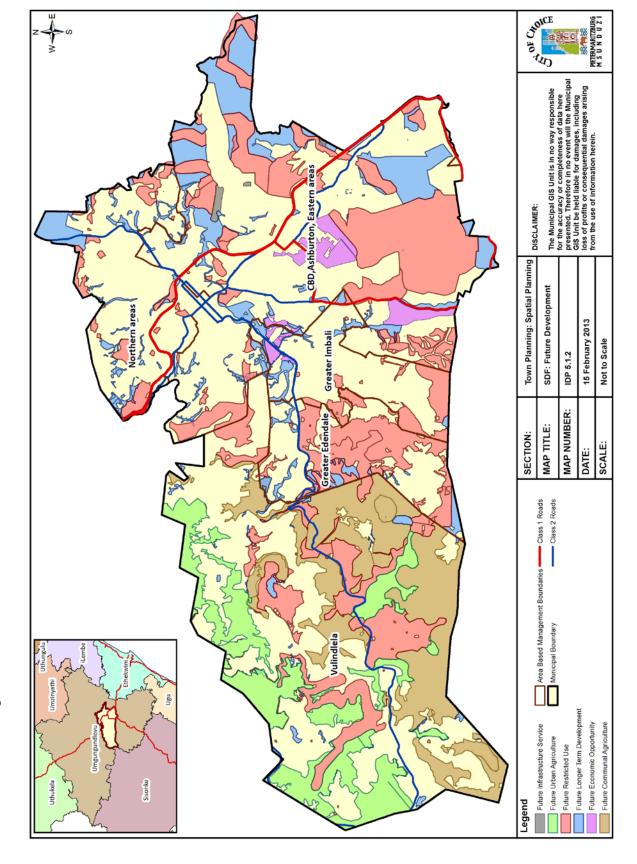

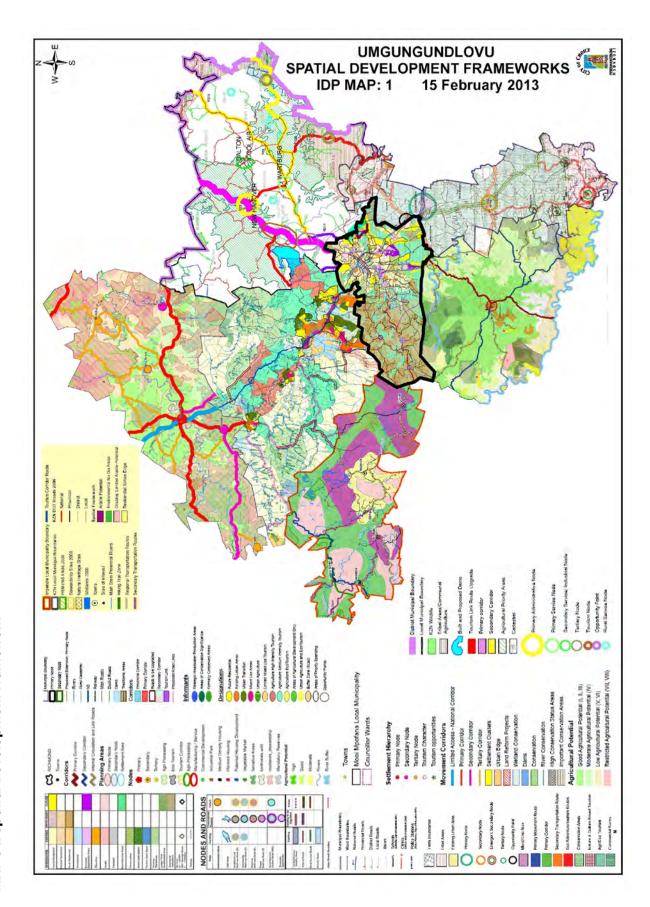

MAP 33: Town Planning: SDF: Future Development

20 YEARS OA THE

IMPLEMENTING THE PLAN

E2

5.3 INTRODUCTION

A unique IDP number has been given to each Vision Statement, the corresponding Value Statements, and the Targets (as well as to the 5 year and 1 year This review of the IDP has seen alignment between the 2030 Municipal Vision, the IDP strategic framework, the SDBIP, and the capital investment framework. targets) and their associated Projects. In creating these linkages, it becomes far easier for oversights structures (e.g. Council, Internal Auditors, the Auditor General, etc.) to ensure that municipal expenditure is in terms of the municipal vision and the IDP.

This project is a work-in-progress, and will develop and mature in the years to come through its daily use. It has also been captured in an electronic spreadsheet format, which makes monthly and quarterly reporting by departments far easier to undertake.

5.4 IMPLEMENTATION PLAN

The following table summarises the capital Budget for 2014/15.

KEY CAPITAL PROJECTS

5.6

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

The following projects have been identified by municipal departments as requiring implementation.

5.6.1 WATER AND SANITATION

STRATEGIC PRIORITY 1: WELL SERVICED CITY

KPA: BASIC SERVICES DELIVERY		
GOAL	VALUE STATEMENT	TARGET
By 2030, Msunduzi is a city serviced 1.1 City-wide infrastructure	1.1 City-wide infrastructure and	1.1.1 100% of all households have a municipal water connection to the yard level.
with quality water and sanitation	service delivery provides a reliable,	service delivery provides a reliable, 1.1.2 70% of all households have water-borne sanitation.
reticulation, uninterrupted,	high quality supply of water,	1.1.3 30% of all households have the basic minimum of VIPs.
adequate energy supply, and	sanitation, energy, and waste	1.1.4 To Reduce Non-Revenue Water and Real Water Losses to 20% and 15%
regular waste removal - for ALL	services - to all.	respectively.
neighbourhoods, communities,		1.1.5 To reduce the amount of water service interruptions from 1684 per annum
and centres of business.		(2011/2012) by 80% to 336 bursts per annum and respond to 100% of service
		interruptions within 8 hours.
By 2030, Msunduzi is a city serviced 1.1 City-wide infrastructure	1.1 City-wide infrastructure and	1.1.6 To reduce sanitation service interruptions from 2499(2011-2012) per annum
with quality water and sanitation	service delivery provides a reliable,	service delivery provides a reliable, by 80% to 500 per annum and respond to 100% of sanitation blockages within 8
reticulation, uninterrupted,	high quality supply of water,	hours.
adequate energy supply, and	sanitation, energy, and waste	
regular waste removal - for ALL	services - to all.	
neighbourhoods, communities,		
and centres of business.

.7 ELECTRICITY

TARGET	1.2.1 Disruption to energy supply is minimised to 6 hours in 100%	of incidents.	1.2.2 Electricity supply keeps pace with expected growth of 4%	per annum.	1.2.3 100% of households have basic electricity supply.	1.3.1 100% of municipal households are fitted with solar water	heating geysers.	1.4.1 100% of street lights and 100% of traffic signals in the CBD	are powered by renewable energy.	1.5.1 Demand management provides a 10% reduction in peak	demand.	1.6.1 Reduces electricity losses to below 5% of bulk supply	purchases.
VALUE STATEMENT	1.2 City-wide energy infrastructure and service delivery provides	a reliable, high quality supply of energy. Energy supply meets	the anticipated increased demand for electricity specifically,	including peak periods.		1.3 Energy prices are affordable for residents.		1.4 Use of renewable sources of energy is widespread.		1.5 Energy production, capacity, storage, management, and	distribution rapidly adapts to changing patterns of demand.	1.6 City-wide infrastructure and service delivery provides reduced 1.6.1 Reduces electricity losses to below 5% of bulk supply	electricity losses.
GOAL	By 2030, Msunduzi is	a city serviced with	quality water and	sanitation reticulation,	uninterrupted,	adequate energy	supply, and regular	waste removal - for	ALL neighbourhoods,	communities, and	centres of business.

COST OF FREE BASIC SERVICES

INTEGRATED DEVELOPMENT PLANFOR 2017/2022 FINANCIAL YEARS

20 YEARS ON THE BOOM

annually as required by the Legislation. Council receives Equitable Share to subsidise those who cannot afford to pay for the minimum needs. The objective in calculating the amountto be subsidised, must be to prevent an increasing balance on the account of an indigent as it will be difficult to recover the debt in a humanly way. Further to the free basic services, we are trying to remove the burden from the indigentcustomers by reducing their amperage on the electricity The municipality has an adopted an indigent register and annually people are invited to register as per the adopted policy. The indigent policy is reviewed they use to 20AMPS. We have started a project to replace all indigent customer meters withsmart prepaid meters.

energy, health care, housing, food and clothing. The municipal spend on electricity for 2014/2015 was R1 776 902, spend on water 2014/2015 R2 169230, spend Indigent policy refers to: people who are lacking the necessities of life such as sufficient water, basic sanitation, refuse removal, environmentalhealth, basic on sewerage for 2014/2015 R4 844 477, spend on refuse for 2014/2015 R1 857 346.

According to the Municipal Systems Act 2000, Section 74(3) and 75(2) stipulates, "A tariff policy may differentiate between different categories ofusers/debtors." Criteria for Approval:

That the gross household income for qualification as a registered indigent be determined each year by Council in terms of the tariff register.

Currently the threshold income is R3500.00

That the prescribed application forms be completed annually.

roll in February 2008. Key activities since publication have been the processing of objections and queries to the roll, publishing of four supplementary rolls in The Municipality implemented the local Government: Municipal Property Rates Act (MPRA) on 1 July 2008 following the original publication of the valuation the first financial year, with a target of three supplementary rolls per year thereafter.

MUNICIPAL PROPERTY RATES

 \in

roll in February 2008. Key activities since publication have been the processing of objections and queries to the roll, publishing of four supplementary rolls The Municipality implemented the local Government: Municipal Property Rates Act (MPRA) on 1 July 2008 following the original publication of the valuation in the first financial year, with a target of three supplementary rolls per year thereafter. The municipality is busy with this process in 2014/2015 awaiting public consultation. It will be implemented on the 1st July 2014

(ii) COUNCIL DEBT REDUCTION

The objective of this programme is to reduce municipal debt by actively reviewing and implementing a council credit control and debt management policy. The implementation of this policy will include the following:

311

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

- The consolidation of all debts owing in respect of electricity, water, and rates onto one account;
- The consolidation of arrears amounts gives council more leverage to pursue recovery action against nonpaying consumers;
- The stratification of the total outstanding debtors into government, commercial, residential, and vacant land; Each category has different collection strategies:
- Focus on businesss. Started issuing of summons in February. Delay due to procurement All debts in excess of R20 000 are handed over to a newly appointed panel of attorneys for collection;
- Judgement will be taken on all ratepayers that owe more than R20 000 via the high court, in terms of the sale in execution process;
- Council properties are being investigated and rates outstanding allocated to respective departments;
- Active attention to government debt by arranging meetings with government officials regularly and disconnecting services for non-payment if necessary; and
- Unallocated debt write-offs.

6.7 ASSET MANAGEMENT

At the meeting of the full council held on the 9th of December 2015, it was resolved that an Asset Steering Committee be implemented and be driven a strategic level as this is informed by the strategic importance of infrastructure in terms of service delivery. The Asset Steering Committee has been appointed to undertake the following duties;

- To embed, integrate, monitor, support and report on the development and implementation of Asset Management Practices within the Municipality.
- To drive and implement sustainable asset management across council
- To increase awareness of the importance of integrated service planning and asset management across the organisation
- To ensure compliance with COGTA guidelines for infrastructure Assets Management in local Government
- To work in unison with the development Services Department to create and implement integrated opportunities for asset management and service planning.

The asset register has been updated with all movable and immovable assets, including investment property, andis in compliance with all applicable standards of GRAP. The verification, conditional assessment, and revaluation of infrastructure assets have been done and updated in the asset register in compliance with Grap 17.No impairment reports have been made to date. Movable assets are verified on an annual basis. The asset registeris updated, on a monthly basis, with asset acquisitions (movable and immovable), disposals, and movements.

6.8 SOUND FINANCIAL STRATEGIES

The Municipality has committed itself to the following sound financial strategies:

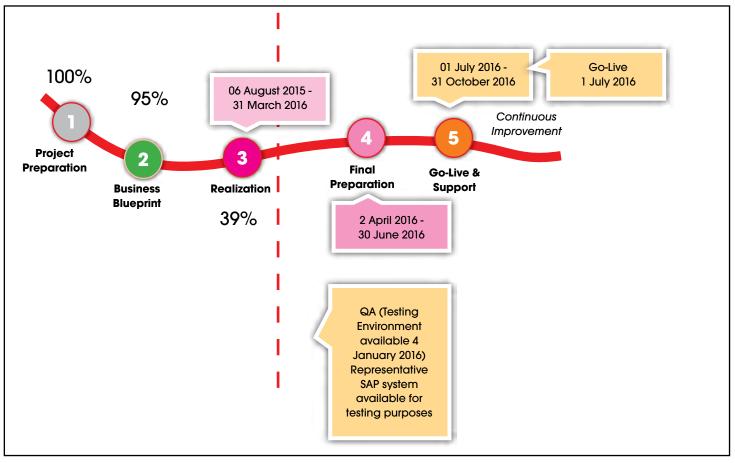

- Strategic and sustainable budgeting
- Sound financial management and reporting
- Value for money expenditure
- Growth of revenue and reduction of debtors

6.8.1 SAP

The municipality appointed EOH as a service provider for the implementation of SAP ERP system. EOH presented the project plan to the Strategic Management Committee in November 2014, which was accepted. EOH is currently working on the SAP ERP implementation in conjunction with the project team from Msunduzi.

The Municipality also appointed PWC to assist with project management and Quality Assurance of the SAP ERP system implementation. A seconded PWC project manager is assisting the municipal project team with advisory on project implementation and decision making. Below is the project road map and progress as at January 2016.

6.8.2 Municipal Standard Charts of Accounts (MSCOA)

National Treasury issued Government Gazette No 37577, Municipal Regulations on Standard Chart of Accounts, which is effective 01 July 2017. The objective is to have a National Standard for uniform recording and classification of municipal budget and financial information at a transactional level by providing a Standardised Chart of Accounts which is:

- aligned to budget formats and accounting standards;
- enable uniform information sets across the whole of government to better inform national policy coordination and reporting, benchmarking and performance measurement.

MSCOA is not a system change it is a business process/reform change! There are Seven (7) segments that are to be complied with on a transaction (posting) level and no further breakdown is needed subsequent to transaction posting.

The seven segments are:

- Project
- Function
- Item segment: Assets, Liabilities and Net assets; Expenditure; Revenue; Gains and Losses
- Fund
- Regional Indicator
- Costing
- Municipal Standard Classification No standardisation

Project segment is linked to the IDP is indicates how the projects should be reflected in the IDP it distinguishes projects according to the nature of expense in terms of capital or operational expense. It into capital, operational or default transactions (non-project related Items). Table number 7 on the IDP will have projects classified as per the MSCOA requirements

PROJECTS WITH COMMITTED FUNDING FROM OTHER SERVICE PROVIDERS

6.9

This section is in the process of being completed and will be finalised ahead of Council final adoption of the IDP. Departments have been requested to forward their 3-year MTEFs to the Municipality for inclusion in the IDP.

1 Budget Subject to Review.

SECTION G CHAPTER 7: ORGANISATIONAL AND INDIVIDUAL PERFORMANCE MANAGEMENT SYSTEM

7.1 ORGANISATION PERFORMANCE MANAGEMENT SYSTEM IN THE MSUNDUZI MUNICIPALITY

The Msunduzi Municipality has an approved Organizational Performance Management System (OPMS) Framework and Individual Performance Management System (IPMS) policy, which serve as the guideline documents for the implementation of the Performance Management System (PMS) within the Municipality. The implementation of performance management is guided by various legislative prescripts and requirements. The OPMS Framework is inclusive of the following interrelated processes:

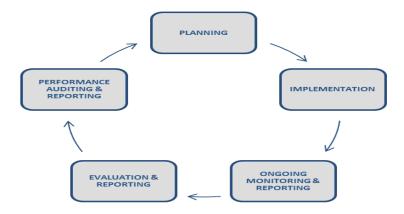

- Planning;
- Implementation;
- Monitoring;
- Evaluation.

The Msunduzi Municipality's PMS is the primary mechanism to monitor, review, and improve the implementation of its IDP and to gauge the progress made in achieving the objectives set out in the IDP. In addition, the Municipality's PMS facilitates increased accountability, learning, improvement, as well as providing early warning signals to facilitate decision-making.

The PMS monitors actual performance against set targets and contractual obligations. Effective service delivery relies upon the IDP, efficient utilization of all resource,s and the PMS being closely integrated across all functions at an organizational and individual level. The most valuable reason for measuring performance is that what gets measured gets done.

Once performance planning and the IDP have been completed and departmental SDBIP's are in place, they need to be implemented by executing the work in accordance with these plans. As the work is executed, it needs to be continuously monitored and periodically measured and reported on. Reporting requires that the Municipality takes the priorities of the organization, its performance objectives, indicators, targets, measurements, and analysis, and present this information in a simple and accessible format, relevant and useful to the specific target group, whilst meeting the legal prescripts for reporting. The PMS Cycle can be illustrated as follows:

FIGURE 21: PMS Cycle

7.2 ORGANISATION KEY PERFORMANCE INDICATORS LINKED TO DEPARTMENTAL INDICATORS

Whilst the organisational key performance indicators are presented in the SDBIP at an annual and quarterly level, the departmental indicators are broken down into monthly indicators, which are monitored and reported on a monthly basis at meetings of the operational management committee.

7.3 DEPARTMENTAL INDICATORS LINKED TO OUTPUTS IN THE PERFORMANCE AGREEMENTS

According to the approved Individual Performance Management System policy, all Deputy Municipal Managers, Process Managers, and other Level three (3) managers must enter into a performance agreement annually. These performance agreements are directly linked to the approved SDBIP and departmental indicators, through the development of individual work plans. Indicators in the work plans also include indicators that are not necessarily included in the SDBIP and/or departmental indicators, but are relevant to the operational functionality of any particular post. The indicators contained within the work plan are agreed upon and signed off by both the supervisor and the incumbent.

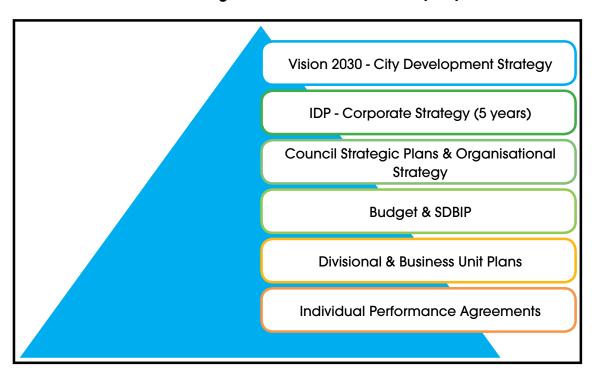

7.4 LINKING OF OUTPUTS IN PERFORMANCE AGREEMENTS WITH ACTIVITIES IN THE OPERATIONAL PLANS AND INDICATORS

The work plans referred to above form the basis of the quarterly performance assessments that are conducted. Assessments that take place during the first and third quarter are conducted on an informal basis between the supervisor and the incumbent, and are more informal, as opposed to the mid-year and annual assessments, which are formal in nature and documented accordingly. As mentioned above, the work plan is the document that links to the operational plans and indicators.

7.5 LINKING THE OPMS (DEPARTMENTAL AND INDIVIDUAL INDICATORS) WITH THE GOALS, OBJECTIVES, AND MUNICIPAL BUDGET

The diagram below is indicative of the linkages between the PMS and the overall strategic planning process of the Municipality, starting with the vision and translated down to the level of individual performance agreements:

FIGURE 22: Performance Management in the Msunduzi Municipality

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

7.6 THE SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN (SDBIP)

7.6.1 INTRODUCTION

The SDBIP is a key management, implementation, and monitoring tool, which provides operational content to the end-of-year service delivery targets set in the budget and IDP. It determines the Performance agreements for the municipal manager and all top managers, whose performance can then be monitored through section 71 monthly reports, and evaluated through the annual report process. The biggest challenge is to develop meaningful non-financial service delivery targets and indicators, in addition to the budget indicators. However, this will remain a work in progress for the Municipality.

The development of the Service Delivery and Budget Implementation Plans (SDBIPs) is a requirement under the Municipal Finance Management Act (MFMA) and gives effect to the Municipality's Integrated Development Plan (IDP) and annual budget.

The SDBIP is an expression of the objectives of the Municipality, in quantifiable outcomes, that will be implemented by the administration for the municipal financial year. The SDBIP includes the service delivery targets and performance indicators for each quarter that should be linked to the performance agreements of senior management.

These are integral to the implementation and entrenchment of our performance management system. The SDBIP facilitates accountability and transparency of municipal administration and managers to the Council, and of Councillors to the community. It also fosters the management, implementation, and monitoring of the budget, the performance of top management, and the achievement of the strategic objectives as laid out in the IDP.

The SDBIP enables the Municipal Manager to monitor the performance of senior managers, the mayor to monitor the performance of the municipal manager, and for the community to monitor the performance of the Municipality, as each activity contains outputs, outcomes, and timeframes. The SDBIP is compiled on an annual basis, and is linked to the 5 year and 1 year organizational scorecards that are contained in the approved SDBIP. The SDBIP is yet another step forward to increasing the principle of democratic and accountable government at local level.

Development objectives are measured through key performance indicators at every level, and continuously monitored throughout the year. The SDBIP is in essence the management and implementation tool which sets in-year information such as quarterly service delivery and monthly budget targets, and links each service delivery output to the budget of the Municipality. It further indicates the responsibilities and outputs for each of the senior managers and the top management team, the resources to be used, and the deadlines set for the relevant activities.

7.6.2 REPORTING ON THE SDBIP

Various reporting requirements are outlined in the MFMA, and both the mayor and the accounting officer have clear roles to play in preparing and presenting these reports. The SDBIP provides an excellent basis for generating the reports which the MFMA requires. The report then allows the Council to monitor the implementation of service delivery programs and initiatives across the Municipality.

(i) MONTHLY REPORTING

Section 71 of the MFMA stipulates that reporting on actual revenue targets and spending against the budget should occur on a monthly basis. This reporting must be conducted by the accounting officer of a Municipality, no later than 10 working days after the end of each month.

Reporting must include the following:

- (i) Actual revenue, per source;
- (ii) Actual borrowings;
- (iii) Actual expenditure, per vote;
- (iv) Actual capital expenditure, per vote;
- (iv) The amount of any allocations received.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

If necessary, explanation of the following must be included in the monthly reports:

- (a) Any material variances from the Municipality's projected revenue by source, and from the Municipality's expenditure projections per vote
- (b) Any material variances from the service delivery and budget implementation plan and;
- (c) Any remedial or corrective steps taken or to be taken to ensure that the projected revenue and expenditure remain within the municipality's approved budget

(ii) QUARTERLY REPORTING

Section 52 (d) of the MFMA compels the Mayor to submit a report to the Council on the implementation of the budget and the financial state of affairs of the Municipality, within 30 days of the end of each quarter. The quarterly performance projections captured in the SDBIP form the basis for the Mayor's quarterly report.

(iii) MID-YEAR REPORTING

Section 72 (1) (a) of the MFMA outlines the requirements for mid-year reporting. The Accounting Officer is required, by the 25th January of each year, to assess the performance of the Municipality during the first half of the year, taking into account:

- (i) The monthly statements referred to in section 71 of the first half of the year
- (ii) The municipality's service delivery performance during the first half of the financial year, and the service delivery targets and performance indicators set in the service delivery and budget implementation plan;
- (iii) The past year's annual report, and progress on resolving problems identified in the annual report; and,
- (iv) The performance of every municipal entity under the sole or shared control of the Municipality, taking into account reports in terms of section 88 from any such entities.

Based on the outcomes of the mid-year budget and performance assessment report, an adjusted budget may be tabled if actual revenue or expenditure amounts are materially different from the projections contained in the budget or the SDBIP.

The SDBIP is also a living document, and may be modified based on the mid-year performance review. Thus the SDBIP remains a kind of contract that holds the Msunduzi Local Municipality accountable to the community.

All the municipal Business units have revised scorecards for this financial year and the information below relates to Corporate Business unit being used as an example. Ps these could not be included here to volume of spreadsheets.

The Municipality is currently in the process of drafting the Service Delivery and Budget Implementation Plan (SDBIP) 2016/2017 which will be presented to the mayor 14 days after the approval of the IDP and the budget by council.

and adaptation strategies		
Comprehensive	Approved by Council	Legislative Requirement. To be updated every 5 years i.e. in
Integrated Transport Plan (CITP) (2012)		2017. It incoporates / consolidates a range of smaller plans
Major Roads Plan	No proof it was approved by Council	Needs update
Transportation Plan	No proof it was approved by Council	Needs update
Road Safety Plan (2007)	No proof it was approved by Council	Needs update
Non-Motorized Network	Not approved by Council	Under review , being integrated with IRTPLAN
Plan 2009		
Roads Asset Management Not Approved Plan (RAMP) (2006)	Not Approved	Under review completion 2014/15
Integrated Rapid Public Transport Network (IRPTN) Plan	Approved by Council	Network under design for implementation
Public Transport Network Plan (2002)	No proof it was approved by Council	Superseded by IRPTN
Building Asset Management Plan (2006)	Not Approved	Budgeted for next financial year. 14/15

It must be noted that Sector Plans are the strategic tools of each Municipal Department, and as such, they should play a pivotal role in determining the strategic allocation of resources, as they are based on empirical research. As can be seen from the table, many of the Sector Plans are very dated and require review. In future reviews of the Msunduzi IDP, this section will incorporate tables from each Municipal Department that indicate projects that emanate from the Sector Plans.

8.2 AUDITOR GENERAL'S COMMENTS AND MANAGEMENT'S RESPONSE

Report of the auditor-general to the KwaZulu-Natal Provincial Legislature and council on the Msunduzi Municipality

Report on the consolidated and separate financial statements

Introduction

1. I audited the consolidated and separate financial statements of the Msunduzi Municipality set out on pages 187 to 299, which comprise the consolidated and separate statement of financial position as at 30 June 2016, the consolidated and separate statement of financial performance, consolidated and separate statement of changes in net assets, consolidated and separate cash flow statement and the consolidated and separate statement of comparison of budget with actual information for the year then ended, as well as the notes, comprising a summary of significant accounting policies and other explanatory information.

Accounting officer's responsibility for the consolidated and separate financial statements

2. The accounting officer is responsible for the preparation and fair presentation of these consolidated and separate financial statements in accordance with the South African Standards of Generally Recognised Accounting Practice (SA Standards of GRAP) and the requirements of the Local Government: Municipal Finance Management Act of South Africa, 2003 (Act No. 56 of 2003) (MFMA) and the Division of Revenue Act of South Africa, 2015 (Act No. 1 of 2015) (DoRA), and for such internal control as the accounting officer determines is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

Auditor-general's responsibility

- 3. My responsibility is to express an opinion on these consolidated and separate financial statements based on my audit. I conducted my audit in accordance with the International Standards on Auditing. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated and separate financial statements are free from material misstatement.
- 4. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated and separate financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the municipality's and entity's preparation and fair presentation of the consolidated and separate financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the municipality's and entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated and separate financial statements.
- 5. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my qualified audit opinion.

Basis for qualified opinion

Receivables

6. I was unable to obtain sufficient appropriate audit evidence that receivables from non-exchange transactions in respect of a prepayment of R93,66 million had been properly accounted for, due to the status of the accounting records of the municipality. I was unable to confirm that the prepayment was correctly accounted for by alternative means. Consequently, I was unable to determine whether any adjustment to receivables stated at R370,23 million and the related debt impairment provision of R244,50 million in the consolidated financial statements was necessary.

Payables from exchange transactions

7. The municipality did not recognise all payables from exchange transactions meeting the definition of a financial liability, in accordance with GRAP 104 Financial instruments. This was as a result of the municipality not maintaining adequate records of outstanding payments for goods and services received but not yet paid at year-end. I was therefore unable to determine the full extent of the understatement of payables from exchange transactions and the related expenditure as disclosed in note 16 of the consolidated financial statements as it was impracticable to do so.

Revenue - Fines

8. I was unable to obtain sufficient appropriate audit evidence for revenue from camera fines as disclosed in note 37 to the consolidated financial statements due to the status of the accounting records. The municipality did not have adequate systems of internal control in place for the recording of revenue from camera fines. I could not confirm revenue from camera fines by alternative means. Consequently, I was unable to determine whether any adjustment to revenue from camera fines stated at R34,50 million and the related traffic fine receivable of R30,36 million in the consolidated financial statements was necessary.

Commitments

9. The municipality did not disclose all contractual commitments, as required by GRAP 1 Presentation of financial statements. Contractual commitments should be disclosed when the municipality has committed itself to future transactions which will result in the outflow of cash. Consequently, commitments of R92,48 million as disclosed in note 63 to the consolidated financial statements was understated.

Contingent liabilities

10. The municipality incorrectly disclosed contingent liabilities which did not satisfy the requirements of GRAP 19 Provisions, contingent liabilities and contingent assets, due to breakdowns in processes and controls. Consequently, I was unable to determine the overstatement of the contingent liabilities amounting to R115,54 million as disclosed in note 64 to the consolidated financial statements, as it was impractical to do so.

Aggregation of immaterial uncorrected misstatements

11. The consolidated financial statements of the municipality were materially misstated due to the cumulative effect of numerous individually immaterial uncorrected misstatements in revenue, receivables and investment property included in the consolidated statement of financial position, statement of financial performance and the notes to the consolidated financial statements.

Qualified opinion

12. In my opinion, except for the possible effects of the matters described in the basis for qualified opinion paragraphs, the consolidated and separate financial statements present fairly, in all material respects, the financial position of the Msunduzi Municipality as at 30 June 2016 and its financial performance and cash flows for the year then ended, in accordance with the SA Standards of GRAP and the requirements of the MFMA and DoRA.

Emphasis of matters

13. I draw attention to the matters below.

Restatement of corresponding figures

14. As disclosed in note 67 to the consolidated financial statements, the corresponding figures for 30 June 2015 have been restated as a result of errors discovered during 2016 in the consolidated financial statements of the Msunduzi Municipality at, and for the year ended, 30 June 2016.

Material losses and impairments

- 15. As disclosed in note 73 to the consolidated financial statements, material electricity losses of R181,96 million (208 million kilowatts) (2015: R179,28 million 234 million kilowatts) were incurred by the municipality as a result of electricity losses due to illegal connections.
- 16. As disclosed in note 73 to the consolidated financial statements, material water losses of R 119,72 million (21 million kilolitres) (2015: R 117,86 million 23 million kilolitres) were incurred by the municipality due to the ageing pipeline infrastructure.
- 17. As disclosed in note 4 to the consolidated financial statements, material allowances for impairment amounting to R244,50 million (2015: R247,79 million) were incurred by the municipality as a result of an allowance for impairment of receivables from non-exchange transactions.
- 18. As disclosed in note 5 to the consolidated financial statements, material allowances for impairment amounting to R718,93 million (2015: R725,49 million) were incurred by the municipality as a result of an allowance for impairment of receivables from exchange transactions.

Material underspending of the conditional grants

19. As disclosed in note 36 to the consolidated financial statements, the municipality underspent on the public transportation infrastructure grant and the integrated national electrification grant by R37,90 million and R25,34 million, respectively due to the delays in the implementation of the projects associated with these grants.

Additional matters

20. I draw attention to the matters below.

Unaudited supplementary schedules

21. The supplementary information set out on pages XX to XX does not form part of the consolidated financial statements and is presented as additional information. I have not audited these schedules and, accordingly, I do not express an opinion thereon.

Unaudited disclosure notes

22. In terms of section 125(2)(e) of the MFMA the municipality and the entity are required to disclose particulars of non-compliance with the MFMA. This disclosure requirement did not form part of the audit of the consolidated financial statements and accordingly I do not express an opinion thereon.

Report on other legal and regulatory requirements

23. In accordance with the Public Audit Act of South Africa, 2004 (Act No. 25 of 2004) (PAA) and the general notice issued in terms thereof, I have a responsibility to report findings on the reported performance information against predetermined objectives for selected objectives presented in the annual performance report, compliance with legislation and internal control. The objective of my tests was to identify reportable findings as described under each subheading but not to gather evidence to express assurance on these matters. Accordingly, I do not express an opinion or conclusion on these matters.

Predetermined objectives

- 24. I performed procedures to obtain evidence about the usefulness and reliability of the reported performance information for the basic service delivery and public safety objectives presented in the annual performance report of the municipality and the municipal entity, respectively for the year ended 30 June 2016.
- 25. I evaluated the reported performance information against the overall criteria of usefulness and reliability.
- 26. I evaluated the usefulness of the reported performance information to determine whether it was consistent with the planned objectives. I further performed tests to determine whether indicators and targets were well defined, verifiable, specific, measurable, time bound and relevant, as required by the National Treasury's Framework for managing programme performance information.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

- 27. I assessed the reliability of the reported performance information to determine whether it was valid, accurate and complete.
- 28. I did not identify any material findings on the usefulness and reliability of the reported performance information for the basic service delivery and public safety objectives.

Additional matter

29. I identified no material findings on the usefulness and reliability of the reported performance information for the selected objectives; however, I draw attention to the following matter:

Achievement of planned targets

30. The annual performance report on pages x to x and x to x includes information on the achievement of the planned targets for the year.

Compliance with legislation

31. I performed procedures to obtain evidence that the municipality and municipal entity complied with applicable legislation regarding financial matters, financial management and other related matters. My material findings on compliance with specific matters in key legislation, as set out in the general notice issued in terms of the PAA are related to the municipality and are as follows.

Annual financial statements

32. The consolidated financial statements submitted for auditing were not prepared in all material respects in accordance with the requirements of section 122 of the MFMA. Material misstatements identified by the auditors in the submitted consolidated financial statements were not adequately corrected and/or the supporting records could not be provided subsequently, which resulted in the financial statements of the municipality receiving a qualified audit opinion.

Procurement and contract management

- 33. Goods and services of a transaction value above R200 000 were procured without inviting competitive bids, in contravention of supply chain management (SCM) regulation 19(a). Deviations were approved by the accounting officer even though it was not impractical to invite competitive bids, in contravention of SCM regulation 36(1).
- 34. Invitations for competitive bidding were not always advertised for a required minimum period of days, as required by SCM regulation 22(1) and 22(2).
- 35. Persons in the service of the municipality who had a private or business interest in contracts awarded by the municipality failed to disclose such interest, as required by SCM regulation 46(2) (e); the code of conduct for councillors, as well as the code of conduct for staff members issued in terms of the Municipal Systems Act of South Africa, 2000 (Act No. 32 of 2000) (MSA).
- 36. Awards were made to providers who were in the service of the municipality and whose directors are in the service of the municipality, in contravention of section 112(j) of the MFMA and SCM regulation 44. Furthermore, the provider failed to declare that they were in the service of the municipality, as required by SCM regulation 13(c).
- 37. Awards were made to providers who were in the service of other state institutions or whose directors were in the service of other state institutions, in contravention of section 112(j) of the MFMA and SCM regulation 44. Similar awards were identified in the previous year and no effective steps were taken to prevent or combat the abuse of the SCM process, as required by SCM regulation 38(1).
- 38. Persons in service of the municipality whose close family members had a private or business interest in contracts awarded by the municipality failed to disclose such interest, in contravention of SCM regulation 46(2) (e) and the code of conduct for staff members issued in terms of the MSA.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Expenditure management

- Money owed by the municipality was not always paid within 30 days, as required by section 65(2) (e) of the MFMA.
- 40. An adequate management, accounting and information system was not in place which recognised expenditure when it was incurred, and which also accounted for creditors and payments made, as required by section 65(2)(b) of the MFMA.
- 41. Reasonable steps were not taken to prevent irregular expenditure, as required by section 62(1) (d) of the MFMA.

Revenue management

42. An adequate management, accounting and information system which accounts for revenue and debtors was not in place, as required by section 64(2) (e) of the MFMA.

Liability management

43. An adequate management, accounting and information system which accounts for liabilities was not in place, as required by section 63(2) (a) of the MFMA.

Internal control

44. I considered internal control relevant to my audit of the consolidated financial statements, the annual performance report and compliance with legislation. The matters reported below are limited to the significant internal control deficiencies that resulted in the basis for the qualified opinion and the findings on compliance with legislation included in this report.

Leadership

45. Oversight over key internal controls was not adequate to ensure that the municipality's control environment prevented significant deficiencies related to financial and compliance reporting. The leadership did not act swiftly in ensuring that commitments in the action plans were monitored on a regular basis and key vacancies in key positions were not filled in good time to promote a sound control environment.

Financial management

46. Daily and monthly processes coupled with adequate records management were not adequate to ensure quality financial and compliance reporting. Management did not decisively respond to breakdowns in key control activities due to a lack of understanding of applicable financial and compliance reporting requirements.

Governance

47. The leadership and management did not create a sound and sustainable control environment by institutionalising an adequate and appropriate risk management strategy and mitigation plan. Consequently basic internal controls were not implemented to prevent, detect and respond to risks that support reliable reporting.

Other reports

48. I draw attention to the following engagements that could potentially impact on the municipality and its municipal entity's financial, performance and compliance related matters. My opinion is not modified in respect of these engagements that are either in progress or have been completed.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Investigations

- 49. Internal audit performed numerous investigations at the request of the accounting officer. The investigations related to allegations of fraud, corruption, theft, mismanagement, and SCM irregularities. Twenty-two investigations were concluded during the 2015-16 financial year. Two investigations resulted in the institution of criminal charges.
- 50. The provincial department of Cooperative Governance and Traditional Affairs requested that an investigation be conducted after a senior staff member was suspended. The investigation commenced in May 2016 and covered the period 2012 to April 2016. The investigation was initiated based on an allegation of maladministration and is still in progress.
- 51. A forensic investigation was conducted on behalf of the municipality into alleged irregularities pertaining to supply chain management processes covering the period 1 January 2012 to 10 June 2016. The municipality is currently reviewing the recommendations of the report.

Pietermaritzburg 21 December 2016

Auditing to build public confidence

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

THE MSUNDUZI MUNICIPALITY
REPORT BY MUNICIPAL MANAGER FOR COUNCIL
25 JANUARY 2017

RESPONSE TO THE REPORT OF THE AUDITOR-GENERAL ON CONSOLIDATED FINANCIAL STATEMENTS OF THE MSUNDUZI MUNICIPALITY FOR THE YEAR ENDED 30 JUNE 2016

BACKGROUND AND PURPOSE OF THE REPORT

The report of the Auditor-General dated 30 November 2016 on the Audit of the Accounts of the Council for the financial year ended 30 June 2016, has been received and is on the Council agenda.

In terms of Section 21 (1) and (2) of the Public Audit Act, 2004 (Act No. 25 of 2004):

- (1) The Auditor-General must submit an audit report in accordance with any legislation applicable to the auditee which is the subject of the audit.
- (2) If there is no such legislation as contemplated in subsection (1) the Auditor-General must submit the audit report to the relevant legislature within the reasonable time.

The Accounting Officer must ensure that the requirements of Section 126 (1) and (2) of the Municipal Finance Management Act, (Act 65 of 2003) are complied with.

Section 121 prescribes that the Annual Report of a municipality must include among others the Auditor-General's Audit Report in terms of Section 126 (3) on the financial statements and particulars of any corrective action taken or to be taken in response to issues raised in the audit reports referred to in paragraph (b) and (c) of Section 121.

Comments and action on matters raised in the report are set out below with the numbering corresponding to the report of Auditor-General.

GENERAL RESPONSE

The Auditor-General has expressed a qualified opinion with the following basis:

1. Receivables

The office of the Auditor General was unable to obtain sufficient appropriate audit evidence non-exchange transactions in respect of a prepayment of R93.66 million had been properly accounted for, due to the status of the accounting records of the municipality. They were unable to confirm that the prepayment was correctly accounted for by alternate means. Consequently, They were also unable to determine whether any adjustment to receivables stated at R370,23 million and the related debt impairment provision of R244,50 million in the consolidated financial statements was necessary.

Management Response

It must be noted that, the matter between IDT and Msunduzi is currently under litigation.

The amount of R93m is made up of payments that were made to IDT in line with the signed agreement. In terms of paragraph 4.5 of the signed agreement, all monies paid by the municipality should be kept by IDT into a dedicated bank account and interest accrued will be for the credit of the municipality and will be refunded to the municipality on the closure of the expire of the agreement. Therefore, based on the above and our consideration for impairment and recoverability, the municipality is of the view that the amount is recoverable as IDT is another organ of state and the municipality has adequate supporting documentation to prove liability.

2. Payables from exchange transactions

The municipality did not recognise all payables from exchange transactions meeting the definition of a financial liability, in accordance with GRAP 104 Financial instruments. This was as a result of the municipality not maintaining adequate records of outstanding payments for goods and services received but not yet paid at year-end. I was therefore unable to determine the full extent of the understatement of payables from exchange transactions and the related expenditure as disclosed in note 16 of the consolidated financial statements as it was impracticable to do so.

Management Response

The municipality will ensure that adequate cut-off procedures on invoices and payments are implemented to ensure that expenditure and accruals are accounted for in the correct period. Creditors statements will be scrutinised and reconciling items will also be adequately followed up to ensure that accruals are recorded in the correct period. The creditors' reconciliations are currently being performed and reviews are conducted by creditors' section to ensure these are done properly and reviewed.

Control measures will be put in place to ensure that Business units submit all accrual information within the cut off times for submission of such information will be set and communicated.

3. Revenue - Fines

The office of the Auditor General was unable to obtain sufficient appropriate audit evidence for revenue from camera fines as disclosed in note 37 to the consolidated financial statements due to the status of the accounting records. The municipality did not have adequate systems of internal control in place for the recording of revenue from camera fines. They could not confirm revenue from camera fines by alternative means. Consequently, They were unable to determine whether any adjustment to revenue from camera fines stated at R34,50 million and the related traffic fine receivable of R30,36 million in the consolidated financial statements was necessary.

Management Response

Msunduzi Municipality was granted a delegation by Director Public Prosecutions (DPP) on 11 July 2012 to perform the function, on the 27 November 2015 the same was withdrawn, the reasons for withdrawal was that the DPP felt that Msunduzi was using the exercise as revenue generating instead of law enforcement.

The purpose of a speed prosecution by camera is to deter speeding and when speed has been deterred the camera is removed and located in a different area.

4. Commitments

The municipality did not disclose all contractual commitments, as required by GRAP 1 Presentation of financial statements. Contractual commitments should be disclosed when the municipality has committed itself to future transactions which will result in the outflow of cash. Consequently, commitments of R92,48 million as disclosed in note 63 to the consolidated financial statements was understated.

Management Response

Commitments were decentralised for the purposes of ownership by each business unit hence the understatement by other business units did not take full responsibility, however, management have taken a decision to centralise all commitments to avoid reoccurrence of the same.

5. Contingent liabilities

The municipality incorrectly disclosed contingent liabilities which did not satisfy the requirements of GRAP 19 Provisions, contingent liabilities and contingent assets, due to breakdowns in processes and controls. Consequently, they were unable to determine the overstatement of the contingent liabilities amounting to R115,54 million as disclosed in note 64 to the consolidated financial statements, as it was impractical to do so.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Management Response

In order to avoid reoccurrence of the same management have decided to create a register of all contingent liabilities which will be maintained by legal department and will be updated on a regular basis. Further to that training in the interpretation and application of GRAP 19 will be provided to relevant legal personnel.

6. Aggregation of immaterial uncorrected misstatements

The consolidated financial statements of the municipality were materially misstated due to the cumulative effect of numerous individually immaterial uncorrected misstatements in revenue, receivables and investment property included in the consolidated statement of financial position, statement of financial performance and the notes to the consolidated financial statements.

Management Response

Going forward all misstatements identified by the Auditor-General will be corrected to ensure that Annual Financial Statements are fairly presented.

EMPHASIS OF MATTERS AND OTHER MATTERS:

The following matters were raised by the Auditor-General and the numbering used below is in line with the audit report.

14. Restatement of corresponding figures

Action plan addressing the shortcomings identified in the implementation of Generally Recognized Accounting Practice has been developed and will be monitored and tested during the preparation of the interim financial statements

15. Material losses/Impairments

The material losses are noted and will be part of the action plan developed by infrastructure to address water and electricity losses.

Electricity Losses

The acceptable norm of electricity loss is 3%. The loss above the norm is due to theft, distribution losses, illegal tampering of electricity meters and can also be attributable to the ageing infrastructure.

16. Water losses

The acceptable norm of water loss in the developing countries is 20%. The loss above the norm is due to theft, distribution losses, illegal tampering of water meters and can also be attributable to ageing infrastructure.

17. Impairments

Noted from 17 to 18

19. Material under spending of conditional grants

Noted, Action plan addressing material under spending of budget has been developed, currently being implemented.

20. Additional matters

Noted

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

21. Unaudited supplementary schedules

Noted

22. Unaudited disclosure notes

Noted

23. Report on other legal and regulatory requirements

Noted

24. Predetermined objectives

Noted from 24 to 28

29. Additional matter

Noted

30. Achievement of planned targets

Noted

31. Compliance with laws and regulations

Noted

32. Annual financial statements

Noted

33. Procurement and contract management

Noted from 33 to 38

39. Expenditure management

Noted from 39 to 41

42. Revenue management

Noted

43. Liability management

Noted

44. Internal control

Noted

45. Leadership

Noted

46. Financial management

Noted

47. Governance

Noted

48. Other Reports

Noted

49. Investigations

Noted from 49 to 51

CONCLUSION:

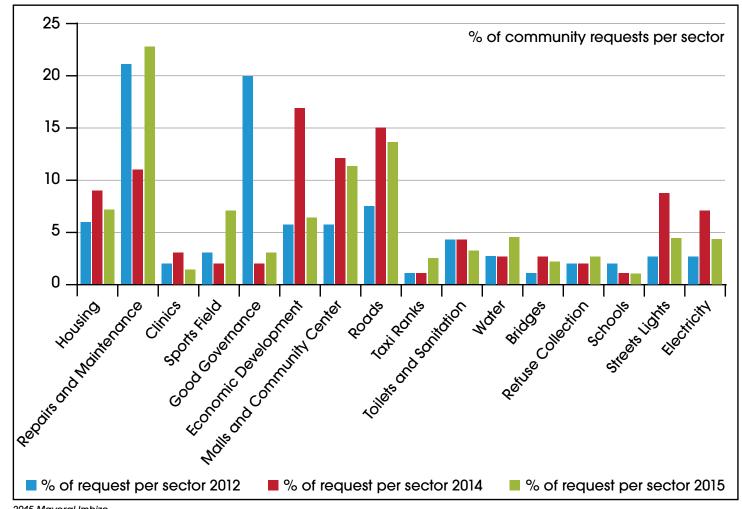

Whilst the municipality has worked tirelessly on the above matters, the improvement is not what was envisaged when the previous action plan was developed, implemented and monitored on monthly basis.

A weekly task team and monthly transformation committee will be revived to address all issues, root causes and deficiencies on the system of internal control.

8.3 AND PUBLIC SECTOR PARTICIPATION AND

The community needs are analyzed and grouped into the different sectors. The community needs were than analyzed for the last three financial years to identify the trend. As can be seen below the demand for housing has increased for the past three financial years and the demand for water and sanitation, infrastructure and sports field have also increased during 2015. The community seems to be satisfied with the delivery of street lights, electricity and repairs and maintenance on infrastructure.

2015 Mayoral Imbizo

The IDP representative's forums have been held on the 18th of September 2015 and the 18th of February 2016. The IDP representatives forum are scheduled to take place four times a year and provide a platform to align and also present community needs to the sector departments. The IDP roadshows were held during the first and second week of December 2015 in the five municipal zones. The municipality also formed part of the district alignment sessions and also attended the COGTA IDP stakeholder's workshop. The municipality also host monthly ward operation sukuma sakhe meetings for each of the wards.

Notes of the meeting of presenting mapping findings by cadres involved in Community Based Planning Project

Date: 18 February 2014

Venue: Imperial Hotel, Pietermaritzburg

Time: 10h00 to 12h00

Agenda for the meeting

Program Director: Mbhe Mdlalose (Built Environment Support Group -BESG)

1. Opening and Welcome: Mbhe Mdlalose 2. Purpose of the Meeting: Mbhe Mdlalose

- 3. Background to the Community Based Planning Project: Mnini Ntombela
- 4. Presentation of findings:
 - Msunduzi Municipality
 - uMngeni Municipality
 - Mkhambathini Municipality
 - Richmond Municipality
 - uMshwathi Municipality
 - Impendle Municipality
 - Mpofana Municipality
- 5. Questions
- 6. Discussions
- 7. Closure

1. The purpose of the meeting

The meeting was a platform for 30 trained cadres to report back on their mapping exercise conducted in seven local municipalities under Umgungundlovu District. The project is facilitated by BESG under their Deepening Democracy Project which started in 2008. This project was designed into 3 Phases over a period of 5 years.

Phase 1:

- Leadership training for community based organisations (CBOs).
- Conflict Management
- Citizenship
- Self-reliance

Phase 2:

- Training CBOs to understand local government structures and functions
- Engagement process with IDP Managers
- Establishment of clusters of CBOs
- Municipal action research

Phase 3:

- Strengthening clusters' voices
- Opening spaces for engagements
- Change management process

This meeting is one of the initiatives facilitated by BESG to open spaces for engagements between civil society and government's IDP Managers. IDP Managers are targeted because they are responsible for spaces that enable citizens to participate in planning and budgeting processes.

BESG process is in line with the government's commitment to work together with the citizens. It is in line with the "walk together scenario" which empowers citizens to take charge of their lives instead of the "walk behind" or the "walk apart" scenarios where citizens are beneficiaries or are angry and protesting against the government.

2. Background to the project.

The project equipped 30 cadres in total. Cadre training was funded by the Foundation for Human Rights and Hivos, with each funding 15 cadres for a period of 10 months and 12 months respectively. This funding came at an opportune time when there was a need to strengthen the voices of civil society. Cadres were chosen from CBO clusters in seven municipalities under Umgungundlovu District.

Community based planning is a process of producing plans that can be designed, implemented, managed and maintained by local communities. This process empowers local communities to voice their opinions and strengthen skills and confidence to participate in development interventions. Community based planning seeks to include vulnerable and excluded groups within the community and develop leaders to ensure inclusive involvement in the planning of initiatives. Communities need to identify their own problems and should take lead in reviewing, reflecting and organising events to share lessons and discuss options. Most importantly, communities should have a sense of ownership of these initiatives to ensure that they are sustainable and long lasting.

Community-initiated plans empower the citizen-resident and sets up possibilities for "co-producing" collaborative approaches to development projects. Community based maps are hence a negotiation tool for communities to demonstrate the existing assets and opportunities to their local governments. By partnering with local governments, community plans can inform some of the IDP projects.

The content of the training was based on the Constitutional Rights of South African citizens. Mobilisations of other citizens to participate in the process were through "Know Your Rights" campaign. The process involved information sharing with community members, mapping of development needs and facilitating constructive ways of improving their wards.

Methodology

Focus Groups

- Groups were comprised of community members from the different CBO clusters and were grouped by sector.
- Discussions were based on a pamphlet titled "Know Your Rights"
- Groups went through the pamphlet first as a tool to facilitate discussion.
- People shared their understanding on human rights and reflected on their own experiences.
- Groups used charts to draw their ward assets and identify gaps.

Door to door

Cadres used a 'door to door' methodology to create human rights awareness in their communities. They also allowed people to tell their stories in the process.

Capturing Evidence

Cadres captured key development issues to back up their findings. In some settings they recorded videos to capture people's stories.

INTEGRATED DEVELOPMENT PLAN FOR 2017/2022 FINANCIAL YEARS

Some common threads of the cadres' presentations

- There is a great need for municipalities and other government structures to plan with communities (for example, to discuss the times for the delivery of water where they are still using water trucks)
- Who is involved in the prioritisation of community needs to compare the needs of different wards/communities
- Challenges of communities located on private land where the government struggles to provide basic services what is the solution to this?
- Communication problem between communities and government structures including councillors this is more about lack of report back on the progress or lack of progress in projects promised to communities
- What is the strategy of the government to address people's perceptions and understanding about their development needs and who should do what? Who should maintain community facilities? How deep is government's pocket in satisfying community needs?
- Is the methodology used by IDP processes effective enough to gather real needs of the communities?
- There is lack of meaningful public participation
- There are challenges with housing allocation processes
- There is a need for the District to intervene on LED challenges in smaller local municipalities such as Mpofana
- Health hazards are a serious threat if there is irregular water supply the infrastructure is in place which is appreciated by communities.

Input by IDP, Area Based, Public Participation and Operation Sukuma Sakhe Managers present.

Officials applauded the work done by the cadres. They applauded the methodology used by cadres.

- Mr Ngcongo and Ms Gwala: Emphasised the importance of participation in ward meetings and in war rooms.
- 2. Mr Roopan: Indicated that the issues identified by cadres are similar to what community based planning in Msunduzi have come up with.
- 3. Mr Fakude: Indicated that such engagements raised expectations and recommended that as a next step: BESG should compile a report, which includes maps for submission to UMDM and LMs. The issues will be included in IDP, some projects have already started, i.e. UMDM's core mandate is sanitation and water in other LMs except in Msunduzi. He also advised that councillors should be involved in this process.
- 4. ALL officials highlighted development that the municipalities are undertaking to address some of the challenges listed by cadres

WARD	GAPS	SERVICES IN PLACE	NEED TO IMPROVE
3		War room sits	Parts of the ward: roads still need to be tar
8			
11	No sanitation No tax shelters	Water Electricity - War room are functioning	Regular waste collecting is needed
12		War room sits	
20	No permanent clinic Jobs War room does not sit		Mobile clinic to come often Children travel long distance to school
30 (Ezinketheni)	No permanent clinic Part of the ward is still waiting for electricity	Taxi shelters	Mobile clinic need to come often and to have proper shelter. Children travel long distances to school Road is still a gravel
37 (Mkondeni)	No permanent clinic War room does not sit		Mobile clinic to come more often Children travel long distance to school Road is still a gravel

8.4 SPATIAL DEVELOPMENT FRAMEWORK

See Part 2 of the Document for a full copy of the SDF.

8.5 DISASTER MANAGEMENT PROGRAMME (PLAN)

A provisional programme is in place to mitigate threats and acts of disaster as they occur. The Municipality, in the past, has reacted and responded accordingly and effectively to disaster and threats. The Municipality has identified flash points, and analysis has been conducted to prepare a comprehensive disaster management plan.

8.5.1 DISASTER MANAGEMENT PROGRAM OF THE MSUNDUZI MUNICIPALITY

Disaster Management Legislation (Disaster Management Act {Act 57 of 2002}) requires that a hazard/risk analysis for the area under consideration must be undertaken. Section 26g of the Municipal Systems Act states that Disaster Management Plans must be part of the Integrated Development Plan. The term "Disaster Management Plan" refers to those remedial plans aimed at preventing or mitigating an identified risk.

The schedule of natural and manmade hazards (and attendant problems) below is by no means an exhaustive list of occurrences/hazards/threats, but rather an overview of things that have happened, or have the potential to happen, because these events occur frequently within the Msunduzi Municipality.

TABLE 99: Natural Hazards

NATURAL HAZARD	<u> </u>	
VULNERABILITY	<u> </u>	CONSEQUENCE
Flooding and	Jika Joe Informal Settlement	Loss Of Life/Property Damage/Personal Assets
